used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent),

\$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings, etc., with their weight, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Price Control in Canada*.

Wholesale Prices, January, 1946

The general commodity wholesale price index rose 0.6 points to 103.9 between December, 1945 and January, 1946. Strength was concentrated mainly in the wood, wood products and paper group where increases in certain export prices advanced the index 4.7 points to 122.3. Notable among these increases were newsprint, spruce lumber and cedar shingles. Vegetable products rose 0.1 to 97.1 in the same interval, reflecting higher prices for potatoes, onions and rye which outweighed weakness in oranges, lemons and hay. Animal products, the only other group to record a change, dropped 0.6 to 108.3 in January, due to continued seasonal weakness in eggs. Live stock and fowl prices were moderately higher. Other groups remained unchanged; fibres, textiles and textile products at 91.8, iron and steel products 115.2, non-ferrous metals 81.6, non-metallic minerals 101.7 and chemicals and allied products 98.8.

The Canadian farm product wholesale price index averaged 0.2 points higher at 106.5 in January, supported by higher quotations in the field products section. Upturns in grains, potatoes and onions outweighed declines in hay and raw leaf tobacco to advance this index 0.5 to 95.4. Animal products declined 0.4 to 125.0 due to weakness in eggs overbalancing strength in live stock and poultry.

Joint National Conference of the Construction Industry

February 18-19-20, 1946, at Chateau Laurier, Ottawa

REPRESENTATIVES of employers and employees in the building and construction industry, attending the *Joint National Conference of the Construction Industry, held in Ottawa on February 18-20, 1946, drafted recommendations designed to further the role of the construction industry in the future development of Canada.

Chief among these was the decision of the conference to train 5,000 apprentices a year. This figure was accepted by the conference as reasonably meeting requirements according to present estimates.

Other recommendations were: the setting of wage rates at levels that will best encourage an adequate supply of workmen; the development of collective agreements in the industry; the paying of proper attention to the provision of rented shelter for low income groups, and also that material and labour are not so exclusively diverted to housing so as to seriously hinder commercial and industrial construction "to the detriment of the national economy", and the abolition of all government controls as soon as possible. A full record of the decisions of the conference is presented further on in this report.

The conference was held under the auspices of the National Joint Conference Board of the construction industry, established at a similar conference held in February, 1941; the purpose of the Board was to carry out the work of the latter conference and act as a medium of consultation in matters affecting the construction industry's participation in the national war effort. The success of the Board's efforts was stressed by various speakers and the decision was reached by the conference to perpetuate the Board's existence in its present form.

Thirty-one employers' representatives and an equal number of employees' representatives were invited by the Board to convene

in Ottawa; others attended by reason of their connection with the organizations involved.

Address of Mr. A. J. Hills, Chairman

Mr. A. J. Hills who as chairman of the National Labour Supply Council had presided at the 1941 conference, welcomed the representatives in an address in which he briefly reviewed the activities of the National Joint Conference Board. He said that the great result of the previous conference was the successful maintenance of industrial peace during the trying period of the second world war when such results were not easy of attainment.

"It was not necessary to stress the vast distinction between prevailing conditions at the time of the last conference and those of to-day," Mr. Hills stated, "but it was necessary to recognize that the principal disturbing factor in 1941, namely the growth of government controls, had been replaced by the necessity of facing the responsibility which a policy of lifting the restrictions and limitations would impose up the industry. The true test the conference faced was the extent to which it would recommend self-imposed laws to govern the industry in the period of relative freedom that lay ahead. Freedom of action brings with it, not unfettered choice, but a corresponding responsibility of using that freedom."

Mr. Hills pointed out as a matter of record that since its inception, the Board had held 33 meetings, which involved 544 attendances by members and alternates. Continuing, he outlined certain of the Board's activities as follows:

The Board formed zone committees, designed to deal with controversies which arose regarding wages and working conditions; these zone committees were in time superseded by government boards. The Board prepared and got approved a formula by which the cost of living bonus could be translated into cents per hour, to suit the peculiar conditions of the construction industry. National Selective Service Officers were kept

*This is the third national joint conference of employers and employees in the construction industry. The first and second took place May 3-6, 1921 (L.G., May, 1921, p. 646) and February 10-12, 1941 (L.G., February, 1941, p. 117) respectfully.

constantly informed of conditions of employment in the industry; the seven days' notice was cancelled for field forces, and special arrangements regarding the hiring of skilled workmen were secured. The Board took an active interest in situations arising out of the scarcity of materials, giving special attention to the availability of vital materials for the housing program, bringing acute situations to the notice of proper authorities, and co-operating in labour supply where priorities for hospitals and housing were in effect.

Mr. Hills stated that he was sure it had been a matter of much satisfaction to the Board that the Honourable Humphrey Mitchell, who had been so intimately associated with the 1941 conference, had continued to take a keen interest in the work of the Board and in the construction industry. "Whenever we had occasion to go to him in connection with anything of interest to the construction industry, we received his unqualified support."

The appointment of Mr. J. L. Kingston to the office of permanent secretary was referred to as enabling the Board to function with greater efficiency.

Mr. Hills referred to a recommendation of the 1941 conference which dealt with the necessity for devising a system by which demobilized soldiers and industrial war-workers, could return to peace-time occupation without disrupting the country's economic and social life. He said he felt that if industry were given a chance it would want to develop and promote work for all, thus avoiding unemployment and depression. Governmental efforts it was hoped would be largely confined to encouraging private enterprise, at least until such time as government spending is deemed to be essential to maintain a proper level of employment opportunities.

*Address of Mr. Percy Bengough, President of
The Trades and Labour Congress*

Mr. Percy Bengough, President of the Trades and Labour Congress of Canada, the first speaker for the employees, complimented the chairman, the Minister of Labour and others who made the holding of the Conference possible.

Expressing the view that the subject of building and of construction work in Canada is the most important one confronting the people to-day, he went on to explain that the construction industry was one of the major occupations requiring the services of the army of people returning to civil employment. "Every city, every town, every hamlet, and all our highways in Canada are in need of repair and development."

Canada, Mr. Bengough stated, is in the fortunate position of being able to follow most commodities going into construction right back to the mill and the mine—unlike some less fortunately situated countries whose construction activity means importation of materials. "In this fashion we secure the maximum amount of employment from construction.

"The present and immediate issue is the housing crisis, which must receive all priority. Then, one has in mind not only the vast volume of work delayed during the war years, but those other works which are required to build this country in the way we would like to see it built. If only a quarter of the money spent for purposes of destruction were allotted in Canada for purposes of construction and the building of this great nation, none of us could visualize what kind of a country we would be living in."

Mr. Bengough concluded by declaring that the future of Canada to a large extent was dependent upon the construction industry and the work it will perform. "That is why I have said that this conference is being held at a most opportune time."

I wish you every success in your deliberations in the belief that the results of these meetings will be of benefit to the people of Canada."

*Mr. Albert Deschamps, President of The
Canadian Construction Association*

Mr. Albert Deschamps, president of the Canadian Construction Association, paid further tribute to the results achieved by the National Joint Conference Board in attuning the potential contribution of the construction industry to the common national war effort, during the emergency period.

"The wise guidance of the Board provided leadership of a high order at a time of greatest stress, and as a consequence the affairs of the industry were conducted in a manner which reflected the greatest degree of credit on all ranks. Ambitions to take personal advantage of a critical situation were submerged to the welfare of the common cause, namely, the speedy and complete defeat of the enemy."

Mr. Deschamps expressed, as the chairman had, deep regret over the illness which prevented Mr. Tom Moore from contributing his "sage counsel" to the Board at a time when it would have been of inestimable value and asked the Conference to mark its appreciation of the part he played in the formation period preceding the establishment of the Board.

Continuing, he paid tribute to the contribution made by Mr. Bengough, since he succeeded to the presidency of the Trades and Labour Congress: to Mr. Piggott, and Mr. Hills in aiding and guiding the Board in its successful operations.

Mr. Deschamps emphasized the necessity of keeping a constant eye on the public interest if the industry was to thrive in the years ahead.

"High taxation has made deep inroads into the savings of the building public, intensifying the demand for efficiency and value on proposed expenditure. Efficiency and value are the joint contribution of management and labour, and although the public holds management alone responsible, it is imperative, while costs remain at their present high levels, that labour do its share by providing economic and skilled production.

"Our industry will remain active only so long as construction remains a profitable undertaking and investment. That statement I address to the representatives of management and labour, for the interests of both are identical. In the future we shall again become almost wholly dependent upon private initiative and consequently upon private capital for our industrial welfare."

He concluded his remarks by referring to the possibility of making or marring that welfare by the wisdom or folly of actions and decisions in the Conference.

"Let us therefore think and plan wisely and realistically for the future. Let us hold to the substance and let us avoid the shadow. If we approach our new problems in that spirit all will be well, and I have no doubt, that the good sense of all ranks in the construction industry will evolve solutions and agreements creditable to themselves and acceptable to all others directly or indirectly affected and concerned."

Address of Mr. Ernest Ingles

Mr. Ingles drew a contrast between the circumstances of to-day and those of five years ago, stressing that the problem then was to develop a smoothly operating machine for war production.

When realization of the terrible implications of the war came, plans had to be made hurriedly. The leaders of both sides in the industry felt that the industry could function with better results through continued co-operation. This he said was not developed without some suspicions but a spirit of co-operation with a practical application had been developed that was second to none in employer-employee labour relations in the Dominion of Canada.

Mr. Ingles said "You can't quarrel when you are all face to face around the same table. It would be foolish to say that there is complete understanding on the part of both of us." Conflicts of opinion were essential to progress. Criticism of each other was necessary; it was hoped this would be constructive.

The speaker then passed on to the workers' concern in the employers' problems stating: "Problems of labour should be a concern to management. Problems of management determine to a considerable extent the ability of workers to continue in employment," but he added "we should be very careful that these concerns do not develop to a point of interference." Mr. Ingles then went on to say that there was still some feeling that "the workers' concern in industry is exclusively one of wages". That was, he said, not the proper way to put it. "The greatest concern of the worker in industry is security." He believed that industry itself was more responsible for the means of security than any other agency; that legislation could be helpful as some forms of assistance to security were only available through the state but stated: "It is exceedingly questionable as to how far in that direction we should go."

Mr. Ingles also stated that the worker was entitled to security both for the immediate future and for his old age, but he felt compelled to say that "high unit wages do not spell security." "A steady income is of greater value to the worker than high unit wages."

Mr. Ingles said he believed everyone would agree that the past five years had developed a situation in which a great deal of initiative, ingenuity and application had been lost adding "we have got to get it back"; he hoped that some plans would be developed which would eventually solve this problem.

Mr. Ingles said some thought should be devoted to the development of machinery that would have for its purpose the securing of industrial peace throughout all industry in Canada. He paid tribute to the co-operation displayed by the employer group and to the Department for help and assistance. He ventured the opinion that the problems of peacetime would have almost as severe an impact on industry as did the problems of wartime. He closed by saying "But we are now developing into a new era: old things are gone; old shibboleths are past. Out of this conference I believe we can go forward to make Canada a happier and better place in which to live."

Address of Mr. H. P. Frid

Mr. H. P. Frid, leader of the employer group, also praised the splendid results achieved by the Board. "The success of the

conference method in smoothing out the many differences and maintaining good relations," he said, "is an example to all industry and reflects the greatest possible credit on construction labour in general and its Board representatives in particular."

Some of the problems which at present hindered the industry in its attempt to function at its best were specified. "Our responsibility at this time is a large share in the task of finding jobs for war veterans and workers from war industries. We are concerned with the fact that before the year is over Canada should have more than five hundred million dollars of new construction completed or under way, in order that the national economy may begin to return to normal. Estimates as to the time normalcy will actually require range from three to six years. Right now the housing situation is serious and must be taken care of but structures for manufacturing and distribution must be built so that war veterans and war workers may have jobs.

Then, there is a growing opinion that costs are too high, and construction labour and management together need to find fair means of affecting reductions. We need increased efficiency on the jobs; increased supply and orderly distribution of materials throughout the country; and restored pride in building craftsmanship."

Mr. Frid stated there was need of grave concern about future shortages of skilled building trade workers and apprentices. Apprenticeship training for the construction industry should now be put on a truly national basis. "You will agree with me that Canada is great enough and rich enough to make room for a great increase in skilled workers, without its resulting in lower wages when construction catches up to the existing demand."

Mr. Frid held that construction management found much to favour a solution of the annual wage problem, holidays with pay, and establishment of pensions for older workers. He pointed out that many Canadian Construction Association members use group insurance for illness, apart from Workmen's Compensation, which takes care of accidents on the job, and suggested that these benefits might be widely extended.

The work of the Industrial Production Co-operation Board was given earnest endorsement and the speaker felt that labour-management committees, which were sponsored by that Board, might be set up to serve construction organizations where fifty or one hundred or more men were employed on jobs.

"I repeat that labour and management of the construction industry have a great respon-

sibility at this time. In the first place we cannot help but affect the nation as a whole. . . . We have our share, and a large one, of this country's immeasurable debt to our armed forces. We cannot pay what we owe to those who died; but in serving their dependents, assisting their comrades who survived to find their place in life and furthering national development, we can render service expected of us. This we are proud to give."

In conclusion Mr. Frid referred to the wage policy adopted at the 1941 conference, gave credit to labour and their leaders for the job they did, and stated that if the post-war task were tackled with the same good faith another enviable record of performance would be achieved.

Address of Mr. A. MacNamara

After a temporary adjournment, Mr. MacNamara, Deputy Minister of Labour, spoke to the delegates and referred to the widespread ramifications of the industry. "In your deliberations you must take hold of this problem in its entirety, give it a good shaking, and get all the facts."

The Deputy Minister then went on to speak of housing, and of the efforts the department had made to get information as to how many building units were actually being built. Based on information obtained Mr. MacNamara did not think it would be difficult for the construction industry to step up the building of dwelling units so that the mark of 50,000 mentioned by the Minister of Reconstruction and Supply would be reached. Mr. MacNamara said their survey showed that 57 per cent of the jobs were going ahead without any delay. Of the other 43 per cent, about 40 per cent of delays were due to material shortages. The balance was due to a shortage of skilled labour. In other words, the principal delay was that of materials not being on the job.

Mr. MacNamara referred to some of the items causing delay and to the steps being taken to improve the situation, extending into such basic industries as logging, lumbering, etc. Mr. MacNamara also referred to the movement of workers required by war industry and to the necessity of such workers changing their locale. He also stressed the importance of apprenticeship training as well as training on the job.

Following these addresses working committees were appointed to consider and report to the conference on items included in the agenda.

The committees are listed in the order in which their reports were dealt with, the first named of each group (i.e., employees' or employers') being Joint Chairman.

Employer-Employee Relations

A. Cooper, J. Dwyer, L. Guerard, A. E. Skaling, Ira Davis, O. Filion (employees) and Allan C. Ross, F. G. Rutley, W. J. Bavington, V. L. Leigh, J. A. Juneau, Tullis N. Carter, H. L. Roper (employers).

Government Controls, Wages, Prices Etc.

W. Jenoves, J. Graham, J. Walker, J. Connolly, O. Renaud, W. Watts, E. Larose, H. Laverdure (employees) and C. J. A. Cook, W. C. Wells, S. E. Dinsmore, H. G. Macdonald, R. A. Seasons, H. J. Bird, John N. Flood, John Tucker (employers).

Construction Outlook

J. McLeod, H. Colnett, J. Wedge, G. Pyper, H. Patton, J. Durocher, A. Charpentier, R.

Adair (employees) and J. B. Stirling, K. I. Campbell, H. J. Mero, E. E. Lord, F. E. Halls, J. A. Laprey, L. A. Merlo (employers).

Supply of Labour and Materials

J. Woolsey, S. Finlay, D. Gillies, G. Bengough, H. Weller, C. R. Roberts, D. Dickson (employees) and J. M. Pigott, W. P. Bickle, W. C. Wells, H. C. Nicholls, F. W. Purdy, E. F. Longfellow, E. Walden (employers).

There was also a Co-ordinating Committee composed of E. Ingles, P. R. Bengough (employees), H. P. Frid, A. Deschamps (employers) and the Chairman and Secretary, ex officio, with the Joint Chairmen of the above committees.

Decisions of the Conference

Following discussion on the reports submitted by the above committees and consideration of amendments suggested by the Co-ordinating Committee, the conference at a full session adopted decisions as set out hereafter.

*Employer-Employee Relations**(a) Form of Standard Agreement*

The conference went on record as being generally in favour of a standard form of joint agreement throughout Canada between the local employer and labour organizations. The National Joint Conference Board was requested to set up a committee to study and compose the form of such an agreement the general clauses of which will be acceptable throughout Canada, leaving the question of wages, hours of work or any other local conditions to be incorporated by the recognized organizations in the various localities. That wherever such a standard joint agreement is signed, Governments and other authorities be asked to arrange the conditions in all contracts which will conform to such agreements.

(b) Work Week

Owing to the pressing demand for housing and other essential construction required in the immediate future, and owing to the lack of mechanics and skilled workmen in the industry, the conference concurred that the 40-hour week for skilled trades in the building construction industry should not be placed on a national basis at this time. It is recognized, however, that certain sections of Canada already have the 40-hour week in the industry, that the demand for the same is

growing, and where conditions of location permit, that the 40-hour week for the skilled trades of the building construction industry be accepted as a future general policy of this industry.

And further, that employers and employees must recognize that a greater degree of skill is required in order that greater production is achieved in the construction industry.

(c) Holidays with Pay

Recognizing that legislation providing for "holidays with pay" is already in effect in one Province and that the stamp system is the most efficient and easily workable method of providing for the same the conference accepted the recommendation that the enactment of such similar measures be left to the various provincial governments for legislation, providing employers and employees be given three months' notice before legislation is proclaimed.

(d) Hourly or Annual Basis of Employment

The conference considered at the present, that the hourly basis of employment is the only practicable method of employment in this industry, but decided that the question of annual employment be referred to the National Joint Conference Board for study.

(f) Licensing

The conference accepted the suggestion of the Committee that any question of employer or employee registration appeared to be a provincial or municipal matter with the recommendation that it be referred to the National Joint Conference Board for further consideration.

- (g) National Selective Service Regulations &
- (h) Dominion Employment Service Offices

The conference noted with approval that the provisions of the National Selective Service no longer apply to the building and construction industry, and that operation is now through the Dominion Employment Service offices.

- (i) Unemployment Insurance

The conference endorsed the Committee's recommendation that unemployment insurance be administered by the Unemployment Insurance Commission which was set up for that purpose.

- (j) Construction Safety

The conference recognized that construction safety is a matter of prime importance to both employee and employer, but as workman's compensation is a provincial matter also recognized that the enactment of supervision of safety measures is likewise a provincial matter. The conference strongly recommends that authorities give the matter prompt and serious attention and that measures be taken so as to provide for separate supervision of construction work. It was noted that in instances where the supervision of safety measures is in the hands of Boards composed from within the industry that the cost of compensation to construction contractors has dropped with the result that the employee and his family have greatly benefited by the reduction in accidents.

Government Controls, Wages, Prices, Etc.

- (a) Abolition or Amendment of Wage and Salary Orders

The conference recommended that all federal controls in the construction industry be abolished within a reasonable time, and that the time of abolition of these Boards be determined in conference with the Honourable Minister of Labour, the President of the Canadian Construction Association and the President of the Trades and Labour Congress of Canada.

The conference also went on record that pending the abolition of Regional and National Labour Boards, where mutually satisfactory agreements are arrived at by employer and employee, these agreements shall be recognized by such Boards in the future, and shall be deemed to be in conformity with the now existing amendments to P.C. 9384, Section 20, Subsection 1A. Copies of such agreements to be submitted to the Regional Boards for their records.

- (b) Existing Wage Schedules

In regard to wage rates, the conference recognized that low hourly wage rates are not necessarily conducive to low cost of construction, and recommended that wages should be set at such levels as will best encourage an adequate supply of workmen into the industry, and as will develop mechanics with ability to turn out the quality and quantity of work to give increased satisfaction to the industry and general public.

- (c) Avoidance of Stoppage of Work

As a measure designed for the prevention of stoppage of work the conference recommended the development of collective trade agreements between employer and employee in all localities throughout the Dominion of Canada and the inclusion of an arbitration clause in all such agreements.

- (d) Common or Unskilled Labour

The conference adopted a recommendation that in any general revision of the wage structure in the industry serious consideration should be given to this group of workers.

Construction Outlook

- (a) The Importance of Housing in the National Economy and its Relation to Industrial and Commercial Construction

A grave national emergency was recognized in the existing lack of housing available to families in low income categories. The conference felt that the situation was not being met by building arising out of present legislation concerning housing and that housing must be treated as other war emergencies were viz., by assistance in some form which will create low rental dwelling units.

The conference felt that insufficient attention was being directed to the provision of rented shelter for low income groups; also, that it was undesirable and not in the national interest to divert material and labour to housing to the detriment of other commercial and industrial building necessary to keep the national economy in proper balance. Extreme care it was felt should be exercised not to overload housing construction activity beyond the capacity of construction to build it, or beyond the housing requirements of the community.

- (b) Privately Financed Projects
- (c) Government Public Works, and
- (d) A Steady Annual Construction Volume

The conference agreed that a steady annual construction volume is indispensable to a

healthy construction industry. The two important results are:

A steady annual income to workers in the industry.

A better opportunity to properly plan work with substantial lowering of construction costs.

The two factors making up the national construction volume are:

Privately financed works.

Public works.

Public works other than road building and necessary public utilities should be instituted only when privately financed work lags in volume, but plans for necessary public works should be ready for the immediate calling of tenders.

The conference recognized that one factor that has an important effect on costs to owners and income to workers in the industry is the lack of advance information concerning private, commercial and industrial construction. The conference also recognized that it is difficult to secure the information, but agrees with the suggestion that an appropriate continuing agency be established to make a survey of the possibilities in this direction with a view to recommending a plan which would operate to smooth out fluctuations in the construction cycle.

Effect of Material Shortages on Production

The conference adopted as its own a resolution which this Committee and the Committee on Supply of Labour and Materials agreed upon jointly. This reads as follows:

Whereas the shortage of materials is the most serious factor confronting the construction industry in its effort to provide employment and carry out a maximum volume of construction. Therefore be it resolved:

That this conference heartily endorses the action of Honourable C. D. Howe, Minister of Reconstruction and Supply and the Canadian Construction Association, in establishing the Committee on Materials to study causes of material shortages and recommend means of overcoming such shortages. That this conference expresses its full confidence in the said Committee and its ability to recommend practical means of accelerating the flow of construction materials, so essential to a satisfactory construction volume, affecting as it does housing and other types of construction such as is required in industrial expansion and the general field of construction employment.

That this conference regards the situation as an emergency and urges the Federal Government to expedite implementation of the

recommendations of the Committee on Materials.

Supply of Labour and Materials

(a) Rehabilitated Men, Skilled and Semi-skilled

The conference agreed that the industry is fortunate in being able to draw partly trained mechanics from the Armed Forces who are receiving preparatory training in the centres that have been set up in the various provinces by the rehabilitation authorities.

In view of the fact that it will take several years for the industry to build up its apprenticeship load to a satisfactory level, the supply of these young men is particularly valuable at this time.

(b) Boys coming from (1) Public Schools (2) Technical Schools

The conference adopted the Committee's recommendation that the advantages of building trades should be publicized in all provinces in the primary and technical schools by posters and publicity through trade talks, motion pictures and other media: that teachers be informed on this subject and particularly vocational guidance men; all with the object of explaining the advantages of trade training in construction.

(c) Canadian Apprenticeship Training Plans, Standards, Quotas and Census

The conference adopted the plan which was outlined by the Committee and which follows after (h) hereof. This plan includes Resolution No. 1, Appendix No. 1 and Appendix No. 2.

(d) Immigration Policy re Skilled Mechanics

The conference agreed that no help can be expected in improving the supply of trained men through immigration. On the contrary, it is felt that with the plans that are being laid down now as set out in Resolution No. 1 for the training of a proper number of apprentices in Canada, the possible loss of men so trained to other countries should be carefully observed, as in the opinion of the conference it will be unfortunate indeed if the fruits of these labours should be lost to Canada.

(e) How Can Present Material Shortages be Overcome?

The conference adopted as its own the joint resolution of this Committee and the Committee on Construction Outlook as already referred to.

- (f) Effects on Skilled Trades of Substitute Materials, and
- (g) New Processes, New Materials, New Skills

The conference agreed with the Committee in the expectation that improved materials and new processes will appear from time to time and shared the Committee's confidence that so long as the industry can depend on a proper supply of materials and a sufficient number of trained mechanics, there is little to fear from any serious departure from traditional methods and materials.

(h) Film Showing Apprenticeship Training

The conference also endorsed the Committee's recommendation that a film covering apprenticeship training as is referred to in a communication addressed to the Chairman by the Director of The Information and Publicity Branch of the Department of Labour, be prepared and circulated as described, and that a Committee consisting of Ernest Ingles, London, Ontario, J. M. Pigott, Hamilton, and Major R. I. Olmstead, Hamilton, be appointed to assist in the matter and to co-operate with the Federal Department of Labour and the National Film Board in its details.

Canadian Apprenticeship Training Plans

The resolution (known as No. 1) referred to in (c) above was adopted by the conference; it reads as follows:

RESOLUTION

After due consideration, the conference is unanimous in the opinion that the construction industry is suffering acutely to-day from:

- (a) a general shortage of mechanics in all trades, and
- (b) a lack of proper training in the existing insufficient supply of mechanics.

In regard to (a)—If we are to meet the demand for construction over the coming years, with the increasing volume of work laid down for reconstruction purposes, but apart from that, to perform in a reasonably satisfactory manner the volume of construction that plainly faces the country, we must train all the apprentices that the industry can absorb. Both employers and employees agree that this figure may reasonably be placed at 5,000 per year. This figure is subject to a breakdown that will take into account that the problem is not necessarily the same in each trade. Some trades, notably the trowel trades, are in short supply to a serious extent. While in others, such as the electrical trade and plumbing, the problem is not

nearly as serious. Each trade should be dealt with in the light of present shortages and future requirements. It is possible and perhaps desirable that in some trades special short term methods might be employed to quickly bring the available numbers up to a more satisfactory level. This is dealt with in Appendix I.

Appendix I gives the total number of apprentices which, in the opinion of this Committee, concurred in by the conference, can be taken on each year in Canada, and it is further broken down so as to set out the numbers that should be aimed at for each trade in each province.

In regard to (b)—Employers and employees here represented are unanimous in the opinion that building costs are high, due in no small part to the presence in the ranks of labour of untrained or half trained men (the result of lack of training during the pre-war depression) who have been drawn into these trades during the war years through sheer necessity. Lower costs can be obtained with efficient skilled performance and the opinion is unanimous that this will be attained in substantial measure as properly trained men are produced. The displacement of untrained men by trained men will, in the opinion of the conference, take care of itself as time goes on.

Appendix II sets out what is a satisfactory method or system of training apprentices so as to create properly skilled journeymen.

APPENDIX No. I

1. Numbers of men presently engaged in various trades in construction for Canada.

Bricklayers	4,273
Carpenters	55,000
Plasterers	3,749
Painters	17,269
Plumbers	10,086
Electricians	7,199
Sheet Metal	1,731
	<hr/>
	99,307

2. This number has proved too little for the modest program of the past two years. It is estimated that not less than 140,000 skilled men will be necessary to carry out the annual program facing the industry.

Bricklayers	5,873
Carpenters	77,000
Plasterers	5,200
Painters	24,069
Plumbers and Steamfitters...	14,000
Electricians	10,000
Sheet Metal Workers.....	2,400
	<hr/>
	138,542

3. Taking the accepted ratio of apprentices to mechanics it will be necessary to provide apprentices as follows:

Bricklayers	738
Carpenters	9,600
Plasterers	650
Painters and Glazers.....	5,000
Plumbers and Steamfitters...	2,800
Electricians	3,300
Sheet Metal Workers.....	600

22,688

This means 5,600 recruits each year.

4. The opinion of the Committee was accepted by the conference that in two of the above trades, viz. carpentry and painting—an allowance must be made for casual partly trained men who are in this industry only when usual, normal employment is not available to them. This is true and possible in these trades where it is not in others. It is felt that 7,600 apprentices in Canada is high enough for carpenters and 3,000 high enough for painters. This reduces the total annual recruitment of apprentices from 5,600 to 4,600.

5. This 4,600 apprentices divided into the provinces on the basis of trade population produces the following percentages.

N.S. 10 per cent; N.B. 3.3 per cent; P.E.I. 2 per cent; Que. 36 per cent; Ont. 31.5 per cent; Man. 3.7 per cent; Sask. 2.3 per cent; Alta. 4.6 per cent; B.C. 8.4 per cent. Total: 100 per cent.

6. If the percentages set out in No. 5 be applied to a round figure of 5,000 apprentices, the following quotas result.

Nova Scotia	500
New Brunswick	165
Prince Edward Island.....	15
Quebec	1,800
Ontario	1,567
Manitoba	187
Saskatchewan	115
Alberta	230
British Columbia	420

7. The quotas set out in No. 6 are gross for all trades. This is further broken down to show the number in each trade in each province as follows:

Trades	4-Yr. *Total	N.S.	N.B.	P.E.I.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
Bricklaying	738	73	24	2	266	231	28	17	33	62
Carpenter	7,600	760	251	25	2,736	2,383	284	173	340	651
Plasterer	650	65	21	2	234	204	24	15	29	54
Painter	5,000	500	165	15	1,800	1,577	188	115	230	420
Plumbing and Steamfitting....	2,800	280	92	8	1,001	878	105	64	128	235
Electrician	3,300	330	109	9	1,188	1,035	123	76	151	277
Sheet Metal	600	60	20	2	216	188	22	14	28	50

*To ascertain annual recruitment divide above totals by 4.

APPENDIX No. II

The conference adopted the Committee's recommendation that the experience obtained under the operation of the Apprenticeship Act of Ontario should be drawn upon by other provinces as a guide in setting up an apprenticeship system. In some provinces a similar act has been in existence for some time, for instance, British Columbia. Quebec has recently enacted an Apprenticeship Act which is somewhat different, although its objects are the same, but with the exception of Prince Edward Island, all provinces in Canada now have apprenticeship legislation, and it is possible to set up training systems under provincial auspices.

The conference also accepted the Committee's suggestion that the experience obtained under the operation of the Ontario Act should be studied and might well form a basis for the desired training. The Ontario Act has been in operation for seventeen years, and during that period, has produced nearly 2,000 trained mechanics in the various trades, and has an active list at the present time of approximately 1,100 boys. Briefly, the Act applies to minors who wished to be indentured to employers for the purpose of learning trades. The Provincial Department of Apprenticeship becomes a party to the contract and supervises the training of the apprentice throughout. During 8 weeks in the first and 8 weeks in the second year of training, the apprentice is required to attend special classes arranged by the provincial authorities in which they will receive training by skilled mechanics in the finer points of their craft and at the same time will receive instructions in related subjects, such as mathematics, drafting, English, etc. The apprentices are paid during the 16 weeks of special tuition referred to above and they are assisted by allowances under the Canadian Vocational Training Act under an agreement between the Department of Labour at Ottawa, and the provincial departments.

It is recommended that boys be drawn as far as possible from existing provincial technical or vocational schools. In this connection in the Province of Ontario, credit on the apprenticeship contract is given on the basis of six months' allowance for junior

apprentices who declare themselves in the 11th grade, and six months for students who take preparatory studies leading to construction trades in the 18th grade. It is important that the department in charge of apprenticeship be properly staffed for that purpose and that sufficient outside supervisors are provided to see that the trade is properly taught, and that reasonable continuity of employment is provided. This may sometime involve shifting the apprentices from an employer who is running out of work, to another who has work to provide.

The rates recommended as minimum are expressed in percentages of the mechanic's rate and they are as follows:

First year	30 per cent
Second year	40 per cent
Third year	50 per cent
Fourth year	70 per cent

These are minimums, and it is recommended that where rapid progress is made, these minimums can be reasonably added to.

Copies of the forms of contract, application, progress reports, registration cards, and of the Act itself, and the Regulations under the Act, can all be obtained from the Apprenticeship Department of the Department of Labour, Parliament Buildings, Toronto.

A very important feature in any effective apprenticeship system is the setting up of a provincial supervisory committee, composed of equal representation of employees and employers who meet at least once a month and who will at all times exert the necessary pressure and activity to build up the number of apprentices in training and to satisfy themselves at all times that the training is adequate and the results satisfactory.

It is possible and probable that in some of the provinces where an apprenticeship act has but recently been enacted, the department may not as yet be properly organized and staffed and steps should be taken by the industry with both employers and employees represented to have the machinery for proper operation of the Act set into motion as quickly as possible.

Other Decisions of Conference

Following the adoption of the Resolutions of the Committees as recorded above, the conference dealt with a motion by Mr. Ingles, seconded by Mr. Frid:—

That this Joint National Conference of Employers and Employees of the Construction Industry decides that it is in the best interests of the industry that the present organization of a National Joint Conference Board be maintained.

That the National Joint Conference Board at present operating, continue to carry on with authority of this conference.

That the Honourable the Minister of Labour be requested to provide for the continuance of the convening and secretariat of the Board.

Motion passed and carried.

Motions were also moved, seconded, put and carried as follows:

That this conference express its appreciation of the work that is being done, and that has been done in these past years, through the members of the National Joint Conference Board, and of the excellent results which have been obtained.

That the proceedings of this conference be sent to all provincial governments, and the ministers thereof who would be interested in these subjects, particularly Ministers of Public Works and Ministers of Labour.

This concluded the business sessions of the conference.

Closing Session

Following the adoption of the various resolutions, recommendations and suggestions as decisions of the conference, a plenary session was held which was attended by the Minister of Labour, the Deputy Minister of Labour and various officers of the Department, the press and other observers.

At the close of this session the conference recorded its regret at the absence through illness of Mr. A. J. Crawford, a member of the National Joint Conference Board, with sincere wishes for speedy return to health.

At the request of the chairman, Mr. Frid summarized the work of the conference for the employers, touching on the purpose for which it was called and making reference to the democratic manner in which the discussions had been conducted and the evidence of willingness to reach a common ground so that the serious situation and the changing conditions would be properly met. Mr. Frid stated that the resolutions of the conference, while based on the same underlying principles as those in 1941, were expressed in terms to suit the present time, that they were not revolutionary but evolutionary.

Both employer and employee delegates were urged to go home prepared to support the resolutions approved by the conference, not forgetting that the public is the umpire and that public confidence must be maintained.

Mr. Frid closed by expressing thanks to the Minister for his co-operation in bringing about the conference and to the Chairman and Secretary for their very efficient arrangements

Each of the following speakers struck this same note of appreciation of the work of those responsible for the conference.

Mr. Ingles, for the employees, stated that any apprehension at the beginning of the conference as to what position the different sides in industry would take was dissipated by the free and frank discussions which took place. . . . Out of this he said, had come a better understanding of the other's position in the industry and the factors from which the problems develop.

Mr. Ingles said he wished particularly to leave the thought that the closing of the conference had not concluded the work before the industry. He realized that the dislocation created by hard years of war could not be set aside in a few months.

In closing Mr. Ingles said "I believe we have set an example to the rest of industry in this country in the development of employer, employee relations.

Hon. Mr. Mitchell

Showing his appreciation of the importance of the conference the Minister of Labour, the Honourable Humphrey Mitchell, attended this session and addressed the representatives.

The Minister said that his presence at various gatherings of the conference had shown his interest in the proceedings. He desired before the delegates dispersed to record his appreciation of what the construction industry had done for the war effort, a contribution which in his opinion was unsurpassed by any other industry.

Mr. Mitchell assured the delegates that their work and that of the National Joint Conference Board was appreciated by the officers of the Department of Labour as well as by himself, realizing that the statements made by delegates express the view of a very wide and responsible group of construction employers from coast to coast and trusted representatives from all building and trades across the country, adding "here at this conference we have among us not only men from the Trades and Labour Congress but also from the Canadian and Catholic Confederation of Labour and the Canadian Congress of Labour".

The Minister referred to the very necessary services which had been performed by Selective Service and to the necessity of maintaining it for some months after the principal hostilities had ceased. Many Government directives and controls brought into being to meet the emergency of war fortunately were now gone.

The Minister in speaking of the attention being given to housing reminded his hearers

that it must not be forgotten that people need work as well as shelter and that work emerges through the provision of factories and commercial buildings and therefore it was necessary that housing and industrial and commercial building be kept in balance each in the proper proportion and each in its appropriate location to serve the others.

The Minister referred to the good results which had been obtained in Canada through its administration of price control and that while price control, though diminishing, was not yet completely gone. The conference was reminded that inflation was a disaster in which workmen always lose.

Mr. A. Deschamps

Mr. Deschamps, speaking as the President of the Canadian Construction Association, thanked the Chairman for giving him an opportunity to say a few words before the end of "this dynamic gathering" pointing out however that the really hard work was just beginning, that the same spirit which had prevailed during the conference must be carried on throughout the country and on to the job. "Let us go forward together, into a new era for the construction industry and a new era for Canada. The true measure of success of this conference will be the industry's accomplishments throughout the land".

Mr. Bengough

Mr. Bengough stated that most industrial disputes, like disputes between countries, were caused by misunderstanding. The conspicuous feature of this gathering had been the clear understanding shown on both sides.

List of Delegates

The delegates nominated to attend the conference were:—

Employers' Section

H. P. Frid, Hamilton, Ont.
J. M. Pigott, Hamilton, Ont.
W. P. Bickle, Bridgewater, N.S.
H. L. Roper, Halifax, N.S.
Albert Deschamps, Montreal, P.Q.
John N. Flood, Saint John, N.B.
K. I. Campbell, Saint John, N.B.
F. G. Rutley, Montreal, P.Q.
C. J. A. Cook, Montreal, P.Q.
J. B. Stirling, Montreal, P.Q.
L. A. Merlo, Walkerville, Ont.
J. A. Juneau, Quebec, P.Q.
E. F. Longfellow, Toronto, Ont.
F. W. Purdy, Toronto, Ont.
H. C. Nicholls, Toronto, Ont.
Tullis N. Carter, Toronto, Ont.

Employers' Section—Con.

W. J. Bavington, Toronto, Ont.
 Allan C. Ross, Ottawa, Ont.
 S. E. Dinsmore, Windsor, Ont.
 R. A. Seasons, Ottawa, Ont.
 H. J. Mero, Walkerville, Ont.
 F. E. Halls, Winnipeg, Man.
 H. J. Bird, Winnipeg, Man.
 W. C. Wells, Wilkie, Sask.
 E. E. Lord, Regina, Sask.
 E. Walden, Calgary, Alta.
 H. G. Macdonald, Edmonton, Alta.
 V. L. Leigh, Victoria, B.C.
 John Tucker, Vancouver, B.C.
 Fred J. Hale, Vancouver, B.C.
 Robt. J. Lecky, Vancouver, B.C.
 J. E. Picard, Quebec, P.Q.
 H. J. Graham, Ottawa, Ont.
 R. Drummond, Toronto, Ont.

Employees' Section

E. Ingles, Vice-President, International Brotherhood of Electrical Workers, London, Ont.

P. R. Bengough, President, Trades and Labour Congress, Ottawa, Ont.

H. W. Watts, Secretary, Building Trades Council, Vancouver, B.C.

E. Larose, General Representative, United Brotherhood of Carpenters and Joiners, Montreal, Que.

John McLeod, Canadian Vice-President, Bricklayers, Masons & Plasterers' International Union, Toronto, Ont.

John Wedge, International Representative, International Union of Operating Engineers, Toronto, Ont.

Alfred Charpentier, President, Canadian and Catholic Confederation of Labour, Montreal, P.Q.

H. Colnett, General Organizer, Painters, Decorators and Paperhangers of America, Toronto, Ont.

Jos. Connolly, Special Representative, United Association of Journeymen Plumbers and Steamfitters, Toronto, Ont.

A. Cooper, General Representative, United Brotherhood of Carpenters and Joiners of America, Toronto, Ont.

Jos. Durocher, Financial Secretary, Painters, Decorators and Paperhangers, Windsor, Ont.

George Pyper, United Association of Plumbers and Steamfitters, Victoria, B.C.

Sam Finlay, International Representative, International Brotherhood of Boiler Makers, Iron Shipbuilders and Helpers, Toronto, Ont.

J. H. Dwyer, Representative, United Brotherhood of Carpenters and Joiners of America, Halifax, N.S.

J. Woolsey, International Union of Elevator Constructors, Toronto, Ont.

H. Weller, Secretary, Toronto Building Trades Council, Toronto, Ont.

J. Walker, Business Manager, Sheet Metal Workers International Association, Vancouver, B.C.

J. B. Graham, Business Agent, United Brotherhood of Carpenters and Joiners of America, Winnipeg, Man.

L. Guerard, 1st Vice-President, United Association of Journeymen Plumbers and Steamfitters.

David Dickson, National Secretary, Amalgamated Building and Construction Workers of Canada, Toronto, Ont.

Robert Adair, Vice-President for British Columbia, Amalgamated Building and Construction Workers of Canada, Vancouver, B.C.

W. Page, General Representative, United Brotherhood of Carpenters and Joiners, Vancouver, B.C.

W. J. Burr, International Representative, International Union of Operating Engineers, Hamilton, Ont.

O. Renaud, Business Representative, Sheet Metal Workers, Montreal, P.Q.

W. Jenoves, President, Provincial Conference Board of Ontario of the Bricklayers, Masons and Carpenters, Toronto, Ont.

Duncan Gillies, Vice-President, Operative Plasterers' and Cement Finishers' International Association, Toronto, Ont.

Ira Davis, President, United Brotherhood of Carpenters and Joiners, Calgary, Alta.

Geo. Bengough, President, United Brotherhood of Carpenters and Joiners, Vancouver, B.C.

C. R. Roberts, President, International Brotherhood of Electrical Workers, Winnipeg, Man.

O. Fillion, 2nd Vice-President, Canadian and Catholic Confederation of Labour, Montreal, P.Q.

H. Laverdure, President, Bricklayers and Masons, Canadian and Catholic Confederation of Labour, Montreal, P.Q.

A. E. Skaling, President, Saint John Trades and Labour Council, Saint John, N.B.

H. Patton, Secretary and Business Agent for Electrical Workers, Hamilton, Ont.

Accredited Observers

H. G. deBivort, International Labour Organization, Montreal; C. Sayeau, Toronto, Ont.; J. Clark Reilly, Ottawa; R. G. Johnson, Ottawa; E. M. Woolcombe, Halifax, N.S.; J. Wells, Wilkie, Sask.

The representatives of the employees on the National Joint Conference Board are:—

E. Ingles (Electrical Workers); A. J. Crawford (Sheet Metal Workers); J. Woolsey (Elevator Constructors); Duncan Gillies

John Wedge (Operating Engineers); J. W. Bruce (Plumbers); Arthur Martel (Carpenter-Plasterers); John McLeod (Bricklayers); ters); Harry Colnett (Painters); Sam Finlay (Boiler Makers).

Alternates: A. Cooper (Carpenters); E. Larose (Carpenters).

The representatives of the employers are:—

H. P. Frid (Hamilton); J. Flood (Saint John); E. F. Longfellow (Toronto); J. B.

Stirling (Montreal); R. A. Seasons (Ottawa); J. A. Juneau (Quebec); C. J. A. Cook (Montreal); H. C. Nicholls (Toronto); H. J. Graham (Ottawa).

Alternates: P. N. Gross (Montreal); J. M. Pigott (Hamilton); A. C. Ross (Ottawa); J. L. E. Price (Montreal); R. Drummond (Toronto); T. N. Carter (Toronto).

J. L. Kingston, Secretary.

A. J. Hill, Chairman.

Workmen's Compensation in Quebec, Saskatchewan, Alberta and Ontario

BRIEF summaries of the Annual Reports of the Workmen's Compensation Boards of

Quebec, Saskatchewan and Alberta for the year 1944, appear below.

Quebec

The sixteenth annual report of the Workmen's Compensation Commission of Quebec reveals a reduction of more than 6,000 in the number of industrial accidents in 1944, the total being 84,308, as compared with 90,564 in 1943 and 96,888 in 1942.

"There is reason to believe," the report says, "that the efforts which have been made by our Accident Prevention Associations and the co-operation which they have received from employers have given the excellent results obtained . . . the assets of the Commission now exceed \$28,000,000, 86 per cent of which represents investments of the very best kind. These assets are safely sufficient to meet all responsibilities to be incurred by our Commission."

The report states that "since the Act has been amended to extend its benefits to workmen afflicted with non-complicated silicosis and asbestosis, the Commission, with the co-operation of employers, is organizing clinics where workmen exposed to these terrible diseases shall be examined before they are ac-

cepted in employment, and will be submitted also to subsequent periodical examination."

According to the report, the amount paid out in compensation during 1944 was \$4,536,848.69 (Provisional figure). This compares with a total of \$4,600,397.37 in 1943. The largest item on the 1944 expenditure list was for temporary incapacity, \$2,075,676.08. The other items were \$1,024,144.49 for permanent disability; \$987,147.14 for medical aid; and \$449,880.98 for death. The reserve for outstanding adjustments amounted to \$4,350,828.81, as compared with \$2,083,986.39 in 1943.

Administration expenses during the year under review amounted to \$640,467.54 (\$522,034.38 under Schedule 1 and \$118,433.16 under Schedule 2), of which \$491,757.94 was paid out in salaries of the Commissioners and staff. Revenues for the period totalled \$10,242,438.12 and was made up of assessments, penalties and sundry items. An accumulated surplus of \$2,408,783.73 is reported as at December 31, 1944.

Saskatchewan

The following is a brief summary of the fifteenth annual report of the Workmen's Compensation Board of the Province of Saskatchewan for the calendar year 1944.

The report states that "the year 1944 witnessed a new high record for Board business, increases being shown in revenues, in number of claims reported, and in benefits awarded." There was an increase of 193 in the number of employers who reported to the Board as compared with the number reporting in 1943.

During 1944, a total of 8,618 claims were reported as compared with 7,718 in 1943. On account of the 1943 claims a total of \$814,948.76 was paid out to the Board, made up

of \$328,926.62 in compensation, \$347,665.29 in pension awards, and \$138,355.85 in hospital and medical aid. Not including deposit accounts the total receipts of the Board in 1944 amounted to \$701,210.93, while the total expenditure, including estimate for outstanding claims was \$659,205.48, leaving an estimated surplus of \$42,005.51.

The average assessment rate for 1944 was \$1.37 per \$100 of payroll, an increase of six cents as compared with 1943 and of one cent as compared with 1942.

The number of employers who reported to the Board in 1944 was 4,658 as compared with 4,465 in 1943. The amount of payroll reported

during 1944, exclusive of Dominion and Saskatchewan governments (which are not asked to estimate their payrolls) totalled \$53,522,-887.00, an increase of \$5,424,313.00 over 1943.

Accidents in 1943 were classified as follows: Prime movers, 137; working machines, 376; hoisting apparatus, 53; dangerous substances,

317; stepping on or striking against objects, 666; falling objects, 760; handling objects, 1,201; tools, 488; runaways and animals, 70; moving trains and vehicles, 251; falls of persons, 1,217; all other causes, 1,385. Of all classes a total of 23 accidents were fatal.

Alberta

The total number of accidents reported to the Workmen's Compensation Board of Alberta in 1944 was 19,286. There were 48 fatal accidents reported during the year. In addition, there were six deaths due to accidents reported in 1943 and one caused by an accident reported in 1942. The total revenue for the year was \$4,207,141.04. From this is deducted \$181,650.29 for estimated or adjusted merit rebates, making a net income of \$4,025,490.75. The total expenditures amounted to \$3,322,-833.87, leaving a provisional surplus of \$702,-656.88. The largest revenue item was that of assessments amounting to \$4,075,717.42, followed by interest of \$112,723.95 and penalties totalling \$18,699.67.

Compensation payments amounted to \$804,-692.33; cost of medical services, \$290,270.49; provision for disasters, \$182,066; provisions for silicosis, \$110,245; provision for claims

pending, \$375,420; administrative and general expense, including mine rescue stations, \$255,-086.80. The capitalized cost of pension awards amounted to \$1,048,775.39.

Statistics for the year 1944 reviewed by the report may be summarized as follows: Number of employers within the scope of the Act at December 31, 1944, 6,648; accidents reported during 1944, 19,286; accidents and claims not finally disposed of at December 31, 1944, 2,345; claims disposed of by award of pensions or payment of compensation, 7,988; claims disposed of by payment only of account for medical aid, 9,353; accidents disposed of for which no application for compensation was received, 187; accidents disposed of on which no compensation was due, 2,260; claims on which further payments have to be made, 1,095; accidents awaiting further reports and on which no payments have been made, 748.

Ontario

The Annual Report of the Workmen's Compensation Board of Ontario for 1944 was issued recently. A brief summary giving the more important features of the report appears below.

Accidents reported to the Board in 1944 numbered 123,820, as compared with 131,458 during 1943, a decrease of 7,638 or 5.5 per cent. Of this total 116,381 accidents were paid for, either by compensation or medical aid or both. These included 288 deaths, 2,191 permanent disability cases, 45,822 temporary disability cases and 68,080 medical aid cases only. In addition, the Board in 1944 opened for further award 1,027 claims which had been settled previously.

During 1944, the payroll covered by Schedule I of the Workmen's Compensation Act (that part of industry under collective liability) was \$1,169,052,000, as compared with \$1,076,780,000 during 1943, an increase of 8.6 per cent. The average rate of assessment was \$1.02 for each \$100 of payroll; the corresponding rate for 1943 was \$1.03. There were 25,001 employers under Schedule I at December 31, 1944, as compared with 23,950 at the end of 1943.

The compensation and medical aid for Schedule I industries, including estimates for

what is still to be awarded for accidents happening during the year and for prior years' accidents amounted to \$9,768,934.17. The total amount awarded in Schedule II industries (those in which employers are individually liable for accidents to their workmen) including Dominion and Provincial Crown Companies, in 1944, was \$2,278,793, as compared with \$2,264,507.50 during 1943. Of the 1944 total, \$1,249,520.42 was for Dominion Crown Companies and \$113,410.40 was for Provincial Crown cases.

The provincial assessments paid for 1944 under Schedule I were \$11,965,195.12. To this must be added \$72,800.01 refunds from various sources, application of sections of the Act by way of penalty and other sources of income. The total receipts for the year were, therefore, \$12,037,995.13.

The Dominion Government (including Defence Industries) the Provincial Government, and employers in Schedule II paid for accidents as they occurred, on the adjudication of clauses by the Board. Hence while accidents from these sources were included in the above totals, there was no inclusion of wage roll or assessment figures as these industries did not pay assessment to the Board on a percentage of their payrolls.

The gross administration expenses of the Board in 1944 were \$654,361.28. Of this amount \$80,446.50 was charged to Schedule II and Crown employers; \$15,620.65 to Safety Associations; \$27,089.90 to silicosis account; \$1,089.34 to mine rescue work; \$4,666.50 to special hospital account, and \$5,240.35 to clinic. The balance, \$520,208.04 was charged to Schedule I and is 5.10 per cent of the benefits awarded in Schedule I during 1944.

The Disaster Reserve to meet any unforeseen disaster or other circumstance which might burden unduly the employers in any class of industry, amounted to \$236,248.27 at the close of 1944. The Pension Fund to take care of future payments of pensions totalled \$34,822,620.99, and the reserve to complete claims amounted to \$4,662,295.73, at December 31, 1944.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at December 31, 1945

IN the accompanying tables, which have been prepared by the Department of National Health and Welfare, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating. Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

The administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935. By a second Order in Council, P.C. 5942, dated September 7, 1945,

the administration was transferred from the Department of Finance to the Department of National Health and Welfare from September 1, 1945.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion

* Amended by Orders in Council P.C. 6367, August 10, 1943, P.C. 3376 and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

Proposals for Labour Legislation in Saskatchewan

On December 17, the Saskatchewan Executive Committee of the Trades and Labour Congress of Canada met with the Provincial Cabinet and presented their annual brief of proposed labour legislation.

The delegation expressed its appreciation for the social and economic legislation already enacted by the present Provincial Government which was described as, "step by step, gradually improving the conditions under which the workers of the province labour."

Amendments to the Trade Union Act of the Province asked for were: (a) that individual unit certification be extended to cover any area designated by Provincial Labour Relations Board; (b) that maintenance of membership, like dues check-off, come into effect immediately upon certification, if application is made for it; (c) that the Government provide machinery for dealing with applications placed before the Labour Relations Board, in the interests of the Trades Union Act; (d) that provision for perpetuation of responsibility be made in cases similar to changes in the ownership of businesses; (e) that a collective agreement remain in effect during any seasonal occupation lay-off; (f) that changes in ownership for the purpose of destroying a union by changing conditions be classed as unfair labour practice; (g) that the use of strike breakers, scabs, etc., in labour disputes, be made an unfair labour practice.

Proposals were included for: the enactment of an Hours of Work Act which would set a 40-hour maximum throughout the province; the enactment of a Holidays with Pay Act; and the amendment of the Workmen's Compensation Act so as to extend blanket coverage to all workers, increase payments to 100 per cent of wages, and eliminate the three-day waiting period before commencing payments.

The delegation asked that Old Age Pensions be paid at 60 years of age and benefit payments increased to \$50 per month. It requested the abolition of the Education Tax; the standardizing of all school books; and their free provision for all grades by the Department of Education. On the question of child labour, the brief favoured legislation which would prohibit the employment of children in factories, hotels and restaurants prior to the age of 16 and requested the elevation of the school leaving age to at least a similar level.

Requests were made for a minimum wage of \$1,800 per year and the immediate implementation of the 35-cent per hour minimum wage.

The Provincial Government was requested to cogently impress upon the Federal Government the necessity of removing the control of the present Housing Act from private banks and mortgage companies to the Bank of Canada.

New Brunswick Labour Brief on Dominion-Provincial Relations

A DELEGATION representing the New Brunswick Federation of Labour met recently with the New Brunswick Cabinet for the purpose of presenting a brief containing matters which the Federation felt should be discussed at the Dominion-Provincial Conference.

Health Insurance.—The delegation was of the opinion that the Dominion proposals for health insurance were good but contended that leaving the final choice of what services were to be inaugurated entirely with the provincial governments would result in a lack of uniformity in such legislation throughout Canada. Fear was expressed that such a plan would lead to inferior services in some provinces. As a result these provinces would be paying for superior services rendered in other provinces because of the proportionately equal share of the cost each province incurred under the proposed plan. The delegation demanded that any health insurance scheme adopted be national in scope, operation and administration.

Old Age Pensions.—Similar views were expressed regarding old age pensions. The rate of benefit payments and the extent of coverage varied between the provinces—"further illustrating the lack of uniformity that exists in social legislation in Canada", the delegation declared. Protest was registered against the "means test" being utilized as a measure of eligibility. "We heartily agree with the proposal that the age of eligibility should be reduced from 70 to 65 years, with an ultimate goal of 60 years, and we believe all the pensions should be paid by and administered under federal authority and without the claimant having to prove destitution."

Unemployment Insurance and Unemployment Assistance Benefits.—The Government delegates to the Dominion-Provincial Conference were urged to support the request for extending unemployment insurance to a greater number of workers. This, coupled with the extension of the duration of payments, should, to a great extent, obviate the need for unemployment assistance benefits.

Wage Control and Collective Bargaining.—The delegation pointed out labour's desire to have present wage regulations relaxed or eliminated as promptly as is consistent with the general welfare, but declared they saw no valid reason why minimum wage legislation already promulgated, but presently suspended, should not be immediately reinstated to help maintain present wage rates and spending power.

The delegates expressed wholehearted concurrence in the "desirability of uniformity throughout Canada of minimum wage standards, occupational coverage, maximum hours of work, and minimum hours of employment" set out in the Dominion Government's proposals. However, they proscribed the condition, "consistent with justifiable local or regional variations in cost

of living standards" as absolutely precluding any possibility of attaining uniformity.

Collective Bargaining and Conciliation.—A single labour code for the entire Dominion was advocated which would provide workers with the absolute right to organize and contain means for rapid conciliation in cases where disputes arise. In the latter case the delegation was of the opinion that it would be difficult to improve much upon the general principles of the Dominion Industrial Disputes Investigation Act, except to make it applicable to all employment in the country.

The delegation went on record as being essentially in agreement with federal proposals to maintain present wartime taxation agreements. It asked safeguards against imposition of further taxes such as rental, occupational, and poll taxes, and favoured collection of taxes at source as earned.

Households and Families in 1941

THE number of buildings used for habitation purposes at the date of the 1941 census was 2,181,564, or one for every five of Canada's population, according to final figures released by the Dominion Bureau of Statistics. Averages ranged from one for every eight of population in Quebec, to one building used for habitation for every four persons in British Columbia. On the basis of number of dwellings, however, the range diminishes to between one dwelling for roughly every five persons in the Maritimes and Quebec, and one for every four persons in Ontario, the Prairie Provinces and British Columbia. Such differences in the number of building and dwelling units in relation to population are largely determined by the variable factors of type of dwelling, tenure, size of household and families, type of locality, etc.

Dwellings occupied by owners constituted 55 per cent of all dwellings in Canada. The proportion was higher in rural localities where three-fourths of the dwellings were owner-occupied. In urban localities, however, only 40 per cent of the dwellings were occupied by owners. Rented dwellings outnumbered owner-occupied dwellings in urban localities of all provinces, with the exception of Prince Edward Island, Nova Scotia and British Columbia.

An analysis of rents paid by tenant households in the larger cities shows that close to one-half of tenant households in Montreal were paying low monthly rentals of between \$10 and \$19 at the date of the 1941 census, about one-third in Quebec City, Winnipeg and Vancouver, one-fourth in Windsor and

Hamilton, and one-fifth in Ottawa and Toronto. However, it should be noted that 93 per cent of all Montreal tenant households and 87 per cent of those in Quebec were living in apartments and flats, whereas in Winnipeg and Vancouver, where a large proportion of households also were in the low rental levels, over half were living in single homes.

Monthly rents for single homes were lowest in Winnipeg and Vancouver and highest for households in Ontario cities, notably Ottawa and Toronto. Approximately 75 per cent of urban tenant households in the former cities paid less than \$30 a month for rent, as compared with about 50 per cent in Ottawa and Toronto. A similar comparison of urban tenant households living in apartments and flats shows that roughly one-third of such households in Ottawa and Toronto were paying less than \$30 a month, with proportions in other large cities ranging upward to three-fourths in Montreal and Quebec City.

Households consisting of two and three persons in 1941 were more numerous than those of any larger size in urban localities. For Canada as a whole, urban households of two persons amounted to 22 per cent of the total, and three persons slightly lower at 21 per cent. The number of households fell off more sharply between the four and five person groups from 18 per cent to 12 per cent, with a continuing drop to three per cent for households of 10 persons and over.

In urban centres, households living in four, five or six rooms were most numerous, with the largest number in the last group. Per-

centages of total households in these room-per-household groups were 17 per cent, 18 per cent, and 22 per cent, respectively, with a drop in the number of households with seven rooms to 10 per cent, and those with 10 rooms or more, to three per cent.

Urban tenant households showed a greater concentration than owner households in the low room-per-household groups, and to a lesser extent, in the smaller person-per-household groups. Less than one-third of urban tenant households occupied six rooms or more as compared with three-fifths of owner households. The proportion for tenant households living in single homes was slightly higher at 42 per cent, but for those in apartments and flats only 20 per cent occupied six or more rooms.

Normal families, consisting of husband and wife (with or without children) living together at the date of the census, far outnumbered other types of family groups. Normal families totalled almost 88 per cent of all families in Canada. Another two per cent represented families in which either the husband or wife were resident elsewhere on the census date. This latter group should not be confused with families whose heads were separated or divorced.

Families of widowed heads accounted for almost nine per cent of the total families in Canada, with almost three-fourths of these having female heads. Families with separated and divorced heads together totalled 1.3 per cent of all families, and those of single heads, 0.2 per cent.

Australian Industrial Lighting Standards

“INDUSTRIAL Lighting”, a bulletin issued recently by the Commonwealth Department of Labour and National Service, sets forth the minimum requirements of the “Australian Code for the Interior Illumination of Buildings by Artificial Light” which was drawn up by the Australian Standards Association and applied during wartime in the National Security (Standards of Lighting) Regulations. The bulletin contains numerous photographs and diagrams.

The first chapter, on general principles, points out that the five factors of vision are eyesight, the size of objects, the contrast between an object and its background, the time in which work-tasks must be done and illumination. Glare, it is emphasized, impedes vision and brings on fatigue, reduces production and increases errors.

Some requirements of good practice summarized in the second chapter are the provision of sufficient light on each work-task, the prevention of eye-strain caused by working in a pool of light with surrounding gloom, the prevention of glare from exposed lamps, the prevention of glare by screening local lights at or near machines and by using indirect lighting in offices, and the use of light colours or special lighting methods to improve contrast between work-tasks and backgrounds. The amount of desirable illumination is indicated for six classes of work and for a number of industrial interiors and tasks.

A chapter on colour in industry emphasizes the need for light-coloured surroundings to reflect the light. Ceilings should be white but may be slightly tinted when the interior

is well lighted day and night. Walls, however, should not be white but painted in some light colour such as light green or blue or “sunshine cream” or buff. Machines, it is urged, should be painted in light but not bright colours. Strong colours, however, should be used to identify dangerous parts of machines or for other identification.

Another chapter deals with the best methods of lighting. The use of 50 or more foot-candles is advised for very severe and prolonged visual tasks, 25 to 50 foot-candles for less severe and prolonged tasks, 15 to 25 for moderately critical and prolonged operations, 10 to 15 foot-candles for ordinary and 5 to 10 for less exacting visual tasks.

A chapter on lighting equipment points out that direct lighting is unsuitable for precision, assembly, machine-tool and other work on shiny surfaces, or for operations where shadows will be troublesome, and prescribes the use of diffused light for these tasks. The importance of proper maintenance is emphasized, since dirty reflectors, darkened walls and ceilings, burnt-out and over-age lamps or replacements of inadequate size and under-voltage burning of lamps all result in depreciation of lighting installations, dirt being the chief enemy of continued effective lighting.

The value of fluorescent lighting with its relatively high efficiency and cool lighting is also discussed. Its value may be reduced, however, if the lighting fittings are installed over machines, benches, etc., with no upward light to dispel the darkness of upper areas. If necessary, auxiliary lighting should be installed to light the general surroundings.

APRIL, 1946

[NUMBER 4

Notes of Current Interest

Canadian delegation to I.L.O. meeting in Mexico City

Canada's delegation to the third American regional conference of the International Labour Organization which opened in Mexico City on April 1, was headed by Dr. Hugh L. Keenleyside, Canadian Ambassador to Mexico. C. C. Eberts, of the Canadian Embassy staff in Mexico City, acted as assistant to Dr. Keenleyside. Paul Goulet, Assistant to the Deputy Minister of Labour, and J. S. McCullagh, Assistant Director of Industrial Relations of the Labour Department, were technical advisers to the Government delegate.

J. B. Ward, Chairman of the General Conference Committee of the Standard Railway Labour Organizations, of Montreal, was the workers' delegate; while C. E. Shumaker, Manager of the Personnel Division of the Goodyear Tire and Rubber Company, New Toronto, was the employers' delegate.

Items on the agenda included vocational training, labour inspection, industrial relations, and such social and economic problems of American countries as industrialization, immigration, the relationship between wages and prices, and the conditions of life of the native population of American countries. An account of this meeting will appear in a subsequent issue of the LABOUR GAZETTE.

Restriction in use of building materials

ing materials for purposes other than housing.

The Minister stated that the number of houses that are to be built during 1946 will

Speaking in the House of Commons on April 1, the Minister of Reconstruction, Honourable C. D. Howe, announced a policy for restricting the use of building materials for purposes other than housing.

be limited by available supplies of building materials. He said that it was impossible to judge from Ottawa the essentiality of different construction projects, and that in prohibiting the construction of non-essential buildings the decision could be made most effectively by municipalities.

"As hon. members know, a building permit must be obtained from the municipality before any building can be erected within its borders. The most appropriate time and place effectively to curtail unnecessary building is prior to the issuance of the building permit. The authority that issues the building permit is in the best position to determine whether the permit should be issued or deferred, having regard to the possibility of shortages of housing in the area, and having regard to employment conditions in the area," the Minister stated.

An Order in Council of March 27 (P.C. 1184) provides that

... every municipal body and every officer, employee or agent thereof having authority in relation to building permits shall, in the exercise thereof during the current calendar year, have power

- (a) to refuse to issue a permit for the erection, alteration or repair of any building or structure; and
- (b) to revoke, cancel or suspend any permit which may have been issued for the erection, alteration or repair of any building or structure.

The Order further provides that

where, in any place, a permit from a municipal body or any officer, employee or agent thereof is required by law for the erection, alteration or repair of any building or structure, no person shall erect, alter or repair any building or structure in such place unless such permit shall have been issued therefor and is in full force and effect.

The Minister said that effective means have been taken to bring about a fair distribution of building materials in all parts of Canada and that steps will be taken to maintain the same equitable distribution. "It will then be the duty of each municipality to determine whether its quota of material should properly be used for housing, for industrial projects or otherwise. Should the municipality decide to use its building materials to build motion picture theatres or other places of amusement, that municipality can hardly complain if a shortage develops in materials for construction of houses. I feel certain that every municipality will be impressed with the necessity to provide adequate housing for its population, even if this involves deferring projects that would otherwise be desirable."

Stating that there is still a need for low-rental housing for veterans, the Minister said that Wartime Housing Limited will consider applications from municipalities for veterans' houses for rent provided that they are received not later than June 1. "During 1945," he said, "the Wartime Housing building program was not undertaken until July, and, in the case of certain municipalities, not until late in the autumn, with the result that practically all the building extended over the winter months. It is to avoid this that the deadline of June 1 has been established for applications during 1946."

Enumerating the steps that have already been taken to make the best use of available supplies of building materials, he said a priority order required suppliers to fill orders for government housing projects and for houses of individual veterans whose houses are 75 per cent completed. This order, he said, will later be enlarged to give priority to all housing for veterans, whether built by the government or by the individual veteran.

He pointed out that the housing problem is not one that normally lies within the jurisdiction of the federal government.

Progress of housing in Canada

Reports on building permits collected from municipalities by the Dominion Bureau of Statistics give an indication of the progress

of housing in Canada.

During February, 1946, permits were issued by the reporting municipalities for 1,903 new housing units, of which 1,682 were new buildings and 221 were conversions. In February last year, 1,099 permits were issued for housing units, including 834 for the construction of new buildings and 265 for conversions. The aggregate value of new residential buildings, additions and repairs thereto, was \$7,819,812 in February this year as compared with \$3,449,565 in February, 1945.

Permits for the construction of 3,918 new dwelling units were granted during the first two months of the present year as compared with 1,905 in the same period of 1945. The permits for 1946 included 3,445 for new buildings and 473 for conversions. The value of new residential buildings, and additions and repairs thereto amounted to \$16,004,749 during the first two months of this year as compared with \$5,850,257 in the same period of 1945.

Permits for all construction reached the value of \$16,156,047 in February, recording a small increase from the January total of \$15,252,348 and exceeding the February, 1945 total of \$7,224,439 by 124 per cent. Permits for new construction were issued in February to the value of \$12,608,713 and additions, alterations and repairs, \$3,547,334. For the first two months of the current year, permits were granted to the value of \$31,408,395 as compared with \$12,619,666 in the comparable period of 1945, an advance of 149 per cent.

The Bureau received returns from 171 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 145 reported detailed operations. The remaining 26 advised that no permits had been issued during the month, while 33 municipalities had failed to report by March 12, at which time compilations were proceeded with.

Of the 1,903 permits for new housing units issued in February, 740 were issued in British Columbia, 525 in Ontario, 379 in Quebec, 128 in Alberta, 57 in Manitoba, 45 in Saskatchewan, 15 in Nova Scotia, 12 in New Brunswick, and 2 in Prince Edward Island.

Employment and industrial statistics

The latest statistics available reflecting industrial conditions in Canada are shown in the accompanying table.

The index of industrial employment, published by the Dominion Bureau of Statistics, was 166.9 at February 1, 1946; this was lower by 1.3 points than one month earlier. The index of the physical volume of business receded from 195.4 in January to 181.2 in February. A slight increase was registered in the general index of wholesale prices during the month. The Bureau's cost-of-living index also showed a fractional gain to stand at 120.1 at March 1, 1946.

Employment and earnings.—Following the downward trend in employment indicated in mid-winter in seven out of the last eight years, the index of industrial employment (base 1926=100) declined from 168.2 at January 1, 1946, to 166.9 at February 1. This indicated a decline of 6.7 per cent as compared with employment one year earlier, when at February 1, 1945, the index stood at 178.9.

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

⁴ Base June 1941=100.

⁵ Base 1935-1939=100.

⁶ Adjusted, where necessary, for seasonal variation.

⁷ Notes in the hands of the public at the end of the month. ⁸ Figures for four weeks ended March 30, 1946, and corresponding previous periods.

A combined working force of 1,701,579 persons at February 1, 1946, as compared with 1,715,109 at January 1, was reported to the Dominion Bureau of Statistics by 15,612 firms in the eight leading industries. A substantial increase was shown in the total payroll of the reporting firms, however. The weekly disbursement in salaries and wages at February 1 was \$54,348,721. This exceeded by 5.9 per cent the amount reported at January 1 for the previous week which included the Christmas holidays. The average weekly earnings at February 1, 1946, were \$31.94, a rise of \$2.02 over the January 1 average which was also affected by the holiday season. Per capita weekly earnings at February 1 averaged \$32.15 in 1945; \$31.76 in 1944; \$29.96 in 1943, and \$27.65 in 1942.

Employment in manufacturing showed considerable recovery during the month of January, though the gain of 12,700 persons, or 1.3 per cent, from the preceding month was below the average at mid-winter in the years since 1920. Part of the increase was due to the re-employment of automotive workers who had been on strike for over three months. General improvement was shown in other branches of manufacturing, particularly textiles; seasonal losses were registered in animal food processing and chemical factories. The non-manufacturing industries on the whole reported a curtailment in employment, the largest reductions being 5.0 per cent in construction and 7.8 per cent in trade.

Prices—A slight rise was indicated in the general index of wholesale prices which, on the base 1926=100, increased to 104.6 in February from 104.0 in the preceding month and 102.9 in February, 1945. In the sub-groups, there were slight increases in animal, textile, wood, and iron products, while other groups, comprising vegetable products, non-metallic minerals and chemical products, remained unchanged. The removal of maximum price regulations from refined silver, effective February 1, 1946, accounted for the sharp rise of 6.9 points in the non-ferrous metals group index.

The Dominion Bureau of Statistics cost-of-living index (base 1935-1939=100) advanced from 119.9 at February 1 to 120.1 at March 1, 1946. The increase since August, 1939, was 19.1 per cent. Although foods accounted for the major part of the rise over February 1, clothing, home furnishings and services, and fuel also registered moderate increases. The food index moved up from 132.5 in February to 133.1 in March, increases being recorded for vegetables, eggs, and dairy products. Clothing advanced from 122.7 to 123.1, and home furnishings and services from 120.1 to

120.4. The fuel and light index rose fractionally from 107.1 to 107.2 while two groups were unchanged, rentals at 112.3 and miscellaneous items at 110.9.

Index of the physical volume of business—The index of the physical volume of business receded from 195.4 in January to 181.2 in February. A further decline in the volume of production was evident during the month. Curtailment of operations of industries engaged mainly in war production was accentuated while a shortage of materials resulting from the steel strike in the United States restricted activities still further. The index of industrial production declined 5.7 points, mineral production 21.6, and manufacturing 4.9. On the other hand, the index of construction was 8.0 points higher than in the previous month. The index of the value of contracts awarded rose to 256.2 in February, an increase of 35.1 points during the month, but building permits declined sharply from the high of 365.3 recorded in January to 265.4 in February. There was a slight rise in electric power production during the month. The general index of distribution, covering railway traffic, commodity distribution, and external trade, dropped from 198.7 to 166.7; declines were registered in both divisions of external trade, imports dropping 38.0 points and exports 40.4 points.

Demand for technical personnel exceeds supply

According to the February report of the Wartime Bureau of Technical Personnel, the demand for professional engineers and scientists by Canadian employers continues to exceed the supply available.

The Bureau, which became an employment service for technical personnel on the relaxation of National Selective Service Civilian Regulations in December, 1945, reports that its records show only one month when the supply of applicants in the technical category exceeded the demand. This was at the end of November, 1945, and was due to a rapid increase in demobilization and the curtailment of war industries following V-J Day.

At the end of February, 1946, there were 1,261 openings registered with the Bureau and only 710 applicants listed as available. The continuing large demand for technical personnel is attributed to a great extent to the present need of men for planning and organization of reconversion and reconstruction activities which will in turn absorb increasing numbers of non-professional personnel.

Since demobilization of the Armed Services began, the proportion of ex-service personnel to all technical personnel visiting the Bureau

has steadily increased. The figures for March show that more than 50 per cent of all technical persons recorded as taking up new employment were veterans. It has been estimated that one-half of all technical personnel in the Armed Forces were not employed in civilian life prior to enlistment and the employment available through the Bureau is of particular value to these men.

A survey of industry was begun by the Bureau in November, 1944, with a view to obtaining a backlog of openings for technical personnel discharged from the Armed Forces, when it became apparent that a number of scientists and engineers would be available for discharge from the Air Force through the curtailment of the Commonwealth Air Training Plan. Constant canvassing by the Bureau has kept this list up-to-date.

After V-J Day, the same listing of employment openings was of great value in the resettlement of those whose war service had been in civilian operations and substantial numbers of technical persons released from war industries were directed into new fields of employment.

An indication of future employment openings for technical personnel in the field of public utilities is given by statistics produced by the Bureau showing that one-third of the technical personnel employed by a typical public utility concern will be retired during the next 10 years, assuming they all live to the age of 65. This condition applies to a greater or less degree to most employers in the category of public utilities, government departments, and the well-established firms which have almost the same status as public utilities, where there was little recruiting of new graduates during the war and in most cases for some years before the war.

Based on a recent survey, lists of summer employment for undergraduates and employment for science students graduating this year have been sent to universities.

Canadian Commercial Corporation

The Honourable James A. MacKinnon, Minister of Trade and Commerce, has announced the establishment of the Canadian Com-

mercial Corporation, for the purpose of assisting private enterprise in international trade relations.

The Corporation will assume the duties of the Canadian Export Board, which made purchases for UNRRA and foreign countries in Canada. It will also facilitate the purchase of essential materials by private domestic interests in ex-enemy countries, when there is little possibility of procuring them through

normal trade channels; and will provide machinery for the purchase of commodities such as sugar, tea, oil and fats which are under international allocation or foreign government control and may continue to be so for a substantial period.

The Corporation will provide Canadian commercial concerns with a service comparable to that provided British and American traders, the Minister said. New tasks will devolve upon it as its work proceeds, in the light of its developing experience and the needs of Canadian business.

The Minister explained that the executive officer who will be charged with the primary responsibility for directing the activities of the Corporation will be its director and general manager, Mr. W. D. Low, former chairman of the Canadian Export Board. Mr. Maxwell Mackenzie, Deputy Minister of Trade and Commerce, will be president of the new organization. The board of directors will be: Mr. Hector B. McKinnon, head of Commodity Prices Stabilization Corporation; Mr. David Sim, Deputy Minister of National Revenue; Mr. V. W. Scully, Deputy Minister of Reconstruction and Supply; Mr. D. B. Finn, Deputy Minister of Fisheries; Mr. L. P. St. Amour, assistant deputy governor of the Bank of Canada and Mr. Low.

Repatriation of Japanese from Canada

As mentioned in the January issue of the *LABOUR GAZETTE*, (p.8) the Supreme Court of Canada was asked by the Government for an

opinion on the validity of the three Orders in Council dated December 15, 1945, dealing with repatriation of Japanese from Canada.

The Court heard counsel for the parties concerned on January 24 and 25, 1946. Briefs were presented on behalf of the Co-operative Committee on Japanese Canadians, the Attorney-General of Saskatchewan (supporting the C.C.J.C. brief), the Attorney-General of Canada, and the Attorney-General of British Columbia (supporting the Attorney-General of Canada's brief).

The Supreme Court handed down its judgment on February 20, 1946, which was not unanimous.

(1) The Chief Justice and Justices Kerwin and Taschereau are of the opinion that the Orders in Council in question are not ultra vires in whole or in part.

(2) Justices Hudson and Estey are of the opinion that the Orders in Council in question are not ultra vires except paragraph 4 of Section 2 of P.C. 7355, which states:

(4) The wife and children under sixteen years of age of any person for whom the Min-

ister makes an order for deportation to Japan may be included in such order and deported with such person.

(3) Mr. Justice Rand is of the opinion that P.C. 7355 is not ultra vires in relation to Japanese Nationals, naturalized Japanese Canadians, or persons going voluntarily, but it is ultra vires in relation to compulsory deportation of Canadian-born Japanese, as well as wives and children under sixteen years of age who are not within the first two classes; and that P.C. 7356 is not ultra vires in taking away the rights and privileges of Japanese as Canadian Nationals, but is ultra vires insofar as it revokes the naturalization of such persons under the Naturalization Act; and that P.C. 7357 is not ultra vires subject to the requirements of the Naturalization Act as to grounds for revocation of naturalization.

(4) Mr. Justice Kellock is of the opinion that P.C. 7355 is not ultra vires except insofar as it authorizes deportation of Canadian-born Japanese, and wives and children under sixteen years of age; and that P.C. 7356 is not ultra vires except Section 1 insofar as it provides for loss of status of a British Subject; and that P.C. 7357 is not ultra vires except as it may authorize a departure from the British Nationality and Status of Aliens Act, 1914.

In summary, the Supreme Court by a majority of four to three ruled that the Orders in question were not ultra vires the Governor in Council in any part except paragraph 4 of Section 2 of P.C. 7355, which is quoted above.

The Prime Minister, Rt. Hon. W. L. Mackenzie King, announced on March 13 that the Government would facilitate any appeal which it was desired to carry to the Judicial Committee of the Privy Council from the decision handed down by the Supreme Court.

Pending the outcome of such an appeal to the Privy Council, action under the Orders in Council with regard to deportation will be suspended. In the meantime, the Department of Labour will proceed with arrangements to assist any Japanese who wish to leave Canada to do so at an early date. Mr. King made it clear that notwithstanding the fact that the Orders in Council are under review, any Japanese persons who wish to go to Japan will be accorded the terms provided for in Order in Council P.C. 7355, which allows the removal of the value of all property and assets held in Canada, and which provides for minimum financial credits and government assistance in needy cases. Persons leaving under these arrangements will be accorded free transportation for themselves and their families and for whatever baggage allotment is allowed by shipping conditions.

The Prime Minister stated that the Government would defer the appointment of the commission to review the cases of persons of Japanese origin until judicial review of the Orders in Council is completed. Prior to the appointment of the Commission, its terms of reference, as set forth in Order in Council P.C. 7357, will be reviewed by the government.

Amendment to regulations regarding conscientious objectors

The Minister of Labour, Hon. Humphrey Mitchell, announced in the House of Commons on March 25, an amendment to the regulations respecting conscientious objectors who may be

willing to assist in relieving the shortage of farm labour. He said on that occasion:

"Under the National Selective Service Regulations, men who were called under the Mobilization Regulations and who were recognized as conscientious objectors by mobilization boards, were required to perform alternative service work subject to specific conditions. One of the requirements was that a portion of the conscientious objector's earnings (which was designated under contract) must be paid by the employer to the Canadian Red Cross Society. Conscientious objectors in alternative service work number 10,870 and 6,749 are employed in agriculture. Contributions to the Red Cross society from the inception of the regulations to January 31, 1946, amounted to \$2,248,913.84.

"I do not intend, nor do I believe that the citizens of this country would agree, to relieve conscientious objectors from alternative service work until all enlisted men in the armed forces, or at least the majority of them, have been discharged.

"However, in view of the urgent need for increased agricultural production, it has been decided that some relaxation of the regulations should be effected which would encourage greater effort in agricultural production and to assist in furthering the supply of available agricultural labour. Therefore, under authority vested in me under the National Selective Service Regulations, an order has been issued providing:

"(1) Every postponed conscientious objector at present engaged in agriculture, or who becomes engaged in agriculture after the date of the order shall at the conclusion of the employment period ending March 31, 1946, be relieved of further payment to the Canadian Red Cross Society, provided he continues to be engaged in agriculture.

"(2) Every qualified agricultural worker at present engaged in the performance of alternative service in alternative service work camps shall be granted leave of absence for work in

agriculture and will not be required to contribute from his wages to the Canadian Red Cross Society so long as he continues to be engaged in agriculture.

"(3) No postponed conscientious objector or alternative service worker to whom the order applies may work for an employer other than the one with whom he is at present engaged, or with whom he enters employment except by first obtaining the consent of a divisional alternative service officer.

"It is understood, of course, that any conscientious objector who leaves agriculture will immediately become subject to the regulations as they have applied heretofore.

"Under the plan as proposed, I am confident there will be no movement of farm labour to the city in so far as conscientious objectors are concerned, but I believe there will be a definite movement of these workers from the city to the farm, as a result of this change."

Review of Canadian manpower situation during 1945

Elsewhere in this issue, on page 511, appears a review of the Canadian manpower situation during 1945. The article describes the trends in employment from the beginning of the year, when

war employment was high, through the achievement of victory and the ensuing period of re-conversion to peacetime production. It is accompanied by a number of tables and charts.

Report on labour legislation in Canada, 1944

The Annual Report on Labour Legislation in Canada, 1944, which was recently issued by the Department of Labour, is the sixth supplement to Labour

Legislation in Canada as existing on December 31, 1937. The Report contains the text or a summary of all labour laws enacted in 1944 by the Parliament of Canada and the provincial legislatures. Orders in Council of interest to labour are also summarized or noted.

The legislation contained in the Report is reviewed in the Introduction under such headings as: Trade Unions and Collective Bargaining; Factories and Shops; Employment of Children; Wages and Hours of Labour; Workmen's Compensation; Safety and Health; Vocational Education and Apprenticeship; Post-war Reconstruction and Veterans' Affairs.

The main volume of the series may be obtained from the Legislation Branch of the Department for one dollar and the supplements for twenty-five cents each.

Labour bills in B.C. Legislature would reduce working hours

Seven labour bills have been introduced into the British Columbia Legislature by the Minister of Labour. If enacted, three of these statutes will affect hours of labour. Amendments to the Hours of Work Act will reduce from 48 to 44, subject to special exemptions, the maximum weekly hours of workers in mines, factories, shipyards, lumbering, construction, road transport, shops, bakeries, hotels and restaurants and elevator operation. A consequential amendment in the Factories Act reduces the normal maximum hours of women and girls in factories from 48 to 44 and, when overtime is permitted on not more than 36 days in the year, reduces the limits from 54 to 50 hours in a week. Similarly, in shops, boys or girls under 16 must not be employed more than 44 hours in a week.

The Board of Industrial Relations administering the Hours of Work and Minimum Wage Acts, the latter of which apply to classes of workers which the Hours Act does not cover, will have power, by an amendment in the Male Minimum Wage Act, to limit hours, an authority it already had under the Female Minimum Wage Act. In both cases the limits must be compatible with those prescribed by or under the Hours of Work Act. The Board is henceforth to consist of not more than seven and not fewer than five members, instead of five, and it is expressly stipulated that it is to be "representative of organized groups of employers and employees and of the general public."

A new Annual Holidays Act will provide for one week's holiday with pay each year for all workers except those engaged in farming and domestic service.

The deduction of one cent a day from workers' wages towards the cost of medical aid in workmen's compensation cases is to be discontinued. An injured workman will now have three years instead of one in which to file an accident claim.

Amendments to the Shops Regulation and Weekly Half-holiday Act will provide that, on petition of not less than three-quarters of the occupiers of shops of any class, a municipal council may, by by-law, require the closing of all shops of their class for one whole day in a week.

Retirement of Arthur J. Odam from Department of Labour

The Department of Labour honoured one of its senior administrative officers upon the occasion of the recent retirement of Mr. Arthur J. Odam.

At the presentation ceremony the Minister of Labour, Hon. Humphrey Mitchell, empha-

sized the special value of Mr. Odam's competent work and his faithfulness beyond the call of duty. Also speaking for the staff, the Deputy Minister, Mr. Arthur MacNamara, lauded Mr. Odam's major contribution to the work of the Department and his co-operation with his colleagues.

Entering the Civil Service in the Public Works Department in 1916, Mr. Odam transferred to the Employment Service Branch of the Labour Department in 1919, then presided over by Dr. Bryce M. Stewart, later Deputy Minister of Labour and now of New York City. Except for a temporary period with the Unemployment Insurance Commission after it was established in 1940, Mr. Odam has been continuously with the Labour Department, having held several positions the latest being that of Senior Statistician in the Research and Statistics Branch. An active member of the International Association of Public Employment Services, Mr. Odam participated in several conferences of this organization in Canada and the United States. Active in Civil Service affairs, Mr. Odam has been a member of the Professional Institute since 1920, and an active member, and at times a representative, of the Civil Service Association of Ottawa since he first entered Government Service.

Decline in meat consumption during 1945

Preliminary estimates indicate that the civilian consumption per capita of all meats declined sharply in 1945, according to figures released by the Dominion Bureau of Statistics. Total civilian consumption is estimated at 136.5 pounds per capita in 1945 as compared with 149.8 pounds in 1944. Nearly all of the reduction is attributable to a decline in pork consumption, which for 1945 is 10.6 pounds lower than the 1944 figure of 61.4 pounds per capita.

While the 1945 per capita consumption is down sharply from previous years, it is still considerably above the pre-war average, being over 18 pounds greater than the 1935-39 average. The decline in consumption is partly a result of the reintroduction of meat rationing in September, 1945. Lard consumption in 1945, estimated at 5.9 pounds per capita for the civilian population is 2.4 pounds lower than the estimate for the previous year. However the 1945 consumption is two pounds higher than the pre-war average of 3.9 pounds per capita, per annum.

Civilian consumption per capita of meats was as follows in 1945, totals for 1944 being in brackets: beef 61.6 (62.4) pounds; veal, 12.1 (11.0); mutton and lamb, 4.9 (4.8); pork, 50.8 (61.4); offals, 4.4 (7.4); canned meats—carcass equivalent, 2.7 (2.8).

British employers required to give jobs to disabled persons

Beginning March 1 all British employers hiring twenty or more employees were required to hire enough disabled persons to equal two per cent of their total employment.

Formal notice was served on employers two and one-half months before the scheme was to take effect, in order to give them time to prepare for the statutory obligations which fall upon them under the provisions of the Disabled Persons (Employment) Act. The definition of a disabled person is "one who by injury, disease, or congenital deformity is substantially handicapped in obtaining or keeping employment or undertaking work on his own account of a kind which, apart from that injury, disease or deformity, would be suited to his age, experience, and qualification."

The only disabled people who will count for the purpose of the quota are those who are registered as such under the Act. Registration began on September 25, 1945, (L.G., Nov., 1945, p. 1609), and up to February 18 over 277,000 persons had registered.

The obligation to employ a quota does not mean that the employer must discharge non-disabled persons to make room for disabled. It means he must take the opportunity when engaging fresh staff to build up to his quota.

The prescribed percentage will not remain as low as two per cent for many months, but will be raised as soon as is necessary to facilitate the resettlement of large numbers of will be raised as soon as is necessary to facilitate the resettlement of large numbers of disabled persons coming on the register. Two per cent is the standard percentage for general application, and will apply to all employers unless a special percentage has been fixed for any industry.

Of the 277,105 persons who had registered up to February 18, 132,725 had received their disability as a result of war service, 46,124 from industrial accidents or injuries, and 67,592 from other accidents or diseases; while 27,583 had been disabled from birth or childhood, and 3,081 were classified as "other war casualties."

United Kingdom drive to increase export trade

Statistics released in March by the United Kingdom Information Office illustrate the progress of Britain's drive to increase her foreign trade.

Exports during February, 1946, which totalled almost 60 million pounds, were on a daily average one-sixth above the January level and by the end of the month had exceeded 80 per

cent of the pre-war rate. During February, 1945, while Britain was still at war and subject to air attacks her exports totalled 23 million pounds. Immediately victory was won a rapid start was made on six years' accumulated overseas orders, and the rate of exports rose rapidly.

Britain's imports in February showed a decline from January of 16.7 million pounds, caused mainly by a drop in purchases of food, drink and tobacco. However the Office states that the reduction in imports is to be regarded as a temporary phase. "The United Kingdom long-term trade policy aims at the expansion of both exports and imports. Due to her war sacrifices Britain must cut her imports until a rise in exports again places her in a position to increase overseas purchases. The success of the plan to raise exports, which is the core of Britain's production drive, is essential for a prosperous Britain—and for a prosperous world."

(On April 8 the Hon. James A. MacKinnon, Canadian Minister of Trade and Commerce, announced in the House of Commons that Britain had agreed to relax her import restrictions in regard to 38 items whose entry had been prohibited, and to permit Canadian exporters who built up trade connections in Britain in pre-war years to ship about 20 per cent of the value of their pre-war business.)

Study of incentive plans in U.S.A.

The United States Secretary of Commerce, Mr. Henry Wallace, recently announced the formation in his department of an incentive division which will undertake a study of profit-sharing, bonus and other incentive systems for increasing the production and distribution of goods.

The division will include sections to evaluate separately incentive programs for labourers, salaried employees, salesmen and executives, and will be headed by Mr. Charles E. Brokaw.

Training of building apprentices in United Kingdom

The United Kingdom is aiming at training three times as many building apprentices and craftsmen at a time as were trained before the war, according to a recent statement by Miss Ellen Wilkinson, Minister of Education. The present target is to train 90,000 at a time in Britain's technical colleges and institutes. Junior building schools which had an annual intake before the war of four hundred have now increased this to between five and six thousand.

A system of part-time release from study in the daytime will be used, whereby "work and study will go side by side". Encourage-

ment is also being given to the training of teachers.

Reference was made in the June, 1945, LABOUR GAZETTE (p.797) to a scheme whereby apprentices erect buildings under the guidance of craftsmen. At the end of last year the first houses built by apprentices in this way were officially opened. Apprentices train under an apprentice master on building work set aside for the purpose and if the resultant costs are above normal, the local authority is reimbursed from Government funds.

Settlement of strike at General Motors

Settlement of the strike of 350,000 members of the United Automobile Workers, employees of General Motors Corporation (L.G., Feb., 1946, p.138) was reached on March 13. The strike had lasted 113 days.

Terms of settlement included a wage increase of 18½ cents an hour, together with increases in vacation pay and in overtime rates for seven-day continuous operations, equal pay for women and a form of union security.

The wage increase lifts from about \$1.12 an hour the national average pay of hourly-rated General Motors workers to about \$1.30½ an hour. It means, however, that the net take-home pay of the average worker, operating on a 40-hour week, will be less than it was at the old rate during the war, when he worked forty-eight hours, with eight hours at time-and-one half.

U.S. court rejects "superseniority" for veterans

In a two-to-one vote the United States Circuit Court of Appeals recently reversed an earlier decision of a lower court which had upheld "superseniority" for veterans. The reinstatement provisions of the Selective Service Act have been interpreted by the Selective Service administration as granting the returning veteran the right to reinstatement even though this may necessitate the discharge of a non-veteran with greater seniority (L.G., Nov., 1945, p.1609).

The court held that it seemed "beyond debate" that the legislation was not intended to give veterans a "gain in seniority" and that it was unlikely that Congress, which passed the law when the country was at peace, would have accepted a proposal which "gave industrial priority regardless of their length of employment, to unmarried men—for the most part under thirty—over men in the thirties, forties and fifties, who have wives and children dependent upon them."

The court qualified its decision by expressing the hope that the question should reach the Supreme Court as soon as possible.

Housing in United States Expenditure on new residential housing in the United States was eight times greater during February, 1946, than in February, 1945, according to the U.S. Bureau of Labour Statistics.

Expenditures for privately financed housing have been rising at an average monthly rate of nearly 13 million dollars since February a year ago, the Bureau announced. Though some of the increase in expenditures for housing has been absorbed in higher prices for somewhat larger houses than were built a year ago, much of it reflects an increase in the number of dwellings being provided.

The value of new residential building put in place during February, 1946 totalled 175 million dollars, higher than for any February during the period for which monthly data are available (January 1939 to date). In spite of the continued gain during the past year, however, home building is still far below the monthly rate which must be attained to satisfy current and prospective needs, the Bureau stated.

Expenditures for new private non-residential building, which competes directly with home construction for critical building materials, rose 22 million dollars during February, 1946, and 170 million dollars from February 1945. While all types of private non-residential building participated in the increase over the year, the greatest gains occurred in expenditures for industrial building, which nearly tripled between February, 1945 and February,

1946 (from 39 million to 121 million dollars) and for commercial building, which increased ten times (from 7 million to 72 million dollars).

Estimated total construction expenditures (including minor building repairs) in continental United States approximated 654 million dollars this February—5 per cent more than the January total of 624 million dollars. This gain in what is normally a poor construction month is attributable entirely to an advance in privately-financed non-farm building. All other categories of construction expenditures remained stationary or declined seasonally.

Curtailment of publicly-financed activity, first apparent in June, 1945, continued during February, 1946. The 85 million dollars expended for public construction this February was the lowest figure for any month in recent years and was about half the amount spent in February, 1945.

Public construction expenditures are at their present low level because expenditures for peacetime public works projects (highways, community facilities, conservation work, etc.) have not begun to expand. The volume of highway construction, for example, amounted to only 16 million dollars in February 1946, as compared with prewar levels for the corresponding month of 37 million dollars in 1939. Expenditures for conservation and development work totalled 24 million dollars in February, 1941, but only 10 million dollars this February.

Developments in Price Control Policy

Price Adjustments Authorized—Anti-Inflation Policy Reaffirmed

A NUMBER of upward price adjustments were recently permitted by the War-time Prices and Trade Board for certain products including iron and steel, lumber, butter, pork, and pulp and paper.

On April 2 the Hon. J. L. Isley, Minister of Finance, made the following statement in the House of Commons dealing with this fact and reaffirming the Government's anti-inflation policy:—

During the past few days, as hon. members no doubt will have noticed, the Wartime Prices and Trade Board has authorized a number of important price adjustments. Ceiling prices for iron and steel and for various consumer articles made from iron and steel have been increased. Producers of lumber will be permitted to charge higher prices, although wholesalers' and retailers' ceilings remain unchanged. Butter and pork prices have been raised. Price increases have been permitted for various pulp and paper products other than newsprint. In the course of the next three or four months small increases will take place in the retail prices of clothing and furnishings consequent upon the government's decision to eliminate subsidies on imports of raw cotton and wool.

Taken in conjunction with the decision made at the beginning of February to suspend price ceilings on a list of some 300 items and with the relaxation of rigid price controls on many imported goods, these recent steps may be regarded by some as implying that price control is breaking down, or at least that the basic policy of the government has been changed.

I am therefore taking this opportunity of making it plain that such is not the case. These adjustments are part and parcel of a carefully planned program which has been developing gradually since V-E day, and which, in its broad outlines, has been explained to the house and to the public on several occasions during the past twelve months. These measures do not mean that the Government's anti-inflation policy as administered by the prices board is beginning to falter. They do not mean that we contemplate an early lifting of our price control system, nor must they be taken to imply that any serious increase in the cost of living is impending. On the contrary, they indicate that the Govern-

ment is prepared to maintain control over the movement of prices during this difficult and highly dangerous transition period.

Policy Adopted to Fit Transition Period

I need hardly say that the danger of inflation is still very great. Many commodities are still in short supply, e.g., food, textiles and building materials—all highly essential. Purchasing power and consumer demands exceed their war-time levels. In this situation it would be unthinkable to allow prices to find their own level. But that does not mean, of course, that the administration of price control should not change. The system which served Canada so well in war must now be adapted, and is being adapted, to meet the special circumstances of the transition period.

Our system of price control has always permitted price adjustments in cases of genuine necessity. The special significance of the adjustments recently announced arises from the fact that they cover a wider area of Canadian industry than has so far been affected. I believe, however, that this will be recognized as the sensible approach to the problem. It would be folly to pretend that the Government could continue to administer the same more or less inflexible system of price ceilings that was appropriate to the uncertain days of 1942 and 1943. Here and there the line has to bend if it is not to break.

The declared aim of the Government's price policy for the transition period is to give a reasonable degree of stability to living costs while creating conditions favourable to a high level of employment and production. In practice this means that where the Wartime Prices and Trade Board is satisfied that production is capable of expanding on the basis of basic period selling prices, then basic period prices will continue as the legal maxima. On the other hand, where it can be demonstrated to the satisfaction of the prices board that present ceiling prices are prejudicially affecting production and employment, adjustments are made. But except for commodities in quite ample supply, or relatively unimportant, price ceiling are not suspended.

As the house will realize, it is easy to state general principles such as these but more difficult to put them into practice. The prices

board is literally in a continuous fight to prevent price increases from being extended any further than is absolutely necessary. The increases in prices, to which I referred earlier, provide examples of the policy in practice. In the case of iron and steel, the support of the price structure formerly given by war production has disappeared. Consequently, wartime increases in costs must now be reflected in selling prices of the basic iron and steel products. The wartime accumulation of cost increases, particularly wage increases, is also the basic factor behind the increase in the producer's price of soft-wood lumber, and in pulp and paper prices.

Subsidies

Another factor behind certain recent price increases stems from the decision which the Government reached some time ago to reduce or eliminate subsidy payments. While subsidies played a vital part in checking the forces of inflation during the war, they are not desirable as a permanent feature of the price structure, and should be removed as expeditiously as possible. Certain subsidies were paid to offset temporary wartime cost increases and are more or less self-liquidating. The subsidies formerly paid on imports of petroleum are a good example of what I mean. On the other hand, it looks as if the wartime increase in the cost of imported cotton and wool, for example, is more or less permanent. In view of this, the board has largely withdrawn from the payment of subsidies on wool imports in recent months, and has reduced the amount of subsidy paid on cotton imports. At the same time, the prices board has authorized certain price increases that will be necessary to compensate for the higher price of wool and cotton as the various products move from the mills and converters, through to the garment manufacturers and down to the final consumer. The price increases authorized have been carefully worked out in relation to seasonal production, and in relation to inventories and other such factors, and the board is confident

that the increase of consumer prices will be kept to the bare minimum necessary to offset subsidies. In other words, basic period or 1941 price ceilings in this particular industry, as in other industries where adjustments are necessary, will cease to be the rule, but the system of legal maximum price ceilings remains intact.

The recent increases in the prices of butter and pork products require very little explanation. In the case of butter, an additional incentive is needed if even a restricted consumer ration is to be met. In the case of bacon, the United Kingdom, realizing that hog numbers were declining seriously, agreed to raise contract prices immediately, and the domestic price was simply adjusted to the new level.

I am confident that the policy we have been following is capable of meeting the realities of this period of adjustment. It will undoubtedly mean a modest increase in the cost of living. But it will enable us to preserve the economic advantages we have gained from nearly five years of self-discipline on the economic front, and will protect consumers and producers alike from the economic and social dislocation which would surely develop if present inflationary pressures were given free rein.

In conclusion I wish to reiterate that the government has no intention of putting into effect what some political and other groups are advocating, namely, the removal, wholly or substantially, of price control.

We believe that price control and the maintenance of ceilings have the support of the Canadian people and we do not intend at this stage of the fight to flout their opinion or destroy the results of nearly five years of determined effort to prevent inflation.

I would like to appeal to this house and to the Canadian people for continued support of measures which we are satisfied are necessary if economic stability is to be maintained, if the real value of our currency and our bonds is to be protected, and if the bankruptcy and unemployment resulting from a price boom followed by a price collapse are to be avoided.

National Health Service in Great Britain

Complete Medical Protection to be Provided by Government

A BILL to establish a national health service was introduced in the British Parliament on March 20. Based on the principle that complete medical treatment should be available to everybody, regardless of income, and that the maintenance of the people in good health must become a national responsibility, the national health service is part of the broad social insurance system that is being established in the United Kingdom (L.G., March, 1946, p. 287).

The Bill fulfills the purposes set forth in a Government White Paper two years ago (L.G., 1944, p. 443), but goes further in the direction of nationalization. It also consolidates the advances made during the war in re-organization of hospital services.

Services to be Provided Free

A complete free medical service is to be available to every man, woman and child unconditionally. The services which the Minister of Health will be obliged to provide take four forms.

Firstly, personal advice and treatment by doctors and dentists chosen by the patient will be given at health centres, at homes, and at the doctor's own surgery. Doctors will be free to join the service or not, and if they do they will be still able to take private fees.

Secondly, all forms of general and specialist hospital care and treatment and advice is to be given at hospitals, institutions, clinics, health centres and the patient's home. All hospitals and consultant services are to be taken over by the state.

Thirdly, supplementary services are to be provided by the local authorities, including midwifery, maternity and child welfare, health visiting, home nursing, priority dental service for children and expectant and nursing mothers, domestic help where needed on health grounds, vaccination, immunization, ambulance services, additional special care and after-care in illness. Blood transfusion and pathological laboratory services will be on a national scale.

Fourthly, all necessary drugs, medicines, dentures, spectacles and other necessary appliances are to be provided at hospitals, health centres, clinics and drug stores.

There will be no fees or charges to patients, but certain additional amenities will be available on payment, such as additional privacy in hospitals (subject to the prior claims of those

for whom it is medically necessary). The service will not be conditional on insurance qualification, though part of the contributions under the National Insurance Scheme will be used together with taxes and local rates to finance the Service.

The Doctor's Position

The relationship between doctor and patient will not be changed, except that the doctors will be paid from public funds. The doctors will be employed by a local council, half the members of which will be doctors and pharmacists. They are to receive part salary, varying with local circumstances and the doctor's experience, and capitation fees varying with the number of their patients. The precise rates will be fixed in consultation with the medical profession, according to an independent report now being drawn up.

All doctors taking part in the new service will be in contact with the executive council for the area in which they practise. The executive council will be required to draw up and publish lists of all general practitioners who wish to participate. People will then choose their doctor and each doctor will have his own list of the people whom he has agreed to attend. There will be machinery for allocating among the doctors concerned such people as wish to take advantage of the service but have not chosen a doctor for themselves or have been refused by the doctor chosen by them.

A special tribunal is to be set up to investigate cases where it is claimed—either by the executive councils or otherwise—that the continued inclusion of any doctor, chemist, dentist, or optician in the lists drawn up by the executive councils would be prejudicial to the efficiency of the service. The tribunal will in each case include a member of the same profession as the person whose case is being investigated.

It is intended to adjust payments to encourage doctors to practise in the less attractive places. The distribution of doctors will be fixed by a mainly professional medical practices committee, which will be able to refuse consent to starting a practice on the grounds that there are already enough public service doctors in the place in question. Practices wholly or partly within the national service may not be sold and existing practitioners

will be compensated for loss of values. The total compensation figure agreed with the British Medical Association is sixty-six million pounds, though the Association has not committed itself to the policy of abolishing the sale of practices.

Health Centres

The chief feature of the new personal service will be health centres to be provided by the local authorities. As these are developed, local doctors will be able to use their facilities as they please if participating in the new service.

The object is that the health centre system, based on premises technically equipped and staffed at public cost, shall afford facilities both for the general medical and dental services and also for many of the special clinic services of the local health authorities, and sometimes also for out-post clinics of the hospital and specialist services. Besides forming a base for these services the centres will also be able to serve as bases for various activities in health education.

New Hospital Scheme

The chief difference between the Bill and the Coalition Plan is the transference to the Government of all hospitals, voluntary or public, in England and Wales. The endowments of the voluntary hospitals, however, will pass to a new hospital endowment fund. The Minister of Health will thus have the duty of providing hospital and consultant services of all kinds, including general and special hospitals, maternity accommodation, tuberculosis sanatoria, infectious diseases units, provision for the chronic sick, mental hospitals and mental deficiency institutions, accommodation for convalescents and medical rehabilitation and all forms of specialized treatment, such as orthopaedics, cancer, neuro-surgery, plastic-

surgery, paediatrics, gynaecology, and ear, nose and throat treatment.

These services, together with blood transfusions and pathological laboratories for the control of epidemics, are to be organized nationally but administered by regional hospital boards and local hospital management committees. The capital value of the new endowment fund will be apportioned among the regional boards. The boards may receive gifts or legacies and hold property on trust.

There will be sixteen or twenty of these boards, which will thus plan and operate a complete hospital and specialist service for areas much larger than the existing local Government divisions (cities, counties, towns, etc.). They will employ the hospital staffs. Specialists taking part in the service will be attached to the hospitals, but like the general practitioners will be able also to practise outside the service.

A new Central Health Services Council will advise the Minister of Health on the administration of the new Services. Its members will be doctors, dentists, nurses and other professional people and those experienced in hospital management and local Government.

Cost of Scheme

The cost of the scheme in the early years is estimated at £152,000,000 a year and, allowing for a contribution of £32,000,000 from the National Insurance Fund and for savings on present grants, the net annual additional Exchequer expenditure is estimated at £95,000,000. The Government will bear the full cost of the hospital and specialist services—estimated at £87,000,000—and of the family doctor, dentist, pharmaceutical services—estimated at £45,000,000—and will also pay about £6,000,000, or roughly half, of the cost of the services to be administered by the local health authorities.

British Family Allowances Regulations

REGULATIONS under the Family Allowances Act, 1945, of the United Kingdom (L.G. 1945, p. 812) explaining the qualifications required, how claims are to be made, and how disputes will be settled, were issued by the Minister of National Insurance on January 31, 1946.

Applications for allowances must be certified by some responsible person; a definition of "responsible person" is being prepared and it will be made as wide as possible to enable applicants to obtain certifying signatures quite

easily. Payments, beginning August 6, 1946, will be made through the Post Office weekly to an estimated 2,600,000 families representing 4,500,000 children. Tuesday will be the official pay-day but each week's money form will be valid for six months.

A family living in Great Britain will qualify for an allowance if the husband or wife, or claimant if the claim is not from a married couple, can show that he or she is a British subject born in the United Kingdom, or born outside but living in Great Britain for 12

months out of the preceding two years; or that he or she is an alien who has been living in Great Britain for three out of the preceding four years. Women who have lost their British nationality because of marriage to an alien will be considered as British subjects for purposes of the Act. Special treatment is also provided for British subjects born abroad, and for aliens who can show that they cannot meet the residence qualification because of war circumstances. Servicemen and merchant seamen, during their service, will be considered as living in Great Britain.

An allowance will be paid for a child until July 31 following his 16th birthday so long as he is under full-time instruction at school (the statutory school-leaving age is 14 at present and will be 15 after April 1, 1947) or so long as he is an apprentice. A school for the purpose of the Act includes any university, college or school within the meaning of the Education Acts.

Disputes about claims are to be handled by courts of referees to be appointed by the Lord Chancellor whose decisions will be final.

Organization of Foremen in the United States

A HISTORICAL review of the conditions that led to the formation of the Foremen's Association of America has been published in a recent issue of the United States Department of Labour's publication the *Monthly Labour Review*.

Foremen in mass-production industries in the United States such as automobiles, iron and steel, and rubber have been specifically excluded from production workers' unions although supervisory employees in the railway, maritime, printing and building industries have been organized for a long time, the study reports. It states that powers of foremen have been substantially curtailed whenever production workers acquired union agreements covering wages, hours, seniority, etc., and their rate of wages failed to keep pace with increases secured by production workers. A further discrepancy that was illuminated during the war was the inequity of the rate for overtime that was paid supervisory personnel. Foremen "were not protected by job security and when no longer needed as supervisors and returned to the production line, they found themselves far down on the seniority lists."

The first decision to organize was reached amongst a small group of foremen in one division of a Ford Motor Company factory in Detroit. It spread to other of the company's plants and to large industrial concerns in the area, culminating in the adoption of a constitution on November 2, 1941. The organization adopted the name Foremen's Association of America.

The union appointed a full-time president in July 1942 and other full-time officers early in 1943. It encountered numerous difficulties in gaining recognition from employers and the United States Labour Relations Board due primarily to the latter's indecision concerning the question of whether foremen were intrinsically agents of management.

However, membership grew from 350 in September 1941 to 28,240 in June 1945, with 281 chapters recorded. The Association admits foremen for any employer to its membership. Its constitution specifies that any employees "whose duties require the supervision of other employees, or who direct work, who may or may not supervise other employees" may become members of the Association after having been employed in such capacity for a period of not less than 30 days. Supervisory personnel who formulate managerial policy are specifically excluded from membership.

Rulings by the National Labour Relations Board have varied on the question of certifying organizations to represent foremen. The first case before the Board resulted in a ruling that foremen were employees within the meaning of the Wagner Act and in certification of a bargaining agent. On May 11, 1943 the Board in rendering a decision in the Maryland Drydock case, reversed its position and refused to order an election and dismissed the petition for certification. This position was subsequently modified in March, 1945, when the Board directed that an election be held among the Packard Motor Car Co. foremen. The Foremen's Association won the election but the company refused to bargain. The Board subsequently ordered the company to bargain with the Association at its plants in Detroit.

The Packard case, while it affirmed the right of separate foremen's unions to serve as collective bargaining agents, denied supervisory personnel representation by a union that also represented production workers.

However in March, 1946, the Board reversed this stand and ruled that foremen have the right to join and be represented by unions of rank-and-file production workers. This case involved coal mine foremen employed by the Jones and Laughlin Steel Corporation, Pittsburgh, and the United Mine Workers (AFL).

Legislative Proposals of Labour Organizations

DURING the past month the major Canadian labour organizations presented to the Dominion Government their programs of proposed labour legislation.

A delegation from the Trades and Labour Congress of Canada appeared before the Cabinet on April 4, and was received in the Railway Committee Room of the House of Commons by the following members of the Government: Rt. Hon. W. L. Mackenzie King, Prime Minister; Hon. Humphrey Mitchell, Minister of Labour; Hon. Ian MacKenzie, Minister of Veterans Affairs; Rt. Hon. J. L. Ilsley, Minister of Finance; Hon. C. D. Howe, Minister of Reconstruction and Supply; Hon. J. A. MacKinnon, Minister of Trade and Commerce; Hon. Colin Gibson, Minister of National Defence for Air; Hon. Alphonse Fournier, Minister of Public Works; Hon. Ernest Bertrand, Postmaster General; Hon. Brooke Claxton, Minister of National Health and Welfare; Hon. J. A. Glen, Minister of Mines and Resources; Hon. Joseph Jean, Solicitor General of Canada; Hon. Lionel Chevrier, Minister of Transport; Hon. Paul Martin, Secretary of State of Canada; Hon. Douglas Abbott, Minister of National Defence and Minister of National Defence for Naval Services; Hon. James J. McCann, Minister

of National Revenue; Hon. H. F. Bridges, Minister of Fisheries.

Another delegation from the Canadian Congress of Labour was received by the Government on April 5 with the same representation of the Cabinet present. This meeting also took place in the Railway Committee Room.

The chief officers of the Canadian and Catholic Confederation of Labour presented the memorandum of that organization on April 2. Receiving them in Room 268 of the House of Commons were the following members of the Government: Hon. Humphrey Mitchell, Minister of Labour; Rt. Hon. Louis S. St. Laurent, Minister of Justice; Hon. Douglas Abbott, Minister of National Defence; Hon. Paul Martin, Secretary of State; Hon. Joseph Jean, Solicitor-General; Hon. Lionel Chevrier, Minister of Transport; Hon. Alphonse Fournier, Minister of Public Works.

On April 9, the Dominion Joint Legislation Committee of the Railway Transportation Brotherhoods was received by the Prime Minister and several members of the Cabinet in the East Block office of the Prime Minister.

The following are summaries of the major legislative proposals contained in the Memoranda:

Trades and Labour Congress of Canada

THE memorandum read by Mr. Percy Bengough, President, expressed appreciation on behalf of the affiliates of the Trades and Labour Congress of Canada, for the opportunity of appearing before the Government of Canada under peace-time conditions.

It stated that experiences gained during the war have proved that Canada is in the "fortunate position of being able to grow and produce commodities far beyond the requirements of its own citizens. No sane person can be satisfied so long as there are people in this country who are unemployed and living under sub-standard conditions."

"We are convinced that if our Government and the people of Canada will exert the same ingenuity and dispatch to bring such conditions about as they did to win the war, then it will be possible to guarantee to every

Canadian, able and willing to work, an adequate income sufficient to provide a good home and comfortable living for himself and his family; that will free all from the fear of want for the whole of their lives, with efficient treatment during illness and full protection in old age."

Price Control

On the subject of price control the memorandum advocated the reconstitution of the Board administering such legislation to provide a tripartite representation of Government, labour and employers.

Wage Control

Referring to wage control, the brief stated: "While there is a growing resentment to wage controls and many requests for their complete

removal, we are still of the opinion that controls are necessary and cannot be operated without causing some dissatisfaction." It stated, however, that it did not agree that wages should be frozen to prevent inflation. "We desire that full recognition be given to the need for controlling other factors which often have a far greater bearing on the price of commodities, such as the operation of cartels, the purchasing of industries at enhanced prices, watered stock and stock manipulations, as well as poor management and excessive profits. We believe that far more attention should be paid to such factors which definitely affect commodity prices and the Government should not devote its whole activity to pegging wages at sub-standard levels in order to control prices."

"More recognition should be given to the fact that the machine is now doing the work. All of the people must participate in its benefits. They must have a buying power in balance with our modern productive ability if our economy is to successfully continue and employment is to be provided for our people."

With regard to War Labour Board authorizations, the memorandum further stated: "While the provisions authorizing a War Labour Board to approve an increase in wage rates only where a gross inequality or gross injustice existed has been repealed, the present provisions of Order in Council P.C. 348 restricts a War Labour Board to comparative rates within the same locality and the Board can only use comparable rates outside the locality if none exists in the locality. We submit that this provision definitely prohibits changes being made where most needed which is the rate of wages in low paid communities, which are a menace, not only to workers and employers outside of such low paid communities, but to our citizens generally."

In concluding this part of its brief the Trades and Labour Congress stated: "We are also strongly of the opinion that in instances in which employers and employees agree that wage increases are necessary and become part of a collective agreement, that the National or Regional Board should not be allowed to interfere."

Labour Relations Regulations

The 51 per cent of the total number of employees' votes necessary for certification, under the Wartime Labour Relations Regulations, P.C. 1003, was requested changed to 51 per cent of the votes cast, which the memorandum declared was, "the procedure followed in all democratic systems of elections."

The memorandum held that the clause in the Regulations excluding "persons employed in a confidential capacity", has been "distorted" and thousands of bona fide employees excluded from the benefits of this law. Correction of this condition was requested.

Section 20, Paragraph 1 of the Regulations, which reads, "no person shall, with a view to compelling or influencing a person to join a trade union or employees' organization, use coercion or intimidation of any kind, but this subsection shall not be construed to prohibit the inclusion of any provision in a collective agreement," was requested amended by adding "whereby all the employees of the employer or organization of employers shall be required to be members of a specified organization."

Other requested changes in the Regulations were:

That Sections 15 and 16 be amended to provide that changes to existing agreements may be made either by negotiations or through officers of the Department of Labour or a Board of Conciliation following the serving of notice to revise specified clauses rather than to involve termination of the entire agreement;

That the Order be amended to definitely prohibit company unions;

That its provisions be extended to include the employees of naval dockyards and similar Government services;

"We recommend a change in the Regulations whereby the union shall be recognized and certified as the bargaining agency instead of naming individuals."

Dominion-Provincial Conference

The Congress complimented the Government on its effort to establish labour and social laws on a uniform basis, which it felt presented the only basis for real progress. "We sincerely hope, as a result of the conferences of the Dominion and Provincial representatives, that the Dominion Government will be given full authority to enact a labour code giving all workers in Canada the right to organize and bargain collectively in its fullest sense; that a maximum forty hour work week be established without reduction in wages; that legislation be enacted guaranteeing to all employees at least two weeks' holidays with pay each year, in addition to all statutory holidays; that a minimum wage of 65 cents per hour, below which rate it shall be illegal for one to employ another, be established by law; that a decent aged citizen pension be

established, sufficient to guarantee a Canadian standard of living with all destitution tests eliminated and applicable to all on reaching the age of sixty years; that legislation be enacted making it illegal to employ children under sixteen years of age."

National Health Insurance

Enactment, at the present session of Parliament, of a national health insurance scheme was requested. The memorandum stated that, "such a scheme, framed in the best interests and available to all citizens, is long overdue."

National Housing Act

The Congress declared that, "a grave national emergency exists in the lack of housing available to families in low income categories. The situation is not being effectively met under the present legislation....."

It recommended that the National Housing Act be removed from the control of private banks and mortgage corporations and all loans should be made through a government agency, such as the Bank of Canada.

More attention, it felt, should be directed to the provision of rented shelter for low income groups.

Taxation

"We again request that the present exemption be raised to \$2,400 per year for married persons and \$1,000 per year for single persons."

Apprenticeship

The memorandum advocated the immediate institution of a nation-wide apprenticeship system and that an adequate living wage be provided for those who avail themselves of the opportunity. It suggested restrictions against the setting up of privately owned schools.

Shipping

On the subject of shipping, the memorandum contained proposals for the incorporation of various specific conventions and recommendations of the International Labour Office, into the Canada Shipping Act. They were as follows:—

- (a) Draft convention of hours of work and manning of ships.
- (b) Draft convention on individual liability of the ship owner in the case of sickness, injury or death of seamen.

- (c) Draft convention on sickness insurance for seamen.
- (d) Draft convention on minimum professional capacity for Masters and Watch-keeping Officers on Merchant Ships.
- (e) Draft convention on holidays with pay for seamen.
- (f) Draft convention on minimum age for admission to work at sea.
- (g) Draft recommendation applying the terms of the draft convention on hours and manning to ships not covered by the draft convention, e.g., coastal and inland water ships.
- (h) Draft recommendation on seamen's welfare in ports.

Railroad Retirement Act

On this matter, the memorandum observed: "We desire to bring to the attention of the Government the need for legislation similar to the American Railroad Retirement Act in order that the railroad workers of Canada may have the benefits of participating in a proper Superannuation Act. We believe that provisions should be embodied including decent pensions that will allow earlier retirement and so help to create employment and advancement for younger men."

Other Proposals

The memorandum contained certain other proposals some of which were as follows:

The long hours worked by both manipulative staffs and letter carriers in many localities in the Postal Services, should be adjusted.

Remedial adjustments should be made in the employment conditions of officials in the Immigration Service along with overtime pay for Sunday work and statutory holidays.

It should be made Government policy in placing contracts or orders for work that preference at all times be given to those employers who have labour agreements and those who employ union workers and observe union conditions.

In conclusion the Congress complimented the Government for its continued participation in the I.L.O.; for the assistance given to industrial research and for bringing those who were in the fire fighting services overseas under the War Service Gratuities Act.

The Congress also expressed appreciation for the co-operation received during the past year from the various departments of the Government.

Canadian Congress of Labour

THE brief of the Canadian Congress of Labour was read by Mr. Pat Conroy, Secretary-Treasurer.

At the outset, the brief expressed dissatisfaction with the Government's reconstruction planning. "It is evident," the brief alleged, "that no plans were made to permit an orderly transition from war to peace, apart from the disposal of industries which had been established by the Government, and which should have been retained for use in making civilian goods."

The Congress regretted that the Government had not adopted its proposals, made in other years, for the payment of dismissal pay for laid-off war-workers and for the establishment of tripartite industrial councils, and other measures for the planning of industry. "We have no alternative," the brief said, "but to feel that the Government is satisfied to let economic conditions drift from bad to worse, until another depression, probably on a wider scale and more disastrous than last, has occurred." The brief criticized "the admitted policy of the Government to abandon manufacturing plants erected at huge expense, or to dispose of them for nominal amounts to private industry, instead of operating them for the production of necessary consumer goods," and called for less reliance on private enterprise.

National Labour Code

The brief regretted that none of the amendments to the Wartime Labour Relations Regulations recommended by the Congress last year (L.G., May 1945, p.641) had been adopted. "The result has been that the National Wartime Labour Relations Board and the Regional Boards have operated under inadequate and restrictive regulations, and they have not been able to meet the justifiable requests of labour in many instances."

It urged the establishment, by agreement with the provinces or by an amendment to the British North America Act, of a national labour code to be effective for the post-war period.

Wage Policy

The amendment to the Wartime Wages Control Order made on January 31 was termed inadequate to meet the objections made by the Congress to the Order. The failure to consult labour prior to the appointment of a member of the National Board last October was also criticized.

The Congress asserted its belief that wage control was no longer necessary in Canada, and stated:—

During the war, employers who would otherwise have paid large amounts in excess profit taxes were willing in some cases to pay higher wages inasmuch as a large proportion of the increased wage-payment would be met out of excess profits, and they did not object to sharing excess profits to some extent with their employees. Conditions are now quite different, however, and it may properly be assumed that the opposition of employers to wage-increases will provide an adequate means of wage-control, and that wages may be left to the normal processes of collective bargaining.

The Congress further declared that it had adopted a wage policy calling for a general increase in wage-rates for the purpose of providing a higher standard of living.

It is felt that, in view of the advances in industrial production made during the war, it should now be possible to assure to every worker and his dependents economic security and an adequate income. The workers are obviously entitled to share in the benefits of new techniques of production, and they can do so only if their incomes are increased, while at the same time prices should be controlled to the extent necessary to prevent increases which would otherwise nullify higher wage-levels.

The Congress believes that, in order to provide employment for the increasing number of workers in the nation, it is essential that hours of labour be reduced to forty hours per week or less, without reduction in incomes. The tendency of modern industry is to make greater use of automatic machinery and labour-saving devices, with the result that productive activity requires less and less human energy. The only solution to the problem of unemployment caused thereby is the sharing of the available work among the available workers through a reduction of working hours.

During the war, the workers and the people of Canada accepted the constant and forceful admonitions of the Government with regard to the necessity of maintaining virtually absolute control over increases in wages, as a means of maintaining adequate control over prices. At the present time, however, we find that the Government is removing price-controls or establishing increased prices for a wide variety of products, and for such commodities as imported goods, while there has been no similar removal of controls with respect to wages.....

Prices

The Congress urged the maintenance of price control, the retention of subsidies on various necessities of life and agricultural products, and the appointment of a Bureau of Standards to ensure the protection of consumers against unfair practices, including the operation of sweat-shops, the payment of sub-standard wages, the degradation of quality, and the substitution of inferior materials in manufacturing.

With reference to the official cost-of-living index, the Congress declared that the cost of food bulked larger in the case of workers with low incomes than it did in the cost-of-living index. The index was termed "inadequate and misleading."

Housing

The brief urged that the Federal Government "assume responsibility for the provision of homes and the administration of adequate legislation to bring about a vast increase in the number of low-cost homes in Canada."

Labour Representation

Repeating the request made in previous years that labour be given "more adequate representation" on government bodies, the brief made specific reference to the appointment of the Canadian delegation to the American Regional Conference of the International Labour Organization at Mexico City. It protested that in spite of the stipulation in the I.L.O. constitution that workers' delegates and advisers are to be chosen in agreement with the industrial organizations which are most representative of the workers; the workers' delegate to the Mexico City Conference had been appointed without reference to the Canadian Congress of Labour, "a central labour body representing 300,000 workers."

The brief also declared that "only a token delegation" had been sent to this Conference, and urged that the Government "give the fullest support to the International Labour Organization by accepting its responsibility for the sending of adequate delegations to I.L.O. Conferences, and assisting the I.L.O. to carry on its highly important activities in the interests of labour."

Income Tax

Commending the Government for the reduction of income taxes, the Congress requested that consideration be given to the exemption from income taxes of all single persons earning incomes up to \$1,500 a year and of married persons up to \$2,000 per year.

"On the other hand", the brief continued, if no other means can be found by which to ensure full employment for the workers of Canada than the raising of large sums of money by taxation, the Congress believes that full employment is much more important than lower taxes. For example, it may be necessary to continue subsidies on agricultural and other products, to subsidize home-building, to produce goods under government auspices and sell them below the cost of production, and to carry on extensive public works programs, all of which would require heavy expenditures. As has been emphasized

repeatedly by the Congress, employment is Canada's basic problem, and the future of the nation depends on finding a solution for it.

Unemployment Insurance

In regard to unemployment insurance the brief recommended: provision of insurance to all workers, regardless of income; payment of benefit from the first day of unemployment and for the full period of unemployment; an increase in the amount of benefits; and the payment of benefits where loss of employment results from a labour dispute.

Veterans and Unemployment

The Congress was of the opinion that "while every consideration must be given to those who risked their lives in the service of their country on the war-fronts," no enduring benefits would be obtained if civilian workers were displaced from employment by veterans. The solution to the problem was said to be the provision of employment for every citizen able and willing to work.

Health

Dealing with the proposals for health insurance made by the Dominion to the Provinces, the Congress expressed doubts as to the adequacy of the health grants, and as to the equity of the distribution of funds between doctors and nurses. It further urged cash benefits to maintain income during interruption of earning power on account of illness; the integration of curative and preventive work, with the emphasis on prevention, by providing the necessary personnel to guarantee to everyone the maximum medical and dental benefits; large capital expenditures for new medical schools, urban and rural hospitals, sanatoriums and homes for incurables; and suitable representation of the general public on the administration boards.

Old Age Pensions

Welcoming the Government's proposals on old age pensions made to the Dominion-Provincial Conference, the Congress requested a further reduction to age 60 of the age of eligibility, without a means test.

World Federation of Trade Unions

The Congress expressed its support of the World Federation of Trade Unions, and its conviction that this body should have fuller representation at meetings of the United Nations Organization.

Conclusion

Referring to the singleness of purpose with which Canadians had given themselves to war tasks, the brief concluded as follows:

Canada's war-effort showed the people what could be done in solving problems of production and finance; it showed that obstacles could be overcome and industry be operated without the usual incentives of competition and profit; it showed that government could plan and organize industrial production, attaining higher efficiency than had been possible under peacetime conditions. Now the workers and the people of Canada want to know why the lessons learned during the war should not be applied during peacetime, and why a nation which could build ships and planes and tanks of vast and intricate design cannot build the simplest type of homes for workers and their families. They want to know why the bottlenecks which were eliminated in war-time production should be allowed now to hamper the production of consumer goods, the building of homes, and the provision of decent standards of living. In this Memorandum we have

endeavoured to provide an answer to some of these questions, and to show why Canada, a young and virile nation, should now be in the forefront of industrial and social progress, meeting the needs of its own people and making its full contribution toward the stabilization of world-peace.

The Congress recognizes that the reconversion of industry and its operation in such a manner as to utilize fully the human and natural resources of the nation for the attainment of the highest possible standards of living is not a matter which the Government can accomplish alone, but that it demands the fullest co-operation from every citizen. So far as the workers of Canada whom it represents are concerned, the Congress again offers its fullest co-operation with the Government in every honest effort which is made to increase the economic security and well-being of the Canadian people. In its criticism of Government policies, and action or lack of action, the Congress does not desire merely to find fault, but rather to make constructive suggestions which may lead to the improvement of social and economic conditions and a happier life for the workers and the people of Canada.

Canadian and Catholic Confederation of Labour

THE memorandum of the Canadian and Catholic Confederation of Labour, read by Mr. G. Picard, Secretary, opened by declaring that, "Canada is experiencing much difficulty during the transition from a wartime to a peacetime economy, and the situation is the cause of anxiety amongst working people in general." It suggested that the Federal Government redouble its efforts to rectify the situation.

The memorandum alleged that "the Federal Government's domestic and international policies are giving rise to considerable pointed questioning and occasioning anxieties which should be dissipated by the taking of necessary measures."

Income Tax

The Confederation's suggestions on the subject of income taxes were briefly as follows:

Abolition of the annual Income Tax forms for all individuals whose sole source of revenue is salaries and wages. ("Salaried persons and wage-earners will no longer be put to the trouble of making complicated annual returns and will have no supplementary payments to make if the total tax is collected at the source.")

Exemption of overtime pay from taxation. (This, it was felt, would provide a greater production incentive to employees); increase employer-profits by simplifying the task of making tax deductions at the source; and increase government revenue as a result. Continuing its observations, the brief stated:

The C.C.C.L. is not against Income Tax reductions in favour of corporations, ministers, and members of parliament, but it does consider that the working people ought to benefit from more substantial exemptions than those granted till now.

Thousands of workers whose earnings, due to the high cost of living and seasonal unemployment, are at best insufficient, pay the income tax and contribute towards the payment of other federal taxes as, for instance, (a) the federal sales tax; (b) the cigarette and tobacco tax; (c) the tax on cigarette papers and tubes; (d) the tax on sugar, etc., etc. And in addition there is their contribution to provincial, municipal and school taxes.

The C.C.C.L. is of the opinion that it is high time the present tax were modified and suggests, as explained above, complete exemption up to \$1,200 for unmarried persons and up to \$2,000 for married persons. . . .

Dominion-Provincial Conference

On the matter of Dominion-Provincial relations, the C.C.C.L. expressed itself, in part, as follows:—

In the vast field of social security there are subjects, such as social insurance, the minimum wage in industries of inter-provincial scope, the maximum of the working week, on which it is difficult to legislate satisfactorily, in the national interest, without some understanding reached beforehand between the interested governments. Such understandings could be integrated in concurrent legislation, contractual in character and conforming to the spirit of the constitution. . . .

Undoubtedly it is easier for a government to legislate when it holds exclusive jurisdiction over a given matter, but it is nonetheless

a fact that the higher interests of the nation might justify concurrent authority over the same matter. In such case, here in Canada, it is possible by means of conferences and resultant understandings to establish national norms and have them incorporated in the Statutes of the Dominion as well as in those of the Provinces. In that way we would obtain concurrent legislation of a contractual character, which would not be susceptible of either abrogation or modification, except with the consent of the interested parties. The C.C.C.L. holds that, by this means, the autonomy of the provinces will be respected and the menace of legislative unity avoided in the general interest.

International Cartels

The memorandum urged the Government to implement the recommendations set forth in the "highly important report on international cartels," tabled on November 8, 1945, by the Minister of Justice, with a view towards eradicating certain evils that this form of organization fostered.

Order in Council P.C. 9384

The Confederation expressed disapproval of the latest amendments proposed in respect to Order in Council 9384 controlling wages, which it claimed, contained "very strict instructions to the Labour Boards purposed to prevent any increasing of the present too-low wages while opening the door to reductions in basic pay rates everywhere that there are production systems in force based on industrial rationalization."

"This policy," it was stated, "seems all the more strange in that the government has by special decree (P.C. 9505), authorized considerable increases in salary to anyone whose rank is above that of foreman."

Unemployment Insurance and Employment Service

Referring to the operation of Unemployment Insurance and the Employment Service, the brief declared that "the Unemployment Insurance Commission is representative of neither the Government, the employers, nor the workers, nor sufficiently autonomous." Another criticism was expressed as follows:—

The employment services lead to confusion. There are those of the Department of Labour and others of the Unemployment Insurance Commission. The workers do not understand this state of things. The C.C.C.L. take this occasion to express approval of work available advertisements being published by the Employment Service, but it also submits that employers offering starvation wages ought not to be benefited by a Government service. Work available should be advertised only in those cases where fair wages are paid to the workers.

The C.C.C.L. also considered that benefits should be increased by 20 per cent "in proportion to the rise in living costs as given in official statistics."

The C.C.C.L. also drew attention to "the delays to which the unemployed are subjected before receiving their benefit payments—and the numerous trips they are called on to make in reporting periodically to the employment office. . . ."

Other Proposals

The memorandum contained certain other proposals, some of which were as follows:

That bilingualism and the representation of the French-Canadian element be taken into account when high officials are named to the Federal Department of Labour;

That the Federal Government should revive Part II of the National Housing Act, and effect changes therein to render its provisions more readily available to the wage-earners.

That old age pensions be raised to \$30 a month and that the age levels be reduced to 65 for men and 60 for women, according to a recommendation of the International Labour Organization. There should be no reduction made from pensions as long as the pensioner's annual income does not exceed \$365.

That a tribunal of equity be established to deal with disputes, between landlord and tenant arising out of the present decrees that are in force.

Post-War Program

The Confederation, in conjunction with the memorandum, presented the Cabinet with its post-war program for the ensuring of social harmony in Canada. The pamphlet formulates the recommendations of the C.C.C.L. in respect to post-war problems and other social matters.

Some of the proposals are summarized below:—

Industrial Democracy

Under the heading of "Industrial Democracy" the brief stated:

In order to achieve true democracy in the world of labour, industrial and commercial activity ought to be confided to professional organizations engendered by the trade unions but raised to the status of public corporations or guilds and vested, under State supervision, with regulatory and disciplinary powers in economic matters.

Price Control

The C.C.C.L. set forth its views on price control as follows:

Price control is proving itself ever more and more a measure necessary to the avoidance of the social disorders of inflation and deflation. During the war price control constituted a protection for the wage-earner and stemmed the tide of inflation which

might otherwise have inundated the country. The same control ought to be maintained after the war to ward off the evil effects of deflation. Inflation and deflation are ills which bear particularly on the wage-earning class. The C.C.C.L. holds that price control should be maintained in force for an indefinite period.

Fair Wages

In the matter of fair wages the C.C.C.L. considered that to achieve justice in this respect "the State, the trade unions and the employers' associations are the only properly qualified arbitrators of ways and means."

The C.C.C.L. also stated that "upon the State devolves the duty of ensuring to the mass of the families of our country a standard of living, based on the cost of living in the various economic regions. . . ."

Its policy was further set forth as follows:

Because they alone are competent, it rests with the professional organizations, whether of employers or employees or jointly, to establish by collective agreement wages commensurate with the economic value of the work done, which wages, tied in with the minimum wage schedule established and rendered obligatory by law, will represent full justice in the matter of compensation for effort in industry.

Lastly, seeing that the workers' family lives solely upon wages and that it has to fulfil its natural function twelve months in the year, it is a matter of prime importance to assure such family of the means of a stable revenue year after year by full employment.

Labour Organizations

The C.C.C.L. stated that "the civil responsibility of unions, the establishment of labour

courts before which industrial disputes may be brought, and the working out of a system of collective rights can alone lift out of the impassé into which it has sunk the problem of closed-shop as seen in the light of a union security measure."

On the matter of labour organizations and politics the C.C.C.L. expressed itself as follows:

It is contrary to the nature of labour organizations to take political action, either to found a party or to support one for the purpose of taking control of government. As a matter of fact the *raison-d'être* of labour organizations is to settle worker problems in collaboration with employers or employers' organizations. This does not prevent them, however, from prompting legislation and demanding to be consulted on problems which concern them, but it is not in their rôle to go into politics in the sense referred to above, nor is that idea in conformity with their natural functions.

Female Labour

Dealing with this subject the C.C.C.L. declared:

The C.C.C.L. holds it impossible to reconcile the presence of women in industry and commerce with the natural order of things. There is no doubt that social contingencies do at times call for modification of the above statement. Indeed, the C.C.C.L. understands that female labour cannot be prohibited. Women will always have quite easy access to certain lines of work or endeavour, and although female labour ought not to be accepted on a general scale it is out of the question to forbid widows, or young women who are the support of families, for instance, to go out to work for a living for themselves and their dependents.

Railway Transportation Brotherhoods

A BRIEF was presented by the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods embodying the studied opinions of the Committee on specific problems affecting railway workers in the performance of their duties, as well as a number of national problems of interest to all Canadians.

Railway Act Amendments

It was urged in the interests of safety and efficiency that sections of the Railway Act covering such technical matters as headway over cars, space above rails and standard vertical and side clearances, be revised, to bring them into line with the requirements of the larger dimension rolling-stock and other railway equipment now in general use. The

modifications while involving extensive and costly changes in the trackage and side and overhead clearances in railway yards, would, it was pointed out, provide a greater degree of safety for trainmen. The problem, it was claimed, was complicated by obsolete authority vested in the Board of Transport Commissioners with respect to these conditions.

It was, therefore, "strongly urged" that the appropriate sections of the Railway Act should be amended to provide:

(1) safe overhead and side clearances in railway yards appropriate to present and anticipated dimensions of rolling-stock.

(2) that any new construction, or re-arrangement of tracks or alteration of buildings, as of an early date, be made to conform with clearance standards prescribed in the suggested amendments;

(3) that parallel railway tracks be rearranged as soon as possible, as well as practicable alterations of structures; with special reference to general switching and terminal yards of railways, so as to provide safe clearances;

(4) that railwaymen be not required to ride on the tops or sides of rolling-stock in areas adjacent to any restricted clearances that it may be found impractical to remove.

Attention was also drawn to the danger of level crossings. It was suggested that the annual appropriation to the Railway Grade Crossing Fund "be increased from \$200,000 to at least \$1,000,000 and thus stimulate immediate action" in eliminating the most hazardous level crossings, to provide better protective measures for those where removal is not practicable at present, such as modern reflectorized signboards and the discontinuance of the "slow order" at level crossings where an accident had occurred.

The delegation urged further "that as far as may be practicable, customs duty and other tax imposed on materials and equipment imported for use in the construction of crossing protection devices and signals, be removed as early as possible, thus creating an incentive to a more speedy installation of much-needed protection and, at the same time, materially reducing the cost to smaller municipalities and to the railways."

Railway and Highway Competition

Reference was made by the delegation to former submissions to Dominion and Provincial governments in which the Associated Railway Brotherhoods had urged the "equitable regulation and orderly control of all forms of public carriers by the adoption of a National Transportation policy."

To confirm the soundness of these earlier submissions, the delegation made pointed reference to the findings of the Senate committee of inquiry of a few years ago on the "financial condition of the steam railways", and quoted extensively from Chapter II of the Report of the Royal Commission on Dominion-Provincial Relations, 1940, (Sirois) under the caption, "The Problem of Railway and Highway Competition."

For example, the Royal Commission stated that:

The present division of powers (between the Dominion and the provinces) may easily lead to chaos, unless the policies of the Dominion and the provinces can be co-ordinated. But, given a disposition on the part of the various governments to co-ordinate their controls over transportation and their financial aid, so as to leave to each type of

transport a chance to perform on remunerative terms those classes of service which it is best adapted to perform, the Canadian transportation problem may not be insoluble....

The delegation claimed that the experience with Dominion regulations gained during the wartime emergency, together with the present and anticipated volume of post-war traffic, "warrants early and continued co-operative effort, study and practical action in order to effect orderly uniform regulation of all forms of transport for hire...."

With this in view, the Federal Government was urged to constitute a Transport Planning Commission as early as possible to carry on "a continuous study of the ever-changing transport problem." Such study, it was claimed, would result in more effective regulation of the increasing number of competitive agencies in the transport field. It was suggested that the several interests concerned, including organized railway labour, be given representation on such a Commission.

International Highway Transport

The concessions granted United States highway transport agencies during the war which permitted the trucking of freight between points in the United States through Canada, in bond (P.C. 6129, July 16, 1942) "rapidly developed...exploitation of Canadian highways for commercial purposes by foreign interests", the delegation claimed. While it was understood that this concession was annulled December 31, 1945, concern was expressed at a recent announcement by the Prime Minister of the appointment of an International Committee "to facilitate border crossings of persons, goods and vehicles." The hope was expressed that "the Canadian representatives on that Committee will be directed to insure that there will be no reinstatement of the privileges granted under the Order-in-Council now terminated."

St. Lawrence Waterways Project

The delegation re-affirmed its opposition to the development of the St. Lawrence Waterways project, especially for transportation purposes.

Present transportation and power facilities were adequate to meet any anticipated needs and thus the plan could not be justified on grounds of economic or national necessity. Then, too, it was claimed that the project would affect labour conditions adversely, especially in the field of railway employment, and might even contribute to breaking down the railway transportation system. Finally the cost would be a heavy financial burden for the entire country.

Social Security

After commending the government for its studies and legislative enactments designed to improve the social security of less fortunate Canadian citizens, the delegation requested that in developing future plans, due protection be given to the equity in pension plans built up by railway employees over a period of several years.

Old Age Pensions

The delegation expressed a keen interest in the studies being made with a view to a revision of the Old Age Pension Act. The submission of the Brotherhoods to the Government ten years ago was quoted to urge (a) that at least 90 per cent of the total costs be paid by the Dominion Government and (b) that the age of qualification be reduced to 65 years.

The delegation was "strongly of the opinion" that "an early revision of the Act is long overdue and that such revision should include a substantial increase in the monthly payments to recipients"

Scientific Medical Research

The progress being made in the prevention and cure of cancer and tuberculosis by governments and professional interests was commended. It was urged that this work might be given even more effective co-operation by all competent authorities and that these be encouraged by the appropriation of such public funds "as may be warranted to facilitate all worthy efforts."

Post-War Adjustments

In the matter of public works to be undertaken as post-war measures, the delegation placed first the elimination of level crossings of railways with highways. Co-ordinated with this development, it was held that early legislative measures be enacted to bring up-to-date safety standards with respect to the increasing dimensions of railway equipment.

Income War Tax Act

While recognizing the need for sufficient revenue from taxation to meet all national obligations and at the same time prevent inflation, the delegation was of the opinion

that statutory tax exemptions should be allowed up to \$2,400 for married persons and \$1,200 for single persons per annum, with a further exemption of \$500 for each dependent of the tax payer.

Attention was directed to the position of railway employees who were paid on a mileage basis, and who are permitted to deduct from their income actual amounts paid by them for meals and lodgings while away from home. Objection was taken to the annual "inquisition" on the part of income tax inspectors "who demand proof almost to the last dollar claimed for expenses." It was urged that "since members of Parliament are allowed a fixed sum, ostensibly for expenses, . . . all railway employees who are subject to incur expenses away from home should be allowed either a fixed minimum or maximum deduction for away-from-home expenses, with the further proviso that if a fixed minimum is decided upon, and a deduction is claimed in excess thereof, proof of the expenditure must be submitted."

It was claimed that if tax exemptions were raised many older workers who are now fearful that if they retired, they would have insufficient means, would be encouraged to do so, thus making more positions available for returned men and other younger workers. The proposition was advanced that "fear of insecurity and the hoarding of money brings unemployment and depression. Optimism, faith in the future, and the reasonable spending of money creates employment and brings prosperity."

Canadian Broadcasting

The desirability of maintaining strict control and supervision of the Canadian Broadcasting Corporation by the Federal Government was urged as "a sound national policy." In the opinion of the delegation it "should be continued for the general welfare and advantage of Canada."

The following representatives of the Railway Brotherhoods comprised the delegation: A. J. Kelly, Brotherhood of Railroad Trainmen; William L. Best, C.B.E., Brotherhood of Locomotive Firemen and Enginemen; J. J. O'Grady, Brotherhood of Maintenance of Way Employees; W. H. Phillips, Order of Railroad Telegraphers; H. B. Chase, Brotherhood of Locomotive Engineers; J. L. D. Ives, Order of Railway Conductors.

Rehabilitation

Review of the First Session of the Parliamentary Committee on Veterans Affairs

THE Parliamentary Committee on Veterans Affairs, set up to review the legislation affecting Canada's war veterans and to draft bills to clarify, amend or supplement such legislation where necessary, began its meetings on October 9, 1945, with a roster of members that included six cabinet ministers, two holders of the Victoria Cross, and a host of other veterans who served in the Navy, Army and Air Force in the first and second Great Wars. They totalled sixty in all.

The Committee drafted and reported three bills to the House, which have become law. These bills included amendments to the War Services Grants Act, amendments to the Veterans' Land Act, and the consolidation and amendment of Orders in Council, already in effect, under an Act known as "The Veterans' Rehabilitation Act".

War Services Grants Act

The furthest reaching amendment of the Act gave wide power to a Board of Review to direct payment of gratuities and thus make re-establishment credits available to persons discharged for misconduct. This Board of Review is composed of representatives of the three Services and a representative from organized veterans. All "discharges-for-misconduct" cases will be referred to the Board, and the Act instructs the Board to consider "the nature and extent of the service rendered by the member of the Armed Forces and to investigate the circumstances under which the member was discharged". After such consideration, the Board is to award the benefits, if it is of the opinion that it would be inconsistent with "the true spirit and intent of the Act to deprive the member of its benefits".

In connection with the Re-establishment Credit regulations, the definition of the word "business" was broadened to include any trade, industry or profession a veteran might be entering. (Under the War Services Grants Act a veteran is allowed to use his credit for working capital for a "business", purchase of tools, instruments and equipment for "business", the outright purchase of a "business", etc.)

Other amendments to the War Services Grants Act included:—

(1) Inclusion of members of the Canadian Women's Army Corps for all benefits brought

into effect before they became incorporated as part of the Canadian Army;

(2) Calculation of the pay of rank on discharge to include trade or staff pay on the last posting before discharge in computing gratuity payments;

(3) Provision to pay gratuities to dependents or service estates of deceased veterans;

(4) Provision for veterans to retain their re-establishment credit if they borrow under Section 13 of the Veterans' Land Act against lands already owned;

(5) Provision that non-resident veterans of the Canadian Armed Forces may buy Veterans' Insurance Policies with their re-establishment credits;

(6) Provision for veterans who become Dominion Government employees to use their re-establishment credit for payment of arrears in superannuation dues;

(7) Reduction in the proportion of the purchase price of furniture and household equipment which must be paid by the veteran, from one-third to only one-tenth;

(8) Provision for payment of gratuities and credits to veterans on joining the permanent force; and permission to give the Minister of the Department of Veterans Affairs discretionary power to pay gratuities and credits in a lump sum to those veterans re-joining the interim force.

Veterans' Land Act

The amendment in the Veterans' Land Act authorized the Minister of the Department of Veterans Affairs, with the approval of the Governor in Council, to enter into agreements with the provinces for the settlement of veterans on provincial lands which they submit as being suitable for veterans' settlement.

The limit of assistance which may be granted is \$2,320. Veterans accepting assistance under this new amendment may not take advantage of other benefits of the Act, i.e., assistance to purchase a farm, holding or commercial fishing establishment, or assistance to pay off encumbrances on property owned by the veteran.

Another amendment recommended by the Committee is that benefits under the Veterans'

Land Act should be made available to the members of the House of Commons and the Senate who were on active service in the 1939 war.

The Veterans' Rehabilitation Act

The third bill drafted and reported to the House recommended legislation to consolidate and amend the Orders in Council dealing with Vocational and University Training, Out-of-Work Benefits, allowances for the temporarily incapacitated and those awaiting returns from a business, and other benefits. This bill was passed on the 18th December, 1945, and is cited as "The Veterans' Rehabilitation Act".

Two amendments were proposed by the Committee. The first of these permits payments of the cost of correspondence courses being taken by veterans under treatment in hospitals under authority of the Department of Veterans Affairs, with no charge being made against re-establishment credit. The second allows veterans attending universities to carry one "sup" or conditional examination a year, whereas they were formerly required to pass all examinations within one school year.

General Recommendations

In its final report to the House of Commons the Committee further recommended:

(1) That the Department of Public Works

be urged to allot proper office accommodation to provide for the needs of the Department of Veterans Affairs and the Department of Labour;

(2) That consideration be given by the Governor in Council to increase the rates payable under the Post-Discharge Re-establishment Order other than for training by at least \$10 per month.

These rates now stand at \$50 for single persons and \$70 for married persons, with allowances for dependents. It was further recommended that consideration also be given to increasing the rates for vocational and university training. At present these are \$60 and \$80, with allowances for dependents;

(3) That the Government give consideration to providing some measure of assistance other than that now provided by the War Services Grants Act, to provide loans to veterans who wish to engage in business.

The Committee was not able to cover more than a fraction of the legislation and Orders in Council, but it is expected that during its second series of sittings it will review the Pension Act, the War Veterans' Allowance Act, the subject of the War Auxiliary Services, and other items such as Civil Service Preferences, housing, employment, and Vocational and University Training Schemes.

Treatment of Disabled Persons at Rehabilitation Centre in Great Britain

ONE of the problems of disabled persons in the United Kingdom to-day is catered for at Egham Industrial Rehabilitation Centre. Though formally opened by Mr. Ernest Bevin on January 15, this centre has been in operation for nearly two years, and of the thousand men who have passed through since 1944, 95 per cent have returned to their former jobs or proceeded to other establishments for further industrial training.

This pioneer state effort is intended to re-equip mentally and physically men disabled in the Forces or industry, and does in fact fill the gap between the end of hospital treatment and complete fitness for work. The mental state of a disabled man with a dependent family needs sympathetic handling, and Egham provides conjointly a mental and physical toning-up process. The patient may feel himself a useless burden to others, unable to return to his old job, and too discouraged to start afresh. At Egham he gets remedial treatment in a physiotherapy room and gymnasium, realistic advice on his future career together with either a refresher course or the

government-training-scheme instruction for a new career. A pleasant country house, good food and garden produce, cheerful company, fresh air and exercise during the eight weeks' course give him time to pull himself together and take a fresh grip on the future. While at Egham, he receives free board and lodging and allowances, irrespective of any pension to which he is entitled.

The experience gained at this one experimental centre in nearly two years has convinced the various interests concerned—the Government, employers, trade unions, the medical profession and the men treated—that modern industrial conditions demand that severe disablement and convalescence must be followed by a revised and gradual approach to profitable and independent employment, and more such centres are contemplated.

In his speech opening the centre, Mr. Bevin said that since 1941, twenty thousand persons have gone through a course of one sort or another under Government training schemes and the whole field is now covered from hospital back to lucrative work.

Decisions of National War Labour Board

DURING the month of March the National War Labour Board issued decisions in the following cases:—

Various paper companies in Ontario, and International Brotherhood of Paper Makers and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Canadian Industries Limited, Montreal, P.Q.
Imperial Optical Company, Limited, Toronto, Ont.

Odeon (Rialto) Limited and Odeon (Suburban) Theatres Limited, Edmonton, Alta.

Various hotels in Regina and Saskatoon, Sask., and Locals 329, Regina, and 725 and 742, Saskatoon Hotel and Restaurant Employees and Beverage Dispensers.

Keystone Shingles and Lumber Limited, New Westminster, B.C., and International Woodworkers of America, Local 1-357.

Keenan Woodenware Limited, Owen Sound, Ont., and National Union of Aircraft, Furniture Workers and Allied Crafts.

Massey-Harris Company, Limited, Toronto, Ont., and Local 439, U.A.W.-C.I.O.

Auto Specialties Manufacturing Company and United Automobile, Aircraft, Agricultural Implement Workers of America, Local 195, U.A.W.-C.I.O.

Electric Auto-Lite Limited, Sarnia, Ont., and Local 456, U.A.W.-C.I.O.

Dominion Bridge Company, Limited, and Riverside Iron Works Limited, Calgary, Alta., and International Union of Mine, Mill and Smelter Workers, Local No. 800.

Cranemobile Limited, Vancouver, B.C.
St. Lawrence Flour Mills Limited, and Flour Mills International Union Local 71.

Standard Brands Limited, Montreal, P.Q., and United Packinghouse Workers of America, Local 240.

Re: Abitibi Power and Paper Company, Limited, Sault St. Marie, Iroquois Falls, Smooth Rock Falls and Fort William, Thunder Bay Paper Company Limited, Port Arthur, Spruce Falls Power and Paper Company Limited, Kapuskasing, Provincial Paper Co., Limited, Port Arthur, Great Lakes Paper Company, Limited, Fort William, Ontario Paper Company, Limited, Thorold, Ontario-Minnesota Pulp and Paper Company, Limited, Kenora and Fort Frances, and International Brotherhood of Paper Makers and International Brotherhood of Pulp, Sulphite and Paper-Mill Workers

Reasons for Decision

The above-named Unions applied to the Regional War Labour Board for Ontario for a general increase of 3 cents an hour in the wage rates of all hourly-rated employees in the Companies' news-print mills located at or near the above-named places in Ontario. On December 1, 1945, the Regional Board directed the Companies to increase the wage rates of all the hourly-rated employees concerned except those being paid at the base rate in effect at each mill. The Regional Board provided that the increase should become effective in three stages, namely, 1 cent as of May 1, 1945, 1 cent as of November 1, 1945, and 1 cent on May 1, 1946.

The Unions now appeal and ask this Board to direct that the increase apply to the employees on the base rate as well as to other hourly-rated employees, and that the increase be paid in full from May 1, 1945. The Com-

panies opposed the Unions' application before the Regional Board but now concur in the major portion of the Unions' request.

We assume that the Regional Board found that the increase granted to employees other than the base rated was necessary to rectify a gross injustice or gross inequality. The material on the Regional Board file does not indicate that the injustice or inequality which the Regional Board sought to rectify, was founded upon the differentials then in effect between the rates for the lowest paid employees, who did not share in the increase, and the rates for the higher paid employees who received the increase. We must conclude that the increase was granted on some other basis. The effect of the Regional Board's decision is to disturb the previously established differentials. It is our view that the differentials in effect prior to the Regional Board's decision now under appeal should be restored.

The base rated employees are as much entitled to the wage increases in question as are the other hourly-rated employees.

It has not been the practice of the National War Labour Board to approve of wage increases on a step raise basis. However, we are aware of the Regional Board's reasons for the provision that the increase be put into effect in stages. The circumstances of this case make it appear that the Regional Board's decision was the most practical way of solving the problems involved. The Regional Board's reasons for the action taken need not be recited here. It is sufficient to say that the circumstances which influenced the Regional

Board in this connection have changed since December 1, 1945, the date of the decision under appeal. They have changed to the extent that the last step in the overall increase may be taken on January 1, 1946, instead of May 1, 1946.

The appeal is allowed to the extent that the base rated employees of the above-named Companies shall be entitled to receive the 3 cents increase in wage rates on the same basis as the other hourly-rated employees. Further, that the last 1 cent increase shall be paid from and after January 1, 1946. There will be a Finding and Direction accordingly.

March 4, 1946.

Re: Canadian Industries Limited, Montreal, P.Q.

Reasons for Decision

The Company applied to the Regional War Labour Board for Nova Scotia for permission to adjust the salary of its District Credit Manager in Nova Scotia. The Regional Board rejected the application on the ground that no gross injustice or inequality was shown to exist in the presently established salary rate of the employee in question. The Company asked the Regional Board for leave to appeal and the Regional Board declined to grant such leave.

To succeed in an application for leave to appeal or in an appeal from a Regional Board's

decision a party appellant must show this Board where or in what manner the Regional Board erred. It might be shown that the error, if any, resulted from the failure on the part of the Regional Board to properly understand the facts of the case. It might also be shown that the Regional Board erred in the application of the law to the facts. In this case the Company has failed to show any such error. We are, therefore, obliged to dismiss the application for leave to appeal.

There will be a Finding and Direction accordingly.

March 5, 1946

Re: Imperial Optical Company, Limited, Toronto, Ont.

Reasons for Decision

With leave of the Regional War Labour Board for Ontario the Company appeals from a decision of that Board dated November 26, 1945. In and by that decision the Regional Board directed the Company to establish certain occupational classifications, and to pay therefor the wage rates set forth opposite the named classifications in the schedule to that decision. In addition to the foregoing, the Company was ordered to pay overtime at time and one-half the regular rate for all hours worked in excess of 48 in any week, to pay a premium of 5 cents an hour to night shift workers and to establish a vacation-with-pay plan.

Prior to the Ontario Board decision the Company had thirteen occupational classifications in its establishment. The Ontario Board's decision establishes 73 classifications. Some question has arisen as to the propriety of establishing the additional classifications. However, the evidence appears to indicate that the Company, in its endeavour to properly evaluate the several operations in the plant proposed the different job titles and also provided job descriptions therefor.

The main issue in the appeal concerns wage rates which were fixed by the Regional Board. It is an issue which we have found extremely difficult to solve. An examination of the material on the Regional Board's file indicates that they too found much difficulty in producing what appeared to them to be a solution of the problems involved. At the time when the case was at issue before the Regional Board relations between management and the Union were somewhat strained. This may account for some of the difficulties encountered.

It appears to us that some of the rates established by the Regional Board for certain occupational classifications were founded upon the actual earnings rather than on the previously established basic hourly rates. The actual earnings per hour in many cases are higher than the basic hourly rates. This comes about from the fact that the Company has a production bonus system in effect for some of the operations.

The Company is engaged in the manufacture of lenses. It is not the only Company so engaged in Canada. The majority of the occupational titles set forth in the Regional Board's decision are known only to establishments producing lenses. There is one other

competitor producing lenses on a mass production basis. We think that the rates to be established for use in the Company's plant should bear some relation to the rates in effect in the plant of the Company's chief competitor in Canada. Such relationship has to a degree been a governing factor in our findings. Further, we have endeavoured to provide variation in rates to compensate for the variation in the skill required and the hazard undertaken in the various classifications. The revised rates will be as set forth in the schedule to be attached to this Board's formal Finding and Direction.

The Company objected to the action taken by the Regional Board in fixing rates for classifications in the Monostep, Bifocal, Precision, Prism Department. There seems to be some doubt as to the right of the Union to represent the employees in that Department. However, the Regional Board dealt with the rates and we can find no sufficient reason to delete the classifications from the schedule.

We see nothing wrong with the Regional Board's decision as it concerns overtime pro-

visions, night shift differentials and vacation-with-pay plan and we do not propose to disturb the directions made on such issues.

The appeal is allowed to the extent only that some of the wage rates fixed by the Regional Board will be varied. The Regional Board fixed April 6, 1945, as the effective date for the adjustments in wage rates and working conditions excepting for vacations with pay. This was the date of the Union's application to the Regional Board. As above stated, the Regional Board's decision was not issued until November 26, 1945. The time between the date of the application and of the Finding and Direction of the Regional Board was used to some considerable extent in the study of the rate structure by officers of the Regional Board. The officer's report is dated October 16, 1945. It seems fair and reasonable to us that except for vacations with pay, the effective date of the Regional Board's decision should be October 16, 1945.

There will be a Finding and Direction accordingly.

March 6, 1946

***Re: Odeon (Rialto) Limited and Odeon (Suburban) Theatres Limited,
Edmonton, Alta.***

Reasons for Decision

With leave of the Regional War Labour Board for Alberta the Companies appeal from two decisions of that Board. One decision approved an increase in the wage rate for the manager of the Avenue Theatre of Odeon Suburban Theatres Ltd. and the other an increase for the bookkeeper of Odeon Rialto Ltd. The effective date of each of the Regional Board's decisions is September 26, 1945.

It appears from the evidence that on May 3, 1943, the respective employers increased the wage rates for the said employees without first obtaining the approval of the Regional Board. The appellant employers asked this Board to vary the Regional Board's decisions so that they would have effect from the date of the unauthorized increases.

It is appropriate to point out that the Regional Board at the request of the employers, reviewed their decisions and on such review confirmed the same.

We have heard argument on appeal and have examined the submissions made to the Regional Board. The argument presented to us is substantially the same as the submissions made to the Regional Board.

Regional Boards are called upon to exercise a discretion when disposing of a request that its decision should have retrospective effect. There was nothing presented to us which would indicate any error on the part of the Regional Board in exercising its discretion as it did in the cases in question.

The appeal is therefore dismissed.

March 8, 1946.

Re: Drake Hotel, LaSalle Hotel, Champs Hotel, Alexandra Hotel, Empire Hotel, St. Regis Hotel, Grand Hotel, Wascana Hotel, Regina Hotel, Ritz Café, Metropole Hotel, Palmer Hotel, Avenue Luncheonette, and Canadian Café, Regina, Sask., King George Hotel, Senator Hotel, Saskatoon, Sask., and Locals 329, Regina and 725, 742, Saskatoon, Hotel and Restaurant Employees and Beverage Dispensers

Reasons for Decision

With leave of the Regional War Labour Board for Saskatchewan the Union appeals from decisions of that Board dated November 2 and 3, 1945. In and by those decisions the

Regional Board granted, in part, the Union's request for increases in wage rates. Some of the employers entered cross-appeals requesting this Board to set aside the Regional Board's decisions.

Able arguments were made on behalf of the employers and the Union, before this Board. However, those arguments and the briefs on appeal failed to indicate that the Regional Board in dealing with the cases did otherwise than proceed on proper principles with the full realization of the purposes and intent of Wartime Wages Control Order 1943. Both parties, however, objected to the use of the word "minimum" in referring to the bottoms of certain ranges of rates fixed for some occupational classifications. We think that there is considerable merit in the arguments advanced in support of the contention that definite amounts should be set forth to indicate what the "minimum" rate in each case should be.

We propose to fix a specific amount as the low of the range for each occupational classification in respect of which the Regional Board used the word "minimum" as designating such

low. An employee who has had less than two months' experience in that occupational classification may be paid wages at the lowest rate of the range established. When the employee has acquired two months' experience in the classification, he or she, as the case may be, shall be paid at a rate not less than the intermediate rate which will be set forth in this Board's Finding and Direction. Thereafter it will be a matter for the employer and employee concerned to agree upon the rate to be paid within the intermediate rate and top of the range. For the purpose of calculating the experience acquired by an employee in any occupational classification, account shall also be taken of the experience acquired by that employee in the same occupational classification while in the service of another employer.

On all other issues the appeal and the cross-appeals are dismissed.

March 8, 1946.

Re: Keystone Shingles and Lumber Limited, New Westminster, B.C., and International Woodworkers of America, Local 1357

Reasons for Decision

The Regional War Labour Board for British Columbia by its decision dated October 18, 1945, directed the Company to increase the wage rates for its employees in seven named occupational classifications. Later, the Company applied to the Regional Board for leave to appeal. The Regional Board declined to grant leave to appeal. The Company then applied to this Board for such leave.

This case was decided by the Regional Board at the time when the Wartime Wages Control Order, 1943, enabled a War Labour Board to authorize or direct increases in wage rates to the extent necessary to rectify a gross injustice or inequality. We assume that the Regional Board found that there was a gross injustice or inequality in each of the Company's previously established rates for the occupational classifications in question and that the amounts of the increases directed for the respective classifications were necessary

to rectify the injustice or inequality. We have stated on many occasions that we will not disturb a Regional Board decision in any case such as this unless it is shown to us that there was no gross injustice or inequality in previously established rates. A person seeking a reversal of such decision must assume and discharge the onus of showing that such injustice or inequality in question does not in fact exist. It is our view that the Company has not provided us with any sound reason why we should disturb the Regional Board's decision.

In its submissions before us the Company attempted to raise the plea of inability to pay. It was invited to provide us with evidence in support of that plea. This the Company declined to do.

In view of the foregoing we have no alternative but to dismiss the application for leave to appeal and there will be a Finding and Direction accordingly.

March 11, 1946

Re: Keenan Woodenware Limited, Owen Sound, Ont., and National Union of Aircraft, Furniture Workers and Allied Crafts

Reasons for Decision

Upon the application of Local 5 of the National Union of Woodworkers, the Regional War Labour Board for Ontario on August 10, 1945, issued a Finding and Direction directing the Company to establish certain occupational classifications, and to pay certain rates therefor. The Regional Board also directed the Company to increase the rates for its piece work operations so that the current ob-

jective earnings would be increased by four cents per hour. Provision was also made for the payment of time and one-half for the regular rates of pay for all hours worked in excess of the Company's standard work day and work week.

With leave of the Regional Board the Company appealed to this Board. Arguments on the appeal were heard on December 5, 1945. On December 6, 1945, we issued an

interim decision holding that the Company's plea of financial inability to pay the increased rates was well founded. We also indicated that the withdrawal of certain subsidies had the effect of making the position of the Company more difficult. Moreover, it was shown that certain price increases authorized by the Wartime Prices and Trade Board to offset the loss sustained through the withdrawal of subsidy, failed to accomplish the purpose for which they were intended. Some of the Company's customers declined to buy the Company's products at the higher price and found it more expedient to obtain and use a substitute product.

During the course of the hearing it became evident to us that the employees did not have a clear understanding of the Company's piece work and stint systems. The lack of understanding caused considerable unrest among the employees. Accordingly we asked the Company and the Union to negotiate and endeavour to remove those sources of grievances which cause the unrest.

It should here be noted that since December 8, 1945, a change has been made in the bargaining representatives of the employees. The National Union of Aircraft, Furniture Workers and Allied Crafts now appears to represent the employees concerned.

The Union and the Company entered into negotiations as requested. The parties have agreed upon basic hourly rates for piece workers which rates are commensurate with piece work earnings. They have also agreed

to adopt standard working hours and have eliminated the "stint" and "contract" payment practices. A copy of the Company's proposed wage schedule, revised in accordance with the terms of settlement, has been filed with this Board and we are now asked to approve same.

We have examined the said proposed schedule, and the notes on working conditions which are appended to the schedule. The rates suggested for the several occupational classifications as the same are set forth in the proposed schedule are approved; as is also the memorandum concerning certain working conditions which affect wage rates. There will be a Finding and Direction revoking the decision of the Regional War Labour Board for Ontario from which this appeal was taken. Our Finding and Direction will have attached thereto the schedule of wage rates which, according to the understanding of the parties, will be written into or form part of the collective bargaining agreement between the parties. The Finding and Direction will also provide for the payment of punitive rates for overtime.

The Officers of the Company and the Union are to be commended for the results achieved by them through collective bargaining. We know that many difficulties were encountered during the course of the negotiations and we have no doubt but that those difficulties were overcome through a determination on both sides to be just and reasonable.

March 11, 1946.

***Re: Massey-Harris Company, Limited, Toronto, Ont.,
and Local 439, U.A.W.-C.I.O.***

Reasons for Decision

In this case the Union applied to the Regional War Labour Board for Ontario for an order directing the Company to revise and/or establish ranges of wage rates for the several occupational classifications in its King Street plant. The Regional Board, by its decision of November 15, 1945, rejected the application on the ground that the ranges in effect for those occupational classifications were adequate for all purposes. The Regional Board, in its decision, also expressed the view that adjustments of wage rates within the ranges already established were matters for collective bargaining.

With leave of the Regional Board, the Union now appeals from that decision.

The material and argument presented to us by the Union failed to indicate the existence of any gross injustice or gross inequality in the current rates or ranges of rates for the several classifications. However, in order that the matter might be dealt with on its merits, we conducted a survey of the wage rate struc-

ture of other plants which we consider comparable to that of the Company, and checked the results of that survey against the wage rate schedule in effect in the Company's said plant. We are now in a position to say that, for the most part, the conclusions reached by the Regional Board are correct. There are, however, five occupational classifications for which some adjustment in wage rates seems to be warranted. They are the occupational classifications of Elevator Operator, Inspector—Lumber, Sweeper, Stockkeeper and Trucker-Hand.

The range of rates for the occupational classification of "Tool Crib Attendant" appears to be excessively wide. From the information we have received, it would appear that the classification now includes three employees who should be designated as Truckers.

The appeal is allowed to the extent that we may issue a Finding and Direction giving effect to the conclusions we have reached as above stated.

March 13, 1946

Re: Auto Specialties Manufacturing Company and United Automobile Aircraft, Agricultural Implement Workers of America, Local 195, U.A.W.-C.I.O.

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for Ontario dated August 17, 1945, leave to appeal having been granted by the Regional Board.

The Regional Board's decision was made upon a Union application for wage increases for the Company's employees in 12 occupational classifications. The effect of that decision was to dismiss the application, in so far as it concerned 11 such classifications and to direct a wage increase for employees in the other classification (die setter).

It is apparent that the Regional Board had before it substantially the same material as was filed with this Board. One of the items of that material is a table showing the wage rates which are paid by certain employers regarded by the employer as being comparable with it. The Union representatives say that when the case was before the Regional Board they were not afforded the opportunity of perusing the table for the purpose of satisfying themselves that the information therein contained is correct. It is not clear to us whether the Regional Board or the employer prepared the table. If the Regional Board prepared it for its own guidance that Board is not

obliged to disclose its contents to either party. If, on the other hand, the employer tendered the table as evidence its contents should have been shown to the Union.

Because of the aforementioned situation we have carefully checked the information contained in the table. That information is substantially correct. In any case where the wage rates shown on the table are not strictly correct the error is not, in our opinion, material. The Union filed a table showing the wage rates paid by a certain employer. The information contained in that table is also substantially correct.

The Regional Board found in respect of all classifications except the die setter that the requested increases were not warranted under Wartime Wages Control Order 1943. The appellant did not satisfy us that the Regional Board erred in its appreciation of the facts or of the application of the law to those facts. Moreover and following our own investigation into the matters involved in this appeal we have come to the conclusion that the Regional Board's decision should stand. The appeal is dismissed and there will be a Finding and Direction accordingly.

March 14, 1946

Re: Electric Auto-Lite Limited, Sarnia, Ont., and Local 456, U.A.W.-C.I.O.

Reasons for Decision

With leave of the Regional War Labour Board for Ontario the parties hereto join in an appeal from a decision of that Board dated November 28, 1945. By its said decision the Regional Board approved increases in wage rates for certain occupational classifications, but declined to authorize any change in the current wage rates for the occupational classifications of welder, plater, plater's helper, labourer and truck driver.

The employee now in the occupational classification of welder is improperly classified. From the job description prescribed for the welder it is apparent that the employee concerned must be capable of welding pressure vessels, as well as of performing other operations requiring a very high degree of skill. The title for this job should be "high pressure welder". In previous cases we have fixed rates

for jobs requiring the same duties and skills as those required of the employee concerned in this case and in those other cases we authorized the rate now requested by the appellants. We propose to approve the rate requested by the parties for the welder.

We are also satisfied that the appellants have shown that the plater and plater's helper are entitled to certain wage increases. We propose to approve an increase for the plater of 6 cents an hour and for the plater's helper of 3 cents an hour.

It is our view that no case has been made out in support of the application for increases for the occupational classifications of labourer and truck driver.

The appeal is allowed to the extent above indicated and there will be a Finding and Direction accordingly.

March 19, 1946.

Re: Dominion Bridge Company, Limited, and Riverside Iron Works Limited, Calgary, Alta., and International Union of Mine, Mill and Smelter Workers Local No. 800

Reasons for Judgment

On March 27, 1945, the Companies and the Union entered into a collective agreement which, amongst others, contained the following provision:—

3. Vacations

All employees covered by this agreement who have been continuously employed by the Company for a minimum of one year as at June 1, 1945, shall receive one week's vacation (comprised of five and one-half shifts of eight hours, totalling forty-four hours) with pay, during 1945, provided the Regional War Labour Board, acting upon the joint application of the Company and the Union, approves the same.

For reasons which need not here be recounted, the joint application contemplated in the collective agreement was not made to the Regional War Labour Board, being in this case the Alberta Board; instead the Union applied and the Companies entered a countersubmission. The Company took the position before the Regional Board that the details of the vacation plan were not as depicted by the Union.

The Regional Board issued its Finding and Direction in pursuance of the application. The Finding and Direction reads in part, as follows:

The Regional War Labour Board for Alberta does not approve of the suggested vacation-with-pay plan but directs the above-mentioned Companies to establish a Vacation-with-Pay Plan in accordance with the National War Labour Board's Decision Bulletin No. 17. A copy of D.B. 17 is enclosed herewith.

From that decision the Companies seek leave to appeal and appeal.

The Companies' officials seem to be under the impression that the Regional Board directed them to pay a vacation with pay equal to six days' pay. That is not our understanding of what the Regional Board directed, and, for that matter, it does not appear to be the understanding of the Union. A vacation-with-pay plan based on D.B. 17 requires an employer to calculate the amount of vacation pay according to the formula laid down in the governing part of Clause (b)

of that bulletin. The relevant words are:—"A vacation with pay should not exceed the equivalent of one-half day for each 25 days of actual work, due allowance to be made for authorized leaves of absence because of sickness or other justified causes." The Companies' standard work week comprises 44 hours (5½ days). The employees could not by any method of calculation known to us, become entitled to more than 5½ days' normal earnings for vacation pay in any year. The "twenty-five days" mentioned in D.B. 17 refer to and mean 25 full days, in this case 25 days of eight hours each. The four hours worked on the sixth day should be regarded as a half day for the purpose of calculating vacation pay. The Regional Board's decision on this point is not in conflict with Section 3 of the Collective Agreement.

Paragraph (d) of D.B. 17 confers a certain entitlement upon an employee who, while having an unused period of vacation with pay standing to his credit, leaves the service of an employer. The Companies object to the conferring of such entitlement upon their Calgary employees because their employees in their Manitoba plants do not have the same rights or privileges. We do not regard this argument as being sufficient to justify our disturbing the Regional Board's decision on this point. To say that there should be uniformity in decisions by the several Regional Boards on issues such as those involved in this case is also to say that there should be uniformity in wage rates regardless of the localities in which establishments are located. While some people might be prepared to adopt the latter principle it should be realized that it would run counter to the purposes of Wartime Wages Control Order 1943, and therefore cannot be accepted and for the same reason the Companies' argument cannot be accepted.

We allow the application for leave to appeal so that we might express our views on the problems involved. We, however, dismiss the appeal, holding that the Regional Board's decision is in accordance with the purposes and provisions of Wartime Wages Control Order 1943.

March 18, 1946

Re: Cranemobile Limited, Vancouver, B.C.

Reasons for Decision

With leave of the Regional War Labour Board for British Columbia, the Company appeals from a decision of that Board, dated December 13, 1945.

A brief recital of the facts in this case will serve to place this appeal in its proper perspective. On July 10, 1945, the Company applied to the Regional Board for British Columbia for approval of the wage rates for certain occupational classifications established

by them on or about April 1, 1943. Crane-mobile Limited, it appears, was incorporated to handle certain production requirements of the Department of Munitions and Supply and the British Ministry of Supply. The management of the Company and its officers are the same as those of Mixermobile Limited, and both Companies are located on the same premises. Mixermobile Limited had previously applied to the Regional Board for establishment of its occupational classifications and wage rates and this was done. By reason of the fact that Cranemobile Limited was formed for the specific purpose, as aforesaid, and by reason of the fact that it appeared to the Regional Board valid and expedient to do so, the said Regional Board approved the occupational classifications established by the Company, effective as from April 1, 1943, or from the date of its incorporation. The Finding and Direction directing the Company to pay certain wage rates was issued by the Regional Board on October 24, 1945. The said Finding and Direction provided *inter alia* for the establishment of the following occupational classifications:—

Mechanics
Welder Mechanics.

Subsequently, on November 13, 1945, the Company again applied to the Regional Board and pointed out that they had described improperly their classifications, and stated that in addition to the occupational classification of "Mechanic", they also have the following occupational classifications:—

Mechanics, Assembly Line
Mechanic Improvers

for which classifications they requested authority to pay lower rates. The Company also requested authority for establishment of the occupational classification of "Mechanic Improver". The Company explained that the incorrect classification given to the Regional Board in the first place was occasioned by a mistake.

The Regional War Labour Board for British Columbia apparently recognized the distinction between these occupational classifications, and by Finding and Direction, dated December 13, 1945, approved these new occupational classifications and directed the employer to

pay certain wage rates in respect of the following occupations:

Mechanics, Assembly Line,
Mechanic Improvers.

The Regional Board declared its Finding and Direction to be effective as from November 13, 1945, and by a letter addressed to the Company on December 13, 1945, required the Company to pay as from July 10, 1945, until November 12, 1945, the Mechanic's rate to all of their Mechanics regardless of their grading. The Company now appeals to the National Board in respect of the effective date of the latter Finding and Direction.

A careful study of all relevant material in this case leads us to the conclusion that the Regional Board recognized certain of the occupational classifications as submitted by the Company in their application of July 10, 1945, to be erroneous. That Board corrected these errors by its Finding and Direction of October 24, 1945. The explanation offered by the Company at the time of their second application—that the new occupational classifications now requested were omitted due to a mistake—was apparently accepted by the Regional Board, and there resulted the Finding and Direction of December 13, 1945. Having accepted the Company's explanation, and there not appearing to be any evidence of lack of good faith on the part of the Company, it would appear that, in the circumstances, the two new occupational classifications should have been established by the Regional Board under the same pattern and with the same effective date as was set in the Finding and Direction of October 24, 1945. This procedure would be in accordance with Section 30 (2) of the Wartime Wages Control Order, 1943.

Consequently, it would appear to be fair and reasonable to make the effective date of the Finding and Direction of December 13, 1945, the same as the effective date of the Finding and Direction issued by the Regional Board on October 24, 1945, and the National War Labour Board so orders.

There will be a Finding and Direction accordingly.

March 19, 1946.

Re: St. Lawrence Flour Mills Limited, and Flour Mills International Union Local 71

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Quebec dated October 30, 1945. Leave to appeal was granted by the Regional Board.

Some months ago the Union applied to the Regional War Labour Board for Quebec for an order requiring the Company to increase wage rates, reduce its standard work week, increase the period of vacation with pay, and

to pay for six statutory holidays not worked. The Regional Board rejected the application on all counts excepting the last mentioned. The Regional Board *authorized* the Company to pay its hourly-rated employers represented by the Union, regular rates for six statutory holidays not worked.

The Union realizing that an authorization would not be implemented by the Company asked the Regional Board to *direct* the Company to pay for time not worked on the six said holidays. The Board directed as requested. Then the Company protested and claimed before the Regional Board that it was not the established practice in the industry in the locality where the Company's mill is situated, to pay for time not worked on those days. Thereupon the Regional Board revised its decision.

The revised decision, the subject of this appeal, authorizes the Company to pay for five statutory holidays not worked. For the sixth such holiday, namely Christmas Day, the Company was directed to pay for time not worked. Further the Regional Board ordered the Company to pay each employee concerned double his regular rate for work performed on any of the six days.

In developing this case the Regional Board ascertained what the prevailing practice is in respect of statutory holiday pay in the flour milling industry in the locality in question. Information on the point at issue is contained in the Regional Board's file. With much

respect, it is our view that the evidence adduced before the Regional Board and the information it acquired through investigation, does not support the decision under appeal.

The power to make a decision such as the one concerned in this appeal is found in Section 20 (1) (c)—(now (b))—of Wartime Wages Control Order 1943. Before a War Labour Board may authorize or direct an employer to alter a term of employment as in this case, the Board must find that the proposed change is fair and reasonable and is consistent with and will give effect to the purposes of the Order. One of the purposes of the Order is to maintain stability in the wage structure in Canada. To direct an employer to implement a term of employment which is not generally prevailing in the industry of which that employer forms a part would produce an unstable condition in so far as that term of employment is concerned. In the circumstances it would not be fair or reasonable to so direct.

However, the evidence supports the view that it would be fair and reasonable to require the Company to pay its employees who are represented by the Union, one and one-half times their regular rates, respectively, for work done on New Year's Day, Good Friday, Dominion Day, Labour Day, Christmas Day and St. Jean-Baptiste Day.

The appeal is allowed and there will be a Finding and Direction which will give effect to this decision.

March 27, 1946.

Re: Standard Brands Limited, Montreal, P.Q., and United Packinghouse Workers of America, Local 240

Reasons for Decision

The Company has applied to us for leave to appeal and appeal from a decision of the Regional War Labour Board for Quebec dated November 20, 1945. In and by that decision the Regional Board directed the Company to increase wage rates for some employees in the Company's tea and coffee packing plant at Ville LaSalle, Quebec.

In the preamble of the Regional Board's decision reference is made to a request for "an increase of 2 cents an hour for girls and 5 cents an hour for labourers (numbering approximately 6 or 7) these meaning an hourly rate of 46 cents an hour for employees working in the tea and coffee packing department, and 55 cents an hour for beginners and 57½ cents an hour after 6 months and 60 cents an hour after 12 months." The Regional Board then proceeded to direct the Company to pay those increases from April 9, 1945.

The Company applied to the Regional Board for leave to appeal and that Board declined to grant leave because it had not been shown that the Board had made any fundamental error in its appreciation of the facts or in the application of the law to those facts. These are good and sufficient reasons for denying leave to appeal.

The material before us falls far short of meeting the onus which is upon the Company at this stage of the proceedings and we are obliged to dismiss the application.

We are of the opinion, however, that the Regional Board should revise its decision and include in the operative part thereof a list of the occupational classifications to which the wage rate increases are intended to apply. The increased wage rates should also be set forth opposite those classifications.

March 28, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of March. During the month the Board received eight applications, held six hearings, issued six certificates designating bargaining representatives, rejected one application and gave a decision in one appeal case.

Certificates Issued

Six applications for the certification of bargaining representatives were approved by the Board and certificates issued, as below:—

1. Messrs. T. F. Graham, K. Cockburn and R. W. Worraker and the *International Brotherhood of Electrical Workers, Regional Council No. 2*, for the road and terminal electricians and electrical helpers (Operating Department), employed by the *Canadian Pacific Railway Company* on each of the General Superintendent's Districts, namely, New Brunswick District, Quebec District, Ontario District, Algoma District, Manitoba District, Saskatchewan District, Alberta Dis-

trict and British Columbia District, and also for all electrical workers and electrical helpers employed at the Windsor Station, Montreal, P.Q.

Chief electricians and foreman electricians were excluded from the bargaining unit.*

2. Messrs. A. R. Mosher, J. E. McGuire, W. J. Smith, H. A. Chappell, R. Lapage, J. G. A. Tremblay, J. Hodgson and J. Moreux and Misses H. Pellerin and Desneiges Poudrier, and the *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 277*, for the employees of the *Canadian Pacific Railway Company*, employed at the *Chateau Frontenac, Quebec City, P.Q.* as follows: employees in the Service Department, excepting the service supervisor, head bell boys, night watchmen, relief watchman, house officer and check room attendant; employees in the Housekeeping Department, excepting the head housekeeper, first assistant housekeeper, assistant housekeepers, linen keeper, head houseman and

head night cleaner; employees in the Steward's Department, excepting the chief steward, assistant steward, kitchen steward, and the steward's relief clerk and stenographer clerk; employees in the Food Kitchen, excepting the chef, sous-chef and night chef; employees in the Dining Room Department, excepting the catering manager, maitre d'hotel, co-maitre d'hotel (head waiter), food checkers, and relief cashier and timekeeper; employees in the Terrace Café Department, excepting the head waitress and food checker; employees in the Porter's Department, excepting the head porter; employees in the Heat, Light and Power Department, excepting the chief engineer and second engineer; employees in the House Inspector and Maintenance Department, excepting the house inspector and the chief electrician; employees in the Laundry Department, excepting the superintendent and assistant superintendent; and excepting also all employees in the Manager's Office, Front Office, Telephone Department, Beverage Department, Accounting Department, Winter Sports Department, Printing Department and Billiards Department.*

3. Messrs. Thomas McGregor, S. H. Eighteen, F. H. Gillespie, W. J. Smith, W. H. Thompson, and J. F. Sheehen for clerks and stenographers employed in the *Passenger Traffic Department of the Canadian National Railways, Moncton, N.B.*

The chief clerk, passenger traffic representative and travelling passenger representative were excluded from the bargaining unit.*

4. Mr. John A. Holmes and Dr. Eugene Forsey and the *Canadian Radio Officers' Association, Pacific District, Local No. 4, and Atlantic District, Local No. 5, Canadian Section, Marine Department, American Communications Association*, for the radio officers employed on Dry Cargo Vessels operated from Canadian ports by the *Park Steamship Company, Limited, Montreal, P.Q.**

5. Messrs. H. B. Chase and J. B. Ward and the *Grand International Brotherhood of Locomotive Engineers* for the locomotive engineers handling steam or other classes of motive power while employed as such in Canada by the *Canadian Pacific Railway Company (including the Quebec Central Railway, subsidiary), Montreal, P.Q.***

6. Messrs. H. B. Chase, A. E. Evans, A. M. Brisbin and U. W. Carpenter and the *Grand International Brotherhood of Locomotive Engineers* for the locomotive engineers handling steam or other classes of motive power while employed as such in Canada by the *Canadian National Railways, Montreal, P.Q.***

Application for Certification Rejected

International Brotherhood of Electrical Workers, Local 1446, and Canadian Broadcasting Corporation, Toronto, Ontario (L.G., Dec., 1945, p. 1789). At the hearing on the application before the Board, it was disclosed that the employees involved in the application were but a small proportion of the 190 radio broadcasting technicians employed by the Corporation at its 22 offices throughout Canada.

In view of the fact that the Broadcasting Corporation is engaged in the business of communication and its radio broadcasting technicians work together on the same broadcast although their duties are performed at points some distance apart, the Board rejected the application on the ground that the proposed bargaining unit was not appropriate.

Applications under Investigation

1. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of assistant chief clerk, stenographer, clerk stenographers, maintenance-of-way clerk and clerks employed in the Superintendent's office of the *Canadian Pacific Railway Company, Regina, Saskatchewan.*

2. *International Brotherhood of Electrical Workers, Local Union, N.B. 1481*, for linemen superintendent, linemen, operators, electricians, improvers, helpers, groundmen and metermen employed by the *Pembroke Electric Light Company, Pembroke, Ontario.*

3. *Canadian Seamen's Union, Pacific Coast District* on behalf of the unlicensed crew members in deck, engineroom and steward's department of vessels of Canadian registry operated by the *Seaboard Shipping Company Limited, Vancouver, B.C.*

4. *Canadian Seamen's Union, Pacific Coast District* on behalf of the unlicensed crew members in deck, engineroom and steward's department of vessels of Canadian registry operated by the *Canadian Transport Company, Limited, Vancouver, B.C.*

5. *Canadian Seamen's Union, Pacific Coast District* on behalf of the unlicensed crew members in deck, engineroom and steward's department of vessels of Canadian registry operated by the *Canadian-Australasian Line Limited, Vancouver, B.C.*

6. *Canadian Seamen's Union, Pacific Coast District* on behalf of the unlicensed crew members in deck, engineroom and steward's department of vessels of Canadian registry operated by *B. L. Johnson Walton Steamships, Limited, Vancouver, B.C.*

* Following investigation of the application.

** Following investigation of the application and a public hearing.

7. *Canadian Seamen's Union, Pacific Coast District* on behalf of the unlicensed crew members in deck, engineroom and steward's department of vessels of Canadian registry operated by *Western Canadian Steamship Company, Vancouver, B.C.*

8. *International Union of Operating Engineers, Local 865* on behalf of shift engineers employed in the boiler room of the *Prince Arthur Hotel, Canadian National Railways, Port Arthur, Ontario.*

Decisions of Board in Appeal Cases

On March 5, the Board heard argument on the appeal of the Independent Canadian Mineworkers Union from a decision of the Ontario Labour Relations Board dismissing

the Union's application for certification of bargaining representatives of employees of Lakeshore Mines Limited, Kirkland Lake, Ontario, and its request that a vote be directed. Following a hearing, the Board expressed the opinion that the petition had been properly rejected by the Ontario Board when it was disclosed on investigation that the appellant did not have in membership a majority of the employees affected as required by Section 5 (2) of the Wartime Labour Relations Regulations, P.C. 1003, and in view of the appellant's failure to establish a prima facie case. Therefore, leave to appeal was granted but the appeal was dismissed.

The formal text of the Board's Reasons for Judgment is given below.

Between Independent Canadian Mine Workers' Union Petitioner Appellant and Lake Shore Mines Limited, Kirkland Lake, Ont., Respondent and International Union of Mine, Mill and Smelter Workers, Local 240 Intervener Respondent

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Hills, Mosher and Taylor.

Reasons for Judgment

The appellant asks leave to appeal and appeals from the decision of the Ontario Labour Relations Board dismissing its application for certification of bargaining representatives of employees of Lake Shore Mines Limited and asks that a vote be directed.

The intervener union, which had been certified previously as the bargaining representative of the employees by the Ontario Labour Court in 1944, intervened in the proceedings to ask for a further certification. When it became apparent that the appellant's application for certification would fail and in view of the negotiation of a new agreement by the intervener with the company, the intervener with the consent of the Ontario Board withdrew this request for further certification.

The appellant urged before this Board that a vote should have been directed to determine the bargaining representative; that the intervener should not have been permitted to withdraw its petition and further objected to the provisions of the judgment relating to the validity of the renewal of the agreement entered into between the intervener and the company.

The Ontario Board found that the appellant did not have a majority membership of employees among the bargaining unit as required by Section 5 (2) of the Regulations and, in view of the appellant's failure to establish a prima facie case, dismissed the application. This Board is of the opinion that the petition was properly dismissed on this ground. It was within the discretion of the Ontario Board to permit the intervener to withdraw its petition in the circumstances.

With the failure of the appellant's petition for certification, the authority of the present bargaining representatives to negotiate a new agreement was not thereafter an issue in the proceedings.

Leave to appeal is granted but the appeal is dismissed.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

E. SMITH, Esq.,
T. CANE, Esq.,
for Petitioner Appellant.

J. ELDON, Esq.,
T. F. MCGUIRE, Esq.,
for Intervener Respondent.

Dated at Ottawa, March 5, 1946.

**Between the British Rubber Company of Canada, Ltd., Montreal, Appellant
and Rubber Workers Federal Union (T. & L. C.) (Petitioner)
Respondent**

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Vice-Chairman.

This is an appeal from a decision of the Quebec Wartime Labour Relations Board certifying bargaining representatives for employees of the British Rubber Company of Canada, Limited, on the application of the respondent union. The appellant contends that the Board lacks jurisdiction to certify bargaining representatives as the employer and employees are not subject to the provisions of the Wartime Labour Relations Regulations. The appellant further contends that in any event a vote of employees in the bargaining unit should have been ordered by the Board prior to final decision as to certification.

The decision as to the jurisdiction of the Quebec Board turns on the question of whether the employees are employed upon a work, undertaking or business described in Schedule A to the Regulations. The appellant submits that throughout the past four years only a small percentage of its products and sales have gone to fill war contracts and that since September, 1945, it has had no contracts to fill for war purposes. It is contended, therefore, that following the decision of this Board in the Plastic & Linoleum Workers and Dominion Oilcloth case (D.L.S. 7-509), and the Canadian Marconi case (D.L.S. 7-577), the appellant's enterprise not being wholly devoted to production for war purposes is not subject to the provisions of the Wartime Labour Relations Regulations.

While certain sections of Schedule A to the Regulations provide that the work, undertaking or business described therein shall be one engaged in producing or manufacturing for war purposes, as for example section 8—"A work, undertaking or business engaged in manufacturing chemicals for war purposes", other sections thereof do not so specify. For example, section 7 of Schedule A reads—"7. A work, undertaking or business engaged in producing or processing natural or synthetic rubber." Consequently if a business is one "engaged in producing or processing natural or synthetic rubber" it is deemed for the purpose of the Regulations to be essential to the prosecution of the War and subject to the provisions of the Regulations without regard

to the extent to which its production is devoted to fill war contracts. The fact that the whole production of such a business may be disposed of to fill civilian contracts or for civilian requirements does not affect its status as a business falling within the provisions of the Regulations. The evident intent was to bring within the Regulations all employers and employees in such industry.

Moreover, while The National Emergency Transitional Powers Act, 1945, provides that for the purposes of the War Measures Act the War shall be deemed to no longer exist, it is further provided therein that the Governor in Council may continue orders and regulations lawfully made under the War Measures Act in full force and effect. The National Emergency Transitional Powers Act, 1945, does not in our opinion expressly provide that the War is terminated for all purposes and evidently contemplates that the national emergency arising out of the War referred to therein comprises the period of the remainder of the War and the period of transition from war-time to peace-time conditions. The Regulations are continued in effect in virtue of Order-in-Council P.C. 7414 of December 28, 1945, made under section 5 of The National Emergency Transitional Powers Act, 1945.

The appellant further contends that only a small percentage of its employees are engaged in the processing or treatment of rubber, the balance being engaged in the application of the treated or processed rubber to fabric in the production of rubber footwear and other rubber supplies. In the opinion of the Board, the operations carried on by the Company from the initial treatment of the rubber to and including the application thereof to fabric in the production of the goods produced by the Company are indivisible and constitute a rubber processing operation and therefore being the Company's operations within the provisions of Schedule A as an undertaking or business engaged in the processing of rubber.

The contention that the Quebec Board should have ordered a vote of employees before deciding to certify was not seriously pressed before this Board. There was evidence before the Quebec Board to the effect that the majority of employees in the bargaining unit were members of the respondent union and in these circumstances it was within the authority of that Board in the exercise of its discretion to certify without a vote having been taken. In the circumstances, we see no

good ground for interference with this decision.

The appeal is accordingly dismissed.

Dated at Ottawa, April 2, 1946.

**Between: International Brotherhood of Electrical Workers Local B-1038
(Petitioner) Appellant and The New Brunswick Electric Power
Commission, Respondent.**

The Board consisted of the Vice-Chairman and all members of the Board other than the Chairman.

Reasons for Judgment

The judgment of the Board was delivered by the Vice-Chairman.

This is an appeal from a decision of the New Brunswick Labour Relations Board rejecting an application for certification of bargaining representatives of employees of the New Brunswick Electric Power Commission on the ground that the Commission is not an employer within the meaning of the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, nor the persons employed by it employees within the meaning thereof.

In P.C. 1003 the term "employer" is defined as follows:—

2. (1) (g) "employer" means a person employing more than one employee and includes

- (i) the National Harbours Board; and
- (ii) any other body incorporated to act as an agent of His Majesty in right of Canada except any such body whose employees are entitled to a cost-of-living bonus under the order made by the Governor in Council on the twenty-sixth day of August, nineteen hundred and forty-one, for the payment of a cost-of-living bonus to employees of the Government of Canada (P.C. 6702) as amended;

but does not include His Majesty or any person or corporation acting on behalf of or as an agent of His Majesty except as hereinbefore expressly provided:

It will be observed that under the foregoing definition His Majesty or any person or corporation acting for or on behalf of or as an agent of His Majesty, is expressly excluded as an employer under the Regulations apart from corporate bodies incorporated to act as an agent of His Majesty in right of Canada and which are dealt with separately in the definition. This exclusion extends to His Majesty in right of the province and corporations acting for or on behalf of or as an agent of the Crown in right of the province as well as to His Majesty in right of Canada.

The Province of New Brunswick has pursuant to section 3 (1) (c) of the Wartime Labour Relations Regulations enacted legislation applying those regulations to employees and their employers who are ordinarily within the exclusive jurisdiction of the province, but has not in such legislation applied the regulations to the Crown in right of the province.

If, therefore, the New Brunswick Electric Power Commission is a corporation acting for or on behalf of or as an agent of His Majesty in right of the province, the provisions of the Regulations do not apply to the Commission nor to its employees.

In order to determine the status of the Commission, it is necessary to look at the provisions of the special act of the New Brunswick legislature under which the Commission was created and operates and which is now contained in ch. 24, R.S.N.B. 1927, and to consider the extent and nature of the authority and discretion vested in the Commission.

Under this Act:—

- (1) The Commission is appointed by the Governor in Council and members of the Commission may include two members of the Executive Council and salaries of the members of the Commission are fixed by the Governor in Council (secs. 3 and 6).
- (2) The Commission appoints its staff at salaries fixed by the Commission, subject to the approval of the Governor in Council (sec. 7).
- (3) The Governor in Council, upon the report of the Commission recommending same, may authorize the Commission to "(a) construct works; (b) acquire coal and land, etc.; (c) acquire water privileges; (d) construct machinery; (e) make contracts; (f) provide water storage; (g) take lands with or without the consent of the owner; (h) obtain works for the generation, transmission, distribution and use of electrical energy of any person, firm or corporation on such terms as the Commission may arrange with the owner, etc." (sec. 9).

Thus in undertaking any of the essential projects for which it was evidently created,

the Commission may do so only upon the express authorization of the Governor in Council.

The notable exceptions where discretion and authority is vested in the Commission without approval of the Governor in Council are to dispose of land previously acquired and found necessary to its business (sec. 12), to fix prices at which electric power or energy supplied by the Commission may be sold by a municipality (sec. 55), and to acquire and use for the purposes of the Commission, property and rights outside the province.

The provisions of the Act relating to the finances of the corporation are significant in considering the point at issue. The relevant sections of the Act are summarized in the judgment of the New Brunswick Labour Relations Board as follows:—

Section 14 (1)—The income of the Commission shall be applied to defray its operating expenses, for preservation, renewal and repair of its works, and the salaries of its members and employees.

(2)—All funds, including borrowings, income and revenue shall form one fund out of which the Commission shall make all expenditures necessary for the purpose of the Act. The Commission shall account therefor in its annual report.

Section 15—The Commission may retain and set out of money sums to provide for renewals of work, for interest upon working capital and to meet obligations, charges, salaries and for unforeseen expenditures. Any surplus remaining in the hands of the Commission shall be appropriated to such purposes as the Governor in Council may from time to time direct, and generally to maintain such reserve, depreciation and surplus accounts as should be maintained, by a properly managed public utility. The Commission may invest any funds not immediately required in Dominion of Canada or Provincial bonds or guaranteed securities.

The Commission shall annually pay to the Provincial Treasurer to establish a sinking fund account a sum sufficient to pay within a period not exceeding forty years from the date of the advance all monies heretofore or hereafter to be advanced by the Province.

Section 16—The Commission shall make to the Governor in Council an annual report.

Section 17—The accounts of the Commission shall at least every year be audited by the Comptroller General or by some other auditor appointed by the Governor in Council.

Section 18—When required by the Governor in Council, the Commission shall make investigations and collect and record data concerning the power industry.

Section 19—The Governor in Council may raise by way of loan, such sums as are deemed necessary for the purposes of the Chapter, not however to exceed \$12,800,000.00 and pay the same over to the Commission who shall account therefor.

Section 20—The Commission may borrow money for temporary purposes.

Section 21—When the legislature appropriates money for the purposes of the Commission, such money shall be payable to the

Commission under the order of the Governor in Council, from time to time on the requisition of the Commission.

Section 23—The Governor in Council may guarantee the repayment of the advances made by banks or other indebtedness incurred by the Commission.

Section 24—The Commission shall pay to the Provincial Treasurer at least annually such interest on the indebtedness of the Commission to the Province for money advanced to the Commission by the Province as may be from time to time, sufficient to reimburse the Province the full amount of interest paid by the Province on monies raised for the purposes of the Commission and all charges incurred by the Commission in providing such money.

It will be observed that the Commission's borrowing powers are limited to temporary financing, that the Governor in Council may guarantee its bank indebtedness, that other financing required is provided by or through the Government and that the surplus funds remaining after provision for current operations are appropriated as the Governor in Council directs.

It is of interest to note the view expressed in the decision of the Privy Council in the case of *Inglewood Pulp and Paper Co. Ltd., v. New Brunswick Electric Power Commission* (1928) A.C. 422, by Lord Warrington at page 493, in reference to this same Commission. "The respondents are virtually a department of the Province of New Brunswick and were incorporated by the Act referred to for the purpose of constructing, maintaining and operating works, machinery and plant for generating electric energy from (amongst other things) water power and for transmitting same."

In view of the wide extent and the nature of the controls vested in and exercised by the Governor in Council over the operations and activities of the Commission and the correspondingly limited discretion vested in the Commission in its operations, this Board is of opinion that the Commission was created to act as the servant or agent of the Crown in right of the province for the operation of the works and projects authorized by the Act, and so hold.

The appeal is therefore dismissed.

(Sgd.) A. H. BROWN

Vice-Chairman

For the Majority of the Board.

We dissent:

(Sgd.) A. R. MOSHER

(Sgd.) W. L. BEST

Senator A. W. ROEBUCK, K.C.,

for (Petitioner) Appellant

Mr. J. P. D. LEWIN, K.C.,

for Respondent

Dated at Ottawa, April 2, 1946.

Between: Local Union N.B., 1446, International Brotherhood of Electrical Workers, Applicant, and Canadian Broadcasting Corporation, Respondent, and Staff Councils, Intervener Respondent.

The Board consisted of the Chairman, Messrs. Best, Deschamps, D'Aoust, Complin, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an application by the union for the certification of bargaining representatives appointed by it for some 47 "radio broadcast technicians" employed by the Corporation at its Toronto offices. The chief question at issue is whether these employees constitute an appropriate bargaining unit. The Corporation contends that as it is a national undertaking the employees involved in the application are only a small proportion of the 190 radio broadcast technicians employed at its 22 offices throughout Canada and that certification should only be granted to bargaining representatives appointed by an organization representing a majority of the radio broadcast technicians of the Company throughout Canada.

A majority of the Board finds that the proposed bargaining unit is not appropriate.

The Canadian Broadcasting Corporation is

engaged in the business of communication and its radio broadcast technicians work together on the same broadcast, although their duties are performed at points which are hundreds of miles apart.

Accordingly, the application is refused.

Conciliation Proceedings under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Board in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During March 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Canadian Drawn Steel Co., Ltd., Hamilton, Ont., and Local 1031, United Steelworkers of America (CIO-CCL). Wm. Dunn, Conciliation Officer.

Canners' Machinery, Limited, Simcoe, Ont., and Local 257, International Union, U.A.A.I.W.A. (UAW-CIO). F. J. Ainsborough, Conciliation Officer.

Clare Shipbuilding Company, Limited, Meteghan, N.S., and Local 6, Industrial Union of Marine Shipbuilding Workers of Canada, (CCL). H. R. Pettigrove, Conciliation Officer.

Carbide and Carbon Chemicals Ltd., (Bakelite & Plastics Division), Toronto, Ont., and Local 512, United Electrical Radio and Machine Workers of America (CIO-CCL). Wm. Dunn, Conciliation Officer.

James Davidson's Sons, Ottawa, Ont., and Local 6, National Union of Woodworkers, (CCL). J. L. MacDougall, Conciliation Officer.

Kirkland Lake Gold Mining Co. Ltd., Kirkland Lake, Ont., and Local 240, International Union of Mine, Mill & Smelter Workers (CIO-CCL). H. Perkins, Conciliation Officer.

Opal Manufacturing Company Limited, Toronto, Ont., and Local 514, United Electrical, Radio and Machine Workers of America (CIO-CCL). Mr. F. J. Ainsborough, Conciliation Officer.

Smith & Stone Limited, Georgetown, Ont., and Local 526, United Electrical, Radio and Machine Workers of America (CIO-CCL). H. Perkins, Conciliation Officer.

John T. Hepburn Co., Limited, Toronto, and Locals 3356 & 3358 United Steelworkers of America (CIO-CCL). Wm. Dunn, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

Dominion Magnesium Limited, Haley, Ont., and Local Union 828, International Union of Mine, Mill and Smelter Workers, (CIO-CCL). G. Fenwick, Conciliation Officer.

John T. Hepburn Co., Limited, Toronto, and Locals 3353 and 3358, United Steelworkers of America (CIO-CCL). Wm. Dunn, Conciliation Officer.

John A. Lang & Sons, Limited, Kitchener, Ont., and National Union of Shoe and Leather Workers (CCL). G. Fenwick, Conciliation Officer.

R. P. & W. F. Starr Co., Limited, Saint John, N.B., and Local 1, National Union of Coal Distributors (CCL). H. R. Pettigrove, Conciliation Officer.

Victoria Tug Company, Victoria, B.C., and Canadian Seamen's Union, Pacific Coast Dist. (TLC). G. R. Currie, Conciliation Officer. In this case the union has withdrawn its application for intervention.

Boards Established

During March, Boards of Conciliation were established but not fully constituted as follows:

(Four Motor Companies.) British American Motors, Ltd., Toronto; General Motors Products of Canada (Truck Retail Branch), Toronto; Beattie Cadillac, Chevrolet, Oldsmobile Co., Ltd., Toronto; Giles, Rice and

Peters, Ltd., Toronto, and Local 1, Industrial Union of Automotive Employees (CCL).

Canadian Drawn Steel Co., Ltd., Hamilton, Ont., and Local 1031, United Steelworkers of America (CIO-CCL).

Canners' Machinery, Limited, Simcoe, Ont., and Local 257, International Union, U.A.A.I.W.A. (UAW-CIO).

J. H. Connor & Son, Limited, Ottawa, Ont., and Castings of Ottawa, Limited, Ottawa, Ont., and Local 641, International Union, U.A.A.I.W.A. (UAW-CIO).

Opal Manufacturing Company Limited, Toronto, Ont., and Local 514, United Electrical, Radio and Machine Workers of America, (CIO-CCL).

J. B. Smith Lumber Co., Toronto, Ont., and Local 1487, United Brotherhood of Carpenters & Joiners of America (AFL-TLC).

Weston Dairy Limited, Weston, Ont., and Local 647, Milk Drivers & Dairy Employees Union (AFL-TLC).

Boards Fully Constituted

During March, Boards of Conciliation were fully constituted as follows:

Canadian Industries, Ltd. (Windsor Works) Windsor, Ont.—The Board of Conciliation established to deal with a dispute between Canadian Industries, Ltd., (Windsor Works) and Local 195, International Union, (UAW-CIO) was fully constituted on March 18, 1946, with the appointment of Dr. Alexander Brady, Toronto, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. Gerald H. Brown, Ottawa, and Norman Levy, Toronto, were appointed on the recommendation of the employer and employees respectively.

Cosmos Imperial Mills, Ltd., Hamilton Ont.—The Board of Conciliation established to deal with a dispute between Cosmos Imperial Mills, Ltd., and Local 28, Textile Workers Organizing Committee (CIO-CCL), was fully constituted on March 6, with the appointment of His Honour Judge T. H. Barton, Hamilton, Ont., as Chairman of the Board, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board. Messrs. N. L. Mathews, Toronto, and C. L. Dubin, Toronto, were appointed on the nomination of the employer and employees respectively.

Hamilton Cotton Company, Limited, Hamilton, Ont.—The Board of Conciliation established to deal with a dispute between Hamilton Cotton Company, Limited, and Local

26, Textile Workers Organizing Committee (CCL) was fully established March 27, 1946, with the appointment of Dr. A. Brady, Toronto, as Chairman of the Board, who was appointed by the Minister in the absence of a joint recommendation of the other two members of the Board. Messrs. R. V. Hicks, and C. L. Dubin, both of Toronto, were appointed on the nomination of the employer and employees respectively.

Robbins & Myers Co., of Canada, Limited, Brantford, Ont.—The Board of Conciliation established to deal with a dispute between Robbins & Myers Co., of Canada, Limited, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO), was fully constituted March 18, 1946, with the appointment of Honourable Mr. Justice W. D. Roach, Toronto, Ontario, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Messrs. J. G. McMillen, and His Worship J. H. Matthews, both of Brantford, Ontario were appointed on the nomination of the employer and employees respectively.

Steel Company of Canada, Limited (Hamilton Works), Hamilton, Ontario.—The Board

of Conciliation established to deal with a dispute between Steel Company of Canada, Limited, (Hamilton Works) and Local 1005, United Steelworkers of America, (CIO-CCL) was fully constituted on March 20, 1946, with the appointment of His Honour Judge M. A. Miller, Sarnia, Ontario, as Chairman of the Board, who was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board. Messrs. J. S. D. Tory, K.C., Toronto and J. E. McGuire, Ottawa, were appointed on the nomination of the employer and employees respectively.

The Wellesley Hospital, Toronto, Ontario.—The Board of Conciliation established to deal with a dispute between The Wellesley Hospital and Local 204, Building Service Employees International Union, (AFL-TLC) was fully constituted on March 22, 1946, with the appointment of His Honour Judge Egerton Lovering, Toronto, Ontario, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Messrs. Norman L. Mathews, and Bora Laskin, both of Toronto, were appointed on the nomination of the employer and employees respectively.

Dispute at Phillips Electric Company, Brockville

On December 18, 1945, pursuant to a reference from the Ontario Labour Relations Board under Section 12 of the Wartime Labour Relations Regulations, P.C. 1003, Mr. G. R. Fenwick was appointed Conciliation Officer in an attempt to settle the points at issue between the Phillips Electric Company of Brockville, Ontario, and Local 510, United Electrical, Radio and Machine Workers of America.

The Company and the Union had been in contractual relationship since 1937, the latest collective agreement having been signed in 1940. Subsequently this agreement had been amended on several occasions. The present dispute arose from the Union's proposal of further amendments to the original contract. Following the appointment of the Conciliation Officer, the parties agreed to re-enter direct negotiations in an attempt to arrive at a new agreement; this on the understanding that the 1940 agreement should meanwhile remain in force. There was a further understanding that following the Union's presentation of a new draft agreement, negotiations between the parties should open on February 18 or before.

Negotiations in this direction broke down on February 19. On February 20, two one-hour sit-down strikes took place in the Brockville and Montreal plants of the Company. At the first strike the management informed the employees that such action was contrary to existing regulations—the Wartime Labour Relations Regulations P.C. 1003—and also (in the Brockville plant) contrary to the existing agreement between the Company and the Union. At the same time the Company informed the Union that further action of this kind by the employees would mean dismissal. As a consequence, when the second sit-down occurred, separation notices were issued to approximately 680 employees at Brockville and 200 employees at Montreal who had participated therein.

When negotiations between the parties broke down on February 20, Mr. Fenwick was redirected to the Brockville dispute and Mr. Miron was assigned by the Quebec Labour Department to the dispute at the Montreal plant. As the *LABOUR GAZETTE* goes to press it is reported that a settlement has been reached by the parties, details of which will be carried in the next issue.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended,

either by the Minister, or by mutual consent of the parties concerned. The following reports were received by the Minister of Labour during March:—

Report of Board in Dispute Between Canadian Marconi Co., Ltd., Montreal, P.Q., and Commercial Telegraphers' Union, Canadian Marconi System, Div. No. 59

On March 20, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—Mr. L. W. Brockington, K.C., Ottawa, appointed on the joint recommendation of the other two members of the Board, Messrs. W. A. Merrill and Bora Laskin, appointed on the nomination of the employer and employees respectively.

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, as amended, and In the matter of a dispute between Canadian Marconi Company Limited, Montreal, and Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Dear Sir:

The Board of Conciliation appointed by you in the above matter begs to report as follows:—

The Board met in Montreal and in Toronto to consider the representations of the parties and for private deliberation on the two issues referred to it, namely (1) the request of the Union for the incorporation in the renewal collective agreement with the Company of a clause providing for a union shop, and (2) the request of the Union for revision of the seniority clause heretofore included in its collective agreements with the Company. In addition, the Chairman with the approval of his colleagues interviewed the Manager of the Company after the hearings were over in an attempt to ensure an agreement between the parties and the consequent unanimity of the Board.

At the hearing before the Board the Union was represented by J. N. A. Blouin, General Chairman; W. McKay, Eastern District Chairman; and H. Johnson, Great Lakes District Chairman. The Company was represented by S. M. Finlayson, General Manager; J. Fergus, Secretary-Treasurer;

W. J. Gray, Assistant General Manager; and A. Wilkins, Marine Superintendent. Both during and after the open hearing, the Board sought, in accordance with its view of its primary function, to conciliate the parties on the two issues on which they were deadlocked in their negotiations for a renewal of their collective agreement. In this the Board was unsuccessful, although at the hearing the Union modified its request for a complete union shop, and urged instead that provision be made that all new employees must become members of the Union, and that existing employees who are or who voluntarily become members of the Union must maintain their membership therein, in both cases as a condition of continued employment with the Company.

The facts which emerged as a result of the submissions on behalf of the parties to this Board may truly be described as unique. The Union has been in existence for 26 years and has had collective bargaining relations with the Company during the whole of this period. Relations have been good, and the Company was in substantial agreement with the Union's contentions that the advent of the Union had been followed by improvements in the lot and position of the employees of the Company and that the Union's conduct had been good. There has been no stoppage or disruption of work, and both parties have been faithful to the terms of the collective agreements which for more than a quarter of a century have governed their relations. The Union represents employees in the marine service of the Company, that is, persons engaged in ship radio telegraphy and telephony. There are about 110 such employees eligible for membership in the Union, and the Union claims that some 90 per cent of these are and for many years have been members of the Union in good standing. The service records of the employees of the Company have been outstanding, ranging from 20 to 38 years of continuous service, and reflecting credit both upon the Company and upon the individual employees. The officials of the Union are themselves employees of the Company, and those who represented the Union at the hear-

ing had from 23 to 29 years of service in the Company's employ. The Union is a craft union, representing men who have by training and experience become skilful and proficient in a particular line of endeavour. It has represented to the Board that it has no great difficulty in enrolling new employees as members or in retaining the membership of existing employees. In fact, it has recorded that incoming employees who number a very few every year are in the habit of joining the Union as a matter of course. There are but a small number of existing employees who have not joined the Union, and since they are very old employees, both in age and in service, the Union declared before the Board that it would not press for their compulsory acceptance of membership. No check-off was asked for with respect to any members.

It is against this background of a continuous record of mutual trust and cordiality, unusual in Canadian experience of collective bargaining that the Union's request for a modified union shop must be assessed and appraised. It is not improbable that the attitude both of the Company and of the Union towards the request for a modified union shop may have been affected rather by events taking place elsewhere than by the pertinent facts particularly applicable to the situation in discussion. In effect, the Union seeks to regularize through co-operation with the Company a situation which, in practice, it has been able to handle unilaterally for some years past. We think that in the special existing circumstances here evident, the Union is entitled to ask for this degree of co-operation from the Company. The proof of responsibility which the Union has offered over so many years warrants it in asking for a formal recognition of its extended rights. The Union has some legitimate reason for feeling that membership therein should be accepted as automatically as other conditions of employment are accepted by persons who seek to engage in the Company's service. Accordingly, the majority of the Board recommends that the parties incorporate in their renewal collective agreement a clause providing that within thirty days after joining the Company's service new employees shall obtain membership in the Union which, together with the payment of dues, shall continue for the period of the collective agreement, and that existing Union members shall continue their membership and the payment of their dues also during the period of the collective agreement. If the experience of the past offers any guide the Company is not likely to be restricted in its choice of suitable employees by these limited provi-

sions. It is perhaps needless to add that this recommendation is in no way intended to reflect the Board's views in other circumstances or in other situations.

The only other point in dispute was on the question of seniority. The Union seeks an amendment of the seniority clause which has, over many years, been included in successive collective agreements between it and the Company. This clause reads as follows: "The right of seniority, with requisite ability, shall govern in all cases". Both the Company and the Union agreed before the Board that the clause was applicable whenever a vacancy was bulletined, and could be invoked when a senior employee was laid off or was out of a job because the position he occupied was abolished. The Union's proposed amendment reads as follows:—

The right of seniority, with requisite ability, shall govern and it is understood and agreed that the right to exercise seniority shall apply only as follows:

- (a) When a vacancy is bulletined.
- (b) When a senior is laid off or is out of a job, due to his position being abolished.
- (c) When a position which was not bulletined is occupied by a junior; subject only to the provision that the position sought shall be a promotion, either in a wage increase, or in a shorter working week.

The only difference, practically, between the existing seniority provision and that now proposed by the Union lies in clause (c) of the Union Proposal. This clause, on its face, would enable seniority rights to be exercised retroactively, so to speak, against junior men now occupying positions in which they had been confirmed by the Company, and as to which they may not have been challenged at the time the positions became open. While the Union contended that a practice of "bumping" junior men at any time was well established, and cited a number of examples in support of its contention, the Company contended on its part that there was no established practice by which seniority rights could be asserted with retrospective effect. Both parties admitted, however, that the retroactivity which the Union sought to introduce by clause (c) of its proposal related to one particular situation.

In the view of the Board, confirmed in this respect by the submissions of the parties, clause (c) of the Union's proposal is designed to cope with this one situation only, and will then probably be regarded as spent. The issue raised by clause (c) turns hence on the facts of the special situation referred to. The matter involved the appointment of an employee in 1928 to a position which, the

Union submits was then regarded as seasonal or temporary, and which, on becoming permanent in 1937 (and hence, as was admitted by both parties, desirable) was then sought by an employee senior in length of service and at least equal in ability to the incumbent of the position. The Company maintained then, as it does now, that nothing in the seniority provisions obliged or entitled it to remove an employee from an existing position to accommodate a senior employee who occupied a position with the Company which was not slated for abolition. The Union lodged a grievance at the time, and it now asserts that the matter has remained a grievance to this date.

The right of seniority, with requisite ability, shall govern and it is understood and agreed that the right to exercise seniority shall apply only as follows:

The evidence before the Board does not establish that the Union activity pursued the alleged grievance in the years between 1937 and 1945; and it may perhaps be regarded as having "slept on its rights", if any, during that time. The Board became aware at the hearing that until the current negotiations between the parties for a renewal agreement, there had never been any provision for final impartial arbitration of grievances with the result that the final decision rested with management. If the management made a decision in 1937 which was adverse to the Union, the vice of the matter, from the Union's standpoint, was not that the grievance was unsettled but that there was no final arbitration through an impartial third party with whose decision the Union might have been better satisfied.

The Board feels that it would not be justified, after the lapse of so many years, in treating as still open a matter which was not opened for many years, and which, when opened, was settled finally through the only method by which there could then be finality, and which, so far as the evidence discloses, remained dormant between 1937 and 1945.

Since the Union has now the protection of a final arbitration clause providing for impartial arbitration of all grievances, including those arising in relation to seniority, the Board recommends that the Union abandon its proposed seniority clause and that the parties agree on the following clause, which, the question raised by clause (c) aside, was acceptable to the parties at the hearing:—

The right of seniority, with requisite ability, shall govern in all cases, and the Company agrees that all vacancies shall be bulletined.

In conclusion, the Board wishes to record its deep appreciation of the courtesy and mutual forbearance of all those who appeared before it and to express its hope that the good relations between the parties which are almost historical in their continuity persist for the benefit of both.

Respectfully submitted.

(Sgd.) BORA LASKIN,
Employees' Nominee.
(Sgd.) LEONARD W. BROCKINGTON,
Chairman.

Minority Report

I find myself unable to agree with that part of the finding of the majority of the Board which recommends that the parties incorporate in the renewal of the collective agreement a clause providing for a modified Union Shop.

The facts as disclosed at the hearing as to the relationship between the Company and the Union for the past twenty-six years would indicate that the Union as sole bargaining agent for all that time, possessed all the security that could be desired and no reasons were advanced which would indicate that this situation would not continue in the future.

It was stated by the representatives of the Union that it has no great difficulty in enrolling new employees as members or in retaining the membership of existing employees.

A Union Shop clause which provides for maintenance of membership in the Union as a condition of continuance of employment imposes a restriction and interference with an employer's prerogative to retain the services of a satisfactory employee, member of a Union, who has ceased to be a member for reasons of no concern to the employer, as for example the breach of a Union rule; failure to pay Union dues or resignation from the Union for personal reasons, et cetera.

The long and cordial relations which have existed between the Company and the Union for so many years probably would have continued to exist without a request by the Union for the intervention of a Board of Conciliation, had the Union not sought to displace an old employee, who had occupied a certain position for seventeen years or more and who had formerly been a member of the Union from which he had resigned, by means of proposed Union Shop and retroactive security clauses to be incorporated in the renewal of the collective agreement.

At no time during the hearing before the Board was it even suggested that the relations between the Company and the Union were or have been such as to place the security of the Union in jeopardy.

Considering the number of employees with long years of service as one factor alone, the Company would appear to be justified in refusing to subscribe to the principle that the continued employment of such employees, who are members of the Union, would be dependent upon their continued membership in good standing in this particular Union.

With all due deference to the opinion of the majority of the Board, that a modified Union Shop clause should be incorporated in the agreement because the relationship between the Company and the Union up till now has been satisfactory, would seem to me to be the very reason why a Company should not be asked to subscribe to such a clause which might oblige the Company at

some time, against its will and better judgment, to dismiss an old and valued employee who has ceased to be a member of the Union and thus be the means of disrupting the harmonious relationship which it is of such importance to maintain.

As regards the second matter which came before the Board relative to seniority, I am in agreement with the other members of the Board that for the reasons set forth in the Majority Report, the suggested clause which was acceptable to the parties at the hearing be incorporated in the agreement.

Montreal, 7th March, 1946.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

Report of Board in Dispute between Schultz Die Casting Co., Wallaceburg, Ont., and Local 251, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO)

On March 25, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: His Honour Judge M. A. Miller, Sarnia, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Frank Ellis, Windsor, and Alan Adamson, Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you report as follows:—

At all meetings of the Board the Company was represented by Mr. T. H. Campbell, plant superintendent, Mr. D. C. Martin, personnel manager and Mr. G. C. Richardes, counsel, and the union by Mr. Drummond Wren, International representative, Mr. Roy E. Brown, International representative and Mr. Joseph Kay, committee chairman of Local 251, UAW-CIO.

The company and Local 251 of the union entered into a collective agreement May 1, 1943, which by its terms was to remain in effect until May 1, 1944, and from year to year thereafter unless terminated by notice in manner prescribed. No notice terminating the agreement has been given by either party, but the union seeks amendments and additions to the agreement.

At the time of the first meeting of the Board no progress had been made, and at

that meeting the union submitted a long list of amendments and additions which it desired to have made to the agreement. After some discussion the Board adjourned to enable the company to study the union's proposals. When the Board met again there had been no intervening meetings between the parties, and the union's proposals were considered before the Board one by one.

The company took the position that no differences had arisen indicating the need of any change in the existing agreement. The union, while not urging that any such differences had arisen, contended that the agreement should be made as complete as possible, with a view to anticipating and preventing differences.

At that and two subsequent meetings of this Board and the representatives of the parties some eighteen amendments and additions to the agreement of May 1, 1943, were agreed upon. Particulars of the amendments and additions to be made appear in schedule one hereto.

There remain some eight points on which the parties were unable to agree.

1. The present agreement is between the Company and Local 251 of the union. The union desires that this be changed and that the amended agreement be between the company and the international union through its local 251. It may be that there is a principle involved and that situations might arise in which the difference would be important. The Board are of the opinion, however, that inasmuch as the agreement of May 1, 1943, has not been terminated, and that what are now being considered are amendments to the existing agreement, this is not an opportune time to consider changes in the parties to

the agreement and that the union's request should be dropped.

2. The union asks that Section 1 of the Agreement be amended so as to make the union the sole bargaining agent not only for those employees who are members of the union, but for all employees of the company other than those specifically excepted.

Inasmuch as all of the employees of the company coming within its purview are bound by the agreement, the Board are of the opinion that the union should be the sole bargaining agent for all the employees, save those specially excepted. This should, however, be subject to the other provisions of the agreement in that under Section 7 of the agreement an employee may submit a grievance direct to his foreman and is not confined to submitting it through a committeeman of the union.

3. The union asks for, and the company oppose, union security, and the check-off of union dues. The union claims 65 per cent of the eligible employees of the company as members. There being so large a minority of non-members of the union among the employees, the union does not ask that all employees be compelled to join the union. It does ask that all present and future members of the union be compelled to maintain their membership and that new employees be compelled to join the union as a condition of their employment.

The Board are of the opinion that this question might fairly be disposed of by an adaptation of the form of union security provided by the decision of the Honourable Mr. Justice Rand in his arbitration of the disagreement between Ford Motor Company of Canada Limited and Local 200 UAW-CIO.* Inasmuch as there is so large a minority of non-members of the union among the employees of the company, it would not, in the opinion of the Board, be in the interests of the harmonious operation of the business of the company, nor indeed of the union itself, to compel non-members of the union to pay dues to the union. They think it fair, however, that the members of the union, having asked the union to act on their behalf, should be compelled to pay dues to the union during the lifetime of the agreement, and that new employees be similarly compelled to pay dues to the union. The Board are also of the opinion that dues so payable should be deducted each month from the pay of the employees affected. It appears to the Board that this would not be a great burden on the company, and that there would be some compensation in that the tendency to waste time in the collection of dues on the com-

pany's premises would be done away with.

The Board are of the opinion that the company in consideration of its concession to the union should have protection against unauthorized strikes along the lines set out in the decision of Mr. Justice Rand in the Ford case. Mr. Adamsop felt that there were some dangers in permitting employees who were not members of the union to vote on the question of authority to strike but, for the sake of agreement, was prepared to concur in the recommendation as set out in this report and the second schedule hereto.

4. Under Section 6 of the present agreement the union may appoint not in excess of five committeemen, with provision for the appointment of three alternate committeemen. The union asks that the number of committeemen be increased to eight, and that the provision for alternates be deleted. It gives as a reason that the company has opened a second plant in Wallaceburg, and that to avoid inconvenience there must be some committeemen in the second plant, and they say that in practice no alternate committeemen have ever been appointed. The company take the position that at the time the present agreement was entered into it applied to some 405 employees; that now there are but 295 employees, 39 of whom are employed in the second plant, and that there is no occasion to increase the number of committeemen by more than one. They point out that under the agreement committeemen have certain seniority privileges; that they are permitted to do a certain amount of union work on the company's time, and that their number should not be unnecessarily increased.

The Board are of the opinion that the union might not unreasonably require two committeemen in the second plant, even though the number of employees in that plant is small. A committeeman might well want another committeeman available with whom he could discuss matters that might affect the union or the employees. Inasmuch as the number of employees has been materially reduced since the present agreement was made, and some of that reduced number are in the second plant, it appears to the Board that the number required in the first plant might be less than five and that six committeemen divided between the two plants as the union sees fit would be sufficient.

5. The union desires, and the company oppose an amendment to the grievance procedure, Section 7 (e), making the decision of the umpire in decisions as to alleged wrongful dismissal binding on the parties. The company say that just as the right to strike is the ultimate strength of the union, so the right to dismiss an employee is the ultimate strength of the company in main-

* L.G., Jan., 1946, p. 123.

taining discipline in the plant. They have already agreed to an amendment to this clause providing that the decision of the umpire on questions involving the interpretation or violation of the agreement shall be final. They take the position that the fact that a dismissed employee may take his complaint through the stages of the grievance procedure, and may obtain the decision of an umpire on the question of whether or not his dismissal was justified is sufficient to prevent the company from acting arbitrarily. The Board are disposed to agree that that is so in a town the size of Wallaceburg, where the company operates. In the opinion of the Board it has not been demonstrated that there is any need for the amendment of the agreement in this respect at the present time and the Board suggest that if in the opinion of the union such need should arise in the future, it might be well to consider a provision that in cases of alleged wrongful dismissal the umpire should be a member of the judiciary. The Board recommend that the union request be dropped.

6. Section 10 of the present agreement provides that "an employee reporting for work *on instructions of the company* but for whom no work at his regular job is available, will be offered at least two hours employment in other work at his regular hourly rate or, at the company's option, will be paid two hours time at his regular hourly rate." By agreement before his Board, the words "on instructions of the company" will be struck out and replaced by the words "on a regular shift without having had notice not to do so." The union asks that the section be further amended to provide four hours instead of two hour's work or pay under such circumstances. The Board are of the opinion that the section as amended places sufficient penalty on the company to insure that they will not arbitrarily or thoughtlessly permit men to return to work when there is no work for them and that in a town the size of Wallaceburg it affords reasonable compensation to employees going to work when there is no work for them and that the main purposes of the section are thereby achieved. The Board recommends that the union's request be dropped.

7. The union asks that there be added to the agreement a section as follows: "The company agrees to maintain during the life of this agreement, and the union agrees to accept, the existing hours of work unless altered or changed by collective bargaining subject to permission of any Board having jurisdiction." The Board are of the opinion that the proposed section would obligate the company to maintain the existing hours of

work regardless of whether or not the company had sufficient orders to enable them to furnish work for those hours and that the clause should not be added to the agreement.

8. The union asks that clause (m) of Section 8 of the agreement be amended so as to provide that promotions to higher paid jobs or better jobs with equal pay shall be based primarily upon seniority, rather than upon merit and ability.

The argument of the union, of course, is that the clause as it now reads leaves the employees subject to favouritism and discrimination, while the company takes the position that unless merit and ability are to be recognized, efficiency within the plant must suffer. There has been no suggestion of favouritism or discrimination in promotions in the past but the union, as in the case of the other amendments asked for, says that the agreement should endeavour to anticipate any possible differences in the future.

The Board are of the opinion that, with other things being equal, seniority might well govern, but that merit and ability should not be lost sight of in promotions. It would be difficult, if not impossible, to draft a clause, the workability of which would not be wholly dependent upon the good faith of the company, but they suggest the following: "Promotions to higher paid jobs or better jobs with equal pay shall be based upon seniority, save in those cases where, in the opinion of the company, merit and ability should be the governing factor. The exercise of the company's judgment in this matter shall not be, but its good faith in the exercise of its judgment shall be, subject to the grievance procedure. Nothing in this clause shall affect promotions to supervisory positions."

This Board recommends that in addition to the amendments already agreed upon and set forth in schedule 1 hereto, the agreement of May 1, 1943, be further amended to give effect to the opinions herein expressed. The Board has set out in a second schedule hereto proposed amendments designed to facilitate that end.

The long list of amendments already agreed upon indicates the extent of the co-operation accorded this Board by the parties, a co-operation which the Board gratefully acknowledges, and which leads it to hope that the recommendations herein made may lead to still further agreement.

All of which is respectfully submitted.

Dated at Sarnia, this 16th day of March, 1946.

(Sgd.) N. A. MILLER,
Chairman.
(Sgd.) ALAN H. ADAMSON,
Member.

Schedule 1

Schedule of amendments and additions which the parties have agreed shall be made to the collective agreement dated May 1, 1943, entered into by Schultz Die Casting Company of Canada Limited and Local 251 UAW-CIO.

1. Paragraph 2 of the existing agreement will be amended by adding at the beginning thereof the words "Subject to the other provisions of this agreement."

2. Paragraph 3 of the existing agreement will be struck out and the following substituted therefor: "3. The union further recognizes the undisputed right of the company to operate and manage its business in all respects in accordance with its commitments and responsibilities. The products to be manufactured, the location of plants and, subject to the provision of this agreement as to health and safety, the schedules of production, the methods, processes and means of manufacturing are solely and exclusively the responsibility of the company. The company also has the right to make and alter from time to time rules and regulations to be observed by employees, which rules and regulations shall not be inconsistent with the provisions of this agreement."

3. Paragraph 5 of the existing agreement will be struck out and the following substituted therefor: "5. There shall be no discrimination, interference, restraint or coercion by, or on behalf of, the company regarding any employee, because of membership in the union. The union, its members, or agents, shall not intimidate or coerce or attempt to intimidate or coerce employees into membership and no employee or union official shall solicit members, collect dues or engage in any union activity during his working hours or on company time, save as expressly provided by this agreement; nor shall any employee or union official solicit members, collect dues or engage in any union activity on company premises in such manner, place or time as to interfere with other employees during the working hours of the latter, save as expressly provided by this agreement. Violation of the foregoing shall be just cause for discipline by the company."

4. Paragraph 6 of the existing agreement shall be amended by striking out the words "a British subject" where they appear in the second paragraph thereof.

5. Clause (a) of paragraph 7 of the existing agreement shall be amended by adding at the beginning thereof the words "Subject to the other provisions of this agreement."

6. Clause (d) of paragraph 7 of the existing agreement will be amended by striking out the proviso which is in the following words: "Provided further, however, that except when agreed upon between the plant manager and the chairman of the committee, the chairman and the relevant committeeman who has theretofore handled the grievance shall be the only members of the committee to participate in the conference," and substituting therefor the following: "Provided, however, that the company shall not be obliged to pay (under Section 6 hereof or otherwise) for the time of more than five committeemen present at any such conference during working hours, and the company shall not be obliged to pay for the time of any

committeemen present at any conference held after twelve conferences have previously been held in the same calendar year."

7. Clause (e) of paragraph 7 of the existing agreement will be amended by adding to the last sentence thereof the words: "save that in any decisions on disputes as to the interpretation or violation of this agreement, the decision of the umpire shall be binding on both parties."

Memo: This addition was agreed to by the parties, but the union also wants decisions as to alleged improper dismissal of employees to be binding, whereas the company does not. This is dealt with in the report.

8. Paragraph 7 of the existing agreement will be amended by adding thereto as clause (k) thereof the following: "(k) If the committee are of opinion that any grievance submitted by an employee directly, and not through a committeeman, is of concern to more employees than the one submitting it, the committee, if it is dissatisfied with any decision and regardless of the action of the employee in question, may carry the same through the successive stages of the grievance procedure, notwithstanding that a decision satisfactory to the employee in question may have been rendered, and the committee shall be entitled to the same notice of decisions as the employee in question."

9. Paragraph 10 of the existing agreement will be amended by striking out the words: "on instructions of the company" and substituting therefor the words: "on a regular shift without having had notice not to do so," so that the paragraph will hereafter read: "10. An employee reporting for work on a regular shift without having had notice not to do so, but for whom no work at his regular job is available, will be offered at least two hours employment in other work at his regular hourly rate or, at the company's option, will be paid two hours' time at his regular hourly rate. This provision shall not apply when such lack of work is due to a labour dispute, fire, flood or other cause beyond the control of the company."

Memo: The union also ask that this paragraph be amended by substituting the word "four" for the word "two" where it appears in the said paragraph. The company did not agree to this proposal and it is dealt with in the report.

10. Paragraph 11 of the existing agreement will be struck out and the following substituted therefor: "11 (a) The company will not unreasonably refuse leave of absence without pay when required by any employee for specified personal reasons, the question of the reasonableness or otherwise of the request to be in the discretion of the company.

(b) The company will grant temporary leave of absence without pay to a union official or other member delegated by the union for the purpose to attend to union business, provided that circumstances are such that, in the opinion of the company, it can be done without unreasonably interfering with the operation of the company,—this clause to be subject to the grievance procedure.

(c) On no more than two occasions in one calendar year the company will allow leave of absence without pay to not more than one delegate of the union for the purpose of attending conventions or conferences of the Union."

11. Paragraph 15 of the existing agreement will be struck out and the following substituted therefor: "15. This agreement shall continue in full force and effect until the 1st day of April, 1947, and from year to year thereafter until terminated by either party giving to the other two months' notice of its desire to terminate it. Either party may, between the first days of January and February in any year, give to the other notice of its desire to amend or add to this agreement, full particulars being specified in the notice, in which event negotiations in respect of such proposed amendments or additions shall commence within twenty days, and all provisions of any statutes or regulations then in force in respect to negotiations for a collective agreement shall apply to such negotiations for amendments or additions. Any amendments or additions which may be agreed upon shall become a part of the agreement without modifying or changing any of the other terms of the agreement except in so far as may be necessary to give effect to such amendments or additions."

"Notice shall be in writing and shall be sufficient if sent by registered mail addressed, if to the union, to Local 251 UAW-CIO, Wallaceburg, Ontario, and, if to the company, addressed to the Plant Manager, Schultz Die Casting Company of Canada Limited, Wallaceburg, Ontario."

Memo: The date to which the agreement will remain in effect will be changed to a year following the date when the amended agreement is signed and the same relative changes will be made in the dates between which notice of a desire to amend is to be given.

12. There will be added to the existing agreement in an appropriate place the following paragraph:—

REST PERIOD

The company will grant one ten-minute rest period in each shift of eight hours and two ten-minute rest periods in each shift that is more than eight hours. In addition the company will allow a period of five minutes for the purpose of washing up and putting away tools immediately prior to the end of the shift. This will not apply if hours of work drop to fewer than eight hours per day. The union agrees to co-operate with the company when necessary to discipline those employees who take time off in excess of the wash-up period herein provided."

13. There will be added to the existing agreement in an appropriate place a paragraph as follows:—

OVERTIME ON HOLIDAYS

The company shall pay a rate of time and a half for overtime for all work performed on the following holidays: New Year's Day, Good Friday, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas.

14. Clause (n) of paragraph 8 of the existing agreement will be amended by adding thereto at the end thereof the following proviso: "provided such transfers are not made temporarily for the purpose of giving factory employment to office workers and thus displacing employees covered by this agreement."

15. Clause (o) of paragraph 8 of the existing agreement will be re-lettered as clause (p) and the following will be added as clause (o) of paragraph 8 of the existing agreement: "(o) If an employee is temporarily transferred by the

company (other than at his own request) to a different classification than that in which he is regularly employed, he shall be paid at a rate not lower than that applicable to the classification in which he has been regularly employed. If classification to which he has been so temporarily transferred has a higher range of pay than that in which he is regularly employed he shall, while so temporarily employed, be paid at that rate prevailing in such higher classification as his skill in the higher classification merits. Temporarily shall mean not longer than twelve working days."

16. Clause (j) of paragraph 8 of the existing agreement will be amended by adding at the end thereof the following: "When it becomes necessary to transfer employees to lower paid jobs, or less desirable jobs at the same pay, the same principle shall be followed."

17. There will be added to the existing agreement in an appropriate place a paragraph as follows:—

HEALTH AND SAFETY

The company will continue to provide and maintain adequate and proper sanitary arrangements and safety devices throughout the plant and to give proper attention to the maintenance of safe and healthy conditions and practices of employment. It will continue to supply to employees such protective accessories and equipment as it now makes a practice of providing. Nothing in this agreement contained is to obligate the company to continue any form of insurance which it now maintains or assists in maintaining for the benefit of its employees or any of them.

18. There will be added to the existing agreement in an appropriate place a paragraph as follows:—

BULLETIN BOARDS

The company extend to the union the privilege of using four bulletin boards in its plant, the location and size of the same to be mutually determined. Notices to be posted thereon shall be restricted to information concerning union meetings, elections, social events and other affairs of general interest to the employees.

Schedule 2

Schedule setting forth recommendations of the Board of Conciliation for further amendments to the collective agreement dated May 1, 1943, entered into by Schultz Die Casting Company of Canada Limited and Local 251 UAW-CIO.

1. Paragraph 1 of the existing agreement be struck out and the following substituted therefor: "(1) Subject to the other provisions of this agreement the company recognize the union as the sole bargaining agent, for collective bargaining purposes, for all the company's employees in its plant at Wallaceburg, Ontario.

Provided that all employees while within the following classifications, whether or not members of the union, shall not be subject to the provisions of this agreement.

Salaried employees, employees in a supervising position, time study men, office workers, watchmen, engineering staff, nurses and matrons."

2. Paragraph 4 of the existing agreement to be amended by re-numbering the present paragraph as No. 4 (a) and adding thereto the following clauses:

(b) All employees of the company who now are or hereafter become members of the union and all employees who may hereafter be engaged by the company and to whom this agreement applies shall each pay to the union \$1.00 per month during the life time of this agreement. The company shall deduct the said payments from the wages of the respective employees by whom they are to be made and at the end of each calendar month and prior to the tenth day of the following month the company shall remit by cheque the total of the deductions to the local union.

(c) This provision for union security shall be enforced by the company against each employee to whom it applies as a condition of his continuance in or entrance into the company's service.

(d) Any employee to whom clause (b) hereof applies shall have the right to become a member of the union by paying the entrance fee and complying with the constitution and by-laws of the union.

(e) The union will not cause or permit its members to cause, nor will any member of the union take part in any sit-down, stay-in or slow-down in any plant of the company or any curtailment of work or restriction of or interference with production of the company.

(f) No strike, general or partial, shall be called by the union nor taken part in by any employee of the company until all of the grievance procedure outlined herein has been exhausted nor before a vote by secret ballot supervised by an officer of the Department of Labour for Ontario or other person appointed by the Minister of Labour for that province shall have been taken of all employees to whom the agreement applies (whether or not members of, or paying dues pursuant to the provisions of this section to, the union) and a majority voting have authorized the calling of a strike within two months from the balloting.

(g) The union by two officers of the local, including the president or acting president, shall repudiate any strike, sit-down, stay-in, slow-down or other concerted cessation of work whatsoever by any group or member of employees that has not been called by the union after compliance with the provisions of clause (f) of this paragraph; and shall declare that any picket line set up in connection therewith is illegal and not binding on employees. The repudiation and declaration shall be communicated to the company in writing within 72 hours after the cessation of work by the employees or the forming of the picket line respectively.

(h) In addition to any other action which the company may hereunder or otherwise lawfully take any employee participating in an unauthorized strike or other concerted cessation of work not called by the union shall be liable to a fine of \$3 a day for every day's participation therein and to loss of one year's seniority for every continuous participation therein for a calendar week or part thereof.

(i) Should the union violate the provisions of this section either by declaring a strike without complying with clause (f) of this section or by failure to repudiate or to declare as herein provided it shall be liable to the penalty of a suspension of the check-off; in the case of any unauthorized strike by the union

or an unauthorized general strike or concerted cessation of work by employees which it does not repudiate or of a picket line in connection therewith in respect of which it does not so declare for not less than two and not exceeding six monthly deductions; and in the case of an unauthorized partial strike or cessation of work by employees, for failure to repudiate or declare, not less than one and not more than four monthly deductions; the suspension to be in the former case, next following the return to work of the striking employees and in the latter case, next following the violation.

The penalty above the minimum shall be in the discretion of the company, but the company shall have regard to the seriousness and the flagrancy of the violation.

(j) This provision for union security shall be enforced by the company against each employee to whom it is applicable as a condition of his continuance in or entrance into the company's service.

(k) The company will not cause or sanction a lockout until all the grievance procedure in this agreement outlined has been exhausted.

(l) Except as otherwise specifically provided or dealt with any dispute as to a violation of any condition or provision of this paragraph, including the reasonableness of the company's discretion in fixing any penalty, shall be matter for the grievance procedure and shall be submitted direct to the umpire.

(m) The company and the union shall do all such acts and things as may be requisite or necessary to the observance and carrying out of this provision for union security according to the true intent and meaning hereof.

3. Paragraph 12 of the existing agreement to be struck out.

4. Paragraph 6 of the existing agreement to be amended by striking out the word "five" and substituting therefor the word "six".

5. Clause (m) of paragraph 8 of the existing agreement to be struck out and the following substituted therefor: "(m) Promotions to higher paid jobs or better jobs with equal pay shall be based on seniority, save in those cases where, in the opinion of the company, merit and ability should be the governing factor. The exercise of the company's judgment in this matter shall not be, but its good faith in the exercise of its judgment shall be, subject to the grievance procedure and shall be submitted direct to the umpire. Nothing in this clause shall affect promotions to supervisory positions."

Minority Report

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir,—For the reasons hereinafter stated I find that I am unable to agree with some of the recommendations made by the other members of the Board of Conciliation herein.

In view of the fact that it required four sittings of the Board before the hearings were concluded I think it important to review some of the events which preceded the appointment of the Board.

There has been, and still is, in existence between the company and Local 251, UAW—

CIO an agreement entered into under date of May 1, 1943, which provides for termination by either party and also provides for either party proposing amendments thereto.

The union did not terminate the agreement but under date of March 22, 1945, being within the time allowed by the agreement for either party to submit amendments to the other, the union wrote to the company stating in part, "Pursuant to an agreement signed May 1, 1943, and amended May 1, 1944, we are enclosing a contract to revise and amend the present contract."

The purported amendments enclosed in the letter consisted of a draft of an entirely new agreement. When the company and the representatives of the union met the company took exception, and has continued to take exception, to the course followed by the union on the ground that under the guise of negotiating amendments the union was endeavouring to negotiate an entirely new agreement without terminating the one presently existing.

During the negotiations that ensued a further completely new agreement was submitted by the union.

Finally at the first sitting of the Board the union submitted what purported to be a summary of the points in dispute. The company pointed out that many of these points had never been introduced by the union for discussion in the various negotiations which had taken place between the parties prior to the Board's first meeting.

I do not think the Regulations permit, nor were ever intended to permit, the procedure which has been followed by the union as outlined above, and I agreed with the company in the position it took at the opening of the first hearing that, in the circumstances, the Board should refuse to make any recommendations whatever. However, since the other members of the Board did not agree with me at that time we proceeded to hear the parties. I now deal with some of the matters considered by the Board.

Leaving out of consideration for the moment the question of check-off recommended by the other members of the Board and with which I will deal later, I wish to draw attention to the fact that notwithstanding that the parties have had almost three years' experience under the existing agreement the union was unable to support a single amendment proposed by it by some actual occurrence or event justifying or necessitating the particular amendment. This being so, I cannot attach much weight to the reasons advanced, before the Board, in support of such amendments when, after the experience of the parties under the agreement

over such a period of time, the union is unable to show any practical reasons for the amendments, save that of anticipating difficulty in the future.

I agree that Schedule 1 of the report of the majority of the Board sets out correctly the amendments and additions to the existing agreement to which the parties agreed before us and I proceed to deal with the points as paragraph numbered in Schedule 2.

2: I cannot subscribe to any form of check-off which has the effect of compelling an employee to pay dues to the union as a condition of his employment with the company. So much has been written on the subject of check-off that I think it unnecessary for me to deal with the matter at length. Even in connection with the recommendations made by the majority of the Board I wish to point out that the union's representatives stated that the union would not cease its efforts until it had secured a union shop.

I wish also to draw attention to the fact that this company is one of approximately half a dozen industrial plants located in Wallaceburg, which town has a population of about five thousand persons. Whatever may be stated in favour of compelling employees in a large industrial centre to pay dues to a union as a condition of employment, I do not think that any such compulsion should be used in a community of this size where the number of available employees is at all times limited. The result of any such requirement might be that the company would find it difficult to secure the necessary number of employees who were prepared to accept the check-off as a condition of employment. This possibility is rendered more likely by reason of the fact that the union claims as members only sixty-five per cent of the employees covered by the agreement.

3. The recommendation that paragraph 12 of the existing agreement be struck out is made no doubt for the purpose of consistency with the recommendation contained in paragraph 2 of Schedule 2 of the report of the majority of the Board. However, even for that purpose I think that paragraph 12 should merely be amended by deleting those provisions only which are inconsistent with proposed amendments to clause 4 of the existing agreement.

4. I am in accord with the recommendation proposed in this paragraph.

5. The existing paragraph 8(m) of the agreement reads as follows:—

8. (m) Promotions to higher paid jobs or better jobs with equal pay are based primarily upon merit and ability, but when all other things are equal, except in effecting promotions to supervisory positions, the employees having the greatest seniority will receive the preference.

I think that the principle expressed above is very important, i.e., that fundamentally a promotion should depend firstly on the individual's merit and ability and only in the case where the merit and ability, of the persons eligible for promotion, are equal should seniority become a factor. Since the principle involved is clearly stated in paragraph 8(m) as

it presently reads I see no necessity for a change in the wording.

All of which is respectfully submitted.

Dated at Windsor, Ontario, this 20th day of March, A.D. 1946.

(Sgd.) FRANK K. ELLIS,
Employer's Nominee.

Report of Board in Dispute between Welding Shop & Engineering Co., Ltd., Vancouver, B.C., and Local No. 1, Boilermakers & Shipbuilders' Union

On March 28, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. Clarence Darling, Vancouver, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. R. L. Norman and L. Anderson, both of Vancouver, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable the Minister of Labour, Ottawa.

Following the recommendation of R. G. Clements, a conciliation officer, in accordance with the provisions of P. C. 1003, a Board of Conciliation was duly constituted by orders of the Honourable the Minister of Labour, dated the 20th day of November, 1945, when Mr. R. L. Norman and Mr. Lawrence Anderson were appointed members of the Board on the recommendations of the employer and employees respectively, and they having failed to recommend a third person, the Honourable the Minister of Labour, by order dated the 12th day of December, 1945, appointed Mr. Clarence Darling, K.C., as "third" member of the said Board.

At a preliminary meeting of the Board held at Room 57, Commerce Building, Vancouver, B.C., on the 16th day of January, 1946, with Mr. N. de W. Lyons, Deputy Registrar of the British Columbia Department of Labour in attendance, the members were duly sworn. Mr. Darling was agreed upon as Chairman. The procedure to be followed was discussed and adopted and the first sitting for the hearing of evidence by, or submissions of, the parties was decided. The time and place appointed for the first meeting was the Board Room, Hall Building, Vancouver, B.C. at 10:00 o'clock in the morning on the 22nd day of January, 1946.

The Board, accordingly, met on the said 22nd day of January, 1946, at the Board Room in the Hall Building, Vancouver, B.C., and Walter S. Owen, K.C., and Mr. J. H. Ruddock represented the employer and Mr. Malcolm

McLeod and Mr. William White represented the Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1, the certified bargaining representatives for the employees. The Conciliation Officer's report was read and discussed and the parties expressed themselves as being still unable to agree in respect of the two clauses in the proposed Agreement (namely, Sections 2 and 3) referred to by the Conciliation Officer in his report and the principles embodied therein, namely, the matter of Union Shop and Check-off of Union dues, respectively.

After some discussion it was suggested that the onus being more or less on the Union to satisfy the Board and the employer, that these terms of the disputed clauses be included in an Agreement, the Union should submit their representations and arguments in writing, and that the members of the Board and the representatives of the employer have a copy thereof, and the latter in turn would have the opportunity of replying thereto.

The Board convened the next day at 10:30 and the Union representatives presented a Memorandum of their submissions which were read and discussed at length. An endeavour was made by the members of the Board to have the parties come to a mutual understanding and had progressed to a point when it was thought that if a further adjournment were permitted, it would give an opportunity to the parties to enter into direct negotiations and discussion. With this in view, the hearing was adjourned until the 4th day of February, 1946.

On the 4th day of February, 1946, the Board again convened with the representatives of both parties present and it was at this meeting that the representatives of the employer produced a form of Agreement hereinafter referred to, a copy of which was marked as Exhibit 10. At this meeting the alternative of maintenance of membership arrangement was discussed and also the matter of seniority and as it again seemed a progress was being made towards a settlement, a further adjournment was agreed to, to give the Union representatives an opportunity of

examining said Exhibit 10, and of bringing in alternative suggestions unless, in the meantime by direct negotiation, an agreement might be arrived at.

As counsel for the employer intended to be absent from the City for some weeks, it was agreed between the parties that the hearing be adjourned until March 4, 1946, and the Board ordered an adjournment to said date accordingly.

On March 4, 1946, after extended discussion it was evident that the parties were at an impasse and that no extension of the hearing or of negotiations would serve any good purpose and the parties preferred to await the recommendations of the Board before negotiating further.

As the hearing proceeded, and as above indicated, it appeared that the employer had previously submitted an alternative draft form of Agreement which it had been willing to sign, but the Conciliation Officer does not appear to have referred to this document in his report.

The said draft agreement was produced before the Board and was filed as Exhibit No. 10 at the hearing on March 10th. This document had formed the basis of discussion and negotiation and a copy thereof is attached to this report.

The Union representatives were willing to agree to the adoption of the terms of said Exhibit 10 (hereinafter referred to as the "draft agreement") except the terms and wording of Article VIII, Section 1, but insisted that, in addition, a provision be inserted to the effect that all employees (present or future) who are, or who later become, members of the Union shall maintain their membership in good standing as a condition of continued employment, and also that with respect to hirings and lay-offs, preference be given to employees who are members of the Union.

The Union's objection to Article VIII (Seniority), Section 1, was with regard to the first sentence thereof which reads as follows:—

There shall be only one seniority list of the Company which shall include all classifications regardless of the crafts, departments and separate bargaining rights which may exist.

The employer's representatives offered to delete all the words after the word "classifications" in this sentence but insisted that the first part of the sentence should remain.

As an alternative the Union's representative submitted a "Seniority Clause" which was filed as Exhibit 9 and a copy is attached to this report. The employer's representatives strenuously objected to the last nine words of this clause, viz, "preference to be given to members of the Union"; and so far as the

remainder of this suggested clause was concerned they considered that the principle was already amply and clearly covered by Section 1 of Article VIII of the draft agreement already referred to.

With regard to a provision for "Maintenance of membership" and notice to be given to the employees in that regard, counsel for the employer, subsequent to the conclusion of the hearings, submitted to the Chairman of the Board a draft document containing a number of suggested clauses or provisions which would be acceptable to the employer. A copy is attached hereto and marked Exhibit 11.

When the Board met on the 9th instant to consider the arguments and what recommendations should be made, this last mentioned document was given very careful consideration and will be referred to in this report under the heading of "Recommendations." The Union representatives may or may not have seen a copy of said Exhibit 11—at all events they were not invited to express their views thereon as the Board did not consider that any useful purpose would be served either by having further arguments or representations; but preferred to meet and confer privately, and in considering the whole matter decided to utilize said Exhibit 11, as a basis on which to make their recommendations with respect to a "Maintenance of membership" provision as will later appear.

Having regard to the fact that one hundred per cent of the present employees are already members of the Union; the comparatively small number of employees in the employer's establishment; and the apparent favourable attitude of the management towards the Union, or better, towards craftsmen who are members of a Union; and generally the friendly and co-operative relationship which appears to exist in this particular establishment; the members of the Board are unanimous in the conclusion that the Recommendations hereinafter set forth should be made; with the reservation, however, that nothing therein contained is to be taken or understood as indicating any personal views, (or any change of personal views) of any individual member of the Board regarding Trade Unions, generally, or membership therein, or the advantages or benefits, or otherwise, of trade-unionship, "open shop", "closed-shop" or other principles or matters usually involved in collective bargaining. In other words the members of the Board in arriving at their conclusions herein have endeavoured to apply their minds to, and focus their attention upon, the particular facts, factors, and circumstances respecting

this employer and its employees. It is their apparent mutual desire to effect an agreement reasonably satisfactory to both—at all events for the present.

RECOMMENDATION

The Board unanimously recommends:—

That the employer and the Union enter into an agreement in the form and terms set out in the "draft agreement" (Exhibit 10) subject to the following modifications and additions:—

1. That Section 1 of Article VIII be amended by striking out the first sentence thereof and by inserting in lieu thereof the words "Rights of seniority shall be recognized and the following principle shall apply:—"

2. That Article 1 be amended by adding to the title thereof after the words "Bargaining Agency" the words "and Union Status" and by numbering the present clause "Section 1."

3. That said Article 1 be further amended by adding thereto, as Sections 2, 3 and 4 (a), (b) and (c), the clause set forth in the memorandum attached hereto and marked "Exhibit 11."

The Board does not see the necessity or advantage at this time of requiring this particular employer to expressly agree to any "check-off" provision, and accordingly does not recommend the inclusion of any such provision.

All of which is respectfully submitted this 26th day of March, A.D. 1946.

(Sgd.) CLARENCE DARLING,
Chairman.

(Sgd.) R. L. NORMAN,
Member.

(Sgd.) L. ANDERSON,
Member.

AGREEMENT

This agreement made this.....day of..... between the Welding Shop and Engineering Company Limited, 1600 Main St., Vancouver, B.C., hereinafter referred to as the "Company" of the first part and: Boilermakers and Iron Shipbuilders Union of Canada Local No. 1, Vancouver, B.C., hereinafter referred to as the "Union" of the second part

Witnesseth

Whereas it is the intent and purpose of the parties hereto that this agreement will promote and improve industrial and economic relationship between the Union and the Company, and to set forth herein the basic agreement covering rate of pay, hours of work, and conditions of employment to be observed between the parties hereto:

Now, therefore, in the consideration of the mutual covenants and agreements herein set forth, the Parties hereto mutually agree as follows:

Article I—Bargaining Agency

The Company agrees to recognize and bargain with the Union as the sole collective bargaining agency on behalf of its employees duly certified under Wartime Labour Relations Regulations P.C. 1003, dated February 14th, 1944.

Article II—Definition

The term Employee as used and for the purpose of this Agreement shall include all persons employed by the Company except and excluding those having authority to hire and fire, office workers, supervisory officials and salesmen.

Article III—Management

Section 1. The entire management of the company and the direction of the working forces are vested exclusively in the company and the Union shall not in any way interfere with these rights, provided however, that this will not be used to discriminate against members of the Union.

Section 2. The Foreman will decide which man to advance and endeavour to have the full co-operation of the Shop Steward.

Section 3. Any man selected for advancement and not proving competent, will be restored to his former occupation.

Article IV—Hours of work

Section 1. All employees must punch in and out of the yard or shop on the time clock number assigned to them. There shall be a warning whistle five minutes before quitting time on week-days for all shifts, and a warning whistle at noon on Saturday. After the warning whistle employees may make out time sheets and put away tradesmen's tools.

Section 3. The Company and the Union agree that the standard work day shall consist of eight (8) hours and that the standard work week shall consist of forty-four (44) hours, Monday to Saturday, on the first shift.

Section 4. If a second shift is employed, the hours of work shall be seven (7) hours per shift, for which shift payment shall be made as authorized by the Regional War Labour Board.

Section 5. Five shifts shall constitute a week's work on second and third shifts. All work after starting time on Saturday shall be paid double time.

Section 6. Time worked in excess of standard hours of work shall be considered as overtime, and overtime rates of pay shall be paid as follows: Time and one half for the first four hours after regular shift and double time thereafter.

Section 7. Double time shall be paid for Sundays and all Statutory Holidays so specified by the Federal or Provincial Governments.

Section 8. All employees called in to work and receiving less than 4 hours' work shall be paid for four hours. However, if four hours' work are not available on the regular job an employee shall not refuse to perform other work for the remaining period of time up to four hours.

Section 9. The starting and stopping time as well as the meal period shall be mutually arranged by the Company and the Union, it being understood that the meal period shall not be less than thirty (30) minutes nor more than one hour. If employees work during the lunch period, equivalent time off shall be arranged with their foreman.

Section 10. An interval of at least one full shift shall be allowed when employees are transferred from one shift to another.

Article V—Safety and Health

Section 1. Employees shall not be asked to work against wet paint if that can possibly be avoided.

Section 2. All painting shall be done after welding wherever possible.

Section 3. Any employee suffering injury while in the employ of the Company must report immediately to the First Aid Department or so soon thereafter as possible, and, also report to this Department on returning to work.

Section 4. A safety Committee shall be maintained representative of all departments in the plant, and the Union shall have equal representation with the Company on such Committee, provided that the total of the Committee shall not exceed six.

Section 5. The Company shall operate suitable ventilation equipment for removing fumes from confined spaces, and the employees shall undertake not to interfere with this operation.

Article VI—Vacations

All employees covered by this agreement shall be entitled to such annual vacations with pay as shall be prescribed by the National or Regional War Labour Board.

Article VII—Wages

Section 1. Classification and wage scales shall be those authorized by the War Labour Board.

Section 2. Time and one quarter will be allowed when men work on board ship under conditions for which shipyards have established this rate.

Section 3. Time and one quarter will be paid employees welding on galvanized pipe or other galvanized work.

Section 4. Any welder being asked to weld over dry paint, or any person being asked to burn off dry paint, shall be paid time and one quarter if in the opinion of the superintendent, foreman and shop steward same is justified.

Article VIII—Seniority

Section 1. There shall be only one seniority list of the Company, which shall include all classifications regardless of the drafts, departments, and separate bargaining rights which might exist. All other things being equal, length of continuous service with the Company shall be the determining factor governing promotions, layoffs, and re-employment after layoffs, providing the employee has the necessary qualifications such as skill, ability and training to do the work required. This clause applied to all positions filled by those defined by the term "employee" in this agreement.

Section 2. The seniority of any employee enlisting in, or being called into His Majesty's Forces, shall remain unimpaired by reason of such enlistment or call.

Article IX—Classification of work

Section 1. All angle work, flanging, joggling, press work, burning, drilling or bucking out

rivets shall be done by a mechanic of the trade or at a mechanic's rate of wages.

Section 2. In the event of any employee being temporarily employed at a higher paid class of work than his own, the full hourly rate of pay agreed to for such classification shall be paid.

Section 3. Any employee asked to do temporary work at a classification with a lower hourly rate of pay shall receive his usual rate of wages, provided the change of rate of pay shall be permissible after seven (7) days notice.

Article X—Grievance Procedure

Section 1. Individual grievances shall be adjusted and finally settled without stoppage of work as follows:

First: By negotiation between not more than two Shop Stewards of the Union and the Superintendent and Foreman.

Second: In the event that agreement between the aforesaid is not reached, then between the said bargaining representatives and the Management of the Company.

Third: If such differences are not adjusted within two weeks after such negotiations are begun, by submission of the matter to arbitration as hereinafter provided.

Section 2. All differences concerning the interpretation or violation of this agreement shall be adjusted between said bargaining representatives and the Management of the Company, and failing such adjustment as provided in the immediately preceding paragraph.

Article XI—Arbitration

Section 1. In the event of arbitration being required there shall be a Board of three arbitrators, one to be appointed by each party to this Agreement, and the third to be selected by the two as appointed. The party desiring arbitration shall appoint its arbitrator and shall give notice in writing to the other party of such appointment, together with a written statement of the question to be arbitrated. After receiving such notice and statement, the other party shall appoint an arbitrator and give notice in writing to the first party of such appointment within five (5) days.

In the event that the two arbitrators so appointed cannot, within five days, select a third arbitrator who is able and willing to serve, the two arbitrators shall jointly request the Minister of Labour, who is charged with the administration of the Labour Regulations applying to the industry in which the Company is engaged, to appoint a third arbitrator, who shall act as Chairman.

Section 2. The decision of the Board shall be by majority vote and all decisions will be final and binding upon the parties hereto.

Section 3. The provisions of the "Arbitration Act" of the Province of British Columbia, shall apply to any arbitration held under the terms of this agreement.

Section 4. Each party shall pay the expenses and charges of its representative on any Arbitration Board and shall bear in equal proportions the expenses and allowances of the Chairman and of stenographic and secretarial expense, and rent.

Article XII—Labour Management Production Committee

In the interest of efficient production, a Labour Management Production Committee shall be maintained. Representatives of all departments in the plant shall have equal representation with the management on such Committee. The total of the Committee shall be mutually agreed upon by the Management and the Union.

Article XIII—General Provisions

Section 1. No employee shall be paid off until he produces a receipt for all tools or any equipment (property of the Company) that may have been issued to said employee.

Section 2. The workman shall not be held responsible for any accidental breakage or loss of tools, the property of the Company, through no fault of his own, but every employee is charged with the responsibility of protecting the Company's property.

Section 3. The provisions of this agreement are subject at all times to all Government and Department orders and regulations affecting the matters dealt with herein.

Section 4. Wherever the word "Government" is used in this agreement it shall mean the Provincial Government of British Columbia, and wherever the word "Department" is used, it shall mean a Department of the Government.

Article XIV—Duration of Agreement

The Company and the Union mutually agree that this agreement shall be effective from to thereafter from year to year unless written notice of contrary intention is given by either party to the other party by registered mail at least sixty (60) days prior to the expiration of any yearly period. Within ten (10) days after receipt of such notice, the parties to this agreement shall begin to negotiate. During the period of negotiations this agreement shall continue in full force and effect.

THE WELDING SHOP AND ENGINEERING CO. LTD.
VANCOUVER, B.C.

BOILERMAKERS' & IRON SHIPBUILDERS' UNION
OF CANADA LOCAL NO. 1)

EXHIBIT 11

(To follow Section 1 of Article 1)

2. All employees of the Welding Shop & Engineering Co. Ltd. shall be free to join or not to join any labour organization as they see fit.

The Company and the Union agree that they will not coerce or intimidate any employee or discriminate against any employee because of his membership or because of his non-membership in any labour organization.

3. Subject to the conditions hereinafter set forth all employees of the Welding Shop & Engineering Co. Ltd., who, at the expiration of the ten-day period of posting the notice hereinafter referred to, are members of the Union in good

standing in accordance with the Union's constitution and by-laws, and all present or future employees who subsequently become members of the Union during the term of this agreement, shall maintain their membership in good standing during the life of this agreement as a condition of employment.

4. (a) Any employee who is a member of the Union on the date of this agreement may voluntarily withdraw from the Union by resignation, as set out below, not later than midnight of the tenth day after the first posting of the notice hereinafter referred to. Accordingly the Company and the Union agree to the terms and conditions set out in the following joint notice. Moreover, they agree to post the said notice on all bulletin boards in the plant within five days after the execution of this agreement and to keep the said notice posted continuously for ten days thereafter.

NOTICE RE MEMBERSHIP IN BOILERMAKERS' &
IRON SHIPBUILDERS' UNION OF CANADA,

LOCAL NO. 1.

The Welding Shop & Engineering Co. Ltd. and Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1, have agreed that all employees of the Company who are members of the Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1 in good standing on1946, must continue as members of the Union in good standing during the currency of this agreement as a condition of employment.

Any employee of the Company who is now a member of Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1, and who does not wish to continue as a member under the terms stated above, may withdraw from the Union by submitting his resignation in writing to the Company and the Union not later than midnight,.....1946.
(10th day after posting)

Employees who are in doubt as to whether or not they are now members of the Union should, without delay, consult the Company and the Union.

Employees who are not members of the Union may join the Union or not as they like but all present or future employees who become members of the Union on or after1946,
(11th day after 1st posting)

must continue as members during the currency of this agreement as a condition of employment. Dated and posted this day of March, 1946. Signed for the Company Signed for the Union.

(b) The Company and the Union agree that during the ten-day period in which the aforesaid notice shall remain posted, they will not attempt in any way whatsoever to influence any employee in making his decision as to whether or not he will remain in the Union or join the Union.

(c) Should a dispute arise as to whether or not a certain employee or employees are members of the Union in good standing at the expiration of the said ten day posting period the matter shall be referred to arbitration.

Report of Board in Dispute Between Hudson's Bay Company, Inc., Victoria, B.C., and Local 279, Retail Clerks' International Protective Assn.

On March 4, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—Mr. J. Howard Harman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. B. Patterson and J. P. Simon, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable
The Minister of Labour,
Ottawa,
Canada.

Dear Sir:—

The Board confined its attention to clause 1 of the agreement proposed by the above Union on behalf of the employees as all other clauses had earlier been agreed to by the local Manager of the employer when this dispute was before the Conciliation Commissioner, and presumably the local Manager of the employer either has or will recommend the acceptance of the other clauses to his superiors.

The disputed clause is a request by the Union for Union security and in the form finally drafted before the Conciliation Commissioner reads as follows:—

1. All employees who are now members of the Retail Clerks' Union, Local 279 shall as a condition of employment maintain membership in good standing in the said Union. All employees hired after the signing of this agreement eligible for membership in said Union shall after a period of sixty (60) days, become members of the Union and maintain membership therein; provided, however, that this condition does not apply to payroll employees now in the Armed Forces returning to their former positions with the Company.

The Board dealt with this matter on a purely practical basis, exerting itself to find a recommendation which would be workable under the peculiar facts applicable to this matter, regardless as to whether the recommendation was completely justifiable on theoretic grounds, and regardless of the fact that the recommendation may or may not completely satisfy both sides.

Some of the factors influencing the Board were:—

- (a) That the Union has been and remains the certified bargaining representative of all employees, and the Company is required to deal with its employees through this Union;
- (b) That the Union has a record of stability sufficient to justify its being given a reasonable degree of security to enable it to do its work in this unusually difficult field of endeavour;

- (c) That the conditions of employment in this store are admittedly of a beneficial nature for the employees concerned, and that the employees in this store are probably working under better conditions than apply to the retail trade as a whole;
- (d) That excellent employer-employee relationship exists. The attitude of the management and of the Union gives reason to believe that a proper degree of Union security will tend to perpetuate rather than injure this condition. In any event it would not seem that solicitude on the part of the employer for his employees is inimical to Union membership and activity;
- (e) That the turnover of labour in the retail trade generally is extremely high. The estimates given by representatives of both parties varied from 33 per cent to 50 per cent per year. This, combined with the long delay (approximately 17 months), between certification of the Union and the bringing of this dispute before the Board, increased the difficulties of the situation.

In passing, the Board would suggest that future parties endeavour to avoid what occurred here. A substantial portion of the period of delay was consumed by reason of some suggestion that the Union should organize the Vancouver Hudson Bay Store so that the whole of the Province could be dealt with at one time. The Board is of the opinion that P.C. 1003 is intended as a summary mode of settlement of labour disputes, and respectfully suggests that when a dispute has come within the ambit of the order, any agreement between the parties to postpone the effect of the order can only have unfortunate effects.

At the time of the hearing the actual membership in the Union and the classification of this membership between old and new employees was a matter of conjecture only;

- (f) That a great many of the employees concerned in the labour turnover referred to above are extremely inexperienced both from the point of view of the employer and of the Union;
- (g) That some of the experienced and valuable employees concerned either have no background of Union activity, or perhaps are even anti-Union in thought;

- (h) That Union initiation and membership fees would represent a financial strain on employees not likely to remain in the Company's employ or even in the retail trade for any considerable period.

Indirectly, of course, this would affect the Company's position in a competitive labour market;

- (i) That the parties were agreed that some special provision should be made for returned men. The special provision recommended below did not seem to be intended by either party as a suggestion that men returning from the Armed Forces would be unwilling to work with the Union, but represented only an endeavour to protect the rights of such persons to make a free choice in the matter.

These and other factors impel the Board to recommend that the following be substituted in place of clause 1 in the material agreement (Exhibit 8); namely:—

- 1 (a) All employees who are now members or who hereafter become members of the Union shall as a condition of employment maintain membership in good standing during the term of this agreement;
- 1 (b) All employees hired after the date of this agreement (who are acceptable for membership) shall after a period of one year become and remain members of the Union in good standing. Provided, however, that this condition does not apply to payroll members now in the Armed Forces returning to employment with the Company or to any part-time or short-time employees;
- 1 (c) At date of employment each employee shall be given a written notice reading as follows:—

"You are entitled to become a member of the Retail Clerks' Union Local 279 if you so desire. The initiation fees at present are \$..... and the monthly membership fee \$..... If you become a member you must remain a member in good standing as a condition of your continued employment during the term of the existing agreement between the Company and the Union. Under this agreement the Union is the duly certified bargaining agent of the employees and will continue so to be so long as a majority of the employees are members of the Union or desire to have the Union act in such capacity. If this agreement is not terminated either by the Company or the Union prior to March 1, 1947, you will be required to become and remain a member of the Union at the end of the first year of employment. If for any reason you are not then acceptable for Union membership this condition will not apply to you."

(The wording, of course, may well be varied by the parties.)

- 1 (d) This agreement shall remain in force for two years unless terminated at the end of one year either upon

thirty (30) days' notice by either party or by certification showing that the Union is no longer the chosen bargaining agent of the employees.

The last sentence in the draft agreement should be varied so as to avoid conflict with clause 1 (c).

The nominee of the employer on the Board found himself unable to agree with the whole of the above recommendation, and is filing a minority report.

We are,

Yours respectfully,

(Sgd.) J. H. HARMAN,
Chairman.

(Sgd.) J. P. SIMON,
Member.

Minority Report

The Honourable
The Minister of Labour,
Parliament Buildings,
Victoria, B.C.

Dear Sir:

In association with the other members of the Board, I have given very careful consideration to the evidence submitted, to the arguments presented and to the supporting reasons adduced.

The only clause in the proposed agreement, Exhibit 8, to which either of the parties referred in their evidence or argument was Clause one (1) which reads:—

"All employees who are now members of the Retail Clerks Union, Local 279, shall as a condition of employment maintain membership in good standing in the said Union. All employees hired after the signing of this agreement eligible for membership in said Union shall after a period of 60 days become members of the Union and maintain membership therein, provided however, that this condition does not apply to payroll employees now in the Armed Forces returning to their former positions with the Company."

By the aforesaid Clause none of the present employees of the Company, not being members of the Union are required to become Union members, unless they do so voluntarily. The same condition applies to payroll employees in the Armed Forces returning to their former positions with the Company, so that only employees hired after the signing of the agreement are required to become members of the Union, after a period of sixty (60) days employment. These latter employees and employees who are at present members of the Union are the only persons affected by Clause 1.

I am definitely opposed to such a provision being included in any agreement between the

Company and the Union, because it eliminates personal decision on the part of all future employees and subjects him or her to dismissal if he or she should decide to withdraw from membership in the Union.

My associates on the Board, felt that future employees should not be required to join the Union until after the expiration of one (1) year in the employment of the Company. I do not feel that by extending the time within which future employees are to become mem-

bers of the Union overcomes my objection to the clause in question.

For these reasons I am opposed to recommending any form of Union security whatsoever.

All of which is respectfully submitted.

Dated at the City of Victoria at the Province of British Columbia, this 28th day of February, A.D. 1946.

Report of Board in Dispute Between Pacific Café, New Westminster, B.C., and Local 28, Hotel and Restaurant Employees' Union

On February 28, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—Mr. J. Edwin Eades, Vancouver, appointed by the Minister in the absence of a joint recommendation from the other members of the Board, Messrs. W. M. Gilchrist and T. E. Parkin, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable
The Minister of Labour,
Ottawa, Ontario.

SIR:

By order dated the 24th day of January, 1946, the above mentioned dispute was referred to a Board of Conciliation and by order dated the same date Mr. J. E. Eades was appointed chairman of the said Board, Mr. W. M. Gilchrist and Mr. T. E. Parkin having been appointed on the recommendation of the employers and employees respectively. The Board met on the 2nd day of February, 1946. The members were duly sworn. The order appointing the Board and appointing the members were duly filed as exhibits 1 and 2 respectively. The oaths of the members of the Board were filed as exhibit 3 and the Board considered and adopted the rules of evidence and procedure to be followed. It was agreed that the first hearing of the parties should take place in the Board Room on Wednesday the 6th day of February, 1946 at the hour of 10:30 o'clock in the forenoon and that the chairman should notify the parties and the Provincial Department of Labour.

The Board met on the said 6th day of February with Mr. Gilbert Hogg appearing on behalf of Pacific Café, the employer, and Mrs. May Ansell, business agent and secretary of Local No. 28 Hotel and Restaurant Employees' Union, and Mrs. Emily Watts,

president of the said Local and international organizer appearing as bargaining agents for the employees.

Copy of the proposed agreement was filed as exhibit 4 and copy of the conciliation officers' report was filed as exhibit 5. Discussion took place and it was agreed that the sittings be adjourned to Friday, February 8, 1946 at 10:30 a.m., the bargaining agents then to present their case. It was further agreed that the life of the Board be extended to February 20.

The Board met on the 8th day of February, 1946 with Mr. Hugh McGivern appearing for the employer and Mr. Joe Sing, the employer, appearing in person and Mrs. Ansell and Mrs. Watts appearing on behalf of the employees. Mr. N. de W. Lyons, Deputy Registrar of the Provincial Department of Labour, was in attendance and acted as secretary.

The case for the employees was opened by Mrs. Watts and Mrs. Ansell continued and closed the case of the employees and Mr. McGivern cross-examined. The hearing was adjourned to Monday, February 11 at 9:30 a.m. and at this sitting Mr. McGivern completed his questions and submitted the case for the employer. In all twenty-two exhibits were filed by the parties. Before replying the Board felt that it was an opportune time to confer with the parties separately and following this the Board reconvened and the parties agreed to meet on Thursday the 14th day of February at Mr. McGivern's office with a view to resolving the difficulties between them in the light of what had been said and the suggestions of the Board.

The parties agreed to extend the life of the Board to the 7th day of March and that the next sittings should be held at the Board Room on Monday the 18th day of February at the hour of 10 o'clock in the forenoon.

The next sitting was accordingly held, the same representatives in attendance and sec-

tions 1 and 2 and 20 of the agreement were discussed, suggested clauses and counter clauses put forward and an agreement reached in all respects. The clauses as agreed upon were reduced to writing, typed and inserted in the agreement and the same was executed by the parties.

All of which this Board is pleased to respectfully report.

Report of Board in Dispute Between Corrugated Paper Box Company, Ltd., (Cartons Specialty, Ltd.) Leaside, Ont., and Paper Box and Specialty Workers' Union No. 466.

On March 13, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—His Honour Judge Egerton Lovering, Toronto, appointed on the joint recommendation of the other two members of the Board, Messrs. E. Macaulay Dillon and Bora Laskin, appointed on the nomination of the employer and employees respectively.

Report of Board

Honourable HUMPHREY MITCHELL,
Minister of Labour of Canada,
Ottawa, Ontario.

SIR:

The Board of Conciliation appointed by you in the above matter begs to report as follows.

The Board met with the parties in Toronto, and heard representations made on behalf of the Union by Mr. R. Brown, Provincial Representative, who was accompanied by Mr. W. F. Breen, Business Agent for Local No. 466; and representations made on behalf of the Company by Mr. J. C. Adams, K.C., counsel, who was accompanied by his assistant Mr. D. G. Pyle, and by Mr. J. A. Whealy, President and General Manager of the Company, and by Mr. W. F. Ireland, Plant Superintendent.

The dispute between the parties arose during the negotiation of the first renewal of a collective agreement between them. At the inception of their collective bargaining

Dated at Vancouver, B.C. this 21st day of February, 1946.

(Sgd.) J. E. EADES,
Chairman of the Board.

(Sgd.) T. E. PARKIN,
Member of the Board.

(Sgd.) W. M. GILCHRIST,
Member of the Board.

relations, which were voluntarily established, there were about 80 employees in the bargaining unit. Additions to the employment roll brought the number up to 125 as of the date of the hearings before the Board.

The Union requested of the Company that a provision for a union shop be embodied in the renewal collective agreement, and it was this request which was referred to the Board. The case for the Union, as presented to the Board, was framed as a request for a union shop, and alternatively, for a compulsory check-off. The Company opposed both.

There has been a cordial relationship between the parties, and their respective representations to the Board were made in a friendly and conciliatory spirit, so that it appeared that a disposition of the dispute satisfactory to both sides was not improbable. Accordingly, the Board made an effort in this direction and it is pleased to report that the parties agreed between themselves to compose their differences on the basis of a voluntary check-off.

All of which is respectfully submitted.

Dated at Toronto, this 11th day of March, 1946.

(Sgd.) EGERTON LOVERING,
Chairman.

(Sgd.) E. MACAULEY DILLON,
Employer's Nominee.

Employee's Nominee.

Report of Board in Dispute between Toronto Graphic Arts Assn. & Master Printers & Bookbinders' Assn., Toronto, Ont., and Toronto Printing Pressmen & Assistants' Union No. 10

On March 11, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. L. W. Brockington, K.C., Ottawa, appointed on the joint recommendation of the other two members of the Board, Messrs. E. J. Soulsby and Bora Laskin, both of Toronto, nominees on the Board of the employer and employees respectively.

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of a dispute between Toronto Graphic Arts Association and Master Printers' and Bookbinders' Association of Toronto (Employer), and Toronto Printing Pressmen & Assistants' Union, No. 10 (Employees).

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

The undersigned, being the members of the Board of Conciliation, have the honour to report as follows:—

The Board held a number of meetings in the City of Toronto with representatives of both parties, and also arranged a visit to a typical printing shop.

The two employers' organizations contain a number of individual members. The Master Printers Association, as a term of their membership, are pledged to the maintenance of the open shop.

For several years, the Union and the employers' organizations have met together, and negotiated an agreement which has formed the basis of working conditions in all shops controlled by the employers. The Board found it necessary for clarified thinking and ultimate decision to obtain the relevant facts concerning the number of employers included in the organizations, the number of employees in the various shops, and, as far as possible, up-to-date statistics of union membership in each shop. The matters in dispute have, by prior negotiation, been confined to three:

1. Union shop;
2. Employment of apprentices on rotary, 2-colour or multi-colour presses;
3. Employment of apprentice beginners on night shifts.

With reference to the question of union shop, it became obvious that even had the Board been so disposed, no decision on union security could be made in favour of the union in view of the multiplicity of employers and the differential conditions prevailing in the individual firms. As a matter of fact, on the basis of bargaining with the individual employers, the union, in a great many cases,

would be unable to establish their right to certification under P.C. 1003. The Board, therefore, is unanimous in rejecting this portion of the union's case. It has reason to believe that the union itself recognizes the present impossibility of granting its demand.

With reference to the other two matters in dispute, the Board is happy to announce that suggestions made by it for the wording of disputed clauses are acceptable to both sides. These two clauses will now read:

1. No apprentice beginner is to be employed in the place of a printer's assistant on a rotary, 2-colour or multi-colour press until he has completed at least two years of his apprenticeship; provided that this requirement shall not apply to returned servicemen coming into the trade from a recognized rehabilitation school.

2. No apprentice beginner shall be employed on a night shift until he has completed at least two years of his apprenticeship, unless every reasonable effort has first been exhausted to obtain other competent and efficient help and such help is not available.

In concluding its report, the Board would like to express its appreciation of the uniform courtesy afforded to it by the representatives of both sides, of the lucidity of the arguments advanced, and of the mutual goodwill between employer and employee which seems to prevail in this great industry. Although the position is complicated by the multiplicity of employers and the variation in types of labour, the Board believes that the continued relationship of both parties seeking to obtain, and succeeding in obtaining a satisfactory working code is of the greatest benefit to the industry as a whole, and to the interests of both parties to this discussion.

(Sgd.) E. J. SOULSBY,
Member.

(Sgd.) BORA LASKIN,
Nominee of Employees.
(Sgd.) LEONARD W. BROCKINGTON,
Chairman.

Report of Board in Dispute between MacLean and Weir, Limited, Vancouver, and Local No. 1, Boilermakers & Shipbuilders' Union

On March 28, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. Clarence Darling, Vancouver, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs R. L. Norman and L. Anderson, also of Vancouver, appointed on the nomination of the employer and employee respectively.

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between MacLean Weir Limited, Employer, and Local No. 1, Boilermakers' and Iron Shipbuilders' Union, Employees.

Report of Board

To the Honourable the Minister of Labour,
Ottawa.

Following the recommendation of R. G. Clements, a conciliation officer, in accordance

with the provisions of P.C. 1003, a Board of Conciliation was duly constituted by orders of the Honourable the Minister of Labour, dated the 20th day of November, 1945, when Mr. R. L. Norman and Mr. Lawrence Anderson were appointed members of the Board on the recommendations of the employer and employees respectively, and they having failed to recommend a third person, the Honourable the Minister of Labour, by order dated the 12th day of December, 1945, appointed Mr. Clarence Darling K.C., as "third" member of the said Board.

At a preliminary meeting of the Board held at Room 57, Commerce Building, Vancouver, B.C., on the 16th day of January, 1946, with Mr. N. deW. Lyons, Deputy Registrar of the British Columbia Department of Labour, in attendance, the members were duly sworn. Mr. Darling was agreed upon as Chairman. The procedure to be followed was discussed and adopted and the first sitting for the hearing of evidence by, or submissions of, the parties was decided. The time and place appointed for the first meeting was the Board Room, Hall Building, Vancouver, B.C., at 10:00 o'clock in the morning on the 21st day of January, 1946.

The Board, accordingly, met on the said 21st day of January, 1946, at the Board Room in the Hall Building, Vancouver, B.C., and Mr. J. H. Ruddock represented the employer and Mr. Malcolm McLeod and Mr. William White represented the Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1, the certified bargaining representatives for the employees. The Conciliation Officer's report was read and discussed and the parties expressed themselves as being still unable to agree in respect of the two clauses in the proposed Agreement (namely, Sections 2 and 3) referred to by the Conciliation Officer in his report and the principles embodied therein, namely, the matter of Union Shop and Check-off of Union dues, respectively.

After some discussion it was suggested that the onus being more or less on the Union to satisfy the Board and the employer, that these terms of the disputed clauses be included in an Agreement, the Union should submit their representations and arguments in writing, and that the members of the Board and the representatives of the employer have a copy thereof, and the latter in turn would have the opportunity of replying thereto.

The Board convened again on the 23rd day of January, 1946, at 2:30 o'clock in the afternoon with Mr. Walter S. Owen, K.C., present as representing the employer. The Union representatives presented a memorandum of their submissions which was read and discussed at length. An endeavour was made by the members of the Board to have the parties come to a mutual understanding and had progressed to a point when it was thought that if a further adjournment were permitted, it would give an opportunity to the parties to enter into direct negotiations and discussion. With this in view, the hearing was adjourned until the 4th day of February, 1946.

On the 4th day of February, 1946, the Board again convened with the representatives of both parties present and after some considerable discussion the hearing was further adjourned to March 4th, at which time Mr. Owen on behalf of the employer, reported that MacLean Weir Limited had sold its entire plant and was no longer an employer of the employees represented by the bargaining agents herein and that it was not concerned in negotiating an agreement with the parties who were no longer their employees.

The Union representatives agreed that if this were so there was no need to proceed further herein and that as a matter of record they asked that a letter to the foregoing effect be filed by the employer and a copy sent to them. This was duly done, which terminated this matter. The letter from the employer (Exhibit 12) verifying the fact that it had sold its plant to another proprietor, and dated the 5th day of March, 1946, is attached hereto, along with the other exhibits filed in this matter.

In view of the circumstances the members of the Board considered it would be unnecessary to give further details of the hearings and proceedings and trust that this short report will meet with the approval of the Honourable Minister of Labour.

Respectfully submitted, this 26th day of March, 1946.

(Sgd.) CLARENCE DARLING,
Chairman.

(Sgd.) R. L. NORMAN,
Member.

(Sgd.) L. ANDERSON,
Member.

Report of Board in Dispute Between Willards Chocolates, Limited, Toronto, Ont., and Local 264, Factory Bakers' Union

On March 19, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—His Honour Judge Egerton Lovering, Toronto, appointed by the Minister in the absence of a joint recommendation from the other members of the Board, Messrs. E. M. Dillon and H. Orliffe, appointed on the nomination of the employer and employees, respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

*Re: Wartime Labour Relations Regulations,
P. C. 1003, and re Willards Chocolates,
Limited, Toronto, Ont., and Local 264,
Factory Bakers' Union.*

SIR:

The Board of Conciliation appointed by you in this matter had five sessions, on the 4th of January, the 10th of January, the 30th

of January, the 12th of February and the 26th of February, all in the year 1946.

The parties were represented generally as follows: for the Company, J. C. Adams, K.C., Counsel and C. E. Spooner, Manager; for the Union J. Warwick and Charles Aumiller, International Representatives of the Union, John Madsen and Annie Downey, members of the Bargaining Committee and George Hollett, Business Agent of the Local Union.

Your Board is pleased to report that with the active co-operation of the parties, it was able to settle amicably all the points in dispute and that the Board is so advised by letters from the parties.

All of which is respectfully submitted.

(Sgd.) EGERTON LOVERING,
Chairman.

(Sgd.) HERBERT ORLIFFE,
Board Member.

(Sgd.) E. MACAULEY DILLON,
Board Member.

Report of Board in Dispute Between Cranbrook Cartage and Transfer Co., Cranbrook, B.C., and Local 1-405, Int. Woodworkers of America

On March 18, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows:—Mr. C. J. Little, Cranbrook, appointed on the joint recommendation of the other two members of the Board, Messrs. J. M. Falkins and H. Murphy, appointed on the nomination of the employer and employees respectively.

Report of Board

The Board is recommending that both parties sign this agreement as a temporary agreement, and both parties agree now that in view of the district wide negotiations at the coast affecting the main logging and saw-mill operations, this agreement shall be deemed to contain all provisions determined as a result of those negotiations. And we recommend to both parties to enter into

negotiations that would bring these new provisions, that the union and management have in mind, now. While working under the present agreement which shall be binding until all avenues have been thoroughly explored, and agreements sought whereby this agreement shall continue into effect as of the date of signing for one year.

(Sgd.) CHARLES J. LITTLE,
Chairman.

(Sgd.) HARVEY MURPHY,
Member.

(Sgd.) JACK M. FALKINS,
Member.

The appended agreement contained clauses alluding to: Wages, hours of work, adjustment of grievances, arbitration, safety and health, vacations with pay and seniority. When it has been signed by both parties it will be printed in a later issue of the *LABOUR GAZETTE*.

Activities under the Conciliation and Labour Act and Order in Council P.C. 4020

OFFICERS of the Industrial Relations Branch dealt with 14 industrial disputes during the month of March, involving 5,352 work people employed in 28 separate establishments. Of these, 11 were new disputes which originated during the month and 3 were situations which had been untermiated as of January 31, and received further attention in February. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Metal Workers, Galt, Ont.—Early in March a request was received from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission under the provisions of Section 5 of P.C. 4020 to investigate a charge that the Canadian Brass Company, Limited, Galt, Ontario, had dismissed an employee for the reason that he was a member of or working on behalf of Local 2890, United Steelworkers of America. On March 11th, the Minister of Labour appointed His Honour Judge Samuel Factor of Toronto to conduct an investigation. The Commissioner reported that the reason given by the Company for the dismissal of the worker was that he caused dissension among the employees, but that this was not supported by the evidence. It might be true that dissension or difference of opinion asserted itself when the local union was organized but the evidence did not establish that the worker in

question was the one who caused such dissension—rather it was the organization of the union, the interest of which the worker admittedly tried to promote. There was evidence that the discharged employee during working hours discussed with a number of other employees the matter of joining the union. Such discussions were of short duration and did not interfere substantially with the man's own work or the work of the employees with whom he talked.

The Commissioner expressed the opinion that, although an employee is prohibited during working hours from actively persuading other employees to join a union, this does not prohibit an employee from discussing this subject with others as long as it does not impede or interfere with the work of the Company or cause dissension or dissatisfaction among the employees. He found that the discharged worker did not during working hours actively persuade others to join the union. He found that the man was dismissed for the reason that he was working on behalf of the union and recommended his reinstatement. Early in April, the Minister of Labour ordered the Company to reinstate the employee in his former position and to reimburse him for wages lost from the time of his wrongful dismissal until his reinstatement.

Confectionery Workers, London, Ontario—Pursuant to a request by the Minister of Labour for Ontario, the Federal Minister of Labour on March 18th, 1946 appointed Magistrate J. A. Hanrahan of Windsor, Ontario, as an Industrial Disputes Inquiry Commission to deal with charges that McCormicks Limited, London, Ontario, dismissed eight employees because of union membership and activity. The Commissioner reported early in April that the employees had failed to establish their claims that they had been discriminated against and that the charges should be dismissed.

Steelworkers, Hamilton, Ontario—On March 5th the Department received a copy of a decision rendered in arbitration by Dr. Alexander Brady, of the University of Toronto, who had been appointed by the Minister of Labour as the independent chairman of an Arbitration Committee to deal with a dispute between the Steel Company of Canada, Hamilton, Ontario, and Local 1005, United Steelworkers of America. The issue was that a change in the shift schedule of the labour department of the plant involved some men working on Sunday as part of their standard working week of six days without getting overtime pay for the work on Sunday. The union claimed that such work on Sunday without overtime pay was contrary to the

collective agreement between the parties. The company contended that it was not required to pay overtime rates for Sunday work unless such work was something beyond the standard working day and standard working week. The Arbitrator decided that the claim of the union was not sustained by the terms of the existing agreement.

Packinghouse Workers, Various Provinces—The March issue of the LABOUR GAZETTE contained a brief summary of the agreement reached between Canada Packers, Limited, Burns and Company, Limited, and Swift Canadian Company, Limited, and the United Packinghouse Workers of America as the result of mediation by the Honourable Mr. Justice S. E. Richards, of Winnipeg, who acted as an Industrial Disputes Inquiry Commission. As a result of the satisfactory settlement of the dispute Orders in Council were adopted revoking as of March 17, 1946, the government control which had been set up over various plants of the three companies. The control was established in October, 1945, as a result of the threat of a strike at that time, and was exercised through Mr. J. G. Taggart, Chairman of the Dominion Meat Board, as Controller assisted by seven Deputy Controllers in different areas.

Metal Products Workers, Fort William, Ont.—During March the Department received copies of two awards of a Committee of Arbitration established by the Minister of Labour on joint request of the parties to deal with disputes between the Canadian Car and Foundry Company Limited, Fort William, Ontario, and Lodge 719, International Association of Machinists. Both controversies related to the dismissal of employees. In one case the Arbitration Committee rendered a unanimous report recommending the reinstatement of a man who was discharged for allegedly sleeping on the job while in charge of a machine. In the second case the employee had been dismissed for breaking a company rule with regard to eating during working hours. A majority of the Arbitration Committee found that the company was justified in discharging the man as he had been warned on a previous occasion about breaking shop rules.

Newspaper Printers, Winnipeg, Manitoba—The December, 1945, and February, 1946, issues of the LABOUR GAZETTE contained reports of a dispute between the Winnipeg Free Press Company Limited and the Southam Company Limited (Winnipeg Tribune Division) and the Winnipeg Typographical Union No. 191. The proposal made by the Minister of Labour during January that the dispute should be submitted to a Board of Conciliation

established by him was rejected by the publishers. On March 6th the Minister of Labour appointed Mr. William D. Card, K.C., of Portage La Prairie, Manitoba, as an Industrial Disputes Inquiry Commission to confer with the parties and endeavour to effect a settlement. In the event of the Commissioner being unable to secure a settlement, he was instructed to make recommendations to the Minister of Labour as to the manner in which the dispute should be determined. His report had not been received at the end of the period under review.

Insulating Products Workers, Mimico, Ontario—Early in March 1946, the Minister of

Labour received a request from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission to investigate the dismissal of an employee of the Pneumatic Insulating Company, Mimico, Ontario, allegedly because of union membership and activity on behalf of the International Union of Operating Engineers. On March 8th His Honour Judge James Parker, of Toronto, was appointed to conduct an investigation under the provisions of Section 5 of Order in Council P.C. 4020. The Commissioner found that the employee in question was not dismissed because he was a member of the union or for any union activity.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. Because of limitation of space it is not possible to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Rubber Products

ST. JEROME, P.Q.—DOMINION RUBBER COMPANY LTD. AND RUBBER WORKERS FEDERAL UNION, LOCAL 144.

Agreement to be in effect from April 14, 1945, to April 16, 1946, and thereafter subject to 60 days' notice. This agreement is similar to the one summarized in the *LABOUR GAZETTE*, May, 1944, p. 634, with the following exceptions—Hours of night work: 10 per night Monday through Friday or 9 per night Monday through Friday, 5 on Saturday, a 50-hour week; if requirements necessitate continuous production, 8 hour shifts 6 days per week will be worked. Overtime: all time worked in excess of regular hours, Sundays (except as part of regular shift), or other regularly assigned day off and any of 11 specified holidays will be paid for at time and one-half. Vacation: one week with pay equal to 2 per cent of earnings for the previous year for employees with one year's seniority; two weeks with pay equal to 4 per cent of earnings for the year to employees with ten years' seniority.

MONTREAL, P.Q.—DOMINION RUBBER COMPANY LIMITED (PAPINEAU PLANT AND RUBBER REGENERATING DIVISION) AND THE DISTILLERY RECTIFYING BREWERY AND WINE WORKERS INTERNATIONAL UNION OF AMERICA (SYNTHETIC RUBBER WORKERS LOCAL 78).

Agreement to be in effect from July 26, 1945, to July 26, 1946, and thereafter, subject to 60 days' notice. The company recognizes the union as the exclusive bargaining agent for all eligible employees. Check-off: company will, upon authorization from individual members, deduct from the pay of union members monthly their union dues and remit same to the union.

Hours of work: 10 per day or night Monday through Friday, a 50-hour week; continuous operations—8 per day, 6 days a week, a 48-hour week or 12 per day, 5 days a week and every

third week 4 days. Overtime: all time worked in excess of regular hours, on Saturdays and Sundays (except when part of regular shift) and assigned days off and seven specified holidays shall be considered as overtime and paid for as such. Vacation: one week with pay after one year's service with the company, two weeks with pay after 10 years' service.

On all 8-hour shift operations where no stop for lunch is allowed, employees will be given a premium of $\frac{1}{4}$ of an hour. Two ten-minute rest periods will be allowed on all shifts.

Provision is made for payment for waiting time, seniority rights and grievance procedure.

TORONTO, ONT.—GUTTA PERCHA AND RUBBER LIMITED AND UNITED RUBBER WORKERS OF AMERICA, LOCAL 136.

Agreement to be in effect from May 16, 1945, to May 15, 1946, and thereafter subject to 30 days' notice. The company recognizes the union as the sole and exclusive collective bargaining agent for all eligible employees. Check-off: the company agrees to make arrangements for union members who so authorize to have their union dues deducted from their pay cheques monthly and remitted to the union.

Hours of work: day workers—9 per day Monday through Friday, 5 on Saturday, a 50-hour week; night shift workers—10 per night Monday through Friday, a 50-hour week (except shoe strippers who work 9 per night Monday through Friday and 5 on Sunday); multiple shift workers—8 per shift, 6 days a week, a 48-hour week. Overtime: time and one-half for all work in excess of regular hours, for work on Sundays (except as part of regular shift) and for work on any of six specified statutory holidays and two additional days if proclaimed holidays by the city. Vacation: one week with pay after one year's service with the company, two weeks with pay after 25 years' service.

Wage rates: job classifications and the ranges of base rates and average hourly earnings applicable to each will be according to the brief submitted to the Regional War Labour Board to the extent confirmed by the decision of the Board. Off shift bonus will be paid as follows—permanent night workers, 5 cents per hour extra, two shift operators on second shift normally ending 7 a.m., 2.5 cents per hour extra, three shift operators on third shift normally ending 7 or 8 a.m., 1.7 cents per hour extra.

Provision is made for seniority rights and grievance procedure.

HAMILTON, ONT.—FIRESTONE TIRE AND RUBBER COMPANY OF CANADA LTD. AND UNITED RUBBER WORKERS OF AMERICA, LOCAL 113.

Agreement to be in effect from October 17, 1945 to October 17, 1946, and thereafter subject to two months' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. Check-off:

the company agrees to deduct union dues from the pay of union members who so authorize and remit same to union.

Hours of work and overtime rates of pay: subject to the approval of the Regional War Labour Board all hours worked in excess of regular shift hours will be paid for at time and one-half. Approved rates of pay shall be paid for all work performed on Sundays and eight specified holidays.

Vacation: employees with one year's service with the company are eligible for one week with pay equal to 2 per cent of previous annual earnings.

Wage rates: the present base rates, hourly rates and differentials shall remain in effect during the term of the agreement, subject to the right of either party at any time during the first two months from date of agreement to either jointly or separately apply to the Regional War Labour Board for a revision of those or any rate coming within the certified bargaining unit.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Animal Products

KITCHENER, ONT.—BURNS AND Co. (EASTERN) LIMITED AND PACKINGHOUSE BUTCHERS AND ALLIED FOOD WORKERS UNION OF CANADA, LOCAL 90.

Agreement to be in effect from December 4, 1945, with supplementay agreement December 10, 1945, retroactive to November 1, 1945, to December 4, 1946, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. Check-off: the company agrees to deduct union dues monthly from the pay of union members who so authorize and remit to the union. Maintenance of membership: any employee who is a union member in good standing or who becomes a union member shall as a condition of continued employment maintain such membership during the term of the agreement, except during the last 15 days when a member may withdraw from the union.

Hours of work: supplementary agreement reduces basic weekly hours from 48 to 45 and the guaranteed minimum from 40 to 37½ hours' pay, including those weeks in which a statutory holiday occurs. The schedule of daily hours shall be arranged by the company and the union. Overtime: time and one-half shall be paid for all hours worked in excess of the daily hours so arranged, or in excess of 45 hours in any one work week, including shift workers who may be required to work 48 hours in a week; double time shall be paid for work on Sundays (except as part of regular shift), an employee's regular day off and pay of six specified paid statutory holidays.

Vacation: one week with pay to employees with one year's service with the company, two weeks with pay to employees with five years' service, and three weeks for female employees with 15 years seniority. Wage rates shall be increased by 6.8 per cent (supplementary agreement retroactive to November 1, 1945), so that weekly "take home" pay will be the same for 45 hours as formerly for 48 hours. Each employee on a night shift shall be paid a premium of 50 cents for each night worked after 12 midnight.

Provision is made for seniority right and grievance procedure.

ST. BONIFACE AND WINNIPEG, MAN.—CANADA PACKERS LIMITED AND UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 216.

Agreement to be in effect from June 1, 1945, to November 1, 1945, and thereafter from year to year subject to 30 days' notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1944, p. 1003, with the following notable additions—Check-off: the company agrees to deduct monthly, from employees' pay, union dues upon authorization and remit same to union. Maintenance of membership: any employee who is a member of the union in good standing or who later becomes a union member shall as a condition of continued employment with the company maintain such membership for the duration of the agreement, however, during the 15 days immediately following the term of the agreement, union members may resign from membership in the union.

SASKATOON, SASK.—INTERCONTINENTAL PORK PACKERS LTD. AND UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 248.

Agreement to be in effect from July 31, 1945 to July 30, 1946, and thereafter subject to 60 days' notice. Supplementary agreement agreed to November 28, 1945. The company recognizes the union as the exclusive collective bargaining agency for all eligible employees. Check-off: the company agrees to deduct union dues monthly from the pay of employees who so authorize and remit same to the union. Maintenance of membership: any employee who is or later becomes a union member, as well as all new employees, must as a condition of employment maintain union membership in good standing. No employee shall be subjected to any penalties against his application for membership or reinstatement as a member in the union except as may be provided in the constitution of the by-laws of the union.

Hours of work: Monday through Friday, one day of 9 hours, four days of 8½ hours, 5 hours on Saturday, a 48-hour week (supplementary agreement of November 28, 1945, reduces the hours from 48 to 45 per week, guaranteed minimum weekly hours reduced from 40 to 37½ per week including weeks in which a statutory holiday occurs). Overtime: time and one-half for all work in excess of the regular hours. Double time for work on Sundays (except as part of regular hours) and six specified statutory holidays. Vacation: one week with pay after one year's service, two weeks with pay after five years' service, three weeks with pay for females after 15 years' service and for males after 20 years' service.

Hourly wage rates: Males 59½ cents per hour, boys under 18 and females 48½ cents per hour. (Supplementary agreement increases above rates by 6.8 per cent, retroactive to November 10, 1945, bringing weekly earnings for 45 hours up to previous earnings for 48 hours.) Provision is made for seniority rights and grievance procedure.

Manufacturing: Textiles and Clothing

MONTREAL, P.Q.—DRESS MANUFACTURERS' GUILD AND INTERNATIONAL LADIES' GARMENT WORKERS' UNION, DRESSMAKERS' LOCAL 262 AND DRESSCUTTERS' LOCAL 205.

Agreement in effect from April 1, 1945 to April 1, 1946, renews with certain changes the 1944 agreement. The employer recognizes and acknowledges the union as the agent and rep-

representative of the members of the union. Closed shop: the employers shall maintain union shops in their factories during the term of the agreement and shall employ none but union members in good standing.

Hours of work: 8 per day Monday through Friday, 5 on Saturday, a 44-hour week. Overtime: a total not exceeding 8 hours in each week during first four working days shall be permitted provided that not more than 2 hours overtime is worked in any one day.

Vacation: one week with pay to employees who have been with their present employer since the first week in January and have been employed in a union shop in the industry for a year.

Minimum weekly wage rates: operators, sample makers \$21.56; pressers—male, \$33, female, \$23.32, assistant \$15.40; finishers \$17.05; examiners \$16.50; general hands \$15.40; special machine operators \$15.40 and \$19.50; drapers \$20 increased to \$22 effective April 1, 1945; cutters—skilled \$42.35 increased to \$45.35 April 1, 1945, semi-skilled \$32.35 increased to \$35.35 April 1, 1945; apprentices first six months \$8.25, second six months \$9.65, third six months \$11.25, fourth six months \$12.25. No piece work prices may be fixed which do not yield a rate of pay equal to the above minimum rates. No home work is permitted. A rest period of 15 minutes during each afternoon shall be allowed without pay deductions.

Manufacturing: Printing and Publishing

TORONTO, ONT.—CANADIAN LITHOGRAPHERS' ASSOCIATION and AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCAL 12.

Agreement to be in effect from January 18, 1946, to December 31, 1947, and thereafter from year to year subject to 60 days' notice. This agreement is similar to the one previously in effect for several cities and summarized in the LABOUR GAZETTE, August 1944, p. 1003, with the following exceptions: This agreement applies to Toronto only. Hours of work to be 43 per week during 1946 and 42 per week during 1947. Three specified statutory holidays will be paid for at regular time rates when not worked. Hourly wage rates, subject to the approval of the Regional War Labour Board, are increased 3 cents per hour for 1946 except the following: Art Department—drug label work, poster (letterers); Camera Department—operators (commercial); Plate Making Department—commercial transferers, vacuum frame and contact negative operators producing original and proving plates and press plates with frame sizes up to and including 23 x 35, stone polishers and plate grainers; all of which are increased 2 cents per hour; journeymen pressmen groups 1 to 6 increased to \$.75-\$1.52, group 7 (four colour presses) increased from \$1.45-\$1.65 to \$1.48-\$1.69; press feeders and feeder operators increased from 43-53 cents to 46-54 cents during first year, from 46-65 cents to 49-67 cents during second year, from 50-76 cents to 52-78 cents thereafter; on 4-colour sheet fed presses 36 x 48 or over, feeder operators increased 2 cents per hour; apprentices in art, camera and plate making departments increased from \$.23-\$1.01 to \$.28-\$1.03. During 1947 further increases of from 1 to 4 cents per hour, subject to the approval of the Regional War Labour Board, shall be effective.

Manufacturing: Metal Products

HAMILTON, ONT.—AMERICAN CAN COMPANY and FEDERAL LABOUR UNION, LOCAL 23,886.

Agreement to be in effect from October 23, 1945, to October 22, 1946, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. Check-off: The company agrees to deduct upon voluntary authorization by the employee union dues from his weekly pay and remit same to the union monthly.

Hours of work: 9 per day, 45 per week. Overtime: time and one-half for all work in excess of the above hours, double time for work in excess of 12 hours per shift, and for all work on Sundays and any of eight specified holidays. Vacation: subject to approval of Regional War Labour Board, the vacation plan as set forth in an appendix to the agreement will be effective January 1, 1946.

Wage rates and job classifications as contained in an appendix to the agreement shall, subject to the approval of the Regional War Labour Board, be effective during the term of the agreement. A premium of 5 per cent will be paid for all work performed on regularly scheduled afternoon shifts which begin on or after 1 p.m. and end on or before midnight. A premium of 10 per cent shall be paid for all work performed on regularly scheduled night shifts extending past midnight.

Provision is made for seniority rights and grievance procedure.

Transportation and Public Utilities: Electric Railways and Local Bus Lines

HAMILTON, ONT.—THE HAMILTON STREET RAILWAY COMPANY and THE AMALGAMATED ASSOCIATION OF STREET and ELECTRIC RAILWAY and MOTOR COACH EMPLOYEES OF AMERICA, DIVISION NO. 107.

Agreement to be in effect from October 1, 1945, to September 30, 1946, and thereafter subject to 60 days' notice. This agreement is similar to the one summarized in the LABOUR GAZETTE, December 1944, p. 1513 with the following additions. Check-off: The company agrees to deduct union dues monthly from the pay of employees who so authorize and remit same to union. Vacation: all employees with 15 years' continuous service with the company shall be granted two weeks' vacation with 12 days' pay at 8 hours per day. Employees with one year's service and less than 15 years have one week's vacation. Employees who have worked less than 1,800 hours in the previous calendar year may have vacation with pay based on average weekly earnings for the previous calendar year instead of on the 8-hour day.

Service: Recreational

VANCOUVER, NEW WESTMINSTER and OTHER TOWNS IN BRITISH COLUMBIA — ODEON THEATRES OF CANADA LIMITED, FAMOUS PLAYERS CANADIAN CORPORATION LTD., and CERTAIN INDEPENDENT THEATRES, and INTERNATIONAL ASSOCIATION THEATRICAL STAGE EMPLOYEES and MOTION PICTURE MACHINE OPERATORS, B.C. LOCAL 348 (PROJECTIONISTS).

Agreement to be in effect from September 1, 1945, to August 31, 1947.

Hours of work: in urban theatres—6 per day, a 36-hour week; in suburban theatres, 4 per day, Monday through Friday, 7 on Saturday, a 27-hour week; one theatre in New Westminster, 5 per day, a 30-hour week. Overtime: all work in excess of regular hours (not counting the 30 minutes immediately preceding the regular opening time daily which will be given for maintenance work only) up to midnight shall be calculated in one minute periods and paid for at straight time rates, after midnight time and one-half rate to prevail. All Sunday work in-

cluding Sunday midnight matinees shall be paid for at double time rate. All special shows or previews at time and one-half with a minimum of \$5 per man. An annual vacation with pay will be granted the projectionists according to the schedule in effect.

Wage rates—Greater Vancouver and New Westminster for 36-hour week \$53.20 to \$61, for 30-hour week \$41.40 and \$49.80; for 27-hour week \$42.93 to \$49.68; outside greater Vancouver and New Westminster, for 27-hour week \$40.60 to \$46.45.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain conditions made binding throughout the Provinces or within a certain district, on all employers or employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for filing objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning the legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of four new agreements, the amendment of six others, and the correction of two Orders in Council already published. All of these are noted below. Requests for the amendment of the agreements for barbers and hairdressers at Quebec and hospital employees at Sherbrooke were published February 23. A correction of a notice of amendment for the printing trades agreement at Quebec was also published February 23. Requests for the amendment of the barbers and hairdressers' agreements at Montreal and St. Hyacinthe, and for the retail stores agreement at Quebec were gazetted March 2. Requests for the amendment of the retail trade agreement at Jonquière and wholesale food stores agreement at Quebec, for the amendment of the hardware and paint industry agreement at Quebec, retail trade at

Quebec, building materials industry for the province and bakers at Quebec were published March 9. Requests for the amendment of the agreements for garage employees at Quebec, religious institution employees at St. Hyacinthe, building trades at both Three Rivers and Hull and tannery industry for the province were gazetted March 16. (Corrections: In January it was shown that a request had been published for a new agreement for the building materials industry, for the province—this should have been a request for the extension of a new agreement for the woodwork and wooden furniture industry at Ste. Agathe. In February it was shown that a request had been published for a new agreement for the building trades industry at Quebec; this should have been for the sash and door industry at Quebec.)

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Wood Products

WOODWORK AND WOODEN FURNITURE INDUSTRY, STE. AGATHE.

An Order in Council, dated February 21, and gazetted March 2, makes obligatory the terms of a new agreement between J. T. Cloutier, A. Z. Construction Company, Limited and P. Lafontaine and "La Fédération nationale catholique des Metiers du Bâtiment et des Matériaux de Construction", "Le Syndicat catholique de la Construction de Ste-Agathe". Agreement to be in effect from March 2, 1946 to March 1, 1947, and thereafter from year to year until notice. Territorial jurisdiction comprises the town of Sainte-Agathe-des-Monts and the parish of Sainte-Agathe.

Hours: 59-hour week except for watchmen, stationary engineers and firemen. Overtime between 6 p.m. and 10 p.m. is payable at time and one-half; between 10 p.m. and 7 a.m. at double time.

Minimum wage rates: foremen 60 and 80 cents per hour; benchman in the shop 60 and 70 cents; sketcher and drawer \$1.25; moulding shaper and slicker operator, floor wood surfac-

ing machine operator, operators of band-saws, jig-saws, splitting machine, grooving planes, etc. 50 cents; labourer 40 cents; millwright 70 cents; floor wood sorter 55 cents; truck driver \$24 per week; boiler fireman, clerk bookkeeper \$25 per week; stationary engineman \$30; watchman \$18; apprentices from 25 cents per hour during first year to 45 cents in third year. No piece-work.

FURNITURE INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated February 21, and gazetted March 2, makes obligatory the terms of a new agreement, between "La Fédération catholique nationale du Meuble" and The Association of Furniture Manufacturers (Quebec). Agreement to be in effect from March 2, 1946 to March 1, 1947 and thereafter from year to year until notice. Territorial jurisdiction comprises: Zone I, the island of Montreal, Zone II, the province of Quebec, excepting regions comprised in Zones I and III, Zone III the county of Chicoutimi, the city of Rivière-du-Loup, and municipalities with less than 3,000 population according to the last Dominion census, provided establishments do not employ more than 50 workmen.

Hours: Zone I, 9-hour day, 4 on Saturday, a 49-hour week; employees engaged in shipping, maintenance and repair, 55-hour week, boiler firemen and stationary enginemen 56-hour week; Zones II and III, 10-hour day, 55-hour week, boiler firemen and stationary enginemen 56-hour week. Overtime is payable at time and one-half, double time on Sundays and six specified holidays in Zone I. This is not applicable to boiler firemen, stationary enginemen, watchmen, truck drivers and helpers on trucks.

Wage rates: Zone I—minimum 30 cents per hour, average 53½ cents; Zone II—minimum 25 cents, average 47 cents; Zone III—minimum 25 cents, average 40 cents. Vacation: one week with pay after one year's service.

SASH AND DOOR INDUSTRY, QUEBEC.

According to the request published January 12, and Order in Council dated March 9 and gazetted March 16 is published amending the previous Orders in Council in this industry (L.G., March, 1945, p. 349).

Hourly wage rates: bench joiner in the shop 70 cents, machine joiner in the shop 65 cents, junior journeyman joiner (one year) 60 cents, stationary engineman (maximum of 72 hours per week) 55 cents, machinist 63 cents, common labourers 50 cents, machine operators (first six months) 50 cents, machine operators (after six months) 55 cents, machine operators' helpers (under 18 years) 25 cents (18 years and over) 40 cents, shipper and receiver 55 cents, tractor operator, truck driver 53 cents, carter 50 cents. Another amendment does not affect the summary already given.

Manufacturing: Paper and Paper Products

PAPER BOX MANUFACTURING (UNCORRUGATED) PROVINCE OF QUEBEC.

An Order in Council, dated February 28, and published March 9, amends the previous Orders in Council for this industry (L.G., August, 1945, p. 1197, October, p. 1520; March, 1946, p. 317) by the addition of four employers as co-contracting parties to those of the parties of the first part.

PAPER BOX MANUFACTURING (CORRUGATED) PROVINCE OF QUEBEC.

An Order in Council, dated March 9, and published March 16, amends the previous Orders in Council for this industry (L.G., August, 1945, p. 1198 and previous issues).

tives \$2,130 to \$2,430; sergeant detectives (permanent May 1, 1943) no clothing allowance \$2,465 to \$2,865; judicial investigator \$2,665 to \$3,165; chief of detectives, assistant chiefs of Placement, Unemployment and Works Offices \$2,900 to \$3,200.

MUNICIPAL EMPLOYEES (OUTSIDE) QUEBEC.

A correction of Order in Council published March 16, relating to this industry (L.G., January, 1946, p. 52). This correction does not affect the summary already given.

FIREFIGHTERS, QUEBEC.

An Order in Council, dated February 21, and gazetted March 2, makes obligatory the terms of a new agreement, between the City of Quebec and L'Union nationale Catholique des employés du département du feu de Québec, inc. Agreement to be in effect until April 30, 1946 and thereafter from year to year until notice.

Hours: will be divided into 2 shifts and relay will take place every 24 hours. No overtime pay. Firemen called to a fire outside the city will be paid 50 and 75 cents an hour.

Weekly wage rates: firefighters \$25 to \$35.50; lieutenant, lieutenant-instructor \$37.50; captain, captain-instructor, prevention captain, chief mechanic \$40; inspectors \$30 and \$32. Vacation—20 days with pay every year.

Provision is made for sick leave and supplying of uniforms.

Trade Union Membership in United Kingdom

THE total membership (including members of overseas branches) of trade unions in the United Kingdom at the end of 1944 was about 8,024,000, showing a decrease of 79,000, or 1.0 per cent, as compared with the end of the previous year.

The totals for the last fifteen years are contained in the following table.

Year	No. of Unions at end of Year	Membership at end of Year		
		Males	Females	Total
		000's	000's	000's
1930.....	1,121	4,049	793	4,842
1931.....	1,108	3,859	765	4,624
1932.....	1,081	3,698	740	4,444
1933.....	1,081	3,661	731	4,392
1934.....	1,063	3,554	736	4,290
1935.....	1,049	4,106	761	4,867
1936.....	1,036	4,405	800	5,205
1937.....	1,032	4,947	895	5,842
1938.....	1,024	5,127	926	6,053
1939.....	1,008	5,258	973	6,231
1940.....	989	5,463	1,082	6,545
1941.....	981	5,723	1,374	7,097
1942.....	975	6,122	1,676	7,798
1943.....	970	6,228	1,875	8,103
1944.....	946	6,219	1,805	8,024

The concentration of union strength is illustrated by the fact that 12 unions, each with a membership of between 50,000 and 100,000 have a total membership of 953,000 and 16 with over 100,000 each a membership

of 4,758,000; the top 16 have three-fifths of the membership. The main groupings are: metals, machines, conveyances, etc., 1,617,000; transport and general labour, 1,810,000; coal mining, 698,000; Government, 884,000; railway service, 566,000; building, woodworking, etc., 4,510,000.

The Trade Union Congress at the end of 1944 possessed a membership of 6,575,654. At the end of 1943 trade unions affiliated with the Labour party had a membership of 2,237,307.

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:—

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the province for vocational schools.

Cumulative Enrolment

From its inception up to February 28, 1946 the gross enrolment in all types of projects has been 477,013 made up as follows:

Full-time Pre-Employment classes for war industry	108,430
Part-time Classes for persons employed in war industry.....	35,256
Full-time Plant Schools in industry..	38,000

Training of Discharged Members of the Forces

The number of new trainees enrolled during the month in all categories of training (6,485 men and 478 women) was substantially less than the corresponding number enrolled during the month of January, but on February 28 the enrolment in all types of training reached the high point up to the present, namely, 31,409 men and 1,923 women. During the month a substantial number of new classes and courses were started at different training centres throughout the country, but the main effort was concentrated on endeavouring to obtain the machine tools, hand tools and other items of equipment that were absolutely essential to the giving of adequate and thorough training in the centres and classes already opened.

A shortage of housing accommodation is making it necessary for Canadian Vocational Training to assume responsibility for the provision of messing and dormitory accommodation for veterans under training at many centres, such as, North Sydney, Windsor, Pictou, Moncton, Brockville, Kitchener, and Hamilton.

Arrangements have now been completed throughout the country, by which the active

co-operation of the National Employment Service will be given in connection with training veterans on the job in industry. Officials of the Employment Service Office will conduct publicity and propaganda work with the employers with whom they are in touch, and will locate suitable training opportunities in industry for veterans, both men and women. The Department of Veterans Affairs will be notified of all such opportunities and representatives of Canadian Vocational Training will arrange for the individual training contracts with the employers concerned, and will be responsible for all subsequent supervision and follow-up when veterans are placed for training.

There has been a substantial increase across the country in the number of veterans enrolled for training in the building and construction trades. On February 28 there were 3,960 veterans enrolled for training in schools and a further 1,520 indentured to employers in the building and construction trades. Enrolments when checked with the estimated requirements for apprentices in the building trades, as recently drawn up by the National Joint Conference Board of the Building and Construction Industry, shows a distinct lack of balance between the enrolments and the anticipated requirements. In general throughout the country, there is a shortage of veterans enrolling as plasterers, painters and decorators, and in some provinces as carpenters. On the other hand, there is an excess enrolment in most provinces for electricians and plumbers, and for sheet metal workers in some provinces.

In order to help determine the extent of the training facilities that should be provided for various occupations for veterans, regional surveys are being conducted. The object of these is to find out, if possible, the anticipated requirements for various types of occupations in each area, and on the basis of the information, thus obtained, allocate the training accommodation in proper proportion among the different occupational groups concerned. In these surveys the Employment Service Office, the Department of Veterans Affairs and Canadian Vocational Training are uniting and are seeking assistance and information from employers and trade union groups.

Training of Apprentices

The special classes for civilian apprentices in the building and construction trades have been held in most provinces for a period of two or three months, commencing in January. The enrolment in these classes shows a substantial increase over the enrolments of previous years.

*Activities of Unemployment Insurance Commission**

Analysis of Claims and Benefit for February—Insurance Registrations— The Fund—Decisions of Umpire

FOR the first time since last October, the number of claims for Unemployment Insurance Benefit showed a decline in February over the number registered in the preceding month. A total of 59,098 claims was filed in February as against 71,932 in January and 14,990 in February 1945.

At the same time, the number of live claims at the end of February increased by 16,045 over the figure for the end of January. Totals of live claims were 161,997 (130,061 males and 31,936 females) at February 28; 145,952 (116,504 males and 29,448 females) at January 31 and 29,692 (21,706 males and 7,986 females) at February 28, 1945. It would seem, therefore, that in spite of the reduction in cases of unemployment, those already unemployed are not securing employment any more easily than in the past few months.

During February, 62,717 claims were adjudicated at Insurance offices, 49,464 being considered entitled to benefit and 13,253 not entitled to benefit.

A total of 139,222 persons received one or more benefit payments aggregating \$5,902,879 for 2,901,809 compensated unemployed days during February. This compares with 102,718 persons paid \$4,493,252 for 2,193,317 days in January and 23,062 persons paid \$822,490 for 422,873 days during February 1945.

The average amount of benefit paid per beneficiary was \$42.40 in February, \$43.74 in January and \$35.66 in February 1945. The

average amount of benefit paid per compensated day of unemployment was \$2.03 in February, \$2.05 in January and \$1.95 in February 1945.

Unemployment Insurance Fund

Total Employer—Employee contributions during February 1946 amounted to \$4,808,847.73 compared with \$4,614,084.34 in the same month last year.

The upward trend in benefit payments continued during February when a new high figure of \$5,932,374.96 was reached. This represents an increase of \$1,440,293.71 over the figure for January. In February last year benefit payments amounted to \$821,052.62.

The net increase to the Fund during February this year amounted to \$401,996.21.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at February 28, 1946, 3,155,758 employees were issued with Insurance books and had made contributions to the Fund at one time or another since April 1, 1945, an increase of 52,817 since January 31, 1946.

As at February 28, 1946, 158,470 employers were registered as having insurable employees, an increase of 2,432 since January 31, 1946.

Registrations to February 28, 1946 by regions are given in Table 1.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the Provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the *LABOUR GAZETTE* and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU-B. 41

(June 15, 1945)

The claimant left his employment for medical reasons. He made a claim for benefit and the Local Office offered him suitable employment but he refused to apply until he had obtained a release from the medical officer of his company—HELD: The claimant had not shown good cause for refusing to apply for or to accept the employment offered. Furthermore, the reason for the claimant's refusal shows clearly that he was not available for work; the Unemployment Insurance Act is a scheme for insurance against unemployment and not for insurance against sickness.

The material facts of the case are as follows:—

The claimant, a married man, aged 43 years, was employed as station master and checker by a railway company at a salary of \$152.93 per month for some 25 years. On June 20, 1944 the claimant left on vacation with pay and returned to his employment on July 5. On July 6 he was suspended from his employment on medical grounds (blood poisoning and nervous condition) and remained suspended until December 14, 1944 when the Medical Board of the railway company decided to retire him. The claimant made a claim for benefit on August 10, 1944 and asked that his claim be antedated to July 5, 1944 but his demand for antedating was refused and his claim for benefit was allowed as from August 10, 1944.

On December 20, 1944 the local office offered the claimant employment as a packer and helper at an equipment depot of one of the

Armed Forces at a salary of \$90 per month plus cost-of-living bonus. He refused to apply for this employment on the ground that he had to obtain a release from the medical officer of the railway company.

The Insurance Officer disallowed the claim and disqualified the claimant for a period of six weeks beginning December 20, 1944. He was of the opinion that the claimant had been notified of an employment which was suitable within the meaning of the proviso to Section 31 (b) (iii) of the Act, in view of the fact that there was no longer any expectation of his returning to his usual employment.

From this decision the claimant appealed to a Court of Referees and was granted an oral hearing. On January 12, 1945 the Court of Referees unanimously disqualified the claimant because he had not shown good cause for failing to apply for the employment which he was offered.

Following his appeal the claimant submitted a doctor's certificate which reads as follows:

"This is to certify that this patient is unable to follow his occupation on account of anxiety neurosis. Because of this condition, he was laid off from his work at the railway company. Whether this is a permanent condition or not, it is impossible to say, but he was advised by a specialist that he should have a period of at least six months' rest."

On January 29, 1945, the claimant was again notified by the Commission of the same employment with the same employer as the employment offered to him on December 20, 1944 and the claimant again refused to apply for or accept the position and the Insurance Officer disqualified the claimant for a period of six weeks beginning January 29, 1945.

From this decision the claimant appealed to a Court of Referees which heard the case on written submission. On February 28, 1945 the Court of Referees unanimously disqualified the claimant for six weeks on the ground that the claimant had not shown good cause for refusing an offer of suitable employment.

The association of employed persons of which the claimant was a member appealed to the Umpire from the decisions rendered by the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons that:

I have reviewed the submissions and find that under the circumstances the employment

offered to the claimant was suitable within the meaning of the proviso to Section 31 (b) (iii) of the Act and that the claimant has not shown good cause for refusing to apply for or to accept the employment offered. It appears to me that the claimant, in refusing to apply for the employment on the ground that he could not do so before obtaining a medical certificate from the railway company doctor, clearly showed that he was not available for work. The Unemployment Insurance Act, 1940 is, as its name implies, a scheme for insurance against unemployment and not for insurance against sickness, and one of the statutory conditions for the receipt of benefit is that the claimant be at all times capable of and available for work.

CU.-B. 42

(June 27, 1945)

The Local Office offered the claimant (a union carpenter) employment in a town located in another province, at the union rate of wages. He refused to apply for the employment offered. A few days later he was offered employment by another Local Office in another province at a rate of wages lower than the union rate. The Insurance Officer disqualified him on his first refusal but the Court of Referees reduced the disqualification to the period which elapsed between the two offers of employment—HELD: The question as to the second refusal of employment was not before the Court of Referees. The Court properly held that the first refusal was not justified and there was no reason for reducing the period of disqualification as the second refusal was not related to the first.

The material facts of the case are as follows:

The claimant, a single man, aged 36 years, was employed as a carpenter by a firm of building contractors in a city about fifty miles from his place of residence, from May 23, 1944 to January 6, 1945, at the rate of \$1.00 per hour. The claimant was laid off on January 6 and on January 8 he filed a claim for benefit and his claim was allowed.

The claimant was notified on March 8, 1945, by registered letter by the local office of the Commission nearest to his place of residence, of a position in a town located in another province. The letter of notification stated that the rate of wages was 75 cents per hour for rough carpenters and \$1.00 per hour for finishers. The claimant refused to apply for the employment offered, stating that he would report to the local office on March 14 in the city where he had formerly been employed.

The Insurance Officer disallowed the claim under Section 43 (b) (i) of the Act on the ground that the claimant had, without good cause, refused or failed to apply for suitable employment and disqualified the claimant

from receipt of benefit for a period of six weeks ending April 19, 1945.

On March 14 the local office in the city where the claimant had formerly been employed offered him employment as a carpenter at a point in another province a considerable distance from his home, at 90 cents per hour. The claimant refused to apply for the employment offered because he alleged that he was a member of a union of carpenters and could not accept a rate of pay of 90 cents per hour while, according to the agreement in force, he should have received \$1.00 per hour.

The claimant appealed to the Court of Referees from the decision of the Insurance Officer and the Court unanimously confirmed the Insurance Officer's disqualification in respect to the claimant's first refusal to accept the employment notified but reduced the period to five days from March 9, 1945 to March 14, 1945.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees in respect to the reduced period of disqualification.

DECISION

The Umpire's decision was that the claim should be disallowed and the disqualification imposed by the Insurance Officer restored and gave as his reasons:

I have reviewed the record of this appeal and I think that perhaps some confusion was created in the minds of the members of the Court of Referees by the fact that the claimant was offered two positions at five-day intervals by two different local offices and at different wage rates.

The question at issue must be placed in its proper setting. The question as to the second refusal of employment by the claimant was not before the Court of Referees. The real point at issue was whether or not the first refusal of employment was justified. The Court of Referees properly held that the first refusal was not justified and therefore the logical conclusion is that the claimant ought to be disqualified. Upon reviewing all the circumstances of the case I find no reason for reducing the period of disqualification imposed by the Insurance Officer. The second refusal is not related to the first. In other words, the second offer of employment was at a different location than the first. Were we concerned with the question as to whether or not the claimant should be disqualified for his second refusal, we would then have to take into consideration his reasons for refusing that second offer, but it is clear that this appeal is only concerned with the first refusal.

I find the claimant, without just cause, refused or failed to apply for a situation which I consider was suitable employment within the meaning of Section (43) (b) (i) of the Act.

*Review of Canadian Manpower Situation During 1945**

Effect of End of War on Employment Situation

THE year 1945, from the point of view of labour market developments, can be divided into three distinct periods: (1) January 1 to V-E day; (2) V-E day to V-J day; (3) V-J day to the end of the year. During the first period, Canadian industries were still geared to meet war needs, and hence employment was concentrated in those industries essential to the war effort. Many key industries were reporting manpower shortages and employment as a whole was at an abnormally high level. For every unplaced applicant registered at the offices of the National Employment Service two positions were available.

In the second period, from V-E day to V-J day, preparations were made for a long war in the Pacific. At the same time minor steps were taken to reconvert the Canadian economy from production of war goods to production of peace-time commodities. Some of these steps had in fact been initiated in the early part of the year. As supplies of some types of war goods became sufficient, employment in war manufacturing declined. The resultant release of about 179,000 persons from war production led to a slight "loosening" in the labour market and to the expansion of civilian employment. This shift from production of war goods to that of civilian goods reflected two types of employment changes, i.e., within particular plants, in which case no termination of employment was involved, and from plant to plant as a war factory closed down and another plant expanded. In the latter case workers had actually to shift from one employer to another.

During this second period, Canada had planned a gradual demobilization of its armed forces, as well as gradual but progressive cut-backs in war industry. The sudden termination of the war, however, following the unexpected collapse of Japan, made this gradual reconversion impossible. Immediate demobilization of service personnel became imperative and mass lay-offs from war industries were necessary. As a result, many persons entered the labour market in a short interval; by the end of 1945 more than 400,000 persons had been discharged from the armed forces and about 560,000 workers were released from the production of war goods. Con-

sidering the above facts, a substantial volume of unemployment could well have been expected. At the end of December, 1945, however, the number of unplaced applicants registered with the National Employment Service was 183,821, compared with 60,609 at the beginning of the year.†

Several factors accounted for this relatively low level of unemployment. As servicemen returned from overseas, women began to leave the labour force and return to their homes. In addition, as service personnel were reinstated, persons who had postponed retirement during the war years began to withdraw from the labour force. Although employment in war industries declined, many plants were reconverted for civilian production and employees were retained. Civilian industry, with its huge backlog in demand, began to expand and to increase the number of its workers as soon as materials and labour became available. Christmas activity tended to alleviate unemployment at the end of the year. Finally, all ex-servicemen did not enter the labour force. Some 30,000 took further training or entered university during the year. In addition, there was a considerable lag between the time that a veteran was discharged and the date at which he actively entered the labour market in search of work. According to the Labour Force Survey of the Dominion Bureau of Statistics, some 22,000 ex-service personnel were thus holidaying at November 11-17, 1945. This number undoubtedly increased between that date and the end of the year.

Distribution of Canadian Manpower

In Table I are estimates of the distribution of Canadian manpower at October 1, 1944, April 1, 1945, and October 1, 1945. Monthly figures are not available for the over-all distribution of manpower, as statistics for some of the groups cannot be obtained on that basis. Any discussion of changes in the size of different groups in the working force must be based on a realization that the Canadian population is growing by natural increase. The shift among the various population classes, therefore, can be seen only by noting the ratio of each class to the total population, 14 years of age and over, as at particular dates. The following discussion will deal with those groups

* Prepared in the Research and Statistics Branch, Department of Labour.

† At the end of March, 1946, the figure was 266,027.

of the population wherein important changes occurred during 1945.

The total Canadian working force is composed of all those in the armed forces or gainfully occupied. At October 1, 1945, this portion of the population numbered about 4,821,000 and comprised 53.5 per cent of the total population, 14 years of age and over; the comparable figures for the same date in 1944 were 5,095,000 and 57.2 respectively. During 1945, therefore, this group has not only contracted relatively, but has also diminished numerically, in spite of the steady flow of

workers into it due to the natural increase of the population.

Armed Forces

During 1945, and especially since the end of the war on August 14, the number of persons in the armed forces has decreased very rapidly. Data on the effective strength of the three branches of the services during the recent year are shown in Table II. In Table III are presented figures on discharges during 1945 for the three branches of the forces.

TABLE 1—ESTIMATED MANPOWER DISTRIBUTION IN CANADA
(in Thousands)

February 19, 1946—Revised

NOTE.—The estimates are based on the most recent information obtainable from the Dominion Bureau of Statistics and other official sources. Very little statistical information is available for domestic servants, agricultural males, farm women, and employers, own accounts and no pays. In these cases the estimates are subject to a possibility of considerable error, especially for dates furthest from the date of Decennial Census (June 2, 1941).

Population Class	October 1, 1944			April 1, 1945			October 1, 1945					
	Male	Female	Total	Male	Female	Total	Male	Female	Total			
	No.	%		No.	%		No.	%

(b) Employers, own accounts and no pays ³	322	111	433	4-9	327	113	440	4-9	353	117	470	5-2
Agriculture—males only	1,025	1,025	11-5	1,010	1,010	11-3	1,050	1,050	11-6
Farm women, 14-64 years of age ⁴	780	780	8-7	800	800	8-9	810	810	9-0
Students	223	237	460	5-2	223	237	460	5-1	239	241	480	5-3
Unemployed	32	29	61	-7	53	27	80	-9	96	33	129	1-5
All others—includes homemakers not on farms	319	2,189	2,508	28-2	371	2,241	2,612	29-2	483	2,283	2,766	30-7

¹ Includes prisoners of war and persons missing but still on strength. Excludes persons enlisted but on leave and engaged in civilian occupations.

² Does not include women gainfully occupied on farms or in farm homes, who are included in "farm women". Does not include wage and salary workers who are temporarily unemployed owing to "No job" or "Layoff".

³ "Own accounts" are persons who carry on their business without assistance of employees. "No pays" are mainly family workers receiving no fixed money payment.

⁴ Since it was impossible to measure statistically the amount of farm work done by women, all women residing on farms are here included except students, women 65 years of age and over and those gainfully occupied outside the farm.

Estimates of the effective strength of the armed forces differ from those of total strength; prisoners of war, members on extended leave, those missing, deserters, and those seconded are included in the latter.

hovered around 10,000 per month. Between the first of May and the end of July, over 50,000 persons were discharged and a further 314,000 were released by the end of the year. As far as individual services were concerned,

The re-distribution of manpower stimulated by this demobilization was one of the major labour market developments of 1945. About 400,000 service personnel were discharged during the year and over three-quarters of these entered the labour market. The remainder were either incapacitated, holidaying before seeking employment, or attending university or school. Some of the ex-service women took up housekeeping. At the end of the year approximately 46,000 ex-service personnel of the wars of 1914 and 1939 were registered as unplaced applicants with the National Employment Service. In other words, over 250,000 ex-servicemen and women had been absorbed into gainful occupations. About 10 per cent of all the servicemen discharged during 1945, therefore, were out of work at the end of the year.

Discharges from all branches of the armed forces were increased following V-E day. Prior to that date, the number of releases

during 1945 the strength of the Navy fell by 54 per cent, of the Army by 45 per cent, and of the Air Force by 67 per cent.

Gainfully Occupied

The gainfully occupied portion of the Canadian working force is comprised of those in agriculture and those in non-agricultural industry. The latter group, in turn, is comprised of wage and salary workers and of employers, own accounts, and no pays (i.e., unpaid family workers).

Non-agricultural wage and salary workers comprise the bulk of the gainfully occupied. This is the group for which statistics can be most readily obtained, and for which adequate monthly data are available. In addition, this is the group in which the most widespread changes occurred during 1945, and which will be most seriously affected by cyclical swings in industrial activity.

During 1945 the relative size of the total number in non-agricultural industry decreased below that of 1941, although by October 1, 1945, it was still relatively much larger than it was at the same date in 1939. The major decline in the number of wage and salary workers employed in war industry was bound to produce this temporary shrinkage. If however, it is remembered that during the war the drain to the armed forces was primarily from this group, it will be realized that, with the demobilization of servicemen, the number of wage and salary workers in non-agricultural industry will likely increase again. Henceforth, this group will contract only if there is a major recession in employment.

Amongst non-agricultural wage and salary workers, the shift from the production of war goods to those of peace was the most significant development during 1945. This movement was characterized by shifts in employment from one firm to another, as well as by changes in work which did not involve a termination of employment. The latter was the case where a plant was able to continue producing the same goods, but could transfer their sale from military consumers to civilian users.

Employment in War Industry

War employment reached its peak in October, 1943. At that date more than 800,000 workers were employed in the manufacture of war goods. There was some war employment in fields outside manufacturing, such as transportation and construction, but by far the largest portion was in manufacturing. It is for this latter group that statistics are most reliable.

Since October, 1943, employment in war manufacturing has been steadily declining, as plants shifted their markets and their production. As can be seen in Table IV, the pattern of this decline during 1945 followed the three stages outlined in the opening section of this article. The first stage, from the beginning of the year to V-E day, was a period of moderate decline in war manufacturing, with only a very slight expansion in civilian industry as labour and materials were still very scarce. Stage two, extending from V-E day to V-J day, saw an increase in the rate of change from the production of war goods to those of peace, with some lay-offs actually occurring as munitions plants closed down. Approximately 179,000 persons were released from the production of war goods, 79,000 of these in 24 days following V-E day. The extent of the shift in these three months was greater than that which occurred in the 12-month period preceding V-E day. The demobilization of the Canadian "home front" was, therefore, greatly accelerated after V-E day.

The third stage, from the unexpected termination of the Japanese war on August 14, 1945, to the end of the year, saw the virtual over-night disappearance of war employment. The first few months of this period brought mass lay-offs as many munitions plants closed permanently, and as other plants shut down temporarily pending re-tooling and re-organization of equipment. By the end of 1945, only about 60,000 workers were still engaged in the production of war goods.

The effect on the labour market of these lay-offs from war work depended on a number of factors. Many of the workers were immediately absorbed by civilian production.

Dec. 1.....	79,000
Jan. 1, 1946 (forecast).....	60,000

In the plants where this occurred, such as those producing food, clothing and rubber, reconversion was almost instantaneous and the labour market situation was not affected. Evidence indicates that the percentage of all those laid off from war work who were immediately absorbed into civilian work progressively declined as lay-offs increased. It is well to realize, however, that during July, August and September of 1945 the percentage absorption of women workers actually increased. It appears that the early lay-offs of female war workers were concentrated in the "non-reconvertible" industries, and those subsequently laid off were more in the industries where women normally make up a large proportion of total employment.

In addition to the above, there were many war workers who had been released from industries where reconversion, of varying extent, was necessary, or where it was not possible at all. Many of these, however, retired from the labour force by returning to their homes, starting businesses of their own, returning to the farm, or retiring.

The Changing Industrial Distribution of Employment

Shifts in the industrial distribution of non-agricultural wage and salary workers during 1945 were extensive. Table V shows the estimated industrial distribution of non-agricultural wage and salary workers for every month of 1945, and for January, 1946. The total number of wage and salary workers declined slightly during 1945, but when compared with the extensive shifts in manpower that occurred as the armed forces and the "home front" were demobilized, this decline was almost negligible. Industrially, the movements were diverse.

Employment in forestry, fishing, and trapping increased markedly during 1945. This gain was largely due to expansion in forestry, the industry which employed the largest number of persons in this group. The war greatly increased the demand for pulp and paper, and its termination has done nothing to deflate this expanded market. Increased construction activity since V-E day has added to the need for lumber. Despite relatively high wages, however, woods work has not proved particularly attractive, for the work is hard and the localities are isolated. In addition, in most provinces, it is a seasonal industry. Thus, the increase in employment during 1945 had to be largely stimulated by an intensive campaign carried on in the early part of the year to induce war workers and ex-servicemen to accept jobs in the woods.

Employment in mining, quarrying, and oil wells has fallen continually since 1941, but during 1945 there was a slight reversal of this trend. Employment in this group should expand to at least its pre-war level of some 80,000 workers, since the foreign demand for base metals is high, labour restrictions on workers in gold mines have been relaxed, and an increased demand for sand, gravel and quarried stone has developed. Throughout 1945, however, some mines were handicapped by a shortage of experienced miners. The return of many ex-miners from the armed forces has met this need to some extent.

At October 1, 1943, the period of peak war production, approximately 1,263,000 persons were employed in manufacturing industries. At this time economic activity was at its height. Canada had developed a munitions industry which was meeting most of the needs of the armed forces and which was also sending immense supplies of war goods to the United Nations. Throughout 1944 and the first half of 1945, this level of activity declined only slightly. There was only a slight movement of workers out of manufacturing into other industries. During the latter part of 1945, however, the process of reconverting Canada's industrial capacity to the needs of a peace-time economy began. As a result, employment in the iron and steel, chemical, and non-ferrous metal industries declined drastically. On the other hand, employment in the pulp and paper, textile, and clay, glass and stone industries expanded as more workers became available. There was little change in the employment levels of other manufacturing industries (i.e., food, rubber, non-metallic minerals, lumber). All in all, the number of wage and salary workers in manufacturing has declined by about 180,000 during 1945.

Although there were no drastic changes in the sex distribution of employment within manufacturing as a whole during 1945, changes did occur which, viewed in the light of the number of workers involved, were of a considerable degree. In 1939, only 23.5 per cent of all those employed in manufacturing were women. By 1944, women comprised 28.2 per cent of all workers. This increase in the proportion of women workers was largely attributable to their employment as substitute workers in many industries within manufacturing, and as war workers in the war segment of this major industrial group. With the end of the war, however, the proportion of female workers was almost immediately deflated. By October 1, 1945, it had dropped to 25.9 per cent. Mass lay-offs soon after the end of the

TABLE V.—ESTIMATED NON-AGRICULTURAL WAGE AND SALARY WORKERS IN CANADA, 14 YEARS OF AGE AND OVER, JANUARY 1, 1945 TO JANUARY 1, 1946.
(in thousands)

NOTE.—The above estimates are based on the most recent information available from the Dominion Bureau of Statistics and other official sources. Very little statistical information is available for domestic service and personal service. In the case of service, therefore, the estimates are subject to a possibility of considerable error especially for dates further from the date of the Decennial Census (June 2, 1941).

war led to the re-hiring of many male war workers in the civilian manufacturing industries, in order to replace women. The result was that laid-off female workers and those displaced by the re-hiring of men were forced into the trade and service industries. There is no doubt, however, that many of them withdrew from the labour force. This is especially true of married women. It is likely that the sex distribution of employment in manufacturing will quickly return to that which existed before the war. If the post-war labour force has a higher proportion of women than before the war, it will likely be because there are more employed in trade and service.

Many people see the construction industry functioning as an unemployment shock absorber in the immediate post-war period. Backlogs of construction, even apart from housing, represent staggering totals of possible expenditure. The whole construction industry, therefore, will likely be one of the busiest fields of activity during the next few years.

During 1945 employment in construction expanded. Most of this expansion was in building construction, as the urgent need was for houses. This expansion would probably have been greater had there not been a shortage of materials such as plumbing, heating and electrical supplies, seasoned lumber, roofing, and shingles. At the same time, the need for skilled tradesmen was not fully met. Finally, there was some difficulty in channelling war workers and ex-servicemen into these trades, since building craftsmen's incomes are not high, although such workers do receive fairly high hourly wages. The reason for this is that they are unable to work at all for a good part of almost every year because of time lost between jobs, adverse weather conditions, and other reasons. Seasonal fluctuations in the construction industry are great.

Employment in transportation and communication, which had increased steadily since 1939, continued to expand during 1945. In the first half of the year the continued high demands on these portions of the economy arising out of the war maintained activity at its height. Employment expanded steadily as more workers became available. In the latter half of 1945, the need for transporting war commodities was replaced by the necessity of moving servicemen across the country as demobilization gathered pace. Both transportation lines and communication facilities were taxed to the limit during 1945.

Trade and finance lost a large proportion of male workers to the armed forces and to war

industry during the war, and to a very large extent this loss was offset by the employment of women workers and of marginal labour. During 1945, however, this development was reversed. As war industry was dissolved and as large numbers of ex-servicemen began to return to the labour market, there was to some extent a replacement of women workers by men. Amongst women workers themselves in these fields, some turnover developed as many were displaced by female war workers. By the end of 1945, however, the trend towards the pre-war sex distribution of employment had not assumed significant proportions.

The services are one major field wherein women comprise the majority of all workers. Although total employment has increased over the war years, the sex distribution of employment has changed little. There has, however, been a considerable turnover of workers in this field during the war as many were drawn into the higher-paying war industries and were subsequently replaced by a lower grade of labour. As in trade and finance a reversal of this trend occurred in 1945. The sharp resistance of released war workers and demobilized service personnel to downgrading, however, has hampered the effectiveness of this reversal considerably.

Unemployment

The trend of unemployment followed closely the three labour market periods outlined in the first part of this report. At the beginning of the year 60,000 persons were unemployed. The number out of work rose to 86,000 at February 1, a month of low seasonal activity. From that date to V-E day, the number of unemployed declined as trade, transportation, construction, and agriculture entered a period of higher seasonal activity. By the beginning of July, the effects of victory in Europe were becoming apparent on the labour market as the number of unplaced applicants increased by about 7,000 over the previous month. The trend, however, was sporadic, since by August 1 there was a decline of about equal proportions. During this period the initial expansion of civilian industry and slight withdrawals from the labour force tended to soften the effect of the decline in war industry employment and the increase in discharges from the armed forces.

Between V-J day and December 31, 1945, the number of unplaced applicants doubled—increasing by over 86,000 between September 1 and the end of the year. On the average, unemployment increased by 28,000 a month

during this period. The upsurge in civilian industry and the increase in the number of women withdrawing from the labour force, therefore, were not sufficient to offset the mass lay-offs from war industry and the accelerated rates of demobilization.

The pattern of unemployment for male workers is almost identical with the pattern for all workers. This is to be expected, since most of the additions to the labour force which occurred during 1945 were male workers. During January and February of 1945 the increase of 26,000 in unplaced applicants was evenly distributed between male and female workers. However, from February to June the trend of male unemployment was primarily responsible for the pattern of all unemployment. This characteristic of the trend of unemployment became even more distinct during the rest of 1945. Male unplaced applicants increased by 89,000 from August to December, while the increase in female unemployment was only 13,000 in this interval.

industries and of discharge from the armed forces were greatly accelerated and "manpower reconversion" became a greater problem. However, despite the major structural changes which consequently occurred within the Canadian labour force during 1945, unemployment had risen only to 184,000 by the end of the year. By that date the Canadian labour market had shown its ability to absorb the shocks involved in the transition from a war to a peace-time economy.

Canada has become an industrialized nation. This fact can be clearly discerned by comparing the number of wage and salary workers at December 1, 1939, with the number at the same date in 1945. Employment in all industries with the exception of mining and construction has expanded, and the total number of wage and salary workers at December 1, 1945, was almost 700,000 more than at December 1, 1939. Although the number of workers in manufacturing had declined substantially since October 1, 1943, when a maximum was reached, employment at December 1, 1945, was still 340,000 greater than at the

Conclusion

The event which altered the whole complexion of the manpower picture in 1945 was the unexpected collapse of Japan. As a result, the anticipated period of about nine months to one year, during which Canadian economy was to undergo "a smooth, orderly transition from the economic conditions of war to those of peace, and to maintain a high and stable level of employment and income", was shortened to one of only three months' duration. Accordingly, rates of layoff from war

same date in 1939. Much of this expansion in manufacturing has occurred at the expense of agriculture, in which employment fell by approximately 200,000 between October 1, 1939, and October 1, 1944. These developments mean that both manufactured as well as primary products now make up the export trade of the country. The continuing ability to sell this wider range of commodities in the world market constitutes one of the country's fundamental post-war problems if a high level of employment is to be maintained.

Employment, Hours and Earnings

Summary

R EPORTS received in the Department of Labour during the past month gave the following information concerning employment, hours and earnings in Canada.

Employment Situation February 1, 1946.

—There was a further recession in industrial activity throughout Canada at the beginning of February, repeating the mid-winter trend in seven of the last eight years. The 15,612 firms in the eight leading industries furnishing information to the Dominion Bureau of Statistics had a working force of 1,701,579 persons, as compared with 1,715,109 a month earlier. Based on the 1926 average as 100, the index number fell from 168.2 at January 1, 1946 to 166.9 at February 1, as compared with 178.9 at February 1, 1945.

Employment in manufacturing showed considerable recovery at the beginning of February, although the gain of 1.3 per cent over the preceding month was below the average at mid-winter in the years since 1920. The most noteworthy improvement was in the textile industry. Losses were shown in the animal food processing and chemical factories.

In the non-manufacturing industries the largest reductions were in construction and trade. The trend was also unfavourable in logging and transportation, while mining, communications and services showed heightened activity.

Payrolls at February 1, 1946.—The average weekly per capita earnings were \$31.94 as compared with \$29.92 at January 1 and \$32.15 at February 1, 1945; \$31.76 at February 1, 1944 and \$29.96 at February 1, 1943.

Unemployment as Reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit during February numbered 59,098, a decrease of 12,834 from the preceding month.

Report on Employment Conditions, March, 1946.—The labour situation improved during March as labour demand increased slightly and the number of applicants seeking work remained substantially unchanged. The available labour supply, as measured by

the number of unplaced applicants registered at employment offices, totalled 263,215 (214,867 male and 48,348 female) at March 21. Manpower requirements, exclusive of agriculture, rose from 75,890 at February 21 to total 78,186 at March 21. The rise in labour demand took place in the Ontario, Prairie, and Pacific Regions and more than offset the considerable reduction in vacancies in the Quebec logging camps. The increase in the number of female workers required was due largely to the additional service workers needed, while orders for male workers rose for both construction workers and unskilled labour.

Man-hours and Hourly Earnings.—Average hours worked by hourly-rated wage-earners during the week of February 1 were 44 and the average hourly earnings were 68.1 cents. The aggregate and the average hours worked were considerably higher than for the week of January 1. This resulted in substantial increases in the aggregate and average earnings of hourly-rated wage-earners.

Applications for Employment; Vacancies and Placements, February, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the four weeks February 1 to February 28, 1946, showed declines in the average number of placements made daily both when compared with the previous five-week period and with the four weeks February 2 to March 1, 1945. Under the first comparison trade, agriculture and fishing and hunting showed minor increases and all other industrial groups registered decreases. In comparison with the four weeks ending March 1, 1945, apart from a nominal increase in agriculture and fishing and hunting all industrial divisions recorded losses, the most pronounced being a substantial decrease in manufacturing and moderate declines in services, trade, forestry and logging, public utilities operation and construction. During the period under review there were 107,455 vacancies reported, 158,329 applications for employment and 50,505 placements effected in regular and casual employment.

Unemployment in Trade Unions at the close of the quarter ending December 31, 1945, and for the year 1945.—Unemployment in trade unions rose to 3.0 per cent

at the end of the December quarter; an increase of more than twice 1.4 per cent recorded for September 30, 1945. This is the highest average since April, 1942.

Employment and Payrolls at the Beginning of February, 1946

THERE was a further recession in industrial activity throughout Canada at the beginning of February, repeating the movement indicated at mid-winter in seven of the last eight years. Previously, employment had frequently, though not invariably, shown partial recovery at February 1 from the year-end lay-offs. The 15,612 firms in the eight leading industries furnishing information to the Dominion Bureau of Statistics at the date under review had a combined working force of 1,701,579 persons, as compared with 1,715,109 at January 1. This was a decline of 13,530 persons, or 0.8 per cent; the percentage loss coincided with that noted at February 1, 1945.

The index number of employment, based on the 1926 average as 100, fell from 168.2 at the first of January, 1946, to 166.9 at February 1, when it was 6.7 per cent below that of 178.9 at the same date a year ago. This contraction did not conform to the seasonal movement at the beginning of February in the experience of the period, 1929-37, used in calculating the factors of seasonal variation, so that the

seasonally-adjusted index was also reduced, falling from 174.8 at January 1, to 173.4 at the date under review.

The resumption of work on a more usual scale following the interruption occasioned by the year-end holidays resulted in a rise of 5.9 per cent in the amounts disbursed in weekly payrolls at the beginning of February. This increase was proportionately, very similar to that of six per cent which had been indicated at February 1, 1945, over the preceding month.

Employment in manufacturing showed considerable recovery at the date under review, although the gain of some 12,700 persons, or 1.3 per cent from the preceding report was below the average at mid-winter in the years since 1920. On the other hand, the latest advance was rather larger than that at February 1 in either 1945 or 1944. Part of the increase indicated at the date under review was due to the re-employment of automotive workers who had been on strike for over three months, but very general improvement was shown in the many other branches of manufacturing,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

that in the textile division being most noteworthy. There were important seasonal losses in animal-food processing, and chemical factories also showed lowered activity.

Taken as a unit, the non-manufacturing industries reported curtailment, which in many groups was seasonal in character. The largest reductions were those of 6,860 persons in construction, and 16,668 in trade, in each of which the percentage decline was slightly below-average. The trend was also unfavourable in logging and transportation, while heightened activity was indicated in mining, communications and services. The advances were not pronounced.

Payrolls

The weekly salaries and wages paid at February 1 by the co-operating establishments totalled \$54,349,721, a sum which exceeded by \$3,026,840, or 5.9 per cent, the disbursements reported at January 1 for the holiday week. The latest average earnings were \$31.94; as compared with \$29.92 at January 1, this was a rise of \$2.02, a sum which differed little from

the advance of \$2.05 indicated at February 1, 1945. The average then, however, was rather higher, standing at \$32.15. The per capita figures for February 1 in earlier years of the record were as follows: 1944, \$31.76; 1943, \$29.96, and 1942, \$27.65.

Including the statistics for financial institutions, the sums distributed in weekly payrolls at the beginning of February amounted to \$56,760,091, as compared with \$53,717,082 a month earlier. The reported employees in the nine leading industries numbered 1,771,936 at February 1, and 1,785,257 at January 1. The average earnings in the nine major industrial groups, including finance, were \$32.03 at the date under review, as compared with \$30.09 at January 1, 1946, and \$32.18 at February 1, 1945.

Table 11 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the larger cities, and gives comparisons as at January 1, 1946, and February 1, 1945. In Table 1 appears a monthly record

for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls monthly from 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating

firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table 1 indicates that in the period for which data are avail-

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at February 1, 1946, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at February 1, 1946 and January 1, 1946, with Comparative Figures for February 1, 1945, where Available, Based on June 1, 1941 as 100 p.c.

(The latest figures are subject to revision).

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

able, there has been a general increase of 9.3 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly salaries and wages of these persons have risen by 35.1 per cent. Including finance, the gain in employment from June 1, 1941, to February 1, 1946, amounted to 9.6 per cent, and that in payrolls, to 35.3 per cent.

The explanation previously given for the generally greater rise in the payrolls than in the number of employees may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; the importance of the latter factor has of course greatly diminished since the end of the war, (2) the payment of cost-of-living allowances to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their absorption into the basic wage-rates as from February 15, 1944, (3) the progressive up-grading of employees as they gained experience in their work, and (4) the payment of higher wage-rates in a large number of cases.

Until the last few months, the expansion in employment and payrolls in manufacturing

in the period of observation has been relatively greater than that in the non-manufacturing industries, but since the late autumn of last year, the situation has been reversed, the indexes in the latter group of industries being slightly higher than those in manufacturing. Thus at February 1, the index of factory employment showed an increase of 8.5 per cent from June 1, 1941, since when the weekly salaries and wages have risen by 34.9 per cent, whereas in the non-manufacturing classes, the advance in this comparison amounted to 10.2 per cent in the case of employment, and to 35.5 per cent in the case of the payrolls.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used. The degree of skill generally required of workers in the industry is obviously also an extremely important factor.

TABLE III—INDEX NUMBERS OF EMPLOYMENT BY PROVINCES AND ECONOMIC AREAS

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

The Sex Distribution of Persons in Recorded Employment at the Beginning of February, 1946

DURING the present period of conversion to peace-time conditions, it has been found necessary to obtain monthly data showing the sex distribution of the workers in recorded employment in 1944 and 1945, such enquiries were made semi-annually, at April 1 and October 1, while earlier surveys of sex distribution were undertaken at October 1 in 1943 and 1942. Thus the latest statistics result from the seventh enquiry of the kind. None of the information previously obtained, however, affords an entirely satisfactory basis of comparison with the present data, owing to the seasonal changes which normally take place between the autumn, the early spring, and mid-winter. Industrial activity ordinarily is at its annual high level about October 1, while for obvious reasons, employment generally is usually at the minimum during the winter and spring. The completion or cancellation of war contracts since the termination of hostilities has brought about marked changes in the numbers and the proportions of male and female workers. In some cases, the available information is insufficient to permit the assessment of the relative importance of variations due to this factor, and those resulting from seasonal causes. The third significant factor in the situation is of course the industrial activity which results from the backlog of demand for consumers' goods and services, as the easing of the labour market permits higher levels of employment in industries which during the war had low priority in securing workers.

At the beginning of February, the 15,612 employers furnishing data in the eight main industries divisions (viz., manufacturing, logging, mining, communications, transportation, construction and maintenance, services and trade) reported 1,312,334 men and 389,245 women employees, the latter constituting 229 per thousand of the indicated working force. When adjustment is made for changes among the co-operating firms since last October, it may be estimated that there has been an increase of nearly 8,500, or 0.7 per cent, in the number of males, and a decline of over 27,000, or 6.5 per cent in the number of females in recorded employment. The general change in the same comparison amounts to a loss of 1.1 per cent; the experience of the years 1929-37 shows that, normally, a general decrease of rather more than eight per cent is to be expected between October 1 and February 1. Thus the falling-off in employment from last autumn to the date under review was decidedly less than usual. This situation results partly from greatly increased activity in the non-manufacturing industries, and partly from

the fact that the seasonal recession in manufacturing in more recent months has been below-average.

In the nine leading industries, including finance, (for which data have been collected too recently to permit the calculation of factors of seasonal variation), the number of women workers was given as 426,409 in a total staff of 1,771,936. Their ratio was 241 per thousand, as compared with 253 at October 1 and 267 at April 1, 1945. The latest proportion was the lowest since that of 235 at April 1, 1942, when the first enquiry into sex distribution was undertaken in connection with the monthly surveys of employment and payrolls.

As compared with October 1, 1945, the number of men reported in manufacturing had declined by approximately 10,200, or 1.4 per cent, while the number of women on the staffs of the co-operating factories had fallen by about 21,400, or 8.3 per cent. The general contraction in manufacturing up to February 1, 1946, amounted to 3.2 per cent, a proportion which was smaller than that of between six and seven per cent, indicated as typical during this period in the experience of the years, 1929-37. Among the non-manufacturing classes, the general increase in employment since the preceding survey of sex distribution amounted to 1.8 per cent; the gain among men approximated 3.3 per cent, and the loss among women, 3.5 per cent. Under ordinary circumstances, the falling-off in the non-manufacturing industries from October 1 to February 1 is greater than that in the manufacturing classes.

The effect of the termination of the war upon employment is more clearly seen in a comparison of the statistics for February 1, 1946, with those obtained at April 1, 1945, the greatest lay-offs due to the completion or cancellation of war contracts having taken place prior to October 1 of last year. In the period since the beginning of April, 1945, the index of employment in the eight leading industries has fallen by 5.7 per cent, whereas conformity with the normal seasonal trend would have produced an increase of about two per cent. Among the men in recorded employment, the decrease since April 1 of last year amounts to some 27,800, or 2.1 per cent, and that among women to approximately 74,300, or 16 per cent. In connection with these figures and those given in the preceding paragraph, and particularly in studying them with the greatly increased amount of unemployment indicated in recent months, it should be noted that, to date, over 485,500 men and women

have been discharged from the Armed Forces since V-E Day, many of whom have been absorbed in industrial employment. Among the nine leading industries, there has been since April 1, 1945, a reduction of about 1.8 per cent, in recorded employment for men, and 14.6 per cent for women, the number laid-off approximating 24,900 in the case of the former, and 72,800 in the case of the latter sex.

The manufacturing establishments furnishing data reported the release of some 92,200 men and 68,300 women between April 1, 1945,

and February 1, 1946, the losses amounting to 11.3 per cent among the former and to 22.5 per cent in the case of the latter sex. Thus the curtailment in manufacturing since last April has been accompanied by a considerable increase in the employment of men in the non-manufacturing industries; although the number of women on the staffs of the larger employers in the latter group of industries has declined, the reduction as would be expected, was relatively substantially less than that in manufacturing.

THE SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE MAJOR INDUSTRIAL GROUPS, AS AT FEB. 1, 1946, OCT. 1 AND APRIL 1, 1945, AND OCT. 1, 1942

Report on Employment Conditions, March, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE labour situation eased slightly during March. Contrary to the downward trend in the number of unfilled vacancies¹ reported during February, there was a slight increase in labour demand during March. Unplaced applicants² on the other hand, remained substantially unchanged during March while in February, the labour supply increased by 16 per cent. In the Ontario Region, particularly, the situation improved with demand rising to 39 per cent of the available supply at March 21 as compared with 32 per cent four weeks earlier. At March 21, unfilled vacancies, exclusive of agriculture, totalled 78,186 across Canada, whereas four weeks earlier demand stood at 75,890. The increase in labour requirements was due largely to additional orders for both unskilled labour and construction workers which more than offset the decreased number of loggers required. Labour supply totalled 263,215 at March 21 (214,867 male and 48,348 female). The labour situation at this time presents a decidedly different picture from March 23, 1945, the comparative reporting date last year when labour demand totalling approximately 130,000 was considerably more than the available supply (80,000). Table I shows labour demand and supply by main occupational group and by sex, as at March 21, 1946. Table II presents a monthly comparison of total labour demand and supply. Unfilled vacancies classified by main industry group and by sex, as at March 21, 1946, with absolute and percentage changes in total demand during the last month are shown in Table III.

Clerical Workers

No alleviation in the labour market situation for clerical workers was evident during March. At March 21, there were approximately five times as many applicants seeking

work as there were vacancies on file (5,598). The Quebec and Ontario Regions accounted for 74 per cent of the demand at March 21, but only 60 per cent of the applicants seeking clerical work were in these two regions. Male clerical workers across Canada, particularly, were in excess with more than 10 applicants for every vacancy reported. The number of female stenographers and typists required was still in excess of the available supply; at March 21, there were 2,311 needed across Canada while unplaced applicants totalled 2,260. The shortage, however, is in the Quebec and Ontario Regions while a surplus supply of stenographers and typists persists in the other regions. Many of the applicants are not qualified to meet the present exacting demands of employers while others are reluctant to accept available positions because of the long hours, low salaries, and exacting duties.

Sales Workers

Although demand for sales workers rose slightly during the four weeks ended March 21, the number of applicants registered for sales work also showed an increase. At March 21, there were 4,230 sales workers required while the number of applicants seeking this type of work at the employment offices totalled 15,244. Some of the vacancies on file are for out-of-town work or sales work on a commission basis and applicants generally are not interested in such work. Orders for workers should continue to rise as employers prepare for the increased activity of the Easter season.

Service Workers

At March 21, there were 12,411 service workers required across Canada while unplaced applicants totalled 17,861. The surplus of service workers is due to the excess supply of male applicants which more than offset the continued shortage of female service workers. During March, the number of female service workers required increased by 21 per cent. Whereas in February there were more female waitresses and cooks seeking employment than there was work available, by March, there was a shortage of these types of service workers. The shortage of domestic servants persists across Canada with demand totalling 4,230 at March 21 and applicants seeking this work numbering only 929. Although the institution of the Home Aide courses has alleviated this situation somewhat, the shortage of domestic help is still acute.

¹ Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

² Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Skilled and Semi-skilled Workers

A further decline was apparent in the demand for skilled and semi-skilled workers during March, while the number of applicants seeking this type of work continued to rise. Demand during March fell by 10 per cent and at March 21 totalled 33,487; the drop in labour requirements was mainly in Quebec, while slight increases were evident in the labour requirements of the Ontario and Pacific Regions. The decreased number of loggers required during March accounted for the decline in the number of skilled workers required. Applicants classified as skilled and semi-skilled continue to increase, but as previously reported, many are not thoroughly trained while others are in the higher age brackets.

Textile Workers.—Although the labour situation in the textile mills has eased considerably since the cessation of hostilities, there were more than twice as many skilled and semi-skilled textile workers required at March 21 as there were applicants registered. Some of the orders on file are for night work and this, together with the comparatively low wage rates and unfavourable working conditions, curtails placement activity in the textile factories. At March 21, there were 8,204 experienced textile workers required (975 male and 7,229 female) while unplaced applicants numbered 3,845. Demand for sewing machine operators accounted for one half the skilled textile workers required; the available supply of this type of worker remains scarce, with only one applicant available for every four jobs on file.

Loggers.—The early spring thaw has resulted in a considerable decrease in demand for loggers. Workers have been transferred

between camps to complete cutting before the spring break-up and these transfers will undoubtedly increase as agricultural workers leave the logging camps. Some employers fear that with the release of prisoners of war there may be a shortage of help during the summer. Demand at March 21, totalling 9,922 was only 68 per cent of the number required four weeks earlier. This decrease was mainly in Quebec while labour requirements increased slightly in the Ontario and Pacific Regions.

Miners.—Demand at the end of March was confined largely to experienced underground miners, although the Prairie Region reports a need for both surface and heavy labour. The exacting physical requirements which employers are now requesting and the lack of housing accommodation is seriously handicapping the placement of workers in the mines. At March 21, there were 1,424 skilled and semi-skilled miners required across Canada while the supply of workers totalled only 854. Over 65 per cent of demand was for experienced coal miners and this need will become more acute as farmers temporarily employed in coal mines, return to the farms. Placement in the gold mining industry has been at a high level with many employers requesting returned servicemen only.

Construction Workers.—The unusually early spring and the appreciable increase in the output of building materials should result in a very active construction season. The number of skilled and semi-skilled construction workers required increased by approximately one-third during March, bringing demand to 3,326 at March 21. The supply of construction workers, totalling 17,022 at March 21, was still considerably more than demand, but this condition will probably be reversed as residen-

Total.....	43,824	34,362	78,186	214,867	48,348	263,215

tial, industrial and highway construction get underway. Many of the applicants now registered at the employment service lack adequate training while others are elderly and are, consequently, difficult to place. Bricklayers and plasterers remain in short supply, with no immediate alleviation of the shortage in sight.

Metal Workers.—The supply of metal workers continues to outnumber the demand. At March 21, there were approximately 10 applicants for every vacancy reported; labour needs at March 21 totalled 1,991 while the number of unplaced applicants at that date numbered 21,636. An excess supply of workers is particularly noticeable in applicants

classified as machinists, structural steel workers, welders, and flame cutters. Many of these applicants have received a limited training in a war plant and are not qualified in the general trade. Moulders, particularly soil pipe moulders, are urgently needed and local offices are endeavouring to meet demand by the transfer of workers. There is also demand for fully experienced auto bodymen and mechanics.

Unskilled Workers

A slight improvement in the labour situation for unskilled workers was evident during the month, with demand increasing by 21 per

cent while the number of applicants seeking this type of work fell slightly. The rise in demand was due mainly to the increased number of male workers required for both light and heavy labour in the Ontario, Prairie, and Pacific Regions. At March 21, there were 20,529 vacancies reported at National Employment Service offices with unplaced applicants at that date numbering 104,079. More than one-half of the unplaced applicants are classified as light labour, representing handicapped, elderly, and untrained workers who were absorbed into industry during the war years, but are becoming increasingly difficult to place as a better type of applicant becomes available.

Regional Analysis

The Regional analysis which follows is based on the semi-monthly reports received from Local Employment Offices across Canada. The report covers employment conditions during the month ended March 22, 1946.

Maritime Region

Woods Operations—The recent mild weather has brought lumbering operations in the Maritimes almost to a close. Night transportation is being used in some areas in an effort to get the remnants of this year's record cut into the clear. However, such conditions of work make it difficult to secure adequate labour. A few pulpwood contractors in the Campbellton area are continuing work where snow conditions permit. Driving operations will commence in about a month, and when this occurs no shortage of labour is expected.

Coal Mining—No men other than first-class miners or veterans with reinstatement privileges are being hired in Maritimes coal fields. Coal output is gradually increasing as vacancies for skilled miners become filled. In the Cape Breton area, reinstatement of servicemen has reduced the number of vacancies to 260. The Greenwood Coal Company is again in operation and to date about 65 men have been taken on the payroll. Only 68 skilled miners are now required in the Minto area because of the return of ex-miners who had been working in the woods for the winter.

Manufacturing—Industrial activity throughout the Maritimes is curtailed by the shortage of materials, although lack of orders is handicapping some firms. In Amherst, the Maritime Pants Manufacturing Co. has closed due to the shortage of materials. The Trenton Steel Works of New Glasgow are laying off men pending further orders. An industrial dispute at the Eastern Car Company has involved 600 men in a work stoppage.

The Industrial Shipping Company at Mahone Bay has been awarded a contract to build 200 prefabricated houses, and will need about 200 men. Most of this labour is available in the district, carpenters and labourers being the chief requirement.

Shipbuilding and ship repair work are providing employment for many men in the region. The volume of repairs under way in the Halifax shipyards is reported as being the heaviest in years; sufficient work is on hand to keep the present staff of about 2,100 men busy for several months. However, little or no new demand for labour in the shipbuilding industry of Nova Scotia has been indicated for the past two weeks. At the Saint John Drydock Company, 185 workers were hired from 400 applicants for some temporary work.

Preparations for the spring fishing season are in full swing, and labour demands of the fish processing plants are expected to exceed the supply. The dehydration plant at Woodstock will close within the next two weeks, laying off 125 women.

Construction—Residential construction is making slow progress owing to the shortage of materials. In Halifax 160 new units are under construction but much of the work is being held up because of supply shortages, chiefly of flooring materials. The proposed erection of 250 Wartime Housing units has been cut to 150 in this city. Bricklayers are still scarce, although sufficient carpenters are now obtainable. Satisfactory progress is being made on the Veterans' Housing program at Saint John, where four houses are being finished and occupied each day. In the Sydney area, where unemployment is serious, one large firm could employ over 750 skilled and unskilled workers immediately if building materials were obtainable.

Ex-Servicemen—There has been a small increase in the employment of veterans, although the numbers of unemployed ex-service personnel are also increasing. Every effort is being made to extend the training facilities of the Department of Veterans Affairs and of Canadian Vocational training, but lack of buildings, equipment and instructors is seriously hampering the enrolment of additional trainees.

Quebec Region

Woods Operations—Large scale cutting is over in most areas, although in some parts work is being accelerated before all of the snow finally disappears. Labour requirements are now well in hand, as the transfer of workers from completed operations to less advanced work is now possible. Woodsmen leaving the bush in the Dolbeau area have opened about 250 replacement vacancies. Spring operations at La Tuque will be on a limited scale and men are rapidly leaving the bush. About 300 cutters are still required in the Matane region.

Drives are expected to start in early April because of the unusually early spring thaw, and ample help is available for most operators.

There has been an excellent cut of both saw-logs and pulpwood throughout the region during the past winter and indications are that output may have reached an "all-time" high.

Mining—Shortage of experienced miners and lack of housing facilities continue to handicap some Quebec operations. Hardrock mines in Rouyn and Val d'Or districts are still clamouring for experienced underground miners, but the demand for surface workers remains almost nil. Asbestos Corporation Ltd., Vimy Ridge, is rehiring men laid off a few weeks ago. The general mining outlook is good; development work at Lac Doré and Ungava will create appreciable employment opportunities in a few months.

Manufacturing—The employment picture in the general industrial field has not improved appreciably. The effects of the United States steel strike continued to be felt in the numerous Canadian industries depending on imported steel.

New industries planned, or already under way, promise a substantial reduction of unemployment in the near future. The Canadian Car and Foundry Co. is undertaking production of the Noresman plane at Cartierville and also the manufacturing rights for the Barnelli C.B.Y. 3 and aircraft assembly division. Eventually about 500 men will be employed. There are persistent rumours that the motor car industry may be established in the Sorel region, involving the Citroen and Kaiser-Fraser Companies, and the former Sorel In-

dustries gun plant. If this project materializes, large industrial development would occur in the area.

Canadian Power Boat Company in Montreal has begun an extensive program in the construction of utility craft which will create employment for an additional 300 men. In the furniture and upholstery field, Simmons Ltd. and St. Louis Bedding Co. of Montreal are increasing production facilities and enlarging payrolls. The footwear industry is still suffering severely from a shortage of skilled help, but this would appear to have no restraining effect on plant extensions and the opening of new factories. All tanneries are now working at full capacity but they are unable to keep up with present demands of the shoe manufacturers.

The Aluminum Company of Canada will reopen two more pot-rooms at Arvida in April, when 300 additional men will be required.

Renewed activity is expected in Quebec shipyards as the Federal Government will spend over \$2,000,000 in Montreal to rebuild Canada's depleted inland freighter fleets. Most of the important shipyards in the province will receive a share of the contracts.

Textile workers are badly needed at the Drummondville Cottons and Dominion Textiles plants of Magog, Montreal and Sherbrooke. The conversion to three eight-hour shifts resulted in this urgent need for extra workers.

Construction—Prospects in the construction industry are somewhat brighter owing to the unusually early spring and the expanded supply of building materials. The return of building controls will stimulate low-cost housing projects by channeling the required materials to them. The new priorities rating is designed to divert building materials away from non-essential construction. However, the flow of supplies is still inadequate to provide for all the residential, commercial and industrial building projects planned.

Spring maintenance of ways for the C.P.R. and C.N.R. will employ 700 men before June. Several thousand men will be required immediately for highway maintenance.

Ex-servicemen—Employment opportunities for veterans are still very limited. Most of those unplaced are either unskilled or partially skilled, and of an age where further training is difficult. However, an intensive campaign supported by the Employers' Council is gradually expanding "on-the-job" training opportunities.

Ex-servicemen qualified under the Veterans' Land Act will henceforth be eligible for instruction in a short agricultural course at

St. Hyacinthe. Special training is now being given to about 50 ex-servicemen, with satisfactory results.

Ontario Region

Woods Operations—Most companies have ceased operations because of the early spring break-up. Labour demand is limited to pulpwood cutters, who are required chiefly at Kapuskasing, Timmins and Sault Ste. Marie. Vacancies are available for a total of 2,000 men.

Pulpwood production increased by 900,000 cords in the 1945-46 season, and will supply sufficient raw materials for all paper mills operating in Ontario. As the sawlog industry also reported improved cuts, the Woods Labour Campaign, whereby fare was advanced and paid by U.I.C., may be considered successful.

In anticipation of spring driving, orders have been received for 340 river drivers in the Brent and Sault Ste. Marie areas. A few sawmills, hauling their logs directly from the woods to the mill yards, have commenced sawing.

Hard Rock Mining—Development work in the gold fields is expanding rapidly, with a consequent shortage of diamond drillers. About 5,000 men, of whom the majority are ex-servicemen, have been absorbed by the gold mining industry. Increased production at the Macassa, Lakeshore and Auror mines is due to the greater availability of labour over the past five months.

The International Nickel Company of Sudbury has commenced construction work at its Copper Cliff smelter. Two hundred smelter workers were recently recalled, and production is now continuing at the normal peace-time level.

Manufacturing—A great deal of employment activity is occurring in secondary metal industries and in the manufacture of machinery and equipment. At Windsor the majority of industrial concerns have recovered from the American steel strike and are now working at full capacity. The ending of the General Motors' strike in the U.S.A. will mean resumption of work for 500 employees in the Windsor plant and for a few thousand employees in Oshawa plants.

It is expected that a considerable number of heavy labourers will leave the iron and steel industries for outdoor work in the spring, leaving vacancies for others suited to this type of work. Clearance orders from manufacturing firms throughout the region have been placed by Ontario machine shops, including agricultural implement factories, which are calling for moulders, forge operators, and wood and metal pattern-makers.

Many men have been transferred to the Massey-Harris plant in Brantford, but there is a continued demand for foundry workers from Brantford, Hamilton, Galt and Guelph.

There are many indications that the need for production workers is on the increase. At St. Catharines, openings for semi-skilled help and lighter types of labour have increased considerably. At Belleville, the Corbin Lock Company is negotiating with contractors for the erection of a \$650,000 addition to their plant. The Canada Cement Company is also making an addition to their plant, which will eventually employ 200 men. At Hamilton there is a rise in the demand for heavy factory labour. The demand for textile workers has dropped considerably in the last few weeks. Female machine operators are urgently needed in the needle trades at Kitchener. At Guelph there is an acute shortage of female workers. In the furniture industry demand is heavy for skilled wood workers. Several wood-working companies are locating in New Toronto and expect to be in operation by the end of April. Qualified workers are scarce. Ex-servicemen are now receiving "on-the-job" training as woodworkers and upholsterers through Canadian Vocational Training.

Material shortages have occasioned numerous lay-offs throughout the region. Swift Canadian Company at Toronto released 50 labourers, and Phillips Electrical Works at Brockville has laid off 35 men. At Stratford 125 men in the Canadian National Railway shops will be replaced by ex-servicemen. Reduced production at the Chrysler Corporation in Windsor will result in the indefinite release of 78 workers.

Construction.—As spring approaches there is a marked increase in demand for all types of building tradesmen, especially bricklayers, plasterers, carpenters, plumbers, electricians and labourers. Building programs to be started this season include private homes and Wartime Housing units, as well as hospital and commercial construction.

In Toronto, bricklayers are urgently needed and there are also many openings for other skilled tradesmen. Orders for heavy labour in Hamilton are numerous. Kingston is also very short of bricklayers and electricians.

Construction activity in the Pembroke area is at a low ebb. One hundred and fourteen workmen were recently released by the Fraser Brace Company.

Ex-servicemen.—There are increasing indications of an improvement in employment conditions for veterans, although the general situation is still poor. An easier flow of supplies, the opening of Great Lakes navigation, and the commencement of construction work

will swell the number of placements. During the period May 1, 1945, to March 1, 1946, a total of 34,918 ex-servicemen were placed by the Toronto local office—an average of well over 100 per day for the entire period.

Prairie Region

Woods Operations.—The advent of early spring weather has almost stopped bush work at Fort William and Port Arthur. By the end of this period nearly all camps in the Thunder Bay District will be closed for a period of approximately three weeks, at which time the operators expect to start their spring drives and workers now leaving the woods will be re-employed. Some operators will be unable to complete their hauling programs for this year. Operations are continuing at Kenora and Fort Frances on a diminished scale and large numbers of woodsmen are returning from the bush.

Hard Rock Mining.—Greater activity is evident in the industry as spring approaches. Nearly all companies are seeking experienced miners and machine runners, but inexperienced men are not needed at present. Lack of housing accommodation in the Beardmore district hinders placements through clearance. Diamond-drilling crews and prospecting syndicates are very busy in this area.

At Flin Flon the need for men is mounting daily and entire crews are being moved in as obtained.

Manufacturing.—Industrial activity is still quite slow in this region. Meat packing plants, now at their season "low" in output, are still reducing staff. A further lay-off of 50 employees at Canada Packers in Winnipeg has occurred. At Calgary there has been a slight decline in cattle and hog receipts but no immediate lay-off is anticipated. Current separations chiefly involve farmers and farm labourers who are returning to agriculture. Cattle and hog receipts are down approximately 40 per cent as compared with the same period last year.

The Port Arthur Shipbuilding Co. has received contracts for two ships but men will not be needed for some time. Steel shortages will delay the rehiring of men who were laid off upon the completion of contracts. The brick yard at Estevan will employ another seventy men if the weather continues warm and dry. In the last two weeks, about sixty men have been engaged by the Canadian Car and Foundry Company at Fort William. More workers will be hired as material deliveries improve following strike settlements. Otherwise much of the slight increase in labour demand in this region is caused by farmers leaving industry for spring planting.

Construction.—Considerable construction work is planned for all points throughout this region as soon as weather permits. At Calgary, contractors are beginning operations already and a drastic shortage of carpenters and bricklayers is anticipated within the next month. There has been a slight improvement in this industry in the Edmonton area. Bricklayers will be required here for the erection of the Nurses' Home, Union Hospital, at the beginning of April. Also in Medicine Hat, Regina and Saskatoon increased activity is noted. Temporarily over 600 extra gang and section men have been laid off by the C.N.R. at various centres, but will be re-employed when the frost goes.

Ex-servicemen.—Throughout the Prairies a variety of projects are expected to absorb veterans as soon as spring comes. Mining development and construction programs will soon be under way. Calgary reports a definite up-trend in veteran placements and for the first time in six months the number of placements during a two-week period has balanced the number of new registrations. The Canadian army will take over the Alaska Highway on April 1, and will probably require mechanics and truck drivers.

Pacific Region

Woods Operations.—Labour requirements for the logging industry have greatly increased in the past two weeks. The shortage of skilled loggers, which has been developing gradually in the last six years, is now assuming serious proportions. Operators will have to train key personnel if production is to be expanded.

Logging operations have commenced in the Chilliwack area following improved weather conditions. Local labour cannot meet the demand and clearance orders will be required. Logging is in full swing in the Prince George area and skilled woodsmen are needed. Poor road conditions will shortly slow up operations in this area, however, and are at present hampering the industry in the Okanagan and Kootenay regions.

Sawmills.—The seasonal curtailment of logging operations has caused mills in all parts of the province to run below capacity, but the current increase in logging operations will stimulate sawmill employment. Portable sawmills are operating and vacancies are listed for forty workers.

Orders for heavy labour are still brisk in the New Westminster area but there is no difficulty in filling these requirements locally. Orders for skilled millhands are scattered, and are easily met by the movement of men from temporarily closed plants. Vancouver shingle mills have been able to secure rafts of cedar

logs and maintain normal activity. Several mills will operate additional shifts when a supply of logs is assured. Victoria sawmills are gradually returning to full production with little labour turnover. Except for the occasional skilled tradesman, orders are easily filled.

Coal Mining.—The acute shortage of certificated miners is seriously retarding development in all coal mining sections. Greatest shortages are in the Courtenay, Fernie and Nanaimo areas. Prospects of satisfying this demand are remote.

The Crow's Nest Pass Coal Company can use about forty unskilled men for underground work. Development work by the Tulameen Collieries at Princeton is suspended pending sinking of an air shaft. Labour requirements have been set in the Telkwa field.

Hard Rock Mining.—Activity is increasing in all fields. Mines in the Yukon Territory are starting spring operations and increased mining employment will in turn stimulate the services in the area. The availability of suitable mining machinery will govern the expansion of silver and silver lead mines in the Yukon region.

Existing demand is for experienced miners. Crews are now being assembled for placer operations in the Atlin district. Mines in the Cariboo district are very active and numerous orders are registered for experienced miners and muckers in the quartz mines.

In the base metals industry, labour demands remain unfilled for the Britannia Mining and Smelting Company and the Granby Consolidated Mining, Smelting and Power Co. Ltd. The possibility of a general strike is at present hanging over this industry, discouraging applicants from seeking this type of work.

Manufacturing.—Box-making and plant preparations for the coming season form the chief activity at this time, and ex-servicemen are meeting the region's general industrial needs. The few requirements of the metal industry are easily filled, but soil pipe moulders are still required.

Production in Vancouver's steel shipyards has not increased and orders for labour are easily filled. Shortage of shipwrights in the wooden shipbuilding industry is retarding construction in some yards. Victoria Machinery Depot staff reductions will continue until 450 workers have been released. Lay-offs are continuing in Prince Rupert shipyards.

The further lay-off threatened at the Heaps Engineering Works in New Westminster following the cancellation of Russian orders, was averted by the receipt of a large order from a California firm.

Construction.—Mild weather has led to an increased demand for unskilled labour. Skilled carpenters are still urgently required but the need for bricklayers and stone masons has eased considerably. Shortage of experienced tradesmen is due to the fact that most of them have now established their own small concerns, chiefly in the housing field. The shortage of carpenters is particularly acute in New Westminster and Nanaimo.

Throughout the region, construction in general is held up by lack of materials.

Ex-servicemen.—The number of unplaced applicants continues to increase steadily, but most offices anticipate a definite upswing in job opportunities with the coming of spring weather. There has been little difficulty in placing Service women. The few receiving out-of-work allowances are in general awaiting the commencement of training courses.

Applications for Employment; Vacancies and Placements; February, 1946

REPORTS received from the National Employment Service Offices of the Unemployment Insurance Commission during the four-week period February 1 to February 28, 1946, showed a decrease of 6.6 per cent in business transacted when compared with the preceding five weeks, December 28, 1945, to January 31, 1946, and a loss of 59.7 per cent in comparison with the four weeks February 2 to March 1, 1945, this computation being based on the average number of placements recorded daily. Under the first comparison, minor increases were noted in trade, agriculture, fishing and hunting but all other industrial divisions recorded declines. When

compared with the four weeks ending March 1, 1945, except for a nominal increase in agriculture and fishing all industrial groups showed losses, the most pronounced being a substantial decrease in manufacturing, and moderate reductions in services, forestry and logging, trade, public utilities operation and construction.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment Service Offices throughout Canada. It will be seen from the graph that the curve of vacancies

in relation to applications took a downward trend while that of placements remained about the same. The ratio of vacancies to each 100 applications was 67.8 during the four weeks ending February 28, in contrast with 69.3 during the previous five weeks, and 102.0 in the four weeks February 2 to March 1, 1945. The ratio of placements to each 100 applications during the period under review was 31.9 compared with 31.3 in the preceding period and 68.4 during the four weeks ending March 1, a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the four weeks ending February 28, was 4,477 compared with 4,979 in the previous five weeks and 7,415 during the corresponding four weeks last year. The average number of applications for employment received daily by the offices during the period February 1 to February 28, was 6,597 in comparison with 7,184 in the preceding period and 7,265 in the four weeks February 2 to March 1, 1945. The average number of placements made daily by the offices during the four weeks under review was 2,104 of which 1,910 were in regular em-

ployment and 194 in work of one week's duration or less, as compared with a total daily average of 2,254 during the previous five weeks. Placements in the four weeks ending March 1, 1945 averaged 4,974 daily consisting of 4,850 placements in regular and 124 in casual employment.

During the period February 2 to February 28, 1946, the offices of the Commission referred 79,545 persons to employment and effected a total of 50,505 placements; of these the placements in regular employment were 45,848 of which 33,595 were of males and 12,253 of females, while placements in casual work totalled 4,657. The number of vacancies reported by employers was 70,674 for males and 36,781 for females, a total of 107,455 while applications for work numbered 158,329 of which 117,085 were from males and 41,244 from females. Reports for the five weeks December 28, to January 31, 1946 showed 144,401 positions available, 208,346 applications made and 65,374 placements effected, while from February 2 to March 1, 1945 there were recorded 177,950 vacancies, 174,369 applications made and 119,386 placements in regular and casual employment.

The following table gives the placements effected by employment offices each year, from January 1936 to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,020	384,882
1940.....	320,090	155,016	475,106
1941.....	316,163	191,595	507,763
1942.....	309,983	85,633	395,621
1943.....	1,890,408	53,613	1,944,026
1944.....	1,663,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (9 weeks).....	105,497	10,382	115,879

Nova Scotia and Prince Edward Island

Orders listed at National Employment Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending February 28, 1946, called for a daily average of 160 workers, compared with 171 in the previous period and 255 during the four weeks ending March 1, 1945. Placements showed a daily average of 90 in contrast with 96 in the preceding five weeks and 198 during the period February 2 to March 1 last year. The reduction in placements from the four weeks ending March 1 a year ago was mainly due to a fairly large decrease in manufacturing supplemented by losses smaller in volume in public utilities operation, trade, services and construction. Placements by industrial groups included: manufacturing 620; services 578; trade 353; public utilities operation 176; forestry and logging 173, and construction 163. Regular placements numbered 1,316 of men and 672 of women.

New Brunswick

Positions offered through Employment Offices in New Brunswick during the period under review, averaged 142 daily in contrast with 149 during the five weeks terminating January 31, 1946, and 215 in the period terminating March 1 a year ago. There was a daily average of 59 placements in comparison with 66 in the previous five weeks and 153 during the corresponding period of 1945. Placements were less numerous in all industrial groups than during the four weeks ending March 1 last year. The largest decrease was reported in public utilities operation followed by moderate declines in manufacturing, trade, services, forestry and logging, and construction. Changes in all other groups were negligible. Placements by industries numbered: manufacturing 371; services 343; public utilities operation 208; construction 166; trade 144, and forestry and logging 113.

There were 1,021 men and 279 women placed in regular employment.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the province of Quebec during the four weeks ending February 28, 1946; there being 1,072 compared with 1,335 in the preceding period and 2,376 during the four weeks ending March 1 last year. Placements, likewise, decreased under both comparisons, the daily average being 319 during the period under review, in contrast with 362 in the previous five weeks and 1,434 during the period ending March 1, 1945. The heavy reduction in placements from the period ending March 1 a year ago, was chiefly attributable to a marked decline in manufacturing augmented by substantial losses in forestry and logging, services, trade, construction and public utilities operation. Of the remaining groups a moderate decrease in finance and insurance was the most important. Industrial divisions in which most of the placements were effected were: manufacturing 3,071; services 1,318; forestry and logging 744; trade 700; construction 678; public utilities operation 635, and mining 405. Placements in regular employment totalled 5,673 of men and 1,800 of women.

Ontario

Opportunities for employment at Employment Offices in Ontario during the period terminating February 28, 1946, numbered 1,939 daily compared with 2,050 in the previous five weeks and 3,025 during the period February 2 to March 1 a year ago. The average number of placements effected daily was 965 during the four weeks under review, in contrast with 977 in the preceding period and 2,075 during the four weeks terminating March 1, 1945. A pronounced decline in manufacturing together with substantial losses in services, trade and public utilities operation, and decreases of much smaller proportions in forestry and logging, and construction accounted for the reduction in placements from the period terminating March 1 last year. In addition, moderate decreases were noted in finance and insurance, and mining. Industries in which employment was secured for more than 500 workers included: manufacturing 9,398; services 5,072; trade 2,525; construction 1,793; forestry and logging 1,687, and public utilities operation 1,575. Regular placements numbered 16,330 of men and 5,388 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Manitoba during the four weeks under review, was 214 compared with 247 in the period ending January 31, 1946, and 294 during the four weeks ending March 1 a

year ago. There was a daily average of 140 placements in comparison with 145 in the preceding period and 210 during the four weeks ending March 1 last year. Placements under manufacturing were considerably fewer than during the period February 2 to March 1, 1945, and moderate declines were reported

in trade, services and public utilities operation. Of the changes in all other groups, the gains exceeded the losses. Placements by industries included: services 1,043; manufacturing 786; trade 671; public utilities operation 296; construction 228, and forestry and logging 114. Placements in regular employment numbered 1,419 of men and 1,026 of women.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the period terminating February 28, 1946, called for an average of 136 workers daily in contrast with 130 in the previous five weeks and 159 during the period terminating March 1, 1945. Placements recorded a daily average of 85 during the four weeks under review, in comparison with 67 in the preceding period and 112 during the four weeks terminating March 1 last year. Moderate decreases in trade, services and manufacturing were the only changes of importance in placements from the corresponding period a year ago. Placements by industrial divisions included: services 826; trade 564; manufacturing 178; public utilities operation 163; construction 94, and agriculture 91. Regular placements totalled 881 of men and 737 of women.

Alberta

Employment opportunities as indicated by orders received at Employment Offices in Alberta during the four weeks ending February 28, 1946, showed a daily average of 218 workers, compared with 266 in the preceding period and 280 during the four weeks ending March 1 last year. The average number of placements registered daily was 138 during the period under review, in comparison with 162 in the five weeks ending

January 31, and 202 during the corresponding period a year ago. When comparing placements by industrial groups with the four weeks ending March 1, 1945, the most significant changes were moderate losses in manufacturing, services, trade, public utilities operation and mining, and a gain in forestry and logging. Industrial divisions in which the majority of placements were effected were: services 1,063; forestry and logging 560; trade 439; manufacturing 424; agriculture 204; construction 202; public utilities operation 198, and mining 161. There were 2,031 men and 785 women in regular employment.

British Columbia

During the period terminating February 28, 1946, the daily average of positions offered through Employment Offices in the province of British Columbia was 597, in contrast with 631 in the previous five weeks and 810 during the period terminating March 1, 1945. Placements were fewer under both comparisons, the daily average being 309, as compared with 378 in the preceding period and 591 during the four weeks February 2 to March 1 a year ago. There was a considerable variation of placements by industrial divisions when compared with the corresponding period last year, the most noticeable being substantial decreases in manufacturing, forestry and logging, and services. Losses somewhat smaller in volume were shown in trade and public utilities operation, also a moderate decline in finance and insurance, and a gain in mining. Placements by industries included: services 1,978; manufacturing 1,687; construction 964; forestry and logging 853; trade 814; public utilities operation 647, and mining 276. Placements in regular employment numbered 4,924 of men and 1,566 of women.

STRIKE activity in Canada showed an increase during March both as compared with the previous month and with March, 1945. Preliminary figures show 28 strikes in existence during March, 1946, involving 5,976 workers, with a time loss of 46,068 man-working days, as compared with 18 strikes in February, 1946, with 3,532 workers involved and a time loss of 12,406 days. In March, 1945, there were 23 strikes, involving 4,800 workers, with a time loss of 8,709 days.

Preliminary figures for the first three months of this year show 47 strikes, involving 10,449 workers, with a time loss of 79,067 days. For the same period last year there were 55 strikes, with 15,234 workers involved and a time loss of 47,302 days.

Of the 28 strikes recorded for March, two were settled in favour of the workers, 10 in

favour of the employers, one was a compromise settlement and nine were indefinite in result, work being resumed pending settlement. At the end of the month, six strikes were recorded as unterminated, namely: bakery workers at Halifax, N.S.; compositors at Winnipeg, Man.; metal factory workers at Niagara Falls, Ont.; electrical apparatus factory workers at Brockville, Ont., and Montreal, P.Q.; brewery workers at Montreal, P.Q.; and electricians at Windsor, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

Date	Number of Strikes and Lockouts		Number of Workers Involved		Time Loss

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man- working Days	Particulars(2)
	Establish- ments	Workers		
Strikes and Lockouts in Progress Prior to March, 1946				
MANUFACTURING— <i>Vegetable Foods—</i> Bakery workers, Halifax, N.S.	1	40	1,000	Commenced February 11; for a union agree- ment; untermintated.
<i>Textiles, Clothing, etc.—</i> Clothing factory workers, Montreal, P.Q.	1	26	75	Commenced February 13; against dismissal of two workers allegedly for union activity terminated March 4; return of workers; in favour of employer.
Hosiery mill workers, Sherbrooke, P.Q.	1	480 ³	1,440	Commenced February 18; for increased wages; terminated March 4; conciliation, provincial, and return of workers pending time study of operations; indefinite.
<i>Printing and Publishing—</i> Compositors, etc., Winnipeg, Man.	2	113	2,900	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; untermintated.
<i>Metal Products—</i> Metal factory workers, Niagara Falls, Ont.	1	33	850	Commenced February 25; for a union agree- ment providing for union shop, check-off, etc.; untermintated.
Electrical apparatus factory workers, Brockville, Ont., and Montreal, P.Q.	2	900	23,400	Commenced February 26; for a new agree- ment providing for union shop, increased wages, reduced hours, etc.; untermintated.
Farm implement factory workers, London, Ont.	1	35	750	Commenced February 27; for a new agree- ment providing for increased wages, re- duced hours, vacations with pay, etc.; terminated by March 30; replacement; in favour of employer.
Foundry workers, Smiths Falls, Ont.	1	108	216	Commenced February 28; against dismissal of a worker for cause; terminated March 2; negotiations; in favour of employer.
Electrical apparatus factory workers, Toronto, Ont.	1	104	1,400	Commenced February 28; for retroactive payment of incentive bonus under negotia- tions; terminated March 26; conciliation, provincial; in favour of employer.
Strikes and Lockouts Commencing During March, 1946				
MINING— Coal miners, Glance Bay, N.S.	1	680	680	Commenced March 7; protesting considera- tion payment allowed by temporary over- man for incidental datal work; terminated March 7; return of workers; in favour of employer.
Coal miners, Minto, N.B.	1	155	310	Commenced March 8; against penalizing run miners for sending up dirty coal; terminated March 9; return of workers; in favour of employer.
Coal miners, Glance Bay, N.S.	1	86	516	Commenced March 13; protesting considera- tion payment allowed by temporary over- man for incidental datal work; terminated March 19; return of workers pending settle- ment; indefinite.
Coal miners, Cambria, Alta.	1	100	200	Commenced March 18; for employment of extra pushers and drivers, and against transfer of a motorman to another job; terminated March 19; return of workers; in favour of employer.

Strikes and Lockouts Commencing During March, 1946—Continued				
MINING— <i>Con.</i> Coal miners, Florence, N.S.	1	640	3,200	Commenced March 25; <i>re</i> payment for loading bone as coal instead of stone; terminated March 29; return of workers pending settlement; indefinite.
Pitchblende miners, Port Radium, N.W.T.	1	225	225	Commenced March 30; against dismissal of two workers allegedly for union activity; terminated March 30; conciliation, federal, and return of workers pending investigation; indefinite.
MANUFACTURING— <i>Tobacco and Liquors</i> — Brewery workers, Montreal, P.Q.	4	700	1,650	Commenced March 28; against Finding and Direction of RWLB ⁵ cancelling wage increase previously approved; unternminated.
<i>Boots and Shoes (Leather)</i> — Shoe factory workers, Montreal, P.Q.	1	108	1,700	Commenced March 8; against dismissal of four workers for refusal to work overtime; terminated March 30; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
<i>Textiles, Clothing, etc.</i> — Knitting factory workers, Toronto, Ont.	1	70	60	Commenced March 26; refusal to work under temporary foreman; terminated March 26; return of workers; in favour of employer.
Dye factory workers, trainees, St. Catharines, Ont.	1	7	35	Commenced March 26; for increased wages; terminated by March 30; replacement; in favour of employer.
Silk hosiery factory workers, Drummondville, P.Q.	1	132 ⁴	330	Commenced March 27; alleged delay in negotiations for a union agreement providing for increased wages and other conditions; terminated March 29; conciliation, provincial, and return of workers pending further negotiations; indefinite.
<i>Miscellaneous Wood Products</i> — Shingle mill workers, South Westminster, B.C.	1	29	415	Commenced March 8; against dismissal of a worker for cause; terminated March 25; conciliation, provincial; in favour of employer.
<i>Metal Products</i> — Metal factory workers, Vancouver, B.C.	1	7	91	Commenced March 5; against dismissal of two workers allegedly for union activity; terminated March 19; negotiations; in favour of workers.
Freight car factory workers, Trenton, N.S.	1	600	2,400	Commenced March 20; <i>re</i> piecework rates and daily quota for axle turners; terminated March 25; conciliation, federal, and return of workers pending reference to an umpire; indefinite.
<i>Non-Metallic Minerals, Chemicals, etc.</i> — Clay products factory workers, Claybank, Sask.	1	33	363	Commenced March 2; for a new agreement providing for increased wages and reduced hours; terminated March 14; return of workers pending further negotiations; indefinite.
CONSTRUCTION— <i>Buildings and Structures</i> — Electricians, Windsor, Ont.	9	120	960	Commenced March 22; against inclusion of clause in agreement that wage increases would be subject to approval of RWLB; unternminated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries." The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available, but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in January, 1946, was 191, and 14 were still in progress from the previous month, making a total of 205 during the month. There were 39,700 workers involved, and a time loss of 119,000 working days was caused.

Of the 191 stoppages which began during January, 16 arose out of demands for advances in wages, 55 over other wage questions, eight on questions as to working hours, 25 on questions respecting the employment of particular classes or persons, 78 on other questions respecting working arrangements, and nine were on questions of trade union principle.

British India

Preliminary figures for October, 1945, show 93 work stoppages, involving 61,712 workers, with a time loss of 278,608 man-days. For November, 1945, the figures are 82 work stoppages, involving 107,594 workers with a time loss of 630,153 days.

United States

Preliminary figures for February, 1946, show 260 strikes and lockouts beginning in the month, in which 130,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 21,500,000 man-days. Corresponding figures for January, 1946, are 325 strikes and lockouts, involving 1,400,000 workers, with a time loss of 19,200,000 man-days.

Labour Law

Legal Decisions Affecting Labour

Rules Laid Down By Alberta Coal Mines Regulation Act Must Be Observed in Appointing Check-Weighers

FINDING that the provisions of the Alberta Coal Mines Regulation Act, 1945, respecting the selection of a check-weigher, had not been complied with by the miners employed by the Red Deer Valley Coal Company at Drumheller, District Court Judge Edmanson on February 22, 1946, quashed the appointment.

The Act provides for the appointment by miners, who are paid according to the weight of the coal mined, of a man to check the weighing of their output. The Act stipulates that after a notice has been posted in a conspicuous place for at least 48 hours, a meeting of the miners concerned must be held. The meeting must appoint a chairman and secretary and then decide by secret ballot whether to appoint a check-weigher, written nominations then being accepted if a majority votes for an appointment. The election by secret ballot must be held on the third day after the meeting and notice of the meeting and of the result of the election, if one is held, must be left at the mine-office.

Judge Edmanson found from the evidence, however, that at the meeting which led to the disputed appointment, the chairman and secretary had not been appointed by the meeting, that the decision to hold an election was made by an open vote and not by secret ballot, and that the meeting had been told erroneously that a successful candidate must receive at least 51 per cent of the votes cast.

In the balloting one miner received 50 per cent of the votes. Notice of his election was not left at the office, however, and after two informal meetings a number of miners decided to hold another election of which only 24 hours' notice was given to some miners and none to those on the day and night shifts of the day before. Jones, the 1945 check-weigher, received the most votes in this election. Notice of his appointment was filed at the mine-office.

Judge Edmanson, after pointing out the irregularities in the proceedings at the first meeting and the holding of a second election without proper notice, declared the appoint-

ment of Jones null and void, directed that another meeting be held and any subsequent vote conducted under the supervision of the district mine inspector.

Before making his decision, Judge Edmanson overruled several objections made by counsel for the respondent Jones, who alleged that the complaint was invalid since it had been signed not by the applicant himself but by his solicitor for him, and because the complaint had been made in fact on behalf of another who, not being a miner paid by weight, was not qualified to make it. It was held, however, that the complaint was valid since the applicant had authorized his solicitor to sign it for him and was himself qualified to lodge the complaint. *In re The Coal Mines Regulation Act; in re Check-Weigher of Red Deer Valley Coal Company Limited* (1946) 1 W.W.R. 432.

Quebec Court Awards Damages for Accident at Improperly Guarded Machine

The Superior Court at Montreal on January 30 awarded damages of \$1,749.52 to the husband of a laundry-worker who was injured on June 10, 1943, while operating a steam-mangle. Since the laundry employed less than six, it was excluded by regulation from the Quebec Workmen's Compensation Act. Under the Quebec Civil Code a married woman cannot institute an action without her husband or without his authorization.

The accident occurred when the woman was inserting an article between the rollers of the machine. Her left hand was crushed and four fingers had to be amputated.

Mr. Justice Duranleau rejected the employer's plea concerning the worker's negligence, holding instead that the employer had been negligent in not taking proper precautions. He found that the mangle was of an outmoded design, and that the guard, a fixed bar extending along the rollers, had not been adjusted for a woman's hand, but left so much space between the table and the guard that her hand could be caught between the rollers.

The Court, pointing out that modern machines have guards which are not fixed, are farther away from the rollers and closer

to the table, and automatically stop the rollers when the operator's hand gets under the guard as far as the knuckles, considered that, since an old machine was being used, it was the duty of the employer to be especially careful.

The Court, in awarding damages of \$1,749.52 instead of the \$5,000 claimed by the husband, held that in fixing the amount account had to be taken of the fact that the admittedly unsatisfactory condition of the machine had existed for a long time and that the operator had never complained about it, that the accident was the first of its kind at the laundry, and that the operator had not been as careful as she might have been. The damages included \$199.52 for hospital and doctors' bills, \$100 for the pain suffered, \$250 for temporary total disability and \$1,200 for permanent partial disability, from the total of which the \$254.08 voluntarily paid by the employer for medical expenses was to be deducted. *Cournoyer v. Eeckhout*, Montreal Superior Court, January 30, 1946.

Quebec Court Refuses Damages to Window Cleaner when Window-ledge Breaks

Declaring that, in kneeling on a ledge below the window which he was cleaning, the plaintiff had made improper use of the ledge, and that the accident he suffered was due to his "own temerity and imprudence", Mr. Justice Tyndale in Montreal Superior Court on January 31 dismissed with costs a janitor's action for damages of \$19,400.50. Before delivering judgment, the Court set aside, because of error, a release the plaintiff had made in settlement of any claim he might have to damages.

The accident occurred on May 26, 1942, when the workman fell, after the window-ledge broke, and fractured his pelvis. After hospitalization the workman was informed by medical opinion that he would not suffer any permanent disability. He accordingly made a settlement for \$500 with the owner of the property.

In March, 1943, however, the plaintiff returned to the hospital, and an examination showed that the pain and weakness from which he had been suffering were caused by a hitherto unsuspected fracture of a spinal vertebra. It was agreed that this resulted from the accident and that he would be, in some measure, permanently disabled. The workman thereupon sued for damages, alleging that the owner was at fault because of the unsafe condition of the "window sill", and asked that the release he had signed be set aside.

The Court set aside the release, but held, however, that the ledge was not part of the window sill, that in kneeling upon the ledge the plaintiff was making a use of it which was neither intended nor necessary, and that "a reasonable man should have known that it was dangerous to rest his weight upon it." *Stapleton v. Havemeyer*, Montreal Superior Court, January 31, 1946.

English Court Allows Appeal of Epileptic's Widow in Workmen's Compensation Case

The English Court of Appeal on February 28 allowed the appeal of the widow of a workman from a decision in a lower Court which held that she was not entitled to compensation under the Workmen's Compensation Act, 1925, because the accident to her husband did not arise out of his employment.

The workman, an epileptic, while working in a beet field, suffered a fit and fell face downwards in a water-filled rut, dying of asphyxia. The County Court Judge, from whose decision the widow appealed, considered he was bound by the Appeal Court's dismissal of a similar appeal in a 1933 case involving a workman, a known epileptic, who fractured his skull on a floor, a floor not in itself dangerous to normal people.

The Court of Appeal considered the question at issue was one of fundamental importance to the right understanding of the real basis of workmen's compensation formulated in . . . Section 1 (1) of the Act of 1925:—

If in any employment personal injury by accident arising out of and in the course of the employment is caused to a workman, his employer shall, subject as hereinafter mentioned, be liable to pay compensation in accordance with the provisions hereinafter contained. . .

The italicized words are used in the National Insurance (Industrial Injuries) Bill now before the British Parliament, and in all the Canadian Workmen's Compensation Acts.

The Court of Appeal agreed with counsel for the widow that the 1933 case had been wrongly decided and was inconsistent with general principles laid down by the House of Lords and with other Appeal Court decisions.

Lord Justice Scott, delivering the judgment, stated that

It was only if the accidental injury had no casual connexion with the employment at all that it could be said not to arise out of it, though it might occur in the course of it. It was for that reason that the employer could not escape liability by showing that some factor such as disease was a predisposing or even contributing cause of the injury; he must show that it was the sole cause. The statutory language contained no words which qualified the absolute generality.

What the Court had to interpret was the whole of that complex legislation expressed in the lines of Section 1 (1). Sick men and partially unfit and partly disabled men in employment were intended by Parliament to receive the benefits of that Act just as much as the hale and hearty and perfectly fit men. *Wilson v. Chatterton*, Times Law Report, March 1, 1946.

Australian High Court Declares Wartime Minimum Wage Regulations Valid

Regulations concerning minimum wages for women workers which were made by the Commonwealth Government of Australia under the authority of the National Security Act, 1939-43, have been declared valid by the High Court of Australia. The validity of the National Security (Female Minimum Rates) Regulations, as amended in 1945, was challenged by employers in various food and clothing industries to whom they chiefly applied. The employers argued that the Commonwealth had no power to fix minimum rates of wages, that its authority under the National Security Act covered only matters associated with "the public safety and the defence of the Commonwealth."

The Regulations stipulate that, in respect of the normal weekly hours in the industries to which they apply, experienced adult females must be paid a minimum of 75 per cent of the lowest adult male rate, and inexperienced women and girls an amount which bears the same proportion to 75 per cent of the lowest adult male rate as the amount which they previously received bears to the corresponding adult or fully experienced female rate. Women who were receiving a higher rate than prescribed by these Regulations continue to be paid at the higher rate.

Industries to which the Regulations apply include the manufacture of woollen, worsted and cotton textiles, and of knitting and hosiery; pickle and jam making; the processing or preserving of fruit, vegetables, meat, eggs, milk, butter, cheese and margarine; boot and

shoe manufacture; and the occupations of the domestic staffs of hospitals, asylums and similar institutions.

In his judgment, Chief Justice Latham stated that women receiving less than 75 per cent of the male rate in the food and clothing industries would naturally tend to leave these industries for those in which higher rates were paid. In his opinion, the reduction of such disparities in rates between industries would tend to reduce labour turnover and benefit generally the food and clothing industries, thus helping to promote the re-establishment of servicemen in civil life.

Provisions for the repatriation of soldiers and their re-establishment in civil life are directly associated with the defence of the Commonwealth.... They are a necessary step in a wise scheme of demobilization, and are of great importance as affecting the defence of the Commonwealth in relation to any possible future war.

The Chief Justice pointed out that a stage might be reached when the continuance of a particular war control could not reasonably be advocated as necessary for defence purposes. In such case, the Court's duty would be to declare the legislation invalid or no longer operative. In the present case, it had not been shown that the challenged regulations were not desirable or possibly necessary for their declared purposes, which purposes had a real connection with the prosecution of the war and with the defence of the Commonwealth.

Reference was made to the Canadian case, *Fort Francis Pulp and Paper Company v. Manitoba Free Press*, 1923 A.C. 696, in which the Judicial Committee of the Privy Council stated:

Very clear evidence that the crisis had wholly passed away would be required to justify the judiciary, even when the question raised was one of ultra vires which it had to decide, in overruling the decision of the Government that exceptional measures were still requisite.

Act to Decasualize Dock Labour in Britain

WARTIME voluntary schemes for the regulation of the employment of dock workers are to be placed on a permanent basis by an Act passed by the Parliament of the United Kingdom on February 14.

During the war, voluntary schemes operated by the Minister of War Transport put an end to casual employment at the docks on the Mersey and the Clyde where about 28,000 men were protected by them. At other ports somewhat similar schemes, covering some 46,000 men, were administered by the National Dock Labour Corporation, a joint

organization of employers and workers under the Essential Work (Dock Labour) Order, 1941 (L.G., 1942, p. 130). These latter arrangements will come to an end when the Emergency Powers (Defence) Acts expire and the Clyde-side and Merseyside schemes can be terminated on the initiative of any of the parties.

In moving second reading of the Dock Workers (Regulation of Employment) Bill, on November 12, Mr. George Isaacs, Minister of Labour, recalled the days when thousands of men lined up at the dock gates and it was a case of the survival of the fittest.

The Minister stated that the employers were anxious to see the wartime welfare schemes for dockers maintained. Neither side of the industry wished to see it relapse into the casual conditions which prevailed before the war.

The Act provides that a scheme, prepared jointly by the employers' and workers' organizations at any port, for ensuring greater regularity of employment for dock workers, and for securing an adequate number of workers may be submitted for approval to the Minister of Labour and National Service. No scheme may take effect until embodied in an Order made by the Minister who is required to give opportunity for discussion and amendment. Such Orders must be laid before Parliament as soon as possible and may be annulled by resolution of either House within forty days.

If no scheme is in effect at any port or for any class of dock workers before October

1, 1946, the Minister may prepare such a plan on the joint application of both sides of the industry or on his own initiative if it appears unlikely that arrangements will be made by the parties within a reasonable time.

To be approved, a scheme must provide for regulating the recruitment of dock workers and their allocation to employers, for guaranteeing payment to men to whom the scheme applies when work is not available, for ensuring that rates of pay and conditions of service, including holidays with pay, are in accordance with national or local agreements and for making satisfactory provision for training and welfare. It must provide, too, for an administrative body and for the cost of operating the scheme.

As regards expenses, it is expected that each scheme will provide for its own operation, but the Minister may, with the consent of the Treasury, make loans in periods of temporary difficulty.

Safety Regulations Concerning Unfenced Machinery in the United Kingdom

THE British Operations at Unfenced Machinery Regulations, 1938, were amended slightly on January 30, 1946. These Regulations, made under the Factories Act, 1937, apply to the examination, lubrication or adjustment of any unguarded part of machinery and, in the processes specified in the Regulations, to the lubrication, mounting or shipping of a belt in transmission machinery, which must be done while the part of machinery is in motion.

The Factories Act, 1937, reproduces and extends certain safety provisions of the earlier factory law relating to the guarding of machinery. Every flywheel directly connected to any prime mover and every moving part of any prime mover, every part of transmission machinery (such as shaft, wheel, drum, pulley, coupling, clutch or driving belt) and every dangerous part of other machinery must be securely fenced "unless it is in such a position or of such construction as to be as safe to every person employed or working on the premises as it would be if securely fenced". In connection with machinery other than transmission machinery and prime movers, if fixed guards cannot be used because of the nature of the operation, the safety requirements are considered to have been complied with if a device is provided which automatically prevents the operator from coming into contact with the part.

Because, in circumstances of emergency, it may be necessary to examine machinery

immediately and fencing may have to be removed for that purpose, and because in some industries a manufacturing process once begun must be carried on continuously until its completion, Sections 15 and 16 of the Factories Act make special provision with respect to both unfenced and fenced machinery, parts of which must be examined while they are in motion. It is under these sections that the Operations at Unfenced Machinery Regulations were issued in 1938.

Part I of the Regulations deals with adjustments, etc. to machinery in motion other than transmission machinery and Part 2 with parts of transmission machinery in motion in such continuous processes as in the manufacture of beet sugar, paper, viscose transparent paper or film, flour from wheat, animal food-stuffs, milling and the extraction of oil or similar products from cereals and seeds, the enamelling of wire, certain processes in the production of nickel and aluminium, and in the manufacture of certain chemicals. The 1946 amendment to the Regulations added one process to this list and replaced another.

The Regulations require that, to carry out the examination, lubrication or adjustment or the handling of a belt or any part of the machinery to which they apply, at least one person shall be appointed a machinery attendant by the occupier of a factory, by signed entry in or by certificate attached to the general register in which the occupier of every factory is required to keep certain records for the information of the factory

inspector. A machinery attendant, according to Section 15 of the Factories Act, must be a man at least 18 years old. The Regulations stipulate that he must be sufficiently trained for the work, acquainted with the risks involved, have a certificate of appointment which indicates the limitations, if any, to the operations he can perform, and he must be supplied with a precautionary leaflet prescribed by Order of the Secretary of State.

No operation covered by the Regulations may be performed except by a machinery attendant properly authorized. He must wear a close-fitting single-piece suit of overalls in good repair which is so fastened that there are no exposed loose ends of the suit or of other clothing and which has no external pocket other than a hip pocket. The attendant must make proper use of any safety appliances provided; there must be a person competent to act in case of an emergency immediately available within sight or hearing of the attendant; and whatever steps are necessary, including the erection of a barrier, must be taken to prevent other persons from being exposed to risk of injury.

The provisions concerning a machinery attendant do not apply to the setting up of a machine by a skilled mechanic or tool-setter of at least 18 years of age whose duty it is to set up such a machine and who wears the required overall in the prescribed way and makes proper use of any appliances provided for the safe carrying out of the operations. A person other than a machinery attendant may be permitted to perform the operation on a special occasion if all the other conditions are met and if such person has been authorized in writing by the management to do so.

The Regulations also require set-screws, bolts or keys on revolving parts and toothed

or friction gearing with which a person performing the operations is liable to come into contact, to be securely fenced to prevent this. Any ladder used must be securely fixed or lashed or be firmly held by a second person.

Certain precautions must be taken in the case of transmission machinery. A belt must not be handled at a moving pulley in order to mount or ship it onto the pulley unless (1) the belt is less than six inches wide; (2) has already been used for driving on that pulley; (3) the belt joint is either laced or flush with the belt or is secured by a method approved by a certificate of the Chief Inspector of Factories; (4) the belt, including the joint, and the pulley-rim are in good repair; (5) there is reasonable clearance between the pulley and any fixed plant or structure; and (6) secure foothold and, where necessary, handhold, are afforded for the operator. All belts which are used in the specified processes and liable to be handled at a moving pulley must be inspected daily by a competent person from a safe position, and any repair or replacement found to be necessary must be made as soon as practicable.

Where a part of machinery is only being moved by hand or by a barring engine or by an inching or similar device and the examination, lubrication or adjustment or the handling of a belt is being carried out by a man over 18, the provisions concerning machinery attendants, transmission machinery, and those requiring certain parts on revolving shafts, etc. to be fenced do not apply.

The Chief Inspector of Factories may, by written certificate, authorize some relaxation of the Regulations where, because of special methods of work or other special circumstances, their application would be unreasonable or inappropriate.

Safety in Electric Arc Welding in Great Britain

A MEMORANDUM on Electric Arc Welding (fourth edition) of some 15 pages has been issued by the Factory Department of the Ministry of Labour and National Service. The adverse effects of certain features of the electric arc welding process are indicated and preventive measures described.

The process is exempted from the specific requirements of the Electricity Regulations, 1908, on premises where the Factories Act applies, "provided that the process be so worked and the apparatus so constructed and protected and such special precautions taken as may be necessary to prevent danger". The occupier of the factory and, under the Electricity Regulations, the agents and work-

men, must conduct their work according to this proviso.

The material in the pamphlet is arranged under three heads: Protection against Electrical Risks; Protection against Other Risks; Protective Shields, Screens and Clothing. Protection against electrical risks is discussed under the following headings: The Circuit; Earthing and conductivity of the welding return circuit; Electrical protection of welding circuits; Electric holders; Safety devices; Cables and cable couplings; and Earthing clamps.

Other risks, such as those from radiations, chipping of slag, fumes, hot metal, ignition of inflammable materials and trigger finger,

are described and the desirable precautions indicated. To reduce the intensity of the various radiations, glasses of the proper kind should be worn to protect the eyes, the five grades approved by the British Standards Institution being suitable for the various types of industrial operations.

The Protection of Eyes Regulations, 1938, require goggles or effective screens to protect the eyes of persons employed in the process of electric welding from particles or fragments thrown off. In connection with the removal of slag, good lighting will make for safety by reducing the chance of a defective weld, and will protect the operator against eye-strain.

Ventilation must be adequate to dispose harmlessly of the fumes arising from welding operations, especially when these are done in confined spaces such as inside a boiler. When the boiler has two or more openings, portable propeller fans can be arranged to exhaust at one opening and to blow in fresh air at another. Where the opening of a tank is at some distance from the open air, an impeller fan should be used to supply fresh air. Nitrous fumes and fumes from welding processes where the materials contain lead, manganese or cadmium are toxic and their inhalation must be prevented.

Where the welder is standing at a bench, a helmet and gauntlets may provide sufficient protection against hot metal, but in other circumstances an apron, leggings or complete protection for head, arms and upper parts of the body may be necessary.

Precautions should be taken against the ignition of inflammable materials, special care being necessary when dealing with vessels which contain or have contained any explosive or inflammable substance.

The remedy for trigger finger appears to lie in modifications of the design of the

electrode holder and handle and in the use of suitable gloves to protect the hands.

The final section of the pamphlet, on protective shields, screens and clothing, discusses the use of helmets or head shields and hand shields, goggles, screens, gloves, aprons and boots and leggings. The shields should be light, strong and of heat-resisting, non-ignitable material which is impervious to the various rays given off from the electric arc. The helmet is the best head shield, the handshield not being nearly as satisfactory.

Goggles for protection from rays should always have opaque side shields to prevent rays entering from the side and causing "eyeflash". Goggles for protection from flying pieces of slag should be fitted with clear non-splinterable glass; where protection from rays is also needed, the appropriate optical glass should be protected from mechanical damage by a superimposed piece of clear glass.

Screens, which should be placed around all electric welding operations for the protection of other employees from the rays, should be opaque, sturdy but not heavy or cumbersome, and of material not easily ignitable.

Gloves should give protection against heat, sparks, pieces of hot metal and radiations from the arc. Rubber gloves are unsatisfactory; leather ones should be reinforced at points most subject to wear. Gloves should be long enough to protect the wrists and forearms or protective sleeves should be worn.

Aprons should be of thick leather or asbestos; discomfort because of heat may be partially relieved by fastening the apron over a roll of sacking around the waist so that it hangs at a distance of 1½-2 inches from the body. Good shoes or boots and, if necessary, suitable leggings should be worn. Rubber boots are not a complete safeguard against electric shock, but should be worn to keep the feet of the operator dry when he is doing welding work under wet conditions.

U.S. National Conference on Labour Legislation

THE Twelfth National Conference on Labour Legislation which met in Washington in December, 1945, is sponsored by the Secretary of Labour and composed chiefly of State labour authorities and of trade union representatives. It has met annually since 1933 to consider labour laws and make proposals for their improvement.

At the 1945 session recommendations were made to raise the minimum age for employment, to reduce the hours of juvenile workers, to establish a Federal and State minimum wage of 65 cents an hour, to limit to 45 in a

week the hours of work of women, to ensure closer co-operation between the Federal and State labour authorities for conciliation in labour disputes, to retain the national system of unemployment insurance and employment offices and to approve the granting of Federal funds to State Departments of Labour to promote the health and safety of workers. Co-operation was advocated with the International Labour Organization by giving effect to the International Labour Conventions and Recommendations by means of Federal and State legislative action as the subject-matter may demand.

Employment of Children and Young Persons

The conference recommended the enactment of State laws fixing a 16-year minimum age for employment during school hours and, at any time, for jobs in factories, with a 14-year minimum for other employment outside school hours and during school holidays. For workers under 18, a maximum eight-hour day was proposed, a 40-hour week, not more than eight hours a day for school and work combined, one day's rest in seven, a daily meal-period of at least 30 minutes, employment certificates as a condition of employment, and prohibition of employment in hazardous occupations.

Employment of children under 16 between 6 p.m. and 7 a.m., and of juveniles of 16 or 17 between 10 p.m. and 7 a.m. should be prohibited. Also recommended was State legislation to provide double compensation for minors injured while illegally employed.

Regulation of the employment of children in industrialized agriculture was proposed. It was suggested that State laws should include a 16-year minimum age for employment during school hours and a 14-year minimum outside those hours. The application of State school-attendance laws to these children was urged and, since many of these young workers move from State to State, Federal legislation was advocated, including an amendment to the Fair Labour Standards Act to apply it to children employed in industrialized agriculture.

The Fair Labour Standards Act (or Wage-and-Hour Law), 1938, among other things, prohibits the shipment in interstate commerce of any goods produced in establishments in or about which "oppressive child labour" has been used within 30 days before removal of the goods. This term includes the employment of children under 16, except those between 14 and 16 in such non-mining and non-manufacturing occupations as the Chief of the Children's Bureau determines do not interfere with their schooling, health, or well-being. Employment of juveniles between 16 and 18 is prohibited in occupations declared by the Chief of the Children's Bureau to be particularly hazardous or detrimental to their well-being.

Wages and Hours

Other amendments proposed to the Fair Labour Standards Act would raise the minimum wage from 40 to 65 cents an hour and subsequently to 75 cents, and would extend the Act to seamen and workers in industries processing fish and farm products. State laws, it was recommended, should also establish a minimum of 65 cents an hour and stipulate that men should receive at least the rate set for women and minors.

States which have no minimum wage law (in 1942, 22 had no such legislation) were urged to enact it. The law should, itself, fix a minimum and provide for a wage board to raise this rate by stages. Daily and weekly, rather than hourly, rates and higher rates for part-time and overtime work, were advocated. Wages should be recoverable within a period of not less than five years.

Industrial Relations

To facilitate the prevention and settlement of labour disputes, closer co-operation between Federal and State agencies and between conciliation services was recommended, free exchange of information and Federal-State conferences to work out the details of co-operative methods.

The repeal of State laws which require the incorporation of unions was considered desirable, also those requiring the licensing of officers and the regulation of the internal affairs of unions.

State and Federal legislation was urged to prevent discrimination in hiring and promotion on the ground of race, colour or creed. Enactment in more States of labour relations laws similar to the National Labour Relations Act, 1935, was also recommended.

Other Recommendations

The conference called for a uniform national unemployment insurance system and a national employment service. If the employment offices should be returned to the States, it was recommended that minimum standards for their operation should be set and that the Federal service should take over any State service which fails to meet those standards. Federal grants to State labour departments were suggested to promote safe and healthful working conditions.

The conference also called for the extension of trade union educational work for training in collective bargaining, expansion of the training in this field sponsored by the Division of Labour Standards and the establishment of an Advisory Committee to assist the Division in this work.

Another resolution requested that the Secretary of Labour send to State Governors for reference to the Legislatures those International Labour Conventions and Recommendations which can be given effect only by the States or by joint Federal-State action and that the Governors report to the Secretary of Labour on the action taken. Copies of all Conventions and Recommendations should be sent to the trade unions.

Prices

Prices, Retail and Wholesale, in Canada, March, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers,
as Reported by the Dominion Bureau of Statistics

THERE was an advance of 0.2 points to 120.1 in the cost-of-living index between February 1 and March 1, 1946, due to higher prices for foods, clothing, homefurnishings and services and fuel. Firmer quotations for vegetables, eggs and dairy products supported a rise of 0.6 to 133.1 in the food series while the clothing group advanced 0.4 to 123.1, homefurnishings and services 0.3 to 120.4 and fuel and light 0.1 to 107.2. Indexes for the two remaining groups were unchanged, rentals at 112.3 and miscellaneous items at 110.9.

Retail Prices

The accompanying table on retail prices of staple goods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these

commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices was not warranted

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1946

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

TABLE I—

* Indexes prior to 1926 have been recalculated, resulting in revisions from figures previously published. Typographical errors in 1945 averages and in rent indexes for 1941 and 1944 have also been corrected.

† Commodities in the cost-of-living excluding rents and services.

although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The

1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

(Concluded on page 560)

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home-furnishings, etc., with their weight, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941,

except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE.

Wholesale Prices, February, 1946

There was a further increase in the general commodity wholesale index of 0.6 points to 104.6 in February. Non-ferrous metals rose 6.9 points to 87.8, reflecting removal of the ceiling price for refined silver on February 1. Animal products advanced 0.7 points to 109.0 supported by higher prices for whitefish, raw furs, steers, calves and eggs which outweighed weakness in hogs and lambs. Upturns in rayon fabrics were responsible for a gain of 0.4 to 92.2 in fibres, textiles and textile products while an advance of the same amount to 116.0 for iron and its products was due to an increase in the price for wire nails. Due to a small advance in the export price of cedar shingles, wood, wood products and paper moved up 0.2 to 122.5 in February. Other groups were unchanged, vegetable products at 97.2, non-metallic minerals 102.1, and chemical products 98.1.

Canadian farm product prices increased 0.5 points to an index level of 107.0 in February. Animal products rose 0.6 points to 125.6, reflecting net increases for live stock and eggs while field products moved up 0.5 to 95.9 due to advances in rye, potatoes and onions.

Price Movements in Canada and Other Countries

FOURTH quarter changes in wholesale price indexes generally indicated continuing increases. Between September and December, 1945, the Canadian wholesale index advanced 0.6 points to 103.3 (1926=100) due to advances for vegetable, animal and non-ferrous metal products. Higher prices for foods moved the United States Bureau of Labor wholesale index up 1.9 points to 107.1 (1926=100) in the final quarter of 1945. However, the wholesale index for the United Kingdom registered a decline of 0.3 points to 169.3 in the final quarter due to lower prices for meats, fish, non-ferrous metals, chemicals and oils (1930=100). Wholesale price movements for Latin-American countries were mixed in the fourth quarter, the Argentine series on the base 1926=100, declining 1.4 points to 215.6 in November, while the series for Chile on the base 1913=100, rose 15.4 points to 921.1 in the same interval. The Mexican wholesale price index, which has shown one of the sharpest wartime increases, continued upward in the final quarter of 1945 to reach 265.2 (1929=100) in December, compared with 253.7 in September. In the Far East the India (Calcutta) index advanced 4 points to 283 (July, 1914=100) in the final quarter of 1945. Among other British Empire countries, the New Zealand series advanced 21 points on higher prices for vegetable food-stuffs, textiles, wood products and non-metallic minerals to 1613 (1926-30=1000) in December, 1945. For South Africa the December, 1945 wholesale index of 1789 (1910=1000) registered a drop of 19 points since September.

A comparison of the movement of wholesale prices indexes between December, 1944 and December, 1945 also showed increases predominating. The Canadian index rose 0.8 points to 103.3 during 1945, while a gain of 2.4 points in the United States Bureau of Labour series raised it to 107.1. United Kingdom wholesale prices were up 2.1 points to 169.3. An eleven-month comparison for two Latin-American countries indicated a decline of 0.3 points to 215.6 by November for Argentina, while for Chile a gain of 41.4 points to 921.1 was recorded. The Mexican wholesale prices index moved 27.3 points higher to 265.2. In the Far East the India (Calcutta) series dropped 18 points to 283. Australian wholesale price levels rose to 1413 (July, 1936-June, 1939=1000) by October, 1945 from a December, 1944 level of 1398, while the New Zealand series moved up from 1577 (1926-30=1000) in December, 1944 to 1613 by December, 1945.

Changes in cost-of-living indexes in the fourth quarter of 1945 were more consistently

upward than corresponding wholesale series. Higher prices for foods, fuel and lighting, and clothing were responsible for a gain of 0.2 points to 120.1 (1935-39=100) in the Canadian cost-of-living index in the fourth quarter, while on the same base the consumers' price index for moderate income families in large cities in the United States advanced 1.0 to 129.9, reflecting higher levels for foods, fuel and lighting and clothing. At 203 (July, 1914=100) there was no change in the cost-of-living index for the United Kingdom in the final three months of 1945. Reflecting sharp increases in wholesale prices over the past year, the cost-of-living index for Mexico rose 16.8 points to 361.2 (1934=100) between September and December. Strength in foods, clothing and household equipment were responsible for a gain of 3.4 points to 136.9 (1939=100) in the Argentine series in the same period. The cost-of-living index for Chile (Santiago), however, moved against the tendency in wholesale prices falling 9.7 points to 439.5 (March, 1928=100) between September and November. In the Antipodes, the Australian quarterly index of living costs moved up 3 points to 1273 (June, 1936-July, 1939=1000) by December, 1945, and a similar series for New Zealand 2 points to 1003 (December, 1942=1000). An increase of 4 points to 1323 (1938=1000) occurred in the South African cost-of-living index in the final four months of 1945, reflecting higher prices for fuel, light and rent.

Changes in cost-of-living indexes during the twelve-month period ended December, 1945 were mainly upward. The Canadian index recorded an advance of 1.6 points to 120.1 between December, 1944 and December, 1945, while the Bureau of Labor series for the United States moved up 2.9 points to 129.9. The movement in the United Kingdom index was small, amounting to an increase of 2 points to 203. Foods and to a lesser extent clothing were responsible for a sharp advance in Mexican living costs over the past year, the index advancing 48.4 points to 361.2. South American indexes were substantially higher also, the Argentine series advancing 22.2 points to 136.9 between December, 1944 and December, 1945, and the Chilean series 26.8 points to 439.5 between December, 1944 and November, 1945. On the other hand, Australian and New Zealand indexes recorded very small changes, the series for the former country advancing 3 points to 1273 and that for the latter declining 1 point to 1003. For South Africa the 1945 advance in the cost of living has been 12 points to an index of 1323.

Fatal Industrial Accidents in Canada, 1945

Analyzed According to Industries, Causes, Provinces and Months

THERE were 1,309 industrial fatalities in Canada in the calendar year 1945, according to the latest reports received by the Department of Labour. In 1944 there were 1,203 industrial deaths.

The accidents recorded are those occurring to persons gainfully employed, during the course of, or arising from, their employment. Also included are fatalities from industrial diseases reported by provincial Workmen's Compensation Boards. Quarterly reviews of industrial accidents in each year appear in the *LABOUR GAZETTE* for May, August, November, and February of the following year.

The above-mentioned totals were compiled from reports received from provincial Workmen's Compensation Boards, the Board of Transport Commissioners, the Explosives Division of the Federal Department of Mines, the Ontario Chief Factory Inspector, and the British Columbia Department of Mines. Also used were the reports submitted by *LABOUR GAZETTE* correspondents in several Canadian industrial centres.

Press reports on industrial accidents were also included in the review, mainly to supplement official information, and only after careful inquiry to avoid duplication. The record on accidents in agriculture was compiled mainly from such reports. It is not known to what extent agricultural accidents are covered but it is considered that the record is fairly complete.

Seven industrial disasters (five deaths or more) were reported to the Department in 1945. In February, 16 miners were killed near Timmins, Ontario, when the cable in the shaft snapped and the mine cage dropped 1,500 feet. A gasboat capsizing at Seymour Narrows, British Columbia, caused the drowning of nine men, engaged in dredging operations, on March 16. At Vancouver, in the same month, eight men were killed when an explosion wrecked a freighter being loaded with explosives.

Five loggers were drowned at St. Leonard, Quebec, on April 5, when their boat capsized while they were working on a boom. A coal mine explosion trapped seven men on May 13 at Luscar, Alberta. In June, two trainmen, two firemen and one engineer were victims of a freight train collision at Rutherglen, Ontario.

The major industrial disaster of the past year occurred at Port Arthur, Ontario, on

August 7. A dust explosion and fire wrecked a grain elevator and resulted in the death of 19 men.

Fatalities by Causes

Classification of accidents according to cause (Table I, page 564) indicates that the largest number, 425, came under the category "moving trains, vehicles, etc." Automobiles and other power vehicles and implements caused 157 of these fatalities; 104 deaths were the result of "being struck, run over by, crushed by, or between cars and engines", and the remainder were distributed among various other causes in this group.

Persons falling caused 195 fatalities. Of these, 72 fell from elevations, and 40 into pits, shafts, harbours, and rivers. Falling objects caused 191 deaths, 60 being due to falling trees and limbs, 50 from objects falling in mines and quarries, and 37 from objects falling from elevations, loads, and piles.

Dangerous substances resulted in the deaths of 179 persons. Of these, 41 were caused by hot inflammable substances, 38 by gas fumes and poison, 32 by electric current, and 31 by explosive substances.

The category, "other causes" includes 153 fatalities, 97 of which were due to strain or various industrial diseases. The lesser totals were distributed among the other causes in this group, such as shooting and violence, cave-ins, land slides and ice jams, infection, storms, lightning, and sunstroke.

The "prime movers" group includes 17 deaths caused by belts, lines, pulleys, and sprockets. Conveyers among "hoisting apparatus" resulted in 19 fatalities. Being struck by objects caused 35 deaths, the handling of heavy objects, 21, and horses, 20.

Fatalities by Provinces

Five hundred and thirty-eight industrial fatalities were recorded in Ontario in 1945 (Table II, page 568). The largest number of these deaths, 134, occurred in transportation and public utilities; 60 of these were recorded in steam railways, and 31 in local and highway transportation.

Manufacturing totalled 119 deaths, 46 of which were in "iron, steel and products". Of the 68 deaths in mining, non-ferrous smelting and quarrying, 61 were in metal-liferous mining. Building and structures, with

¹Preliminary figures.²Revised figures.³Decennial Census, 1941.⁴Fishermen only; Annual Census of Industry, 1944.^aAnnual Census of Industry, 1943.

36 deaths, was the group with the largest number of fatalities in the construction trades. The 36 fatalities in service included 20 in public administration. In retail trade 14 fatalities were recorded as compared with nine in wholesale trade.

The highest number of deaths in agriculture in any province was recorded in Ontario. Logging caused 51 fatalities in this province, which was second only to the 74 recorded in British Columbia.

In Quebec, 267 industrial fatalities were recorded and in British Columbia, 242.

There were 71 deaths in manufacturing in Quebec, 21 of these being in iron, steel and products, and 15 in pulp, paper and paper products. In the transportation group there were 45 fatalities, of which 13 were in steam railways.

Of the 37 deaths in the construction industry, 25 were in buildings and structures. Seventeen of the 25 fatalities in service were in public administration. Eleven deaths occurred in retail trade and 23 in mining, smelting and quarrying, of which 17 were in metalliferous mining. Quebec had nine fatalities in "central electric stations", the highest for Canada in this industry.

In British Columbia 74 fatalities were recorded in logging, nearly one-half of the 164 deaths in this group for the whole Dominion.

Metalliferous mining accounted for 31 of the 39 fatalities in the mining group. The fatalities in manufacturing were distributed among several industries; 12 occurred in saw and planing mills. Twenty deaths were recorded in water transportation and ten in public administration.

There were 78 industrial fatalities in Alberta, 22 of these being in coal mining, and 21 in agriculture. In Manitoba, 47 fatal accidents were recorded in various industrial categories. In Saskatchewan there were 34 fatalities of which 14 were in agriculture.

In Nova Scotia there were 58 fatalities, with 17 in coal mining and 17 in transportation and public utilities.

Thirty-nine fatalities were recorded in New Brunswick, while for Prince Edward Island, only five industrial deaths were recorded.

Fatalities by Months and Industries

The largest number of fatalities occurred in June, July, and August, with 125, 128, and 136 industrial deaths respectively. April, with 86, was the month with the lowest total (See Table III, page 570).

The highest percentage of the 1,309 fatalities in 1945 was in transportation and public utilities with 21.9. Manufacturing accounted for 19.6 per cent.

Fourteen per cent occurred in mining, non-ferrous smelting, and quarrying, and in logging, 12.5 per cent. The lowest percentage, 1.5, was in fishing and trapping.

Table III also gives the latest available census figures of persons employed in the various industries. Some are derived from the Decennial Census of 1941, and some from the annual censuses of industry for 1943 and 1944. While these figures are not in any instance for the year under review, they are the latest available and are included for general comparative purposes.

Fatal and Non-fatal Accidents Reported by Provincial Workmen's Compensation Boards

THE Labour Department's records of industrial accidents include only fatalities arising from employment and deaths due to industrial diseases. The only comprehensive information on non-fatal accidents is derived from the annual reports of the Provincial Workmen's Compensation Boards. Various government departments and commissions supply additional information for manufacturing, mining, and steam and electric railway operation.

The annual reports of the several Workmen's Compensation Boards are reviewed from time to time in the LABOUR GAZETTE, information being given as to accidents, amounts paid in compensation, etc. The annual reports of the Provincial Workmen's Compensation Boards for 1944 were summarized in the following issues; Manitoba, May, 1945, p. 790; New Brunswick, June, 1945,

p. 924; British Columbia, August, 1945, p. 1194; and Quebec, Saskatchewan, Alberta and Ontario, March, 1946, pp. 417-418.

The accompanying table summarizes the figures on fatal and non-fatal accidents recorded by the several Workmen's Compensation Boards for the years 1939 to 1944 inclusive. Also included are some preliminary figures for 1945.

It may be observed that for any specific year the Department of Labour records a higher number of industrial fatalities than the total reported by the Provincial Workmen's Compensation Boards for the same period. This is because in each of the provinces the Board has jurisdiction over certain industries only. Accidents in agriculture, trapping, finance and domestic service are not covered in the boards' reports. Most of the boards deal with accidents in

(1) Accidents requiring medical treatment but not causing disability for a sufficient period to qualify for this compensation. The period varies in the several provinces; figures not reported by some boards.

(2) Preliminary figures.

logging, mining, manufacturing, construction, transportation and public utilities, and, to some extent, include fishing, trade, and government service. In addition the Workmen's Compensation Boards show accidents to

employees only; the Department of Labour records accidents to all persons employed in industry, including employers and workmen carrying on their own business, particularly in trade, trucking and agriculture.

Return of Prisoners-of-War to Britain

THE Hon. Humphrey Mitchell, Minister of Labour, recently issued a statement dealing with the return of prisoners-of-war from Canada to Britain:—

Approximately 33,000 prisoners-of-war have been in Canada under the custody of the Canadian Government which Government has been acting in this regard as an agent for the British Government. Almost all Canadians will be quite in accord with the idea of meeting the request of the British Government that the prisoners be returned to Europe. The only concern is in regard to the minority which is being used on work projects.

Out of the 33,000 prisoners-of-war it was not felt desirable to use more than 11,000 on work projects. The reason that more were not used on work projects was due to the fact that they were of the type who would not prove satisfactory to the employers and would be more of a nuisance than a benefit. It has been felt necessary to keep the majority under close custody in internment camps.

The working parties have given, on the whole, excellent satisfaction. Briefly, the plan under which they have been used, is to give the prisoner himself the credit of 50 cents per day and require the employer to pay the going rate of wages. This has worked out very satisfactorily in certain industries where other manpower was not available and where the manpower available showed great reluctance to take on the jobs. The plan has been so successful that it has been quite a productive source of revenue for the Dominion Government. During the current fiscal year a total revenue of over \$2,000,000 will be paid to the Federal Treasury from this source.

Prisoners-of-war have been used for lumbering and logging, pulpwood cutting, manufacture of bricks, in brickyards and the cultivation of sugar beets. In all of these industries it is usually quite difficult to interest workmen when other employment is available.

The Department of Labour has consistently followed the practice of not using prisoners-of-war unless it has been proven quite definitely that the situation could not be met from the usual labour market.

In sending prisoners back from Canada it has been arranged with the British Government that the working parties will be sent last which means that there will be no danger of disturbing the prisoners who are working in lumber camps until after the winter season

is over unless they can be replaced with ordinary civilian labour. The requirement has been placed with employers using prisoners-of-war that they must keep orders for men in our Employment Offices. In this way it is assured that prisoners-of-war will not be used to fill jobs and block Canadian workmen from employment.

Representations have been made from the Canadian Agriculture Association, farmers who usually cultivate sugar beets, and the Sugar Controller and operators of sugar plants. All of these representations have emphasized the good work done by prisoners-of-war during the last three years and have expressed a fear of reduction in production if prisoners-of-war are not retained in Canada.

The Minister of Labour continued, "No one is more concerned than the Canadian Government in keeping the production of food from our farms and sugar from our sugar beet crops up to a high level and those who have worked so hard in these industries during the war years may be confident that the planning and co-operation of the Labour Department will be continued during the transition period and, indeed, during the years to come. Already plans are being made in respect to the farm labour situation of 1946, and I am quite confident that labour will be made available to put in the crops and that the tremendous task of harvesting them will be carried through during 1946 as was the case in previous difficult years."

The Minister went on to say:—"Specifically in regard to the minority of prisoners-of-war who were used in work parties it is my intention to review the whole situation in the light of the requirements, about the 1st of April, 1946, and if necessary, I will not overlook the possibility of applying to the British Government requesting that the comparatively small number of prisoners-of-war who have been engaged in work parties be allowed to remain in Canada for a longer period." It should not be overlooked, however, the Minister further pointed out, "that work parties are badly needed in Britain for that country's reconstruction program."

One of the plans which the Labour Department is proceeding with is the circularizing immediately of all farmers urging them to employ their help now rather than wait until next summer when it might be hard to get.

Course in Practical Nursing

THE question of providing training for ex-service women as practical nurses has been discussed for some time by the officials of Department of Veterans Affairs, Department of Labour, Department of Health and Welfare, Medical Associations, Registered Nurses' Associations and personnel directly concerned in the three Women's Active Services. As a result of these discussions and findings, the Royal Commission on Veterans was requested to fully investigate and make a recommendation on the possibility of setting up a practical nursing course.

The Commission had its attention directed to the fact that a considerable number of personnel, mainly women in the three Armed Services, has been trained as sick-bay attendants, hospital assistants or nursing orderlies. The Commission felt that this training was of interest to institutional efficiency and national welfare as well as to the personnel concerned. Ex-service personnel who have been trained and supervised in the Services in the above capacities, were most anxious to be allowed further approved training and then to be recognized by subsequent legislation and registration as practical nurses. Many of the ex-service personnel, who have a keen desire for nursing, lack the necessary academic prerequisites for training as registered nurses.

The Royal Commission recommended that the provincial Departments of Health be urged to implement legislation for training, examination, licensing and registering of the practical nurses. The course for such training was to be based on the outline that was prepared and recommended by the Canadian Nurses' Association. It was also recommended that wherever possible nurses' registries be requested to register practical nurses for the purpose of placement.

The Commission, realizing the necessity of protecting the registered nurses as well as assisting the practical nurses, strongly recommended that the practical nurses be officially recognized and registered by provincial authority. This predicates an Advisory Council similar to that established for Manitoba by the Manitoba Practical Nurses' Act. This Council would define and control the spheres of work for which practical nurses would be suited. Arrangements for training courses and most of the teaching would be done by registered nurses. It was recommended also that the Registered Nurses' Associations maintain registration of practical nurses who successfully pass such approved courses whether provincial licensing laws exist or not. Upon

request, all Provincial Registered Nurses' Associations submitted recommendations to the Commission on their reactions to practical nursing courses.

Plan Undertaken by Manitoba

In the Province of Manitoba, preliminary arrangements have been made by the Canadian Vocational Training officials with the Advisory Council, set up under the Practical Nurses' Act, for the establishment of a course of training to qualify graduates as practical nurses. The first class for practical nurses opened on January 15, 1946, at St. Joseph's Hospital, Winnipeg. In this class there were six women veterans enrolled. The remainder of the class of 25 was made up of civilian trainees. The admission requirements were not too rigid. Entrance age is left to the judgment of a superintendent of nurses, but 21 years is held as a required age before a permanent licence is to be issued. The education requisite is Grade 8. A health and dental certificate, chest X-ray and satisfactory references are necessary.

The course includes the following:

1. Human Body and How It Functions.
2. Principles and Practice Nursing.
3. Nutrition Theory—Practice Cooking.
4. Behaviour and Working Relations.

According to the outline, three months of classroom and practice nursing are given by nine months' experience in hospital wards. The Advisory Council has listed approved hospitals for training. The trainee may choose from this list where she wishes to take 7½ months of her training in hospital wards. The 1½ months is obligatory experience in the Ninette sanatorium. Upon completion of training a minimum wage schedule is applicable. Each phase of training and supervision for the graduate is covered by the Licensed Practical Nurses' Act.

Methods Proposed in Other Provinces

Other provinces are working towards legislation but so far Manitoba is the only one which has finalized legislation in the form of an Act. Ontario has set up the Advisory Council to draw up a course. C.V.T. officials have arranged for the physical setup for basic instruction, which will be given by a registered nurse approved by the Council. The length of Ontario's course is nine months including three months' full time at a teaching centre for lectures, demonstrations and

practice, three months of practical experience and three months of controlled experience during which time the student will take a position with payment and will receive supervision and guidance from the establishment employing her.

Alberta has an arrangement similar to Ontario. However, Alberta's course is emphasizing nutrition and home management to a greater degree than is being considered by some of the other provinces.

Up to the present, Saskatchewan has not taken any definite steps to set up a course of training. However, indications are that if, and when, this course is approved, it will be similar to training offered in Alberta. Legislation has been passed for home nurses.

In British Columbia, it is anticipated that the necessary legislation for a Practical Nurses' Act will be passed at the Spring Session. B.C. Registered Nurses' Association has planned and approved a course similar to that of Manitoba.

No definite action has been taken in setting up a course for practical nursing in the Maritimes, although it is under discussion.

In Quebec, several veterans are being trained in the Trained Attendants' Schools which have conformed to the requisites of the R.N.A.Q. The graduates of these schools are to be recognized by subsequent legislation.

It is interesting to note that the picture of employment possibilities for practical nurses shows a high demand over supply. Listed below are where the licensed practical nurses may be employed: General Hospitals, Mental Hospitals, Sanatoria, Convalescent Hospitals, Nursing Homes, Private Duty, Doctors' Offices and Clinics, Public Health.

Mrs. G. Winter of Winnipeg, Regional Employment Supervisor, Women's Division, National Employment Service, speaking at the D.V.A. Conference in Saskatoon on March 1, pointed out that hospitals were still short of staffs. The practical nursing course, she felt, would prove of inestimable value to young women who had natural gifts for nursing yet lacked academic qualifications. It is felt that this observation on potential employment for practical nurses in the Prairie Region is also applicable to the rest of Canada. It is hoped that in the very near future there may be Dominion-wide legislation for practical nurses which will have outstanding benefits, not only for the trainees, but for the protection of all Canadian citizens. With the practical nurse under the Provincial placement of the Nursing Service, it is expected that a high standard will be maintained through careful selection, closer association and co-ordination of all those engaged in nursing.

Training of Workers for British Catering Industry

THE Catering Wages Commission issued a Report on Training for the Catering Industry on October 20, 1945, which sets out conclusions based on an inquiry under the Catering Wages Act, 1943. The Commission is a permanent one, set up under the Act. It is empowered to inquire into the existing arrangements for regulating wages and working conditions and into any other matters affecting the remuneration, conditions of employment, health or welfare of the workers, and to consider means for meeting the needs of the public, including visitors from overseas, and for developing the tourist traffic. (L.G., 1943, p. 1206; 1944, p. 551.)

Previous reports of the Commission recommended to the Minister of Labour and National Service: (1) that wages boards should be set up, and three have already been organized, to fix rates of remuneration and to provide for rest intervals and holidays with pay for different classes of catering establishments, such as industrial and staff canteens, unlicensed non-residential establishments (restaurants, cafes, tea shops, etc. or catering contractors), licensed non-residential

establishments (public houses and non-residential clubs), licensed hotels and licensed restaurants, and unlicensed residential establishments (hotels, boarding-houses, hostels, etc.); (2) that, in the case of workers employed by the Crown in catering, agreements governing conditions of work should be made, where the workers are organized, between the Government Departments concerned and the trade unions, that where the workers are unorganized the Government should give an undertaking, without prejudice to future joint negotiations, that no catering workers would be employed by the Crown under less favourable remuneration and conditions than those "agreed" for comparable grades of workers in the service of the Crown in similar establishments; (3) that the annual holidays with pay of catering workers should be staggered over the period from June to September inclusive; (4) that certain measures should be taken with respect to the conversion of catering premises used for war purposes to peace-time needs and that every facility be given for securing proper premises, equipment and staff for catering undertakings;

and (5) that catering, holiday and tourist services should be improved and developed.

The Report on training deals with the long-term problem of providing the training necessary in normal times to ensure adequate service to the public, including the tourist trade. Existing training facilities are briefly surveyed and found to be meagre and unsatisfactory, owing, chiefly, to the absence of any protest against their inadequacy. The Commission commends the formation of the Catering Trades Education Committee, a body which has been enlarged and is now fully representative of the industry, as a means of stimulating a demand for an extension of training facilities on a nation-wide scale.

The Commission considers that, if catering is to compete with other industries for juvenile labour in the post-war period, it must be able to "offer prospects of progressive employment conditional on the acquisition of recognized standards of higher skill". The Commission, therefore, stresses the importance of first fixing minimum wages and standards for the industry. It recommends

that a basic training in catering be given within the system of technical education, certificates to be granted after examinations based on a common syllabus by an examining body with national status. Two courses, primarily for those up to the age of 18 who enter the industry on leaving school or after a period of work in another industry, should be instituted, one full-time lasting from three to six months, the other part-time and spread over three years. Suggestions are made to relieve the temporary scarcity of buildings, equipment and teachers.

Further, the Commission recommends that, when these measures have been taken, wide publicity should be given to the opportunities that the catering industry offers to juveniles. It is estimated that 12,000 young people each year are likely to take advantage of such a basic training program.

With regard to special schemes for higher training, the Commission indicates possible lines of development, but makes no recommendation until experience has shown how well the basic courses work out.

Annual Report of Department of Labour, Manitoba

THE annual report of the Department of Labour of Manitoba for the fiscal year ending April 30, 1945 gives details concerning the administration of various Acts coming within the jurisdiction of the Department.

Inspections.—During the fiscal year May 1, 1944 to April 30, 1945, the Manitoba Department of Labour made 21,357 inspections under Acts administered by the Department and issued 6,922 orders. Under the Manitoba Factories Act there were 2,978 inspections made which resulted in 1,750 orders for the improvement of safety and 77 for the improvement of health and sanitation. The policy of training industrial workers in first aid to the injured was continued and over 300 workers qualified for the certificates of the St. John Ambulance Association during the year.

Minimum Wages.—There were 448 wage claims adjusted during the year. Of these, 137 were for male workers and 311 for female workers. The amounts collected were \$3,320.65 for males and \$4,880.97 for females. It is reported that there was a marked improvement in employer-employee relations—"employers in general showing co-operation with regard to safety and healthful working conditions for their employees by way of providing sanitary conveniences, dining rooms and other improvements." There were 1,745 inspections made in Winnipeg and environs and 758 inspections in the remainder of the province, under the Minimum Wage Act.

Fair Wages.—During the fiscal year the Fair Wage Board held nine meetings and one public hearing. Two of these were held jointly with the Regional War Labour Board for Manitoba. Several matters regarding the interpretation of the Fair Wage Schedule were dealt with, for example the employment of high school and university students on construction work and, also the employment of females. The amount collected in connection with wage adjustments for males in the city of Winnipeg and environs under Part II of the Act was \$760.48, and for females \$250.54 was collected.

The Minimum Wage Board held 22 meetings during the fiscal year. Considerable revision was made in the Minimum Wage Regulations, as embodied in five orders. Four of these orders govern the employment of females principally, and one the employment of males. Improvement was made in minimum rates, notably the raising of the minimum for all experienced male employees in the province over 18 years of age and those not requiring skill or training to 35 cents an hour. The training period for inexperienced workers was reduced from one year to six months.

Overtime permits issued during the fiscal year were not as numerous as those issued in the preceding year, the report states. In all, 261 permits to work overtime and 18 permits for legal holidays were issued. There

were 1,745 inspections made under the Minimum Wage Act in Winnipeg and environs resulting in the issuance of 136 orders relating to wages and 39 dealing with hours of work.

Accident Prevention.—The total number of fatal accidents reported during the fiscal year was 367, classified as follows: traffic, 53; industrial, 19; home, 123; general, 172. Of the home accidents, 60 were the result of falls, 18 were due to asphyxiation, and 17 following burns. Under the heading of general accidents 55 were from drowning and 33 were due to aeroplane accidents.

The report points out that during the fiscal year ending April 30, 1945 industry in the province passed the peak of its war production. In spite of that, industrial accidents showed a gradual decrease. This was attributed in large measure to the operation of safety committees in practically all of the larger establishments and to the safety education and training in First Aid which was organized, conducted and encouraged by the Safety Branch of the Department. In addition to the training in First Aid given to industrial workers, a course of evening lectures on safety was provided by the University of Manitoba. Nearly 200 persons, representing over fifty firms, registered for the course.

The Director of Safety "continued to promote safety and the prevention of accidents in all phases of life throughout the province". The work was carried on in co-operation with many public bodies, such as the Manitoba Motor League, St. John Ambulance Association, Winnipeg Board of

Trade, and the Manitoba Associated Boards of Trade. The Director was also connected officially with the Winnipeg Traffic Commission, the Board of Trade Safety Commission and the Streets, Highways and Transit Committee of the Metropolitan Town Planning Commission. These provided support in the campaign for greater safety.

Building Trades.—The bulk of construction during the fiscal year was residential, with numerous repairs, additions and alterations to business buildings. Additions were made to several hospitals and cold storage plants and a number of warehouses, stores, garages, grain elevators, an ice storage building, apartment blocks, a hospital clinic and a large bus depot were built. Around three thousand building permits were issued, valued at approximately eight million dollars. One hundred and fifty-one inspections were made and 22 orders were issued under the Building Trades Inspection Act, during the fiscal year.

Fire Losses.—The number of building fires reported in Manitoba during the fiscal year was 1,643, over 77 per cent of which occurred in dwellings. The insured property losses amounted to \$1,058,490, a reduction of \$292,338 from the 1943 total. The per capita loss was \$1.59 as compared with \$1.86 the preceding year.

During the fiscal year ending April 30, 1945 there were 139 official fire investigations throughout the province, 28 of which were conducted by the R.C.M.P. There were 22 fatalities due to fire in the fiscal year, ten of whom were men, seven were women and five were children.

Notes of Current Interest

Meeting of Dominion- Provincial Conference

The Dominion-Provincial Conference on Reconstruction held its second series of open meetings in Ottawa between April 29 and May 3, attended by the premiers of the provinces, the Prime Minister of Canada, and members of the Dominion cabinet.

At the first open meetings of the Conference last August the Dominion Government had presented to the provinces a set of proposals for the division of responsibility in regard to post-war policies on employment, social security and other matters, and for the sharing of powers of taxation (L.G., Sept., 1945, p. 1280). Following the Dominion's presentation, certain of the premiers submitted proposals, and others made statements. The Conference then adjourned to enable the governments to study the proposals.

Subsequently the Co-ordinating Committee of the Conference, consisting of the provincial premiers, three Dominion ministers, and the Prime Minister, held closed meetings in November, January and April. The proposals of the Dominion and of the provinces were considered in detail.

When open sittings were resumed on April 29, the Prime Minister, Right Hon. W. L. Mackenzie King, made a statement in which he announced certain revisions and modifications of the original Dominion proposals. These proposals remained substantially unchanged in respect of health matters, old age pensions, unemployment assistance, and

Dominion assistance to provinces and municipalities for public investment projects undertaken in accordance with the timing of the Dominion's program; but were modified in regard to financial arrangements. The Dominion's basic proposal had been that in return for specified unconditional payments to the provinces the provinces should undertake for the next three years not to levy income, corporation and succession duty taxation. In its new proposals the Dominion added the proviso that any province which wished to continue to levy succession duties might do so on condition of the Dominion payment being appropriately reduced. The Dominion also offered to increase the amounts that would be paid to the provinces, and made various other suggestions.

The replies of the provincial premiers and the subsequent discussion centred almost entirely on the financial arrangements.

After five days of discussion the Conference adjourned, with no agreement having been reached, and no date set for a possible resumption of meetings.

Availability of executive and professional personnel

About a year ago, the National Employment Service added to the service a new division known as Executive and Professional Offices (L.G., April, 1945, p. 447). These offices were established at Moncton, Montreal, Toronto, Winnipeg and Vancouver for the purpose of placing in employment men and women

possessing executive and professional abilities.

A review of the past year's operations of these offices indicates that the demand for executive and professional personnel is heavy, and that a fair number of this type of applicants has become more readily available due to the return of armed forces personnel and release from war industry.

At the end of March, 1946, there were 1,020 openings registered in the Executive and Professional Offices and 1,758 applicants listed as available. The continuing demand for executive and professional persons is due principally to the development and progress being undertaken throughout the reconstruction and reconversion period. A section of the Executive and Professional Offices deals with the problems of ex-service personnel. Although many persons with executive and professional ability seeking employment after being demobilized from the Armed Forces have limited experience in civil employment, it appears that employers are readily accepting these men and women for executive and technical positions.

Since the opening of these offices less than one year ago 6,000 persons have been referred to employment and 4,480 have been placed in permanent employment at annual salaries above \$2,400.

**Responsibility
for housing
vested in
Minister of
Reconstruction**

An Order in Council (P.C. 1513, April 16) vesting responsibility for housing in the Minister of Reconstruction and Supply was announced on April 29 by the Prime Minister, Right

Hon. W. L. Mackenzie King.

"Hitherto", the Prime Minister stated, "the Minister of Reconstruction and Supply has been responsible for the operations of War-time Housing Limited, but other aspects of housing responsibility have been vested in the Minister of Finance and the Minister of Veterans Affairs. Under the new arrangement, the responsibility for the Central Mortgage and Housing Corporation, which was established early this year under the Minister of Finance and which has responsibility for the administration of the National Housing Act and of the Emergency Shelter Regulations, in addition to the financing of housing construction, will be transferred to the Minister of Reconstruction and Supply. Arrangements have also been made to co-ordinate the operations carried on under the Veterans' Land Act in relation to non-farm housing with the activities which will now centre in the Department of Reconstruction and Supply."

**Employment
and industrial
statistics**

The accompanying table gives the latest statistics available reflecting changes in industrial activity in Canada, by months in the current year, as compared with the corresponding months in 1945.

As may be seen in the table, the index of industrial employment published by the Dominion Bureau of Statistics, declined fractionally from 167.2 at February 1 to 166.9 at March 1, 1946. A slight increase was noted in the general index of wholesale prices which rose from 104.6 in February to 104.9 in March. The Bureau's cost-of-living index also advanced from 120.1 at March 1 to 120.8 at April 1, thereby bringing the index to a slightly higher level than was reached at any time during the war. An increase of 10.2 points in the physical volume of business operations during the month brought the general index to 191.4 in March, 1946.

Employment and earnings.—Industrial employment throughout the Dominion showed a further moderate contraction at March 1, in a seasonal movement which did not vary to any great extent from the normal recorded in that period since 1920. The decline was less than that indicated at March 1, 1945. The 15,644 establishments co-operating in the Dominion Bureau of Statistics' latest survey of employment and payrolls had a combined working force of 1,702,983 men and women at March 1. This was a reduction of 2,522 persons, or 0.1 per cent, as compared with 1,705,505 employees at February 1. The relatively slight shrinkage in employment lowered the index, on the basis 1926=100, from 167.2 at February 1 to 166.9 at March 1, as compared with 178.2 a year ago.

There was a small contra-seasonal recession in manufacturing at the beginning of March, similar to the experience recorded at the same date in 1945 and 1944. These three are the only years on record in which the trend at March 1 has been downward. The general loss was not on a large scale, approximately 1,300 persons having been released since February 1. Among the non-manufacturing industries, logging, transportation, and construction and maintenance showed curtailment, chiefly of a seasonal character. There was little change in the service industries, while in mining, communications and trade, expansion was reported. The advances were contrary to the usual movements in these industries at the beginning of March.

In contrast to the slight reduction in the number of persons employed at March 1, the weekly salaries and wages paid at this

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

Classification	1946			1945		
	April	March	February	April	March	February

necessary, for seasonal variation.

† Notes in the hands of the public at the end of the month.

‡ Figures for four weeks

ended April 27, 1946, and corresponding previous periods.

date, aggregating \$55,249,434, showed an increase of \$728,926 or 1.3 per cent over the amount disbursed by the same firms at the beginning of February. The average weekly earnings in recorded employment were \$32.44 at March 1 as compared with \$31.97 at February 1, 1946, and \$32.81 at March 1, 1945; in earlier years for which data are available, the March 1 averages were as follows: 1944, \$32.27; 1943, \$30.72, and 1942, \$27.92.

Prices.—The general index of wholesale prices, on the basis 1926=100, registered a slight increase from 104.6 in February to 104.9 in March, 1946. This compares with an index of 103.0 in March, 1945. In the sub-groups, textile products increased 3.3 points during the month, and fractional increases were recorded in vegetable products, iron products and non-metallic minerals. The non-ferrous metals group index remained unchanged, while chemical products declined 2.7 points and animal products 0.1 points.

The Dominion Bureau of Statistics' cost-of-living index, on the basis 1935-1939=100, advanced from 120.1 for March 1, to 120.8 for April 1, 1946. The principal part of this increase came from the food group, which rose from 133.1 to 135.1. Price increases for butter, pork products, and vegetables were mainly responsible for the change recorded by the food index. Three other group index changes were for fractional amounts only. Home furnishings and services rose from 120.4 to 120.7, clothing from 123.1 to 123.2, and miscellaneous items from 110.9 to 111.0. Fuel and light remained unchanged at 107.2 and rentals at 112.3. The April, 1946 cost-of-living index of 120.8 exceeded slightly the wartime high level of 120.5 recorded for August, 1945. The increase since August, 1939, was 19.8 per cent.

Index of the physical volume of business.—

An increase of 10.2 points, or about 5.6 per cent during the month, brought the index of the physical volume of business to 191.4 in March, 1946. While the index of manufacturing receded 7.2 points to stand at 190.7, a considerable number of the components of the general index reached higher levels in the third month of the year. Sharp advances were recorded in mineral production (from 98.1 to 143.5) and in the new business obtained by the construction industry where the index rose from 258.1 in February to 435.1 in March. A minor increase was shown in the output of electric power. The index of distribution, based upon railway traffic, internal and external trade, rose from 166.7 to 175.9. Advances were shown in carloadings, imports and exports.

Statistics available for the first two months of 1946 illustrating the economic situation in Canada show that the index of the physical volume of business receded to a lower position in continuance of the downward trend evident since the early months of 1944. This index, on the basis 1935-1939=100, was 15.4 per cent lower in the first two months of 1946 than in the corresponding period in 1945. Employment in manufacturing, as measured by the index of industrial employment, showed a reduction of 15.3 per cent from the early months of 1945. Mineral production was uneven; the index of employment, on the 1926 base, was slightly higher at 149.9 than in the 1945 period. Gold receipts at the Mint were 8.1 per cent higher; coal production registered a similar advance and lead production showed a 33.0 per cent increase. On the other hand, copper production declined 27.9 per cent, nickel 41.8 per cent and zinc 15.7 per cent. Steel ingot production was curtailed by 7.8 per cent. The value of exports declined 27.0 per cent but imports showed an increase of 6.3 per cent. The operations of the railways were slightly greater in regard to the tonnage carried and the number of cars loaded. An important advance was also recorded in the volume of newsprint production; the index rose 26.2 per cent in the first two months of 1946 compared with the corresponding output in 1945. In the same comparison, hog slaughterings declined 35.5 per cent, cattle slaughterings 3.8 per cent, creamery butter production 16.9 per cent and factory cheese production 31.7 per cent.

Application of Reinstatement Act to members of interim forces By the terms of a recent Order in Council (P.C. 1298, April 9, 1946), members of the interim forces who through their war service are entitled to benefits under the Reinstatement in Civil Employment Act will retain their full rights under the Act if discharged from the interim forces prior to April 30, 1946.

Furthermore, those who are discharged after April 30 will also retain full reinstatement rights, if they have applied for discharge prior to that date.

The Order amends the Reinstatement Regulations (L.G., Feb., 1945, p. 131; Dec., 1945, p. 1843).

In announcing the Order, the Hon. Humphrey Mitchell, stated that although the Reinstatement Act was a war measure to preserve the civilian employment rights of those returning to pre-enlistment employment from the wartime Armed Forces, this protection had been extended up to the present

to those who considered that their service in the interim forces was necessary during the reorganization period.

The Regulations as amended state that if a member of the interim forces applies for discharge prior to April 30, the period allowed for him to claim reinstatement dates from the day of his discharge. If he has not applied prior to this date, then the period in which he must apply begins on April 30.

If discharged in Canada, the period within which a man may claim reinstatement at civilian employment is three months, and if discharged overseas the period is four months. There is also provision for an extension of the time when through a condition of health an employee cannot return to his employment this soon.

**Amendment
to N.S.S.
Regulations re
ship repair
workers**

An exception to the requirement that workers be given seven days' notice or six days' pay before being laid off, has been made in the case of persons temporarily employed as ship repair

workers.

Under National Selective Service Civilian Regulations such an exception already exists in the case of workers in any industry who have been employed for a period of less than a month. The new amendment extends this period to "a period of less than two months" in the case of ship repair workers. An employer must, however, still give such a worker a notice of separation in prescribed form before dismissing him.

**Voluntary
savings of food
encouraged
in Canada**

The establishment of an Inter-departmental Food Information Committee was authorized by P.C. 1031, March 22, 1946.

The purpose of this Committee is to direct a program of public information designed to encourage voluntary savings in the use of wheat and wheat products, meat, eggs and cheese, to avoid waste in these essential foods, to encourage voluntary reduction of inventory stocks and, wherever possible, to encourage curtailment in the use of wheat as feed for live stock.

Mr. George V. Haythorne, Associate Director, Agriculture, Forestry and Fisheries, has been appointed representative of the Department of Labour on this Committee with Mr. V. C. Phelan as Alternate.

The Committee is holding weekly meetings to consider various types of publicity and educational measures. These include newspaper advertisements, radio broadcasts, posters, film trailers, arrangements for collecting forfeited meat ration coupons, and providing speakers for public meetings.

Appeals are being included to persons, especially in towns and cities, to make their services available this summer for farm work. The contribution that can be made to essential food stocks through substituting vegetables and fruits grown in home gardens is also being stressed.

**Institute of
Industrial
Relations set
up at Toronto
University**

An Institute of Industrial Relations has been established at the University of Toronto, it was announced in April. Designed to promote investigation and research in the field of industrial relations, the institute will seek aid from qualified experts from management and labour, and will publish the results of its research. It will not offer courses for academic credit, but fellowships, scholarships, and grants-in-aid will be made available for graduate students and others qualified.

Professor V. W. Bladen has been appointed director of the institute.

**Growth of
co-operatives
in Alberta**

Information has been published recently by the Provincial Government of Alberta showing the development of the co-operative movement in that province between 1941-1944. An analysis of some of the statistics has been made by the International Labour Office which shows that the total number of co-operative organizations in the province increased during the three years from 192 to 358. Credit unions more than tripled in number, there being 42 in 1941 and 149 in 1944.

Similarly, there has been an increase in the total membership, not only of individual co-operatives, but in the several categories. The number of members increased from 94,546 to 192,175 for all associations reporting. Live stock co-operatives' membership increased from 8,139 to 17,571 and that of consumers' co-operatives from 12,428 to 42,590. Membership in credit unions increased from 4,564 to 14,790 and in dairy and poultry co-operative societies from 13,256 to 62,561.

Trade more than doubled in the case of dairy and poultry co-operatives—\$13,834,000 from \$5,752,000. Business transacted by grain and seed co-operative societies increased from \$2,400,000 to \$45,260,000. Live stock associations increased in number from 24 to 44. In 1941, the 24 associations reported a total business of \$3,998,000, while in 1944, the 44 associations transacted business valued at \$29,030,000. Credit union business grew from \$252,000 in 1941, to \$1,113,000 in 1944.

**Publication of
1946 edition
of official
handbook
"Canada"**

The publication is announced by the Dominion Bureau of Statistics of the 1946 edition of the Official Handbook "Canada".

So far as space permits the handbook deals with all phases of the country's economic organization and statistics are brought up to the latest possible date. The text is accompanied by a wealth of illustrative matter.

The introduction reviews Canada's economic developments during 1945 and is followed by a special article entitled "Trans-Canada Air Lines—Its Place in the Field of Civil Aviation in Canada". The article deals with the development of civil aviation in the Dominion and the organization and growth of the Trans-Canada Air Lines. The chapter material reviews economic conditions under the following headings: population and vital statistics, national income and survey of production, agriculture, forest resources, fisheries production, mines and minerals, water powers, manufactures, transportation and communications, labour, welfare services, construction, external trade, public finance, currency, banking and insurance, and education.

Copies are obtainable at a price of 25 cents from the King's Printer, Ottawa.

**Unemployment
Insurance
Commission
applies stricter
benefit procedure**

As a further means of ensuring that payment of unemployment insurance benefit be made only to persons legally entitled thereto, the Unemployment Insurance Commission has

tightened the benefit procedure in use in National Employment offices.

The new procedure is being applied experimentally in the National Employment Offices in Montreal and Toronto. If it is successful, the intention is to apply it, with possible modifications, in other employment offices throughout the country.

The new system requires all unemployed claimants who are summoned to the local office or referred to employment, to report back to the local office as often as directed by the local employment officers. Anyone failing to do so on the given day will be considered not available for work on that day, and no unemployment benefit will be paid for such day. In this way it is intended to disqualify for the receipt of benefit those who either never go near the employer to whom they were directed or refuse suitable

work when offered. It has been discovered that many persons who did not fulfil all the requirements of the Act, obtained benefit for longer periods than that to which they were legally entitled. An indication that this practice was increasing was given by the growing number of cases "pending" at the close of each month. This obviously meant that many claimants had been referred to employment and had not reported as to the result. It is realized of course that many of them have had a valid reason for not reporting and the new procedure is designed to take care of these *bona fide* cases.

**Repeal of
British Act
of 1927 on
Trade Unions**

The repeal of the Trade Disputes and Trade Unions Act, 1927, will remove from the statute books of the United Kingdom a law enacted after the general strike of 1926. The repeal Bill passed the House of Commons on April 2, 1946, and the House of Lords on May 16.

The chief provisions of the 1927 Act which led the Labour Government to promote its repeal were those—(1) making illegal a sympathetic strike "calculated to coerce the Government"; (2) declaring unlawful picketing "calculated to intimidate" any person; (3) prohibiting an association of established civil servants affiliating with outside unions; (4) making it unlawful for any local authority or other public body to make it a condition of employment that a person must or must not be a member of a trade union, and (5) reversing the procedure laid down by the Trade Union Act, 1913, under which unions could contribute to a political fund except with respect to a member who, in writing, stipulated that no such contribution should be made from his union fees. "Contracting-out" under the 1913 Act was changed to "contracting-in" by the 1927 statute. The latter prohibited political contributions by a trade union in respect of any members who did not authorize such a contribution in writing.

On second reading of the repeal Bill on February 13, Government members stated that there was no likelihood of trade unions striking against the Government and that the area of lawful picketing had been narrowed unreasonably, particularly by the definition of intimidation as any act which was meant "to cause in the mind of a person reasonable apprehension of injury to him or to any member of his family . . .", "injury" including injury in respect of business or employment.

New Towns Bill introduced in United Kingdom

British House of Commons in April.

The new towns are designed to absorb the "overspill" from overcrowded cities. However, they are not intended to be mere dormitories but essentially self-contained communities with their own industries. The Board of Trade already has lists of manufacturers wanting to establish factories in the new areas.

Under this Bill, after making an order designating the site of a new town (which may include as its nucleus an existing town), the Minister of Town and Country Planning will appoint for its development a corporation of up to nine members, after consultation with the local authorities concerned. The corporation will have the power to acquire land by agreement or compulsorily. It is assumed that the provision of houses and services will be undertaken by existing authorities or private enterprise, there being no ban on the latter, though normally leases will be limited to ninety-nine years. Nevertheless, the corporation will have the power to provide any amenity that is lacking, from gas works to a shop or cinema.

Being responsible for making the overall plan the corporation will be able from the start to make provision for services adequate to the eventual population of the town for which the aim is a figure of fifty thousand. Ultimately (e.g. in ten or fifteen years' time) the corporation will be wound up and its property transferred to the appropriate local authority.

Decline in earnings of factory workers in U.S.A.

Labour. This level was approximately the same as that which prevailed in January, 1944, but about 4 cents lower than in January, 1945.

Average weekly earnings, on the other hand, were almost 13 per cent lower in January, 1946 than in January, 1945. Average hours worked per week in manufacturing industries were 41.1, a drop of almost 10 per cent during the period.

Commenting on the figures, Mr. A. F. Hinrichs, Acting Commissioner of Labour Statistics said: "The decrease in gross aver-

The development of some ten to twenty new towns is provided for in the New Towns Bill which was given first reading in the

age hourly earnings of factory workers was due both to decreases of employment in higher wage industries and to reduction of overtime hours paid for at premium rates. Numerous wage-rate increases equally evident in both durable and non-durable goods groups were responsible for restoring hourly earnings for all manufacturing industries combines to their position above the \$1 mark in January."

Domestic servants' Workmen's Compensation compensation in Law of New York State New York State

Governor John Dewey. The new law, which is to become effective January 1, 1947, makes it mandatory for employers to insure their servants against injury or death caused by accident while at work, if employed 48 hours or more a week by the employer.

The amendment covers such domestic servants as cooks, butlers, housemaids and nursemaids at present excluded from the compensation law. Chauffeurs, gardeners and similar workers are included under the existing provisions.

Liability ranges up to \$15,000 for total disability or death and is collectable in a lump sum, on a summary court judgment, by seizing the employer's property, attaching his earnings, or similar measures. Dwyer W. Shugrue, general counsel to the State Workmen's Compensation Board, in explaining the procedure for enforcement, stated that when a just claim is filed against an uninsured employer and prompt and full payment is not made "we simply deposit our claim with the court and within ten days get a summary judgment which is collectable in the usual way. There is no trial. It makes no difference whether the accident was the employee's own fault.

"The employer is not, however, subject to the criminal penalties that industrial employers are . . . for neglecting to insure his servants."

In the event of the injured servant suing for compensation in the courts, the employer, in defending himself, is enjoined by the new amendment from pleading contributory negligence on the part of the employee, or using the "assumption of risks of employment" or "fellow servant" defences.

The State Labour Department estimated that 40,000 to 50,000 domestic servants in the seventeen largest cities would come under the law's ambit when it becomes operative.

Message of Minister of Labour to Canadian Workers

On May 6 the Minister of Labour, Hon. Humphrey Mitchell, directed the following message "to Canadian Workers":—

During the last War and up to to-day Canada has managed by means of price control to maintain a general price level in this country which has enabled wage-earners to purchase goods and services at reasonable prices. This is in striking contrast to conditions in many other countries where, due to failure to control prices, the purchasing power of wages is much less than before the War and the standard of living lowered to that extent.

We did not have the same measure of price control in Canada during the first World War; and many will remember the very high prices paid for everything during that War and after—particularly after. It is revealing to compare the prices of the following few staple food items then and now:

	March, 1919 (Cents)	1920 (Cents)	March, 1946 (Cents)
Butter, per pound.....	58·0	74·8 (Jan.)	44·7
Eggs, per dozen.....	54·6	88·8 (Dec.)	43·8
Sugar, per pound.....	11·9	25·0 (Aug.)	8·6
Bread, per pound.....	7·9	9·7 (Sept.)	6·7
Milk, per quart.....	13·7	15·6	10·5

It must be borne in mind, however, that prices cannot be kept under control unless at the same time there is made effective a measure of wage stabilization. This is because wages form a very considerable part of the cost of producing the goods and services we all must use. Wages have value only in relation to their purchasing power. In other words, the real value of wages depends upon the amount of goods and services wages will buy. Obviously higher wages mean nothing if they are absorbed by higher prices. Increases in wage rates, where they cannot be taken care of by the employer out of profits, are bound to increase the costs of goods and services.

It was for this reason that during the War just ended the Dominion Government adopted what it considered a fair and reasonable wage control policy. Under this policy wages were stabilized but were not frozen. Thousands of wage rate increases were ordered by War Labour Boards, so that notwithstanding the adoption of a general policy of stabilizing wage rates, wages being paid to-day in the main occupational and industrial groups are the highest in Canada's history.

Under our wage policy legislation, a War Labour Board may direct any employer to raise wages if it can be shown that he is paying less than the going wage for similar work in his own or comparable locality. A Board may also authorize an employer to raise wages on any other reasonable basis provided he can continue to sell his goods or services without raising prices.

If workers feel they are justified in seeking a wage increase, steps should be taken to have the matter submitted to the appropriate War Labour Board on which organized labour is properly represented. Every such application has the assurance of being considered on its merits. Strikes to support such applications are prohibited but this is a necessary safeguard to ensure the maintenance of the Government's price-wage policy. In the long run, that policy has benefited and will continue to benefit the Canadian worker by protecting his living standards and avoiding an inflationary rise in prices, which would cancel the advantage gained by an increase in real wages during the war years and since.

Delaying Factors in Industrial Readjustment

Results of Study Conducted by Department of Reconstruction and Supply

UNDER the title, "Obstacles Currently Delaying Industrial Readjustment", the Department of Reconstruction and Supply issued recently a brochure embodying the results of an inquiry conducted by its Economic Research Branch.

As a basis for the study, a special questionnaire was sent to the 700 plants which report each month to the Department of Reconstruction and Supply. These plants, at the time of the inquiry, employed about 400,000 workers, "or just under 40 per cent of all Canadian manufacturing employment. They include almost all major war contractors and nearly all plants with over 1,000 employees regardless of the extent to which they had been engaged on war work. Under the circumstances, coverage is high in the metals, chemicals, rubber, petroleum, primary textiles and meat and fish packing industries, but is low in other foods, in clothing, household furnishings, lumber, and in most relatively small scale industries".

In analyzing the reports it was recognized that they were obtained from a large proportion of the industries with the heaviest reconversion problems, "but only a relatively small proportion of manufacturers in most of the consumer non-durables, low-priority, low-wage scale industries which may have heavy replacements, modernization and expansion problems".

The questionnaire sought to establish the nature of the factors that were limiting production and the probable extent of their effect on employment by March 1, 1946.

Summary of Findings

Of the 700 plants that reported in January, 38 per cent "expected various shortages of material, labour, parts, equipment, tools, foreign exchange, etc., during the first two months of the year to prevent reconversion, expansion or complete utilization of their facilities, rapidly enough to meet the demand for their products".

As a result of the above shortages it was expected that employment in manufacturing would increase only slightly during the first two months of the year—probably by less than 10,000—whereas a further increase of about 60,000 could have been expected in the same period had these shortages been re-

moved. It was emphasized that these are very approximate figures and must be treated with reserve.

That these shortages continued much as was anticipated is indicated by the fact that employment in manufacturing actually increased only 11,000 between January 1 and March 1.

The principal types of shortages were found to be; (1) materials and parts; (2) labour; and (3) delays in obtaining necessary equipment and tools. Other factors mentioned were inadequate factory space and housing accommodation for additional labour, and import and export controls of other countries.

Concerning the shortages of materials and parts, the report indicates that cloth, particularly woollens normally imported from Great Britain, rayon and cotton yarns, parts of radio and electrical equipment on order in the United States, and meat for packing were most frequently listed as retarding production. Shortages of sheet and coil steel, castings and forgings were reported by the iron and steel fabrication plants. Steel shortages became more acute towards the end of the period reviewed, owing to labour disputes in the United States.

Labour shortages, particularly skilled labour, were found to be the next most important "limiting factor". The principal industries affected by such shortages, were the consumer non-durable, low-wage, low priority industries, such as primary textiles, clothing and footwear. There were also shortages of moulders, pattern- and tool-makers, die makers and general foundry workers.

The plants most affected by delays in obtaining the necessary equipment and tools were pulp and paper, clothing and basic materials and radio and communications. It is stated that these firms, in many instances, were unable to maintain their equipment during the war because of low priorities and that others were faced with a heavy reconversion problem. Slow deliveries from the United States as a result of labour troubles were given as one of the chief limiting factors.

Of the other causes retarding conversion, the need for new factory space was given as important in a number of instances. In most cases it was the intention to build new plants, but the shortage of building materials and skilled labour delayed such action. Then, too,

several plant managers reported that the entry of their products into Great Britain and other countries in the Sterling area was being restricted because of exchange rates and import controls. It seemed probable that the Canadian loan to Great Britain would modify this condition.

Effect of Shortages on Employment

About half of the firms reporting shortages estimated the number of employees affected and, on the basis of these figures, an attempt was made to estimate the probable effect of shortages on manufacturing employment as a whole at March 1, 1946. Estimates for most heavy industries and a few light ones were based on good coverage. "For other industries, however, such as vegetable foods, beverages, and wood and paper products, no samples, or only precariously small ones were available. For most of these groups rough estimates were made on the assumption that the effect of shortages was about the same as in kindred industries for which data were available". It is pointed out that for these reasons the following estimates must be treated with reserve, as a first attempt based on limited data and on an incomplete sample.

The actual employment at January 1, 1946 in the consumer goods group (clothing, primary textiles, footwear, rubber clothing, animal foods and tobacco, vegetable foods, beverages, furs) was 346,000. The estimated additional employment had shortages been removed at March 1, 1946, was placed at 36,700.

In the reconversion group (industrial equipment and foundries, automotive, electrical

apparatus, radio, etc., agricultural machinery) the actual employment at January 1 was placed at 221,000 and the estimated additional employment at March 1 would have been 15,200.

The wood, paper and miscellaneous material group (construction and miscellaneous material, wood and paper products) employed 236,000 at January 1, which it was anticipated could have been increased by 8,200 by March 1, 1946.

In the "minor shortage group" (steel, base metals, chemicals, shipyards, aircraft, miscellaneous industries) employment at January 1 was stated to be 242,000. It was expected that an additional 1,900 could have been employed in this group by March 1, 1946.

"In the primary textiles the skills most frequently mentioned were weavers, spinners, winders and loom-fixers, and in the boot and shoe industry, fitting department operators. In heavy industries where plants are being reconverted to civilian production the need is for tool makers, die and pattern makers, sheet-metal workers and draftsmen. A number of plants in both types of industries stated that the operation of price ceilings made it difficult for them to pay the high wages demanded by labour and still get a normal rate of return on capital."

Equipment and Tools.—"Contrary to what was generally expected, only 49 of the 700 plants reporting stated that their production was being limited by need for equipment or tools. It is quite probable that the number listing this shortage would have been some-

RELATIVE FREQUENCY OF LABOUR SHORTAGES IN INDUSTRY

	Total	Plants Reporting					
		Labour Shortages—Skilled (Sk) Unskilled (U)					
		Number of Plants			Per cent of Total		
		Total	Sk.	U.	Total	Sk.	U.
Primary textiles.....	49	30	25	19	61	51	39
Clothing.....	38	20	18	5	55	47	13
Footwear-Rubber clothing.....	12	6	4	3	50	33	25
Agricultural machinery and equipment..	9	4	4	1	44	44	11
Pulp and paper.....	22	6	6	27	27
Radio and communication.....	7	3	2	1	18	12	6

ALL INDUSTRY.....	700	124	105	47	18	15	17

what higher if industry generally felt sure it could obtain adequate supplies of raw materials to increase its production."

Factory Space.—"Of the firms needing additional factory space, the majority wanted to build new plants or enlarge existing ones, rather than rent. Several firms reported that they were already building additions to their plants, others were planning to build when materials and equipment were available. A Montreal firm manufacturing marine valves, stated that to meet the demand for their product they would have to enlarge their factory, but the problem was to find additional land on which to build."

Import and Export Controls of Other Countries.—"Industries most affected by export controls were boot and shoe firms and those engaged in the clothing industries. A number of plants in the latter industry stated that the uncertainty of release of sufficient quantities of wool by the British Wool Control Board made it risky for them to expand existing production facilities. Heavy indus-

tries such as producers of agricultural equipment, alloys, and tools were having difficulties with import controls. Loss of markets through withdrawal of import licences by the British West Indies and high import tariffs in Australia was reported by a Kitchener firm manufacturing farm and industrial equipment. In general, import restrictions in all Sterling areas seemed to be causing some dissatisfaction."

Other Factors.—"Labour unrest and strikes in their own or in their customers' plants were listed by a number of firms in the automobile and other heavy industries as hindering their expansion. Several plants, including two textiles firms in Quebec, said that they could not obtain the necessary labour because of the housing shortages in the vicinity of their plants. Price ceiling was another factor which was frequently listed, particularly by smaller firms, several of which stated that they lacked sufficient capital for expansion because of high costs of labour and materials, and the ceiling prices on their products."

Apprenticeship in Queensland

AMENDMENTS in 1945 in the Queensland Apprentices and Minors Acts, 1929-1934, are reported in the June issue of the *Queensland Industrial Gazette*.

The first Act regulating apprenticeship in Queensland, passed in 1924, put in statute form regulations which had been operating under the Arbitration Court for some time. Under the 1929 revised Act, the State apprenticeship system, one of the first to be established, has been continued with some modifications. An Apprenticeship Executive advises the Minister and drafts regulations such as those fixing rates of pay, committees supervise apprenticeship in particular trades, and advisory committees function for particular localities.

A probationary period of six months instead of three, including 13 weeks training in a technical college, is to be required under the 1945 Act. This technical training is compulsory, unless exemption is granted, and attendance is to be during working hours, the apprentice being paid by his employer at a prescribed rate. If attendance during probation is not possible, this instruction may be taken during the first year.

During his second, third and fourth years, an apprentice must study at a technical school for one full day in every two weeks those subjects selected by the Group Committee for his trade, payment for the time to be at a prescribed rate. In addition, evening instruction of at least two hours a week must be taken during the first year, and four hours a week in succeeding years. Wages are not payable for these hours of instruction unless, because of the nature of his work, he is unable to attend during his own time. For attending less than 80 per cent of the time, he may forfeit his regular increase.

The rates of pay during a five-year apprenticeship are 17½ per cent of a journeyman's rate for the first year, 30 for the second, 45 for the third, 57½ for the fourth and 72½ per cent for the fifth year. For a shorter apprenticeship, the average rate must be at least 44½ per cent of the journeyman's.

Welfare officers with authority to enter and inspect premises are to interview apprentices, examine books, ensure good relations between employer and apprentice, and to see that the trade experience provided by the employer is progressive and co-ordinated with technical college training.

Rehabilitation

Training on the Job for War Veterans

EMPLOYER-RELATIONS sections of the National Employment Service will now assist in locating training-on-the-job opportunities for Canada's veterans. This new arrangement is provided for in a recent agreement between the Canadian Vocational Training branch of the Department of Labour and the National Employment Service. Previously, training-on-the-job opportunities were arranged by Field Officers of Canadian Vocational Training only.

In view of the extensive employer contacts available through the National Employment Service, it was felt that an additional number of training opportunities could be found, with the assistance of the employer-relations sections which work out of the local employment offices.

The Department of Labour has commenced a publicity campaign, designed to familiarize employers with the details of the training-on-the-job plan for veterans. It is expected that this campaign will result in considerable interest among employers, and if visits from representatives of the Employment Service are made as a follow-up to the publicity campaign, many new openings for training on the job campaign will be located.

Under the new arrangement, regional and local representatives of Canadian Vocational Training, and the employer-relations officers of the National Employment Service, will co-ordinate their efforts to explain to the employer the details of the CVT training-on-the-job program. This plan, designed to provide training which will lead into permanent employment, is of benefit to both the employer and the veteran.

The financial arrangement is that the trainee is assessed in relation to the job for which he is training, and that the employer is required to pay wages in accordance with the trainee's earning capacity from the employer's viewpoint. Then the Dominion Government supplements the man's earnings to a maximum of about 80 per cent of the full rate of pay for a qualified workman, so that in this way the veteran who is training on the job will be assured of a reasonable living wage during the period of training.

As heretofore, arrangements for the training of veterans will be made through officials of Canadian Vocational Training after approval is given the applications by the Department of Veterans Affairs. National Employment Service officials will assist in locating the opportunities.

The rehabilitation training program is rapidly moving toward its peak, in so far as

applicants from among the veteran body are concerned. CVT officials have stressed, however, that it is highly important there be an intensification, rather than a decrease, in the development of training openings. At the moment, studies are being made to determine the scope of job opportunities by industry and occupation.

Regarded by many as the most effective form of training, since it leads directly into employment, training on the job under the auspices of CVT is now being given to about 18 per cent of the veteran trainees—the total being just over 36,000 at the end of March, 1946. It is important to industry in this period of reconversion, and to veteran alike, to increase substantially the number of those who are training within industry.

Arrangements are being made to keep NES job placement officials informed of the progress of veterans in training schools, so that jobs may be canvassed for them before they enter the labour market directly. It is expected that the majority of those who train on the job will be retained by the employer with whom they have trained.

The advantages of training on the job, regularly stressed to employers, by CVT and others responsible for rehabilitation training, are twofold. First of all, the facilities for training on the job are ready at hand, so that it is not necessary for new classrooms to be set up, new equipment to be secured, nor instructors to be obtained. The second advantage is that where training on the job is approved, it is only because it would appear that the veteran will be retained by the employer with whom he is training. Thus flexibility and employment prospects both indicate the distinct advantages of this method of training.

Training-on-the-Job Booklet

A six-page folder entitled "Many Veterans are Training on the Job" has been published by the Department of Labour to aid in the expansion of the training-on-the-job program. This publication, which has been prepared with illustrations and outlines a specific plan which employers can follow if they wish to hire a veteran under the training-on-the-job program, has been distributed to employers, trade unions, rehabilitation officials, and other groups. The booklet is sent out together with a "return" card, which when filled out by an employer constitutes a request for a visit from a Department of Labour representative to discuss the details of the training-on-the-job program.

International Labour Organization

Ratification by Canada of Dockers and Statistics Conventions

ON March 2, 1946, the Instruments of Ratification by Canada of the following International Labour Conventions were transmitted to the Secretary-General of the League of Nations for deposit:—

No. 32, concerning the Protection Against Accidents of Workers Employed in Loading or Unloading Ships (Revised, 1932);

No. 63, concerning Statistics of Wages and Hours of Work in the Principal Mining and Manufacturing Industries, including Building and Construction, and in Agriculture, 1938.

As a preliminary to ratification, the two Conventions were approved by both Houses of Parliament during the 1945 Session (L.G., 1946, p. 205). Ratification was then authorized by Orders in Council on February 28, 1946 (P.C. 654 and 655). Registration by the Secretariat of the League of Nations under the Constitution of the International Labour Organization on April 6 completed the necessary procedure and the two Conventions will come into effect in Canada twelve months

after the date on which ratification was registered (April 6, 1947).

Pending an amendment in the ILO Constitution to permit suitable arrangements with the United Nations, following the dissolution of the League of Nations, copies of the Instruments of Ratification of the two Conventions referred to were forwarded to the United Nations as well as to the League of Nations.

Chile Ratifies ILO Convention

The International Labour Office recently announced that Chile had registered its ratification of the convention forbidding the employment of women underground in mines. The convention has been in force since 1937 and had previously been ratified by 24 countries.

This registration brings up to 34 the total number of conventions ratified by Chile and up to 917 the total of ILO conventions ratified to date.

Proposed Amendments to the Constitution of the International Labour Organization

Report of Conference Delegation on Constitutional Questions—Application of Conventions to Federal States

IMPORTANT proposals for amending the Constitution of the International Labour Organization and for improving the machinery of the Organization are contained in the Report of the Conference Delegation on Constitutional Questions. The Delegation, or "Working Party", as it has been called, was appointed by the 27th Session of the International Labour Conference at Paris in November, 1945, "to review all outstanding questions relating to the Constitution and constitutional practice of the International Labour Organization". The Delegation has 12 members, six representing Governments, three employers and three workers. Its chairman is G. Myrddin Evans, Chairman of the Governing Body of the ILO and Deputy Secretary of the British Ministry of Labour and National Service.

The Report has been referred to Governments for their observations with a view to their consideration by the 29th Session of the Conference to be held at Montreal in September.

Certain amendments in the ILO Constitution were made necessary by the impending dissolution of the League of Nations of which the Organization was a semi-autonomous part as provided by the Peace Treaties of 1919. The Paris Conference approved certain urgent amendments: (1) to enable any member of the United Nations to join the ILO; (2) to permit the Organization to make financial arrangements with the United Nations or to make its own; (3) to permit amendments in the Constitution to be made by the ILO itself instead of requiring the approval of members of the League of

Nations Council. These amendments are now in process of being ratified by the member states.

The amendments recommended by the Conference Delegation can be classed under three heads: those consequential upon the dissolution of the League of Nations; those designed to facilitate co-operation with the United Nations; and amendments to define more clearly the obligations imposed on member states and to improve the machinery of the Organization in accordance with the principles and practice developed during the years of its operation since 1919. Recommended, too, was the insertion in the Constitution of the "Declaration of Philadelphia" which was adopted unanimously in 1944 by the International Labour Conference. This declaration asserts the primacy of the social objective in international policy, defining this as the attainment of conditions

in which all human beings irrespective of race, creed, or sex have the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity.

As regards the League, the Delegation proposes to delete all references in the Constitution to the League or its officials and to transfer the functions performed by the League in part to the Governing Body of the ILO and in part to its Director.

Co-operation with the United Nations

Supplementing the more urgent amendments referred to member states by the Paris Conference with regard to the United Nations, the Delegation recommended that the Director of the ILO should be required to communicate to the Secretary-General of the United Nations for registration, full particulars of all ratifications of International Labour Conventions, acts of denunciation and declarations. It was suggested also that the Constitution should provide for co-operation with public international bodies the members of which are States or Governments and for participation by these organizations in the ILO without the privilege of voting.

Other amendments concerning relations with international organizations may be considered desirable after the negotiations which are contemplated by the Charter of the United Nations for securing close relations between specialized agencies and the United Nations.

Conventions and Recommendations

With a view to securing a wider application of the decisions of the International Labour Conference, the Delegation recommended

several amendments to the Constitution to improve the effectiveness of the system of Conventions and Recommendations.

Article 19 (5) of the present Constitution provides:

5. Each of the Members undertakes that it will, within the period of one year at most from the closing of the Conference, or if it is impossible, owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than 18 months from the closing of the session of the Conference bring the Recommendation or draft Convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.

The "intention of the authors of the Constitution was that the competent authority should normally be the legislature". The Delegation did not consider it necessary to clarify the obligation imposed by Article 19 (5) but it made certain recommendations to ensure that the obligation was carried out. It is proposed to require not only the Director of the ILO but employers' and workers' organizations to be informed by the Government concerned of the measures taken to bring the Convention or Recommendation before the appropriate legislature and of the action taken by the legislature. When no legislative action is taken, the Member State will be required, according to the proposal, to report to the Director concerning its law and practice in regard to the matters dealt with in the Convention or Recommendation, the extent of the effect given to its provisions by various means, including collective agreements, and a statement of the difficulties which are preventing its adoption.

The insertion of certain uniform clauses in Conventions and Recommendations was proposed. One clause suggested to be included in Conventions and Recommendations, is to the effect that the adoption of a Convention or Recommendation would not be deemed to affect existing conditions which are more favourable to the workers. It was recommended, too, that a similar provision should be made in the ILO Constitution. The great importance of ratification of Conventions by high-standard countries was stressed even when such action is unlikely to mean improvement of these countries' standards.

A model clause proposed for inclusion in appropriate Conventions would require laws giving effect to those Conventions to provide for the maintenance of an adequate system of inspection to ensure that the obligation assumed is being carried out. Further, a Convention on labour inspection, it was con-

sidered, should be adopted by the International Labour Conference.

Federal States

Federal countries and their problems with respect to ratification of Conventions received special attention. It has been recognized as desirable that there should be as much reduction as possible in the disparity in obligations between federal and unitary States which has resulted from the provision of the ILO Constitution permitting federal States which have limited power in labour legislation to treat Conventions merely as Recommendations.

At Paris, the Conference Committee on the Application of Conventions recommended that in federal countries, where the Provinces or States have, or share, jurisdiction over labour matters, the Federal Government should make arrangements for the reference to the Provincial or State legislative authorities of those Conventions and Recommendations over whose subject-matter its power is limited, with a view to appropriate action. The Committee recommended, too, that the Federal Government should arrange, with the concurrence of the Governments concerned, for periodical consultation between the Federal and Provincial authorities, in which representatives of workers' and employers' organizations should participate in an appropriate manner, with a view to promoting co-ordinated action to give effect to such Conventions and Recommendations. The Federal Government should also report regularly to the Director of the ILO on the action taken by the Provinces or States to give effect to Conventions and Recommendations.

The Delegation proposed that, before it framed recommendations concerning amendments to the Constitution in regard to federal countries, it should discuss these proposals of the Paris Conference Committee and any others with representatives of federal countries at a meeting to be held at Montreal on May 14, 1946, immediately before the meeting of the Governing Body.

Representation

As regards suggestions that employers and workers should be given equal representation with Governments at the Conference and on the Governing Body, the Delegation con-

sidered that the present proportion of two Government representatives to one of employers and one of workers should not be changed; any reduction in the Government vote would seriously impair the authoritative nature of the decisions made by the Conference. It was, however, recommended that the Governing Body should have two vice-chairmen representing employers and workers, respectively, and that the Conference should have three vice-chairmen representing employers, workers and Governments.

Regional Conferences

The importance of regional conferences was emphasized by the Delegation as they afford opportunity for discussing regional problems and enable the framing of general Conventions in the light of adequate knowledge as to the need for modification because of special circumstances in certain countries.

Other Recommendations

Certain other recommendations are of special interest. It was suggested that when international economic agreements are negotiated, they should contain, where appropriate, provisions to promote the raising and equalizing of labour standards. A special agricultural session of the International Labour Conference in the near future was recommended and committees for salaried and independent workers. Closer relations should be developed with the co-operative movement, in the opinion of the Delegation.

It was pointed out, too, that more adequate national machinery for regular co-operation between the Government and labour and employer organizations in the various countries would be of value in strengthening the practical influence of the International Labour Organization on industrial life.

An amendment proposed in the Constitution would provide for representatives of dependent territories to act as advisers to Conference delegations. Another suggestion was that the Constitution should permit the International Labour Office, subject to the direction of the Governing Body, to assist Governments, at their request, in framing laws and regulations on the basis of the decisions of the Conference and in improving administrative practices and systems of inspection.

American Regional Conference Held in Mexico City

THE third regional Conference of the American members of the International Labour Organization took place in Mexico City, between April 1 and 16. The first such Conference was held at Santiago de Chile in 1936, and the second at Havana, Cuba, in 1939.

Canada was represented by a tri-partite delegation including workers', employers' and Government members.

Matters under discussion included industrial relations, labour inspection, and vocational training. In all some twenty-eight resolutions were adopted, the result of careful study by four committees and a number of sub-committees.

The following is a brief summary of the more important resolutions adopted at the Conference. The official report of the Canadian Government delegates will appear in next month's issue of the LABOUR GAZETTE, together with the texts of the resolutions.

Eleven resolutions were passed on the subject of industrial relations. Three of these dealt with the fundamental principles of a sound system of industrial relations, namely, freedom of association; protection of the right to organize and bargain collectively, and voluntary conciliation and arbitration. Other important decisions in the field of industrial relations which were made the subject of resolutions dealt with the application of collective agreements to all employees in a bargaining unit, the principle of equal wages for equal work, and the maintenance of the highest possible real wage levels.

The subject of an adequate system of labour inspection was carefully studied by the Conference and resulted in a resolution proposing standards by which labour legislation might be more effectively applied by means of improved inspection systems and the educational activity of the inspectors among employers and workers, for better enforcement of legislation.

The Conference devoted much careful thought to the subject of vocational and

technical education and adopted a Resolution aimed at satisfying the immediate and future need for trained workers in industry. The Resolution calls for the provision of opportunities for the more complete development of the skills of young persons of both sexes and to provide trained persons with access to employment opportunities.

The Conference also requested the Governing Body of the International Labour Office to bring to the attention of the Economic and Social Council of United Nations the problem of the industrialization of Latin America and to study the problem in collaboration with other interested organizations. Questions concerning inflation, migration, and the Indian population were also the subject of resolutions asking the Governing Body to initiate further action either by referring the proposals to the countries concerned or by establishing committees of experts to make further studies and report their recommendations to subsequent and early Conferences.

The Canadian delegation to the Mexico Conference was composed of:—

Government Delegates

Dr. H. L. KEENLEYSIDE, Canadian Ambassador to Mexico.

Mr. C. C. EBERTS, Assistant to the Government Delegate, Second Secretary, Canadian Embassy, Mexico.

Advisers to the Government Delegates

Mr. PAUL GOULET, Assistant to the Deputy Minister of Labour, Ottawa.

Mr. J. S. McCULLAGH, Assistant Director of Industrial Relations, Department of Labour, Ottawa.

Employers' Delegate

Mr. C. E. SHUMAKER, Manager of Industrial Relations, Goodyear Tire and Rubber Company, New Toronto.

Workers' Delegate

Mr. J. B. WARD, Chairman, General Conference Committee, Standard Railway Labour Organizations, Montreal.

Retirement of Mr. Adolf Staal

The retirement of Mr. Adolf Staal as Chief of the Workers' Organizations Service of the International Labour Organization took place on April 4, 1946. During his seventeen years of office in this capacity Mr. Staal had served as liaison officer between the ILO and the international and national trade union movement acquainting them with the services

provided by the ILO and acting as a guide to its procedures.

On a number of occasions Mr. Staal has been present at conventions of labour organizations in Canada and has addressed the delegates. He is a native of Holland.

Mr. Staal's successor as chief of the workers' section of the ILO is Mr. Jan Schuil.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

Electrical Contractors, London, Ont., and International Brotherhood of Electrical Workers, Local 120.

Forum Cigar and Delicatessen Company, Limited, Montreal, P.Q.

Guelph Stove Company, Limited, Guelph, Ont., and United Steelworkers of America.

Sifto Salt Company, Limited, Sarnia, Ont., and Local 456, UAW-CIO.

A. W. Kritsch Limited, Ottawa, Ont.

Ottawa Dairy Company, Producers Dairy Limited, Clark Dairy Limited, Central Dairies Limited, and National Union of Stationary and Operating Engineers, Local No. 1.

Grey Goose Bus Lines Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1374.

Southern Canada Power Company, Limited, and National Catholic Syndicate of Construction Trades Inc.

Western Glove Works Limited, Winnipeg, Man., Hendersons Limited, Winnipeg, Man., and United Garment Workers of America, Local 35.

Dominion Tar and Chemical Company, Limited, Sault Ste. Marie, Ont., and United Steelworkers of America, Local 2251.

Dominion Glass Company, Limited Montreal, P.Q.

Monarch Overall Manufacturing Company, Limited, Selkirk, Man., and United Garment Workers of America, Local 35.

The Procter and Gamble Company of Canada, Limited, Hamilton, Ont.

Canadian Wright Limited and British Aeroplane Engines Limited, Montreal, P.Q.

International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 880, Windsor, Ont.

Canadian Johns-Manville Company, Limited, and Syndicat National Catholique de l'Amiante d'Asbestos, Inc.

Re: Electrical Contractors, London, Ont., and International Brotherhood of Electrical Workers, Local 120

Reasons for Decision

This is an application by the Electrical Contractors Association of London, Ontario, by way of appeal from an order of the Regional War Labour Board for Ontario directing the individual members of the said Association to increase the rate of pay for their journeymen electricians from \$1.06 per hour to \$1.10 per hour effective November 9, 1945.

In addition to the written submissions, the Board had the advantage of hearing representatives of the companies involved and Local Union 120, International Brotherhood of Electrical Workers. The Board finds that the rate of \$1.06 per hour is not "low" but is in fact higher than the prevailing rate for journeymen electricians in larger centres throughout Ontario with the exception of Toronto and Windsor. Toronto and Windsor have always had a higher rate than other centres in Ontario. The present rate of \$1.06 per hour is 26 cents higher than the rate paid in the London area in 1939, and repre-

sents a greater increase over the 1939 rates than any other centre in Ontario including both Toronto and Windsor. The prevailing rates show an increase over the 1939 rates in Toronto, 21 cents; in Hamilton, 20 cents; in Windsor, 11 cents; in Ottawa, 16 cents, and in Brantford varying from 11 cents to 21 cents. For these reasons, it cannot be said that any gross inequality or gross injustice exists in the prevailing rates.

Acting on a suggestion that an application would be made to the Ontario Regional War Labour Board for an increase in wages the appellant contractors on March 26, 1945, wrote the Regional Board outlining their position. However, the application for an increase was not made to the Regional Board until October 4, 1945 and the Regional Board for Ontario proceeded with the application without sending either a copy of the application to the employers or giving the employers an opportunity to be heard.

The first notice of such application received by the employer contractors was a copy of

the Finding and Direction. In all such cases, interested parties should be notified and given an opportunity to be heard or make a submission and this not having been done the present order cannot stand.

The appeal will be allowed and the order of the Regional Board for Ontario dated November 9, 1945, will be set aside. Finding and Direction will issue accordingly.

April 6, 1946.

Re: Forum Cigar and Delicatessen Co., Ltd., Montreal, P.Q.

Reasons for Decision

The Forum Cigar and Delicatessen Co., Ltd., applied on November 14, 1945, to the Quebec Regional War Labour Board for an increase of the salary of its president and general manager from \$223.33 per month to \$249.18 per month effective from February 1, 1942. By its order dated December 11, 1945, the Regional Board allowed the application and increased the salary of its president and general manager from \$223.33 to \$249.18 per month, but effective from November 14, 1945, the date of the application. From that part of the order fixing the effective date the com-

pany appeals to this Board for an order that the effective date be February 1, 1942.

It has long been the established practice of this Board to make its orders effective from the date of application unless some good reason is shown to warrant an earlier effective date. The Regional War Labour Board for Quebec has quite properly followed this practice in the present application and no good reason having been shown for an earlier effective date the company's appeal will be dismissed.

Finding and Direction will issue accordingly.

April 8, 1946.

Re: Guelph Stove Company, Limited, Guelph, Ont., and United Steelworkers of America

Reasons for Decision

By its order dated January 12, 1946, the Regional Board for Ontario directed the Guelph Stove Company, Limited.

- (1) to increase its basic labour rates from 50 cents to 55 cents per hour retroactive to March 12, 1945.
- (2) to maintain all other wage rates without change.
- (3) to pay a premium rate of time and a half after 50 hours per week retroactive to March 12, 1945, and refused the Union's request for an off-shift bonus.

Leave to appeal from this order was granted to both the Company and the Union by the Regional Board.

The Company has appealed from that part of the order directing it to increase its basic labour rate from 50 to 55 cents per hour and establishing a premium rate for overtime.

The Union has entered a cross-appeal and asks this Board:

- (a) to establish a basic labour rate of 60 cents per hour.
- (b) to establish a premium rate for overtime after 45 hours.
- (c) to establish an off-shift bonus.
- (d) to establish a 45-hour week.

At the Hearing, the Union abandoned its request for a 45-hour week and amended its notice of appeal to provide for the premium rate for overtime after 48 hours in place of 45 hours.

There are 300 employees represented by the Union on this application. While the basic labour rate is 50 cents per hour, there are

only six persons employed by the Company at this rate; 14 persons are employed at 52 cents, and 35 persons at 54 cents per hour. It is apparent, therefore, that only 55 persons out of the total of 300 will be beneficially affected in varying degrees by the order appealed from. Both the Company and the Union agree that the entire wage structure depends upon the basic labour rate, and it is therefore difficult to understand why the Regional Board would direct the Company to maintain all other wage rates without change.

In making the said order, the Regional Board undoubtedly thought they were correcting an injustice, but in so doing, the Regional Board has either eliminated or narrowed the differentials that mark the different gradations of employment which cannot be regarded as fair and reasonable insofar as the great majority of the employees is concerned. The Board expresses no opinion as to what is a proper labour rate in this enterprise, but does agree that the entire wage structure depends upon the basic labour rate when established.

It transpired at the hearing that negotiations between the Company and the Union were interrupted by the original application to the Regional Board, and also, that so soon as this appeal is disposed of both parties intend to re-open negotiations. The Board considers this most desirable and expresses the hope that these negotiations will be opened without undue delay. The appeal will be allowed and that part of the said order

fixing the basic labour rate at 55 cents per hour will be set aside and that part of the said order dealing with premium rates for overtime will be varied by fixing April 28, 1945 (the date of application) as the effective date.

The order of the Regional Board with respect to off-shift differentials will not be disturbed

and the Board would point out that under P.C. 9384 as amended by P.C. 348, Section 25, sub-section (1) (c) the question of (off-shift differentials) is a matter for negotiation between the parties.

Finding and Direction will issue accordingly.

April 11, 1946.

Re: Sifto Salt Company, Limited, Sarnia, Ont., and Local 456, U.A.W.-C.I.O.

Reasons for Decision

The Union Local 456, UAW-CIO representing the employees of Sifto Salt Company Limited of Sarnia, Ontario, applied to the Regional War Labour Board for Ontario, among other things, for an off-shift differential of 5 cents per hour which was refused by the Regional Board. Leave to appeal was granted by the Regional Board and the hearing before this Board on the said appeal was limited to the single question of the off-shift differential.

The Regional Board, however, granted an increase to certain classifications particularized in the Board's order. The Company desiring to appeal from this part of the Regional Board's order, was late in its application to the Regional Board for leave to appeal and now comes to this Board for leave to appeal which was heard by this Board as a cross-appeal.

The payment of an off-shift differential has never been a practice in this industry. Workmen entering the employ of this Company know this and also know the plant operates 24 hours a day and that the employees rotate on the various shifts. It has never been the practice of this Board to impose such a con-

dition in the absence of agreement and the Board is confirmed in that practice, in that under the amended Wartime Wages Control Order, off-shift differentials are a matter for collective bargaining.

The Board has carefully examined the rate schedule directed by the Regional Board and cannot find that in so directing the Regional Board acted on any wrong principle.

For example, the rates ordered by the Regional Board for second, third, and fourth class engineers approximate the average rates paid throughout Ontario according to the company's own figures.

It transpired at the Hearing that since November 1, 1945, the Company had been paying Truck Drivers 68 cents and Helpers 65 cents per hour. These rates are slightly higher than those fixed in the order of the Regional Board which will be amended by striking out the rates for "Truck Drivers" and "Truck Driver's Helpers" contained in the said order and substituting therefor 68 cents and 65 cents respectively.

In all other respects both the appeal and cross-appeal will be dismissed. Finding and Direction will issue accordingly.

April 13, 1946.

Re: A. W. Kritsch Limited, Ottawa, Ont.

Reasons for Decision

In August, 1945 the Regional War Labour Board for Ontario obtained certain information which caused it to believe that the Company had, without authority, increased wage rates of certain employees and further that it had increased the amounts of certain voluntary bonuses. Upon the request of the Regional Board, the Company furnished information which that Board considered as confirmation of the Board's belief concerning the increases.

In and by its decision of October 31, 1945, the Regional Board approved the wage increases but declined to approve the payment of the bonus. The Company asked the Regional Board for leave to appeal from that part of its decision concerning the bonus, but

leave was refused. The case now comes before us as an application for leave to appeal and, if leave is granted, as an appeal.

The Regional Board held that the Company's bonus plan is one contemplated by Section 26 of Wartime Wages Control Order, 1943. In other words, the Regional Board held that the plan is a voluntary periodical bonus which, according to that Section, may be continued or discontinued as the employer sees fit, but if continued, the yearly rate of payment must not exceed the rate of payment established by practice of the year ending November 15, 1941. The effect of the Regional Board's decision is to tell the Company that it must not pay an employee in any occupational classification an amount which is greater than the amount which an

employee in the same occupational classification received during the 12-month period ending November 15, 1941.

The principal contention of the Company in its submissions before this Board is that, even assuming the payments to be that of voluntary bonus, it is the *rate* of payment and not the *amount* of payment which should govern. The Company further says that the yearly rate of payment in the years 1942 and 1944, inclusive, did not exceed the rate of payment made during the base year 1941.

The Company was incorporated in 1930. The evidence before this Board shows that, excepting for two years, the Company has paid a bonus to the employees concerned. Such bonus was paid out of a fund established by taking a percentage of the annual net profits of the Company. The percentage varied from year to year. In 1941 the bonus fund represented 17.7 per cent of the Company's net profits for that year. The Company accordingly has the right to continue

to use not more than 17.7 per cent of the net profits of succeeding years for the bonus fund. Upon the creation of the fund the Company stands in the position of trustee in respect of that fund, and the responsibilities to be discharged is in seeing to it that the amount of the fund is paid to the employees in those same occupational classifications as were the employees who benefited in 1941.

The evidence also shows the amount paid as and by way of bonus to each employee concerned in 1941. Each such amount represents a certain percentage of the whole fund for that year. For the purposes of Section 26 that certain percentage shall be deemed to be the rate at which the employee may be paid from the funds established in succeeding years.

The application for leave to appeal is granted and the appeal is allowed. There will be a Finding and Direction issued accordingly.

April 17, 1946.

Re: Ottawa Dairy Company, Producers Dairy Limited, Clark Dairy Limited, Central Dairies Limited and National Union of Stationary and Operating Engineers, Local No. 1

Supplementary Reasons for Decision

In our Decision dated October 29, 1945, we varied certain Findings and Directions of the Regional War Labour Board for Ontario as the same concerned the above parties, and directed the employers concerned to pay to employees in the hereinafter named occupational classifications the rates shown opposite such classifications, respectively, as follows:

Operating Engineer—	2nd Class 80c per hour
	—3rd Class 75c
	—4th Class 70c
Fireman	65c

The Union requested us to reconsider that decision and to establish rates for firemen holding engineer's certificates. The employers concerned, namely Ottawa Dairy Company and Producers Dairy Limited, were advised of the request for reconsideration whereupon the said

companies and the Union entered into negotiations on the matter in question.

As a result of those negotiations the parties reached a settlement. The terms of settlement are contained in an agreement in writing, dated April 15, 1945, now filed with us. In and by that agreement we are asked to approve the following classifications and rates therefor:

Firemen (holding 3rd Class certificate)
70c per hour
Firemen (holding 4th Class certificate)
67c per hour

We approve the request and authorize the said companies to establish the classifications last above mentioned, and with effect from September 1, 1945 to pay the rates requested for such classifications.

April 18, 1946.

Re: Grey Goose Bus Lines Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1374

Reasons for Decision

By its Finding and Direction dated December 19, 1945 the Manitoba Regional Board directed Grey Goose Bus Lines, Ltd., *inter alia*:

1. To pay its bus drivers and spare drivers guaranteed monthly earnings in respect of regular time (overtime to be paid in addition as hereinafter specified) on the following scale:

Class:

- A —\$140.00 per month for the first 3 months of service or such longer period as is needed to drive 15,000 miles.
- A —\$150.00 per month for balance of period after qualifying for A-1 grading.
- A-1 \$160.00 per month.
- A-2 \$170.00 per month.
- A-3 \$180.00 per month.
- A-4 \$190.00 per month.

Where an employee is absent from duty for his own reason or because of suspension for sufficient cause duly established upon enquiry, monthly guarantee shall be reduced pro rata. If a driver is suspended by reason of any complaint but the charge is not proven this shall not operate by way of reduction.

Spare Drivers shall qualify for increments on the basic mileage scale, and with similar minimum guaranteed monthly earnings.

To pay one and one-half times the regular mileage rates for all work done on *Sundays* and on the six Statutory Holidays presently recognized by the Dominion Government for observance in Wartime.

From that part of the said Finding and Direction above referred to, the Company appeals to this Board. Leave to do so, was granted by the Manitoba Regional Board.

With respect to wages, it will be noted that the Union's application requested mileage rates varying from 3 to 4.25 cents per mile. In answer to this request and for the purpose of wage stabilization, the Manitoba Board adopted the mileage rates paid by the Western Canadian Greyhound Lines, Limited, which Company operates extensively in Manitoba. In addition to these rates and for the acknowledged purpose of giving the said employees "security" the Regional Board set up a series of guaranteed monthly payments for each class of employee which it directed the Company to pay.

This method was not requested by either the Union or the Company and is a new condition of employment in the Industry. However meritorious the objective may be and with very great deference it seems to this Board that the imposition of such a condition upon one branch of the Industry is contrary to the principle of the Wartime Wages Control Order, i.e., wage stabilization. Likewise it destroys that uniformity in the wage structure of the Industry which was the impelling motive of the Manitoba Board in making the mileage rates conform to those paid by the Western Canadian Greyhound Lines, Limited.

The "spare driver" is on call and that fact puts him in a different position than the regular employee. In his case, the principle of a guaranteed monthly payment was recognized by this Board on the application of the Western Canadian Greyhound Lines, Limited.

In the absence of agreement between the parties, it has never been the practice of this Board to direct either guaranteed payments or guaranteed hours of work.

In its memorandum of October 10, 1945, the Manitoba Board used this language:

Sundays and Statutory Holidays—It must be recognized that the exigencies of the service require a schedule on these days; also keep in mind that the employment is essentially piece-work in type—no work, no pay.

The principle therein stated is not limited to Sundays and holidays and again with very great deference we hold the view that the imposition of monthly minimum rates would be contrary to the principle so well stated by the Manitoba Board in the foregoing excerpt. The wage structure of the industry is built up on a mileage basis, i.e., piece-work and that basis was known to and accepted by each employee of the Company when entering its employ. (It was never contemplated by the Wartime Wages Control Order that the War Labour Boards should function either as "Security Boards" or "Minimum Wage Boards".)

It is also an established practice common to all units of the transportation industry that employees lay off between scheduled runs and likewise at the end of the runs, for varying periods, before returning to their base. It was also urged that the Company set its schedules "in its own best interests" and inferentially without regard to the interests of its employees. However, in this regard the Company is not a "free agent". It must operate the routes for which it is licensed as directed by the Manitoba Public Utilities' Board and to suit the convenience of the travelling public.

The Industry necessarily operates seven days a week, and in this respect, is no different than any other transportation company. The principle of premium rates for work done on Sundays and holidays has never been recognized in the Industry, and again it seems to this Board, with great deference that the imposition of premium rates upon one branch of the Industry would be contrary to the principle of the Wartime Wages Control Order. The Company provides for one day's rest in seven as required by law. We have not overlooked the suggestion that the work on Sundays and holidays is greater due to heavy traffic, but this is not a new condition, and in any event, will be counter-balanced by lighter work in the middle of the week when traffic isn't so heavy.

The Finding and Direction also provides for premium rates for hours worked in excess of 10 per day and 54 per week which only means that the premium rates are to apply if work in excess of the stipulated hours can be lawfully done. It is hardly necessary to add that the Company will have to obey the law of Manitoba in this regard.

The appeal will be allowed and those parts of the Regional Board's order dealing with minimum monthly wages and premium rates for work done on Sundays and holidays will be revoked with the exception of "spare drivers" for which there will be substituted

the same guarantee as authorized by this Board on the application of Western Canadian Greyhound Lines, Limited.

Finding and Direction will issue accordingly.

April 23, 1946.

Re: Southern Canada Power Company, Limited, and National Catholic Syndicate of Construction Trades Inc.

Reasons for Decision

This case comes before the National War Labour Board as an application by the Company for leave to appeal and, if leave is granted, as an appeal from a Finding and Direction of the Regional War Labour Board for Quebec, dated October 23, 1945.

The Syndicate's application to the Regional Board was in respect of the occupational classifications of "Linemen", "Linemen Helpers", "Groundcrew Men" and "Operators". The Regional Board, by its said Finding and Direction, directed the Company to increase by 10 per cent the actual rates of pay for the men employed in these occupational classifications.

The Company contends that the rates paid by it at the present time compare favourably with the wage rates paid by municipalities supplying electrical service and by rural telephone system organizations. It is also alleged that there is no gross inequality or gross injustice which requires rectification. This

Board has made careful comparison with the wage rates generally prevailing for similar occupational classifications in comparable areas, as a result of which it becomes manifest that the 10 per cent increase granted by the Regional Board places the wage rates concerned of the appellant Company within the rates or range of rates paid by the other organizations with which comparison has been made. Indeed, based upon such comparison, it appears to be evident that a gross inequality or gross injustice does exist which requires rectification. The Regional Board appears to have exercised its discretion in a reasonable manner, and there does not appear to be any reason why this Board should interfere with the decision of the Regional Board.

In the circumstances, therefore, the appellant's application for leave to appeal is allowed, but the appeal is dismissed. There will be a Finding and Direction issued accordingly.

April 27, 1946.

Re: Western Glove Works Limited, Winnipeg, Man., Hendersons Limited, Winnipeg, Man., and United Garment Workers of America, Local 35

Reasons for Decision

The Union applied to the Regional War Labour Board for Manitoba for an order directing the Companies to increase their piece work rates by fifteen per cent. The Regional Board, by its decision November 17, 1945, directed the Companies to continue existing piece work rates and, effective January 1, 1946, to add thereto the sum of five cents for each hour worked by each employee. With leave of the Regional Board the Companies appeal from that decision.

During the hearing before this Board, as well as before the Regional Board, statements were made touching upon the history of the industry of which the Companies form part, in the Greater Winnipeg area. It is deemed advisable to refer to some of those statements which are not in dispute.

In 1936 the several firms in the industry, in the said area, formed an employer organization called "Garment Manufacturers' Association of Western Canada". In 1937 the

Association, representing the firms, entered into a master wage agreement with the Union which then represented all the employees of those firms. The basis for the master agreement appears to have been a schedule of piece work rates adopted in 1934 by employers and unions in the same industry in the United States. Each year following 1937 and at least until 1944, the parties negotiated and concluded those negotiations with a master agreement which settled the piece work rates to be paid. Except for a brief period in 1941 it was never a condition of employment that the workers in question should be paid on any other basis than piece work.

In 1944 the Amalgamated Clothing Workers' Union became the bargaining representative of the employees of twenty-two of the Association's members. In 1945 the Amalgamated negotiated an agreement with the Association, which agreement provided for an increase of five per cent in the piece work rates for the employees they represented. The agreement was approved by the Regional Board, with

effect from August 1, 1945. Later the United Garment Workers made the application which led to the decision now under appeal. Incidentally, the application concerned the Monarch Overall Company in respect of its plant at Selkirk, Manitoba, as well as the appellants herein.

The appellants say that when they were before the Regional Board they offered to grant their employees the same increase in piece work rates and with the same retro-active effect as the Regional Board approved following the application of Amalgamated concerning the employees of the other twenty-two members of the Association. That offer was renewed before this Board.

The Regional Board's decision, in this case, was made at the time when wage increases might be authorized or directed to rectify gross injustices or inequalities. During that time and in order that a gross injustice or inequality might be detected in wage rates for an occupational classification in any establishment, war labour boards, in practice, resorted to comparisons with rates being paid to the same occupational classification in other establishments in the same industry. Again in practice, the comparisons were limited to the area where the establishment was located. No reasons were advanced to indicate why

that practice should not be followed in this case.

Prior to August 5, 1945, a uniform system of piece work rates was in effect in all the establishments of the members of the Association. It was the only means used to remunerate the workers in those establishments. On August 5 the Regional Board authorized an increase of five per cent in the piece work rates of approximately 1300 employees in 22 of those plants. That authorization provided the 200, more or less, employees of the appellants and of Monarch Overall, at Selkirk, with grounds to support the claim that a gross inequality existed in respect of their piece work rates. That inequality will be fully and adequately rectified by increasing their piece work rates by five per cent with effect from August 5, 1945.

The appeal is allowed. There will be a Finding and Direction to provide formal effect to the foregoing.

This decision is not to be taken to mean that the parties concerned are precluded from negotiating further on the question of piece work rates or from making further application to the Regional Board, which application will be considered by that Board in the light of evidence adduced in support of the application.

April 30, 1946.

Re: Dominion Tar and Chemical Company, Limited, Sault Ste. Marie, Ont., and United Steelworkers of America, Local 2251

Reasons for Decision

The Union applied to the Regional War Labour Board for Ontario for an order directing the Company to increase wage rates of all hourly rated employees by $4\frac{1}{2}$ cents per hour. The Regional Board, by its decision dated January 21, 1946, directed the Company to increase the rates of labourers from 60 cents to $62\frac{1}{2}$ cents per hour, but dismissed the Union's application on all other issues. The Regional Board granted both parties leave to appeal. The Company's brief on appeal was filed with this Board before that of the Union. We, therefore, treat the Company's plea as the appeal and the Union's plea as a cross-appeal.

The Regional Board decided this case under Wartime Wages Control Order 1943 before the Order was amended by P.C. 348. In order to succeed the applicant was, therefore, obliged to prove to the satisfaction of the Regional Board that a gross injustice or inequality existed in the wage rates existing at the time of the application. The Regional Board decided that the Union failed to provide such proof except in the case of the occupational classification of labourer where the application was granted in part.

The Company contends that the $2\frac{1}{2}$ cents increase to labourers disturbs the differentials in its wage schedule and that inasmuch as the Regional Board found that no inequality or injustice existed in respect of the wage rates for other classifications, it was not proper to find that an inequality or injustice existed in the labourer's rates. The Union, in effect, agrees that the increase granted does in fact disturb the differential and accordingly asks this Board to direct increases for the other classifications. In addition, the Union pursues its request for the $4\frac{1}{2}$ cents increase for all employees.

The Union, in its argument, lays much stress on the fact that the Regional Board had directed $64\frac{1}{2}$ cents as the rate for labourers in other industries in Sault Ste. Marie. That argument is not, by itself, sufficient to justify the increase in this case. There are, however, other factors which should be taken into account. In this connection it should be noted that as of the basic period (November 15, 1941) labourers' rates in the Company's plant were the same as those in at least the largest plant in the locality where the labourers' rates are now $64\frac{1}{2}$ cents per hour. Nor

should we be unmindful of the fact that the Company on a previous occasion asked the Regional Board for permission to pay the last mentioned rate. The request on that occasion was rejected. We are entitled to assume, and do assume, that the Company, at the time it made the request, must have recognized the existence of a gross inequality in their rates.

With much respect we are of the opinion that the Union has made out a case in support of its application concerning labourers' rates. Wage rates for other occupational classifica-

tions in the plant in question should be increased but only to the extent that the newly established rates shall exceed the November 15, 1941, wage rates for those classifications, by the same amount as the newly established labourers' rate exceeds the labourers' rate in effect on November 15, 1941.

The appeal is dismissed and the cross-appeal is allowed to the extent above indicated. There will be a Finding and Direction accordingly.

May 2, 1946.

Re: Dominion Glass Company, Limited, Montreal, P.Q.

Reasons for Decision

The Company applied to the Regional War Labour Board for Manitoba for permission to increase the salary of its "Divisional Salesman" at Winnipeg. The current salary of the incumbent in that position exceeds \$250 per month. The Regional Board found that the duties and responsibilities assumed by the employee in question are such as to require the Board to declare him to be above the rank of foreman and subject to Wartime Salaries Order, P.C. 1549.

From that Finding the Company appeals with leave of the Regional Board.

We note from the material on hand that the Divisional Salesman represents the Company in Manitoba and in that part of Ontario extending easterly from the Manitoba boundary to and including Port Arthur and Fort William. It is said that he holds a power of attorney from the Company and that power of attorney invests him with considerable administrative discretion. We have come to the conclusion that the Regional Board's decision in this case should not be disturbed and the appeal will, therefore, be dismissed.

May 1, 1946.

Re: Monarch Overall Manufacturing Co., Ltd., Selkirk, Man., and United Garment Workers of America, Local 35

Reasons for Decision

In this case, the Regional War Labour Board for Manitoba, by its decision November 16, 1945, directed the Company to continue existing piece work rates and, effective January 1, 1946, to add thereto the sum of five (5c.) cents for each hour worked by each employee. With leave of the Regional Board the Company appeals from that decision.

The argument on appeal took place on the same date as we heard arguments in Western

Glove Works Limited and Hendersons Limited, appeal. We find that the facts in this case are the same as those in the Western Glove and Hendersons case and we have come to the conclusion that the appeal herein should be allowed for the same reasons as those expressed in our Reasons for Decision, April 30, 1946.

There will be a Finding and Direction accordingly.

May 2, 1946.

Re: The Procter and Gamble Company of Canada, Limited, Hamilton, Ont.

Reasons for Decision

With leave of the Regional War Labour Board for Ontario the Company appeals from a decision of that Board which dismissed the Company's application for permission to increase wage rates of its hourly rated employees. The increases, for which approval is sought, are 2c. an hour for female employees and 2½c. to 5c. an hour for male employees.

The main argument in support of the appeal is based on the changes which have taken place since June 1939, in wage rates for employees in several establishments, including

that of the Company, in the Hamilton area. The Company provided us with statements showing what those wage rates were in 1939 and in September 1945. The statements indicate that whereas a sizeable differential existed in favour of the Company's rates over those in the other said establishments in 1939, that differential had all but disappeared by September 1945. The Company contends that the diminution of the differential has the effect of creating a gross injustice in the existing wage rates of its employees. It is our view that an increase in wage rates in

one establishment does not create a gross injustice or inequality in the wage rates in another establishment as long as the increased rates do not exceed those in effect in that other establishment.

As an alternative to its main argument the Company submits that a gross injustice in the wage rates of its employees exists by reason of the fact that its chief competitors pay higher wages. We have analysed the rate schedules of those competitors and of the Company. It is difficult to relate some of the occupational classifications in one plant with those of the other plants. There are however, several classifications common to all plants which

enable us to determine, with a reasonable degree of accuracy, the general levels of wage rates now in effect in those plants. The analysis made confirms the Company's contention. Moreover greater force is given the Company's claim when we take into account the wage incentive plans and production bonuses in effect in the plants of the Company and of the competitors.

We have come to the conclusion that the increases requested are justified and we allow the appeal. This Board's Finding and Direction will approve the Company's application with effect from January 1, 1946.

May 2, 1946.

***Re: Canadian Wright Limited and British Aeroplane Engines Ltd.,
Montreal, P.Q.***

Reasons for Decision

In August, 1942 the Companies obtained from the Regional War Labour Board for Quebec permission to pay a premium rate to their weekly, semi-monthly and monthly rated office and non-production employees for time worked by them in excess of the standard work week established for those employees.

In January of this year the Companies requested the Regional Board to permit them to discontinue payment of overtime to those employees. The Regional Board, by its decision of February 12, 1946, declined to authorize the Companies to discontinue the term of employment in question. The matter now comes before us by way of appeal from that decision.

In their brief on appeal the Companies contend that it is not the prevailing practice of industrial and commercial firms in the

Montreal area to pay premium rates for overtime worked by employees such as those concerned in this appeal. If this is so, and we have no reason to doubt the contention, it does seem strange to us that the Companies asked for the authority to pay in the first instance, and further, that the Regional Board granted the authority. However, that term of employment was in effect when Wartime Wages Control Order 1943 came into effect and has been ever since.

A War Labour Board has no power under the said Order to authorize or direct an employer to alter a term of employment such as the one concerned in this appeal if such an alteration might, and as in this case would, have the effect of reducing directly or indirectly the wage rates of employees. We have no alternative but to dismiss the appeal.

April 5, 1946.

***Re: International Brotherhood of Teamsters, Chauffeurs, Warehousemen
and Helpers of America, Local 880, Windsor, Ont.***

Reasons for Decision

The applicant the Teamsters, Chauffeurs, Warehousemen and Helpers, Local 880 of Windsor, Ontario, represents "dockmen, warehousemen and drivers" presently employed at Windsor, Ontario, by the following companies:—

Joe Maroon Cartage, Direct-Winters Transport, C. Hinton & Company Limited, International Cartage Limited, Inter-City Forwarders Limited, E. W. Lancaster Company Limited, Martin Transports Limited, Morrice Cartage Company, and Western Freight Lines Limited.

The applicant is the bargaining representative of the said employees and as such has an agreement with the said companies.

The men represented by the union are engaged in pick-up deliveries in the City of Windsor and at times have to make deliveries or pick up loads in the City of Detroit. When employed in the City of Detroit, these men are paid the scale of wages applicable to similar occupations in the City of Detroit.

The several occupations of "drivers, dockmen, and warehousemen" are interchangeable and practically all of these employees at sometime or other get an opportunity to earn the higher wages payable in Detroit, although in varying degrees.

The Companies sought to make a comparison with rates payable to truck drivers operating on the highways and urged that any increase granted to this group of employees would be

reflected throughout the entire trucking industry. These employees operate exclusively in the City of Windsor and the neighbouring City of Detroit and therefore such a comparison would not be fair.

After examining the rates paid to occupational classifications of a similar character in the City of Windsor, the Board is of the opinion that the rates paid to the employees covered by this application are low. On behalf of these employees the Union gave evidence of rates paid in what might be regarded as specialized employment, and for that reason, such a comparison was not favourably considered by the Board. The Board is of the opinion, that it would be more proper to take as a standard the rates paid by other companies doing similar work. In some cases, the employees of these other companies in addition to higher wages have advantages such as holidays with pay, and sick and pension benefits, as well as a regulated day. The employees in question work an irregular day and are under constant supervision.

For these reasons, the Board directs the companies in question to pay their employees who are members of the applicant union and whose employment is limited to the City of Windsor and the immediate neighbourhood in the occupational classification of "truck drivers, dockmen, and warehousemen" for the first year of employment in the Company at the rate of 65 cents per hour, and thereafter 70 cents per hour, effective on the date of application.

The companies pleaded inability to pay, but the statements submitted are not in accordance with sub-section 2 of section 20 of the Wartime Wages Control Order. The statement submitted, represented the consolidated receipts and disbursements of the eight companies operating throughout the

Province of Ontario, and no evidence was offered as to the financial position of any individual company involved in this application.

The Union also applied for a 48-hour week, time and a half for overtime, one weeks' vacation with pay, free life insurance, and free hospitalization. The Board does not propose making any order on these issues because it was not shown that they were in general use by the industry on the basic date, November 15, 1941. These issues will therefore be left for negotiation between the Union and the Companies concerned.

There will be a Finding and Direction accordingly, which will exclude Western Freight Lines Limited as this Company operates exclusively in Canada and is therefore a regional employer.

April 12, 1946.

Amended Reasons for Decision

An application was originally made to the Regional War Labour Board for Ontario in February, 1945, and sometime later it was discovered that the companies involved were National employers. For this reason, the file was transferred to this Board in July of 1945 following which both parties were responsible for the ensuing delay by virtue of which the material was not ready for hearing until November 30, 1945.

In our Reasons for Decision "the date of application" was made the effective date. Because of the foregoing facts, it is difficult to determine what was the date of application, and this Board therefore fixes November 30, 1945 as the effective date, being the date on which the question between the parties was first at issue.

April 15, 1946.

Re: Canadian Johns-Manville Company Limited and Syndicat National Catholique de l'Amiante d'Asbestos, Inc.

Reasons for Decision

This is an application made jointly by Canadian Johns-Manville Company Limited and Syndicat National Catholique de l'Amiante d'Asbestos, Inc., for an increase of ten per cent in wage rates of hourly-rated employees represented by the Syndicat but which in the material submitted to the National War Labour Board is expressed for particular classifications as a wage increase in cents per hour. The application followed negotiations undertaken between the parties as the result of which a two-year collective agreement has been concluded subject only to approval by the National Board of the

proposed schedule of wage rates and as to overtime conditions.

The National Board in its Reasons for Decision issued April 13, 1944 on a previous application made under the then governing provisions of P.C. 9384, stated, in effect, that no evidence had been produced to it in respect of the mining of asbestos which would enable it to properly compare the Company's classifications with those of other employers engaged in other types of mining and that consequently no "gross inequality" had been shown. The Board did find, however, that there was "gross injustice" and said that "the ends of justice will be served presently" by

ordering an increase of four cents per hour. The Board also recommended to the parties that they should undertake a job evaluation for the purpose of arriving at rates for each classification included in the schedule which would have proper relationship one to the other in accordance with the varying factors and elements entering into their respective job contents. This job evaluation was undertaken and on joint application the National Board subsequently approved the results.

The Syndicat made a further application in 1945 requesting an additional general increase and for certain other matters, but this Board denied in Reasons for Decision dated October 30, 1945, on the principal ground that no new evidence or argument was submitted with the application which would justify at that time further increase beyond that awarded by the Board's decision of April 13, 1944.

The parties went into negotiation and the present joint application dated February 21, 1946 is the result.

It has not been shown and in fact the brief in support of the present application does not attempt to argue that existing wage rates are low by comparison with those paid by employers engaged in other types of mining but the parties did plead that the general increase now requested was necessary to completely extinguish the condition of "gross injustice".

No comparative wage data having been presented, the Board's powers to deal with the application are restricted to those contained in that part of Section 20(1) (a) of P.C. 9384 which reads as follows:

or may authorize an employer to vary a single rate or the rates of a range on such other basis and to such extent as in the opinion of the National Board is reasonable in the circumstances and consistent with the maintenance of existing prices of the goods and services which the employer sells;

In their written submissions and at the hearing, the parties have contended that their request is "reasonable in the circumstances" in that the Company is radically changing its methods of mining which eventually will replace their present quarry-type operations, that they are increasing their mill capacities and changing their operating techniques and making other improvements calling for greater efficiency and increased volume from existing

production units and that consequently demands on labour are becoming increasingly more exacting and that the requested wage increase would remove any remaining "present" injustice.

In further support of the application, the Company gives its assurance that the proposed wage increases could presently be absorbed without corresponding increase in their existing product prices and that furthermore after the series of applications above referred to and long drawn-out negotiations, the signing of a collective agreement over a two-year period on a mutually satisfactory basis would stabilize labour conditions and so would improve efficiency.

Statements were made to the Board at the hearing that the unit productive efficiency had already improved and after careful examination of all the factors involved the National Board is satisfied that a base rate of 58 cents per hour as requested is justified with corresponding increases for other classifications as proposed by the application including increases for Apprentices and Boys (factory).

Approval will also be given to the change in overtime conditions from the present practice of paying overtime for hours worked after 48 hours per week to the proposed new condition which provides for the payment of overtime at the rate of time and one half time's rate for work required to be performed after eight hours of work per day.

The application asks a period of retroactivity from January 1, 1946. In view of the fact that Order in Council P.C. 348 amending P.C. 9384 only became effective on February 15, 1946 by which amendment the Board was first given power to approve an application upon such basis as that contained in the application of the parties herein, the Board must reserve its decision on the question of retroactivity beyond February 15, 1946 for further consideration. In the meantime, however, and in order that the new wage scale may be put into effect as soon as possible, the Board will authorize Canadian Johns-Manville Company Limited to make effective wage rates as proposed by the joint application as from February 15, 1946.

Interim Finding and Direction will issue accordingly.

April 18, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for five days during the month of April. During this period the Board received ten applications, held six hearings, issued six certificates designating bargaining representatives, rejected one application, gave decisions in five appeal cases, and established a Grievance Procedure in one case.

Certificates Issued

Six applications for the certification of bargaining representatives were approved by the Board and certificates issued, as below:

1. Messrs. G. C. Richards, W. N. Scott, M. G. Fagan, Jack Rainey and George Wilkinson and the *International Longshoremen's Association, Local 38-162* for the Longshoremen employed by the *B.C. Coast Steamship Service, Canadian Pacific Railway Company, Victoria, B.C.**

2. Messrs. E. Ingles and J. B. Cochrane and the *International Brotherhood of Electrical*

Workers, Local Union NB-1481 for linemen, operators, electricians, improvers, helpers, groundmen and metermen employed by the *Pembroke Electric Light Company, Pembroke, Ontario*. The line foreman was excluded from the bargaining unit.*

3. Messrs. John Wedge and Arthur J. Smith and the *International Union of Operating Engineers, Local No. 865* for shift engineers employed in the boiler room of the *Prince Arthur Hotel, Canadian National Railways, Port Arthur, Ontario*. The chief engineer was excluded from the bargaining unit.*

4. Mr. J. A. Donovan and the *Order of Railway Conductors of America* for the sleeping and parlour car conductors and parlour car attendants employed by the *Canadian Pacific Railway Company, Montreal, P.Q.**

* Following investigation of the application.

Messrs. J. M. Smith, Harry Sipes, J. A. Sullivan, Dewar Ferguson and C. E. Lenton and the *Canadian Seamen's Union* for the unlicensed crew members in deck, engine room and stewards' departments of all vessels operated by the *M. R. Cliff and B. C. Mills Towing Company, Limited, Vancouver, B.C.* Masters, mates and engineers were excluded from the bargaining unit.**

Messrs. George H. Hebert, J. Graham, E. Steele, L. A. Lennon and William Cooper and the *Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America* for the employees of *Western Canadian Greyhound Lines Limited, in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.* Excluded from the bargaining unit were officials of the company, such as inspectors, roadmen, foremen, despatchers, superintendents, assistant superintendents, officials with power to hire and discharge, commission agents, private secretaries to superintendents and also all general office employees.***

Application for Certification Rejected

The Brotherhood of Railroad Trainmen and the Canadian Pacific Railway Company, Montreal, Quebec (L.G., January, 1946, p. 39) following an investigation of the application and a representation vote ordered by the Board, the Board decided to reject the application as the applicant union failed to obtain the support of the majority of the employees affected as required by the *War-time Labour Relations Regulations P.C. 1003.*

Applications for Certification Received during the month of April, 1946

1. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of certain employees of the *Regional Bureau of Operating Statistics, Canadian National Railways, Winnipeg, Manitoba.*

2. *Order of Railway Conductors of America* on behalf of sleeping and parlour car conductors and parlour car attendants employed by the *Canadian Pacific Railway Company, Montreal, P.Q.*

3. *Canadian Air Line Passenger Agent Association* on behalf of passenger agents-in-training, passenger agents and passenger agents-in-charge, employed by *Trans-Canada Air Lines, Winnipeg, Manitoba.*

** Following investigation of the application and a representation vote.

*** Following investigation of the application, a public hearing and a representation vote.

4. *Bartenders, Hotel Service and Restaurant Employees Union, Local 796, Hotel and Restaurant Employees International Alliance and Bartenders International League of America* on behalf of certain employees of the lunch counter and dining room employed by the *Canadian Pacific Railway Company, Moose Jaw, Saskatchewan.*

5. *The Brotherhood of Maintenance of Way Employees* on behalf of section and bridge and building crews employed by the *Niagara, St. Catharines and Toronto Railway (Subsidiary of Canadian National Railways) Toronto, Ontario.*

6. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of employees of the operating and maintenance departments below the rank of foreman employed by the *Colonial Coach Lines, Limited, Montreal, P.Q.*

7. "*Eldorado Section*" *Yellowknife District Miners Union, Local 802, International Union of Mine, Mill and Smelter Workers* on behalf of certain employees of the *Eldorado Mining and Refining (1914) Limited, Port Radium, N.W.T.*

8. *Federal Labour Union, Local 23736 (A.F. of L.)* on behalf of grain trimmers employed by the *Goderich Elevator and Transit Company, Limited, Goderich, Ontario.*

9. *International Brotherhood of Electrical Workers* on behalf of sub-station operators and helpers of the *Ottawa Electric Railway Company, Ottawa, Ontario.*

10. *International Longshoremen's Association, Local 1696* on behalf of longshoremen employed by *Three Rivers Shipping Company, Three Rivers, P.Q.*

Decisions of Board in Appeal Cases

1. On April 23, the Board allowed the appeal of the *Employees Association of McCormick's Limited* from a decision of the Ontario Labour Relations Board rejecting the petition of the appellant *Employees Association* for certification of bargaining representatives for employees of the Company.

The Ontario Board expressed the opinion that while the Company did not show a deliberate and concluded partiality for the Association, the fact remained that it contravened the express provisions of the Regulations and that, therefore, the application for certification would be dismissed.

In the Reasons for Judgment the National Board said that the charge of unfair discrimination and special privileges to the Association had not been substantiated and that the certification should not be withheld on

these grounds. Accordingly, the appeal was allowed and certification granted

2. Following a hearing the Board allowed the appeal of the *International Union, United Automobile, Aircraft & Agricultural Implement Workers of America, Local 200 (UAW-CIO)* from an order of the Ontario Labour Relations Board directing a vote of all licensed crane operators employed by the *Ford Motor Company of Canada, Limited*, for its *Windsor and Ojibway Plants*, who were regularly employed for not less than 24 hours a week. The voters were offered a choice between the appellant organization and *Local 944, International Union of Operating Engineers*.

In its Reasons for Judgment the Board said that under the particular circumstances of the case the bargaining unit as indicated in the application submitted by Local 944, International Union of Operating Engineers, was not appropriate, the application for certification was, therefore, dismissed.

3. On April 23, the Board allowed the appeal of the *Canadian Union of Asbestos Workers, Local No. 6 (C.C.L.)* from a decision of the Quebec Wartime Labour Relations Board in ordering a vote of the employees of Johnson's Company, Thetford Mines, P.Q., following an application made by the respondent union, *The National Syndicate of Asbestos Workers of Johnson's Company, Inc.*

In its Reasons for Judgment the Board said that the application should have been rejected in conformity with the practice which had been well established by its earlier decisions on (Wright Hargreaves and Sylvanite Case), since the applicant union failed to show *prima facie* that it had majority support in the bargaining unit. The application for certification was set aside.

The texts of the Board's Reasons for Judgment in each of the above appeals appear hereunder:

Establishment of Appropriate Grievance Procedure

Following a hearing the Board established a procedure for the final settlement of differences concerning the interpretation or violation of each of the collective agreements affecting the applicant organizations, Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen and the Brotherhood of Railroad Trainmen and the Wabash Railway Company, Buffalo Division (Lines in Canada).

The applicant organizations contended that their agreements with the Company contain no appropriate provision for the final settlements of disputes concerning their interpretation or violation.

It was contended by the Company that the authority of the Board to establish a Grievance Procedure applied only with respect to an agreement entered into after the effective date of the Wartime Labour Relations Regulations P.C. 1003 and did not, therefore, extend to agreements entered into at an earlier date.

In its Reasons for Judgment, the Board said that it was within its power to establish, by Order, upon application pursuant to Section 18 (2) of the Regulations, an appropriate procedure for the final settlement of differences concerning the interpretation or violation of an agreement. The Board, therefore, directed the parties to include in existing collective agreements, under the heading "arbitration", the procedure as set forth in the text of the Board's Reasons for Judgment which appear below:—

Between: Employees' Association of McCormicks Limited Appellant (Petitioner) and United Packinghouse Workers of America Local 281 Respondent (Intervener) and McCormicks Limited, London, Ontario, Respondent.

The Board consisted of the Chairman and Messrs. Best, Complin, Hills, Mosher, and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an appeal from a decision of the Ontario Labour Relations Board rejecting the petition of the appellant employees' association for certification. The Ontario Board found that bargaining representatives had been elected by a majority of employees in an

appropriate bargaining unit and therefore a *prima facie* case established for certification. The Board stated, however, that it was not prepared to certify that the bargaining representatives had been regularly and properly elected on the ground that the Company had contributed financial and other support to the association in contravention of section 19 of the Regulations. Having held that the respondent company had infringed subsection 1 of section 19 of the Regulations, "albeit with the best of intentions", the Ontario Board in its judgment went on to say "the

prohibition contained in subsection 1 of section 19 is not limited to cases of direct financial contribution. The language of the subsection is clear and unequivocal and we believe it was intentionally worded in broad general terms. Thus we have the moral effect undoubtedly created in the minds of the employees through the privileges extended by management to the association coupled with the financial support given to the association by the company . . . we believe that the company did not intend to show a deliberate and calculated partiality for the association. Nevertheless, whatever the intent of the company may have been, the fact remains that it contravened the express provisions of the Regulations. In view of these circumstances the application will be dismissed".

We accept the finding of the Ontario Board that there was no deliberate or calculated partiality on the part of the company towards this association.

What then are the circumstances relied on as constituting interference with or as influencing the freedom of choice of the employees in the election of bargaining representatives or which establish that special privileges have been granted to the association?

In the first place, it is claimed that the action of the company in permitting the association to take votes, and make election arrangements during working hours, and the fact that the returning officers and scrutineers appointed by the association were paid as usual by the company and workers not docked in pay for time taken to vote, and the shutdown of machines to permit voting, constituted discrimination in favour of the employees' association. On this point evidence was submitted in the course of the hearing of the appeal to the effect that the same privileges had been extended to the intervener union and to employees on the two occasions in 1945 when votes were taken under the direction of the Ontario Board on the intervener union's petition for certification of bargaining representatives.

This evidence was not contradicted and we are of opinion that with respect to these particular matters there was no discrimination shown by the company.

It is further claimed that the company gave special privileges to the association in granting the free use of company premises to the association for social activities designed to raise money for the association, and for meetings of the association.

At the hearing before this Board company officers gave evidence to the effect that the premises used by the association were dining-hall premises which had been for many years

operated under the management of an employees' committees a non-profit dining-room service for company employees. It has been the custom to permit these premises to be used for after-hour activities of employees without discrimination upon application to the employee committee, but subject to final approval by management. Company officers stated that the premises were and always have been equally available to the intervener union for use on application but that no application for such use had ever been made.

While the free use of company facilities by a bargaining agency for meetings and social activities is not common in collective bargaining practice and therefore creates a natural presumption of discrimination on the part of the company in favour of the bargaining agency involved, nevertheless, in this case it is necessary to consider the finding of the Ontario Board that there was no deliberate or calculated partiality on the part of the company, the further fact that free use of the premises for after-hour employee activities had been extended without discrimination over a period of years and were available to the intervener union. We also observe that the employees have had ample opportunity to signify their choice of bargaining representatives as two previous votes were taken among the employees in the year 1945 on application of the intervener union on both of which occasions the intervener failed to obtain majority support.

In view of the foregoing, this Board is of opinion that the charge of unfair discrimination and special privilege has not been substantiated and that certification should not be withheld on these grounds. Accordingly the appeal is allowed and certification is granted for a bargaining unit consisting of factory employees in the London plant of the company below the rank of foremen and not employed in a confidential capacity or having authority to employ or discharge but excluding office, sales and dining-hall employees.

(Sgd.) G. B. O'CONNOR,
Chairman.

for the Majority of the Board.

We dissent:

(Sgd.) W. L. BEST.

(Sgd.) A. R. MOSHER.

M. J. GRANT, Esq.

for Appellant (Petitioner).

J. LANGLET, Esq.

for Respondent (Intervener).

C. H. A. ARMSTRONG, K.C., Esq.

for Respondent.

Dated at Ottawa, April 23, 1946.

Between: Local 200, UAW-CIO. Appellant (Intervener) and Ford Motor Company of Canada, Limited, Windsor, Respondent, and Local 944, International Union of Operating Engineers, Respondent (Petitioner).

The Board consisted of the Chairman, and Messrs. Best, Complin, Hills, Mosher and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal from the order of the Ontario Labour Relations Board directing a vote of all licensed crane operators employed by the company in its Windsor and Ojibway plants, who are regularly employed for not less than 24 hours a week. The voters were offered a choice between Local 200, UAW-CIO, and Local 944, International Union of Operating Engineers. The vote has been held and resulted as follows:—

Local 944, International Union of Operating Engineers	10
Local 200, UAW-CIO.....	1
Not voting	2

13

Three additional ballots were segregated.

Local 200, UAW-CIO contended that the Operating Engineers had stood by during the conciliation proceedings and the Rand arbitration and should not now be permitted to intervene and take their members out of the existing agreement which was signed on February 15, 1946.

Local 944, International Union of Operating Engineers, pointed out that this union had

applied for certification on July 3, 1945, and had no right to intervene in the arbitration proceedings.

Counsel for the company contended that the bargaining unit is not appropriate because the crane men are employed part time in other work.

It is clear that the Regulations, P.C. 1003, do not prevent an application for certification at any time after the expiration of ten months from the operative date of any collective agreement.

This Board is, however, of the opinion that under the particular circumstances here the bargaining unit is not appropriate.

The appellant will have leave to appeal, the appeal will be allowed and the application for certification dismissed.

(Sgd.) G. B. O'CONNOR,

*Chairman.
for the Board.*

JOHN ELDON, Esq.

for Appellant (Intervener).

J. B. AYLESWORTH, K.C.

W. H. CLARK, Esq.

for Respondent.

JOHN WEDGE, Esq.

for Respondent (Petitioner).

Dated at Ottawa, April 24, 1946.

Between: Canadian Union of Asbestos Workers, Local No. 6 Appellant and The National Syndicate of Asbestos Workers of Johnson's Company, Inc. Respondent (Applicant) and Johnson's Company, Thetford Mines, P.Q. Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Deschamps, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Vice-Chairman.

This is an application for leave to appeal and an appeal against a decision of the Quebec Wartime Labour Relations Board in ordering a vote following an application for certification made by the respondent union.

The facts in this case are as follows:—

In 1944 the Quebec Board certified as an appropriate bargaining unit the employees in the Black Lake and Thetford Mines operated by the respondent company and

certified the bargaining representatives selected by the appellant union therefor. An agreement was subsequently entered into between the appellant union and the company for this unit of employees which ran until January 1, 1946, the provisions of which are apparently still in effect.

The respondent union within the time prescribed in the Regulations applied for certification respecting employees in both mines excluding however a substantial group of employees in one mine. The respondent union was able to show a *prima facie* majority in the smaller unit selected by it but did not have such majority support in the larger unit which had been previously found to be appropriate by the Quebec Board. The Quebec Board did not find the smaller

unit to be an appropriate one and directed that a vote be taken in the unit for which the appellant union had been certified and in which it was admitted that the respondent union had not *prima facie* majority support.

This Board is of opinion that in the circumstances the application should have been rejected in conformity with the practice which has been well established by its earlier decisions, see Wright Hargreaves and Sylvanite case, DLS 7-542, as the applicant failed to show that it had a *prima facie* majority support in the bargaining unit.

Leave to appeal is granted. The appeal is allowed and the application of the respondent

union for certification of bargaining representatives is rejected accordingly.

(Sgd.) A. H. BROWN,
Vice-Chairman,

for the Majority of the Board.

I dissent:

(Sgd.) G. PICARD.

A. MCAUSLAND, Esq.

for Appellant.

J. MARCHAND, Esq.

D. LESSARD, Esq.

for Respondent (Applicant).

Dated at Ottawa, April 23, 1946.

Between: The Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen and Enginemen, The Brotherhood of Railroad Trainmen Applicants and The Wabash Railroad Company Respondent.

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application made pursuant to Section 18 (2) of the Regulations for the establishment of an appropriate procedure for the consideration and settlement of disputes concerning the interpretation or violation of collective agreements affecting the applicants and the respondent company.

There are three agreements affected in these proceedings which the applicants contend contain no appropriate provision for the final settlement of disputes concerning their interpretation or violation. One agreement, affecting engineers, firemen and helpers, hostlers and hostlers' helpers, is administered jointly by the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen. Two other agreements, affecting trainmen and conductors, respectively, are administered by the Brotherhood of Railroad Trainmen.

The employees affected are engaged in operations of the railway in Canada on lines between Detroit and Buffalo using running rights over the Canadian National Railways.

The respondent Company does not challenge the contention of the applicant organizations that the agreements each lack an appropriate procedure for the final settlement of disputes concerning its interpretation or violation. An examination of each agreement reveals that provision is made only for conference between the employees concerned or their representatives with the officers of the railway "when differences as to the schedule and practices under it arise".

The oral argument of the parties before this Board included discussion as to the relative

merits of submitting grievances or differences to either the United States National Railroad Adjustment Board, First Division, or to the Canadian Railway Board of Adjustment No.

1. The applicant organizations favour the former agency while the respondent company would desire the latter. However the argument in this connection does not concern the Board for the fact that, the parties not being in agreement on either the Canadian or United States Board, neither agency can deal with grievances affecting the parties. In addition, it is not within the power of this Board to determine that these particular agencies shall adjudicate the grievances of the parties or to compel the parties to refer their differences to such particular agencies.

The respondent contends, however, that the authority of the Board to establish a grievance procedure applies only with respect to an agreement entered into after the effective date of the Regulations and does not, therefore, extend to those agreements all of which were entered into at an earlier date. As there is no provision limiting the application of the subsection to agreement entered into after the effective date of the Regulations and in view of the absence of anything to otherwise indicate that this was the intent, the Board's opinion is that the provisions of the subsection apply in respect of any collective agreement irrespective of the date entered into. This view is strengthened by reference to subsection one of section 18 which requires that collective agreements entered into after the effective date of the Regulations shall contain a provision for establishing a procedure for the final settlement of differences concerning its violation or interpretation.

The Board is therefore of the opinion that it is within its power to establish, by order, upon application pursuant to Section 18 (2) of the Regulations, an appropriate procedure

for the consideration and settlement of differences concerning the interpretation or violation of an agreement. Therefore, the Board establishes in this case a procedure for the final settlement of differences concerning the interpretation or violation of each of the collective agreements affected by the proceedings by directing the parties to include in such collective agreements, under the heading "Arbitration", the following procedure:—

"ARBITRATION"

"Any grievance which is not settled to the satisfaction of either the Union or the Company by conference or negotiation or otherwise in accordance with the provisions of this Schedule, shall upon the written request of either party, be submitted to an Arbitration Board, provided the grievance involves the interpretation or alleged violation of any provision of this Schedule.

"Grievances shall not be subject to arbitration which involve:

- (a) Any request for a modification of this Schedule;
- (b) Any matter not covered by this Schedule;
- (c) Any matter which is subject to final settlement by a Government agency;
- (d) Any matter which by the terms of this Schedule is exclusively vested in the Company.

"The Arbitration Board shall be established within thirty days from the date the application for same is filed and shall consist of three members, one of whom shall be selected by the Union and one of whom shall be selected by the Company and a Chairman selected by the two first-mentioned members of the Board. In the event of the failure of the two members of the Board so selected to agree upon the selection of a Chairman, the matter may be referred by either member to the Minister of Labour for Canada, who shall choose the Chairman.

"In event of any vacancy on the Board occurring by reason of death, incapacity or resignation, or for any other reason, such vacancy shall be filled in the same manner as is provided herein for the establishment of the Board in the first instance.

"A statement of the dispute or question to be arbitrated shall be submitted by both parties, either jointly or separately, to all members of the Board within five days of appointment of the Chairman. The Board of Arbitration shall convene within 15 days after the appointment of Chairman unless otherwise mutually agreed by the parties and render its decision as soon thereafter as possible.

"The decision of the Board shall be limited to the dispute or question contained

in the statement or statements submitted to it by the party or parties. The decision of the Arbitration Board shall not change, add to, vary or disregard any provision of this Schedule.

"Decisions of the majority of the members of the Arbitration Board, which are made under the authority of this arbitration clause, shall be final and binding upon the Company, the Union, and all persons concerned.

"The expenses, if any, of the Members of the Arbitration Board shall be paid as follows:—the Union shall pay the fees and expenses of the member chosen by it; the Company shall pay the fees and expenses of the member chosen by it; the fees and expenses of the Chairman shall be divided equally between the Company and the union.

"If either party shall refuse or neglect to comply with the provisions of this grievance procedure the other party may apply to the Wartime Labour Relations Board (National) who may amend this procedure as it deems appropriate."

The applications will be granted in accordance with the foregoing.

(Sgd.) G. B. O'CONNOR,
Chairman.

for the majority of the Board.

I dissent, etc.:

(Sgd.) A. J. HILLS.

Dissenting Opinion of Mr. A. J. Hills

I dissent from a decision which injects compulsory arbitration into a collective agreement made before P.C. 1003 came into effect.

The intent of the regulations is to facilitate the making of collective agreements where they do not now exist. The regulations provide that collective agreements, presumably to be made under war conditions, are to have special provisions to avoid stoppage of work.

Under (3) of 21 the parties to an existing collective agreement, as in this case, cannot go on strike, during the term of the collective agreement, but under the regulations the agreement can be terminated and an agreement negotiated which would have to include a provision for final settlement.

for the Respondent.

Dated at Ottawa, April 24, 1946.

Conciliation Proceedings Under The Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Board in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During April 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Carbide & Carbon Chemicals Ltd. (Bakelite & Plastics Div.) Toronto, Ontario and Local 512, United Electrical, Radio & Machine Workers of America. (CIO-CCL). William Dunn, Conciliation Officer.

Eight Decorating Firms: T. Bonner; J. H. Pullen; H. L. MacGowan & Son Ltd.; Lynch & Henderson; A. E. Ritchie; L. E. Pratt & Co.; H. A. Garnet; A. J. Mallett and Local 1151, Brotherhood of Painters, Decorators and Paperhangers of America (AFL-TLC) H. R. Pettigrove, Conciliation Officer.

Kirkland Lake Gold Mining Co. Ltd., Kirkland Lake, Ont. and Local 240, International Union of Mine, Mill & Smelter Workers (CIO-CCL). H. Perkins, Conciliation Officer.

Lamaque Mining Co. Ltd., Bourlamaque, Quebec and Local 654, Val D'Or Mine & Mill Workers—Int. Union M M & Smelter Workers (CIO-CCL). R. Trepanier, Conciliation Officer.

Noranda Mines Limited, Noranda, P.Q. and Local 688, International Union of Mine, Mill & Smelter Workers—(CIO-CCL). R. Trepanier, Conciliation Officer.

National Steel Car Corporation, Hamilton, Ontario and Local 2352, United Steelworkers of America—(CIO-CCL). F. J. Ainsborough, Conciliation Officer.

Royal Canadian Tobacco Company, Toronto, Ontario and Local 254 Tobacco Workers International Union (AFL-TLC). Mr. William Dunn, Conciliation Officer.

Smith and Stone Limited, Georgetown, Ontario and Local 526, United Electrical, Radio and Machine Workers of America. (CIO-CCL) R. Perkins, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

Carbide & Carbon Chemicals Ltd. (Bakelite & Plastics Div.), Toronto, Ontario and Local 512, United Electrical, Radio & Machine Workers of America. William Dunn, Conciliation Officer.

Eight Decorating Firms: T. Bonner; J. H. Pullen; H. L. MacGowan & Son Ltd.; Lynch & Henderson; A. E. Ritchie; L. E. Pratt & Co.; H. A. Garnet; A. J. Mallett, and Local 1151, Brotherhood of Painters, Decorators and Paperhangers of America. H. R. Pettigrove, Conciliation Officer.

National Harbours Board, Montreal, P.Q. and Montreal Harbour Staff Employees' Association, R. Trepanier, Conciliation Officer.

Phillips Electrical Works, Ltd., Brockville, Ontario and United Electrical, Radio & Machine Workers of America. Geo. Fenwick, Conciliation Officer. The April issue of the LABOUR GAZETTE on page.. carried a résumé of the dispute between Phillips Electrical Company (Brockville and Montreal Plants). The settlement referred to therein has been reduced to a written agreement, a summary of which will be found in this issue of the LABOUR GAZETTE in the section devoted to collective agreements and wage schedules.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:—

Eaton-Wilcox Ltd., Windsor, Ontario and Local 195, UAAAIWA (UAW-CIO).

Grey Goose Bus Lines, Limited, Winnipeg, Manitoba and Amalgamated Assn. of Street, Electric Railway & Motor Coach Employees of America, Local 1374 (AFL-TLC).

Ontario Steel Products Co., Ltd., Gananoque Ont. and Local 3209, United Steelworkers of America (CIO-CCL).

Smith and Stone Limited, Georgetown, Ontario and Local 526, United Electrical, Radio and Machine Workers of America (CIO-CCL).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:—

British American Motors, Ltd., Toronto; General Motors Products of Canada (Truck Retail Branch) Toronto; Beattie Cadillac, Chevrolet, Oldsmobile Co. Ltd. Toronto, Giles, Rice and Peters, Ltd. Toronto. The Board of Conciliation established to deal with a dispute between British American Motors, Ltd., Toronto; General Motors Products of Canada (Truck Retail Branch) Toronto; Beattie Cadillac, Chevrolet, Oldsmobile Co. Ltd. Toronto, Giles, Rice and Peters, Ltd. Toronto and Local No. 1, Industrial Union of Automotive Employees (CCL) was fully constituted on April 8, 1946, with the appointment of His Honour J. Egerton Lovering, Toronto, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. E. M. Dillon, Toronto, and Mr. H. Orliffe, Toronto, were appointed on the recommendation of the employer and employees respectively.

British Columbia Packers Limited (Canadian Fish & Cold Storage Co. Ltd.), Prince Rupert, B.C. The Board of Conciliation established to deal with a dispute between British Columbia Packers Limited (Canadian Fish & Cold Storage Co. Ltd.), Prince Rupert, B.C., and United Fisherman & Allied Workers' Union (CCL) was fully constituted on April 15, 1946 with the appointment of Mr. J. E. Eades, Vancouver, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. J. P. Thomson, Vancouver, and Mr. E. Bjarnason, Vancouver, were appointed on the recommendation of the employer and employees respectively.

Canadian Drawn Steel Co., Ltd., Hamilton, Ontario. The Board of Conciliation established to deal with a dispute between Canadian Drawn Steel Co., Ltd. and Local 1031, United Steelworkers of America, was fully constituted on April 17, 1946 with the appointment of His Honour J. C. M. German, Cobourg, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. Norman L. Mathews, Toronto, and Mr. John J. Sullivan, Hamilton, were appointed on the recommendation of the employer and employees respectively.

Canadian Fishing Company Limited (Atlin Fisheries Ltd.), Prince Rupert, B.C. The Board of Conciliation established to deal with a dispute between Canadian Fishing Company Limited (Atlin Fisheries Ltd.), Prince Rupert, B.C. and United Fisherman and Allied Workers' Union (CCL) was fully constituted on April 15, 1946 with the appointment of Mr. J. E. Eades, Vancouver, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. J. P. Thomson, Vancouver, and Mr. E. Bjarnason, Vancouver, were appointed on the recommendation of the employer and employees respectively.

Canners' Machinery, Limited, Simcoe, Ont. The Board of Conciliation established to deal with a dispute between Canners' Machinery, Limited, Simcoe, Ontario, and Local 257, Int. Union, UAAAIWA (UAW-CIO), was fully constituted on April 17, 1946 with the appointment of Honourable Mr. Justice W. D. Roach, Toronto, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. John Sheppard, Simcoe, and Mr. Bora Laskin, Toronto, were appointed on the recommendation of the employer and employees respectively.

Dowell's Pacific Transfer and Storage Co., Ltd., Victoria, B.C. The Board of Conciliation established to deal with a dispute between Dowell's Pacific Transfer and Storage Co., Ltd., Victoria, B.C. and Local No. 234, Canadian Brotherhood of Railway Employees & Other Transport Workers was fully constituted on April 24, 1946 with the appointment of Mr. H. A. Beckwith, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. G. A. Cameron, Victoria, and Mr. D. O'Brien, Vancouver, B.C. were appointed on the recommendation of the employer and employees respectively.

J. B. Smith Lumber Company, Toronto, Ontario. The Board of Conciliation established to deal with a dispute between J. B. Smith Lumber Company, Toronto, Ontario and Local No. 1487, United Brotherhood of Carpenters & Joiners (AFL-TLC) was fully constituted on April 11, 1946, with the appointment of Dr. R. McG. Dawson, Toronto, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. R. V. Hicks, Toronto, and Mr. Fred Molineux, Toronto, were appointed on the recommendation of the employer and employees respectively.

J. H. Connor and Son, Limited, Ottawa, Ontario. The Board of Conciliation established to deal with a dispute between J. H. Connor and Son, Limited, Ottawa, Ontario and Local 641, International Union, UAAAIWA (UAW-CIO), was fully constituted on April 1, 1946, with the appointment of Mr. J. H. Stitt, Ottawa, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. G. Walsh, Montreal and Mr. Alan Adamson, Toronto, were appointed on the recommendation of the employer and employees respectively.

Opal Manufacturing Company Ltd., Toronto, Ontario. The Board of Conciliation established to deal with a dispute between Opal Manufacturing Company Ltd., Toronto, Ontario, and Local 514, United Electrical, Radio and Machine Workers of America (CIO-CCL), was fully constituted on April 23, 1946, with the appointment of His Honour Judge E. Lovering, Toronto, Ontario, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. Norman L. Mathews, Toronto, and Mr. Paul Siren, Toronto, were appointed on the recommendation of the employer and employees respectively.

Prince Rupert Dry Dock & Shipyard, Prince Rupert, B.C. The Board of Conciliation established to deal with a dispute between Prince Rupert Dry Dock & Shipyard, Prince Rupert, B.C. and Marine Workers & Boilermakers Union of Canada, Local No. 2 and National Union of Machinists Fitters, Blacksmiths, Moulders & Helpers, Local No.

1, was fully constituted on April 8, 1946, with the appointment of Mr. F. M. Clement, Vancouver, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. W. S. Owen, Vancouver, and Mr. C. Cameron, Courtenay, were appointed on the recommendation of the employer and employees respectively.

Railway Association of Canada, Montreal, P.Q. The Board of Conciliation established to deal with a dispute between Railway Association of Canada, Montreal, P.Q. and Division No. 4, Railway Employees' Dept. (AFL) was fully constituted on April 4, 1946, with the appointment of Honourable Mr. Justice A. E. McPherson, Winnipeg, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. W. F. Macklaier, Montreal, and Senator A. W. Roebuck, Toronto, were appointed on the recommendation of the employer and employees respectively.

Weston Dairy, Limited, Weston, Ontario. The Board of Conciliation established to deal with a dispute between Weston Dairy, Limited, Weston, Ontario and Local 647, Milk Drivers & Dairy Employees' Union (AFL-TLC) was fully constituted on April 4, 1946 with the appointment of His Honour Judge Samuel Factor, Toronto, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. J. J. Robinette, Toronto, and Mr. G. R. Harvey, Toronto, were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister, or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during April:—

Report of Board in Dispute between Chrysler Corporation of Canada, Ltd., Windsor, Ont., and Local 195, Int. Union, United Automobile, Aircraft and Agricultural Implements Workers of America (UAW-CIO)

On April 27, 1946, the Ministry of Labour received the report of the Board of Conciliation, the personnel of which was as follows: Mr. L. W. Brockington of Ottawa, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. A. F. Fuerth of Windsor, and Norman Levy of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR:

The undersigned, being the members of the Board of Conciliation appointed by you in this matter beg to report as follows:—

A number of hearings were held in the City of Windsor from October 29 to Novem-

ber 3, 1945. On the latter date owing to developments in connection with the general situation then prevailing in the City of Windsor, the fact that the employees of the Chrysler Corporation of Canada Limited went on strike in sympathy with the employees of the Ford Company, and the subsequent appointment of an Arbitrator by the Dominion Government, it was considered advisable for the Board to adjourn its deliberations.

After the report of Mr. Justice Rand's decision was made public, it appeared that there was a possibility that his findings might form the pattern for a general settlement of disputes outstanding in the Windsor area. When that possibility failed to materialize, the Board met the parties again in Windsor on the 11th and 12th of March, 1946, and adjourned for subsequent meetings in Toronto, the results of which will be detailed below.

The matters in dispute between the parties concerned amendment of most of the major provisions of the collective bargaining agreement into which the parties had entered in 1942 as a result of a vote duly taken under the provisions of the Industrial Disputes Investigation Act.

When the hearings of this Board began, it was stated in evidence that about four thousand persons were employed by the Company, there being three thousand belonging to the defined categories which would make them eligible for union membership. A great number of detailed matters were raised before the Board covering most of the individual items and practically the entire field of the collective bargaining agreement. We do not believe that it is advisable for us to attempt to draft an agreement for the parties. We propose, therefore, to limit our reference to those matters which seem to us of major importance leaving to the parties themselves the task of writing into their agreement the recommendations on which they are able to agree.

In view of the inability of the Board to reach unanimity on what is, without doubt, regarded as the most important of the issues outstanding between the company and its employees, it has not been possible to adjust our individual views to the separate items of dispute with as large a measure of agreement as might have been effected in other circumstances.

Throughout the enquiry it was felt that disagreements in other places and other industries had cast their shadow upon the circumstances with which we were called upon to deal. This was unfortunate but presumably inevitable.

Whatever freedom of action and decision may have belonged to the representatives

who appeared before us external conditions did obviously exist by which the spokesmen for the company and the union were consciously or unconsciously influenced. It is only fair to remark that both parties stated that their dispute was not related to any other.

All the members of the Board wish to pay their tribute to the patience, good humour, tolerance and sincerity of those who appeared before it. We were all impressed by the general high standards of working conditions that prevailed in the great Chrysler plant at Windsor with which we were concerned, and by the record of cordial and honourable dealing which has distinguished the history of the mutual relationship of these parties.

It will be convenient to treat the major matters under the headings of Union Security, Recognition, Arbitration, Representatives, Seniority and General.

UNION SECURITY

The Company's attitude in this matter was frank and uncompromising. It had agreed to the formation of a bargaining unit and to a collective agreement. It expressed complete indifference as to the ultimate fate of the Union and stated that whether it became strong or weak, increased its membership or lost a proportion of its present adherents, was none of the Company's concern. It declined to consider any form of check-off or any of the customary devices for maintaining or increasing so-called Union Security. If the Union is to increase its strength, it argued, it must be by its own merits and its own efforts, unaided by the Company. The Chairman with the approval and knowledge of his colleagues, tried by a series of interviews with both parties to find some common ground for agreement. His efforts failed.

In the opinion of the majority of the Board, the promulgation of the findings of Mr. Justice Rand, apart from any other considerations, made the Company's position no longer tenable.

It is the conclusion of the said majority that the immediate and ultimate good of the industry as a whole, the welfare of the community where it is situated, and the interest of the country which it serves will be best advanced by the acceptance by the Chrysler Corporation of Mr. Justice Rand's formula which has been accepted by the Ford Corporation.

No doubt there are present legal weaknesses, particularly with reference to the mutual obligations imposed by the learned Judge which may require legislative consideration. But it seems to Labour's nominee

on the Board, and to the Chairman, that unless the pattern set by the arbitrator in the Ford dispute is accepted by the Chrysler Company as at least an experimental solution, there is a great danger of confusion, dissatisfaction and continuing dispute. The Union is the same in both cases. The industry is similar. The conditions are not dissimilar.

The majority of the Board used every means at its disposal to impress this point of view upon the parties at the last meeting in Windsor. The Union offered acceptance of Mr. Justice Rand's formula as the basis for a two year agreement. The Company declined to consider any such arrangement. The majority of the Board considers that acceptance of the formula is the only reasonable and proper solution available at this time and so recommends.

The Company's nominee on the Board disagrees and has attached hereto a clear and sincere statement of his decision and his reasons.

RECOGNITION

Under this heading the Union asks for an amended clause providing for the recognition of the Union as the sole bargaining agency on behalf of all the Company's employees whose work brings them within the so-called bargaining unit. The Company urged that such recognition should be preceded by certification under the legislative provisions providing therefor. With this contention the majority of the Board does not agree.

When the vote was taken in 1942, approximately 78 per cent of the eligible employees voted for the Union as the bargaining agency. Evidence was given that the percentage of membership has now reached 85 per cent. Whether these figures are completely accurate or not, the relationship between the Company and the Union has been maintained since 1942, and it is not disputed that a very substantial majority of the Company's working force has maintained its Union membership.

The majority of the Board therefore recommends an amendment providing for the recognition of the Union as the sole bargaining agency.

The majority of the Board also recommends the deletion of paragraph 4 of the agreement entitled "Employees' Freedom of Choice" and the substitution of a clause which will more clearly indicate that employees are not discouraged from joining the Union.

ARBITRATION

The Board is unanimously of the opinion that the provisions dealing with reservations to management should remain. Business

could not continue unless they did. It is important, however, that the reservations to management should be defined and known to employees. It is equally important for mutual goodwill and the smooth and efficient progress of the business of the Company that all Company rules and the Union's agreement with the Company should be honourably and fairly observed and enforced. At the present time, grievances are settled unilaterally by the Company in so far as they involve breaches of the Company's rules, and by arbitration in accordance with the procedure laid down in a ruling of the National Labour Relations Board, dated February 26, 1945, in so far as grievances are concerned with misinterpretations or violations of the basic agreement. We recommend to the parties that they agree upon a formula whereby the present procedure is extended and maintained.

While we presume it is already a matter of practice, the rules and regulations of the Company should be published and made known to the employees. Wherever possible, in connection with such rules and regulations, we think it desirable that employees should be informed in writing of notations made against their record with which they may be faced at some time in the future. We do not think that such notice should become the subject of grievance, but believe that the employee should have the right to file a factual reply for later adjudication.

If an employee is punished by reason of a breach of the Company's rules and regulations, it is the opinion of the majority of the Board that there should be a right to appeal and arbitrate the essential fact on which such punishment is based. If, however, the ultimate umpire to be appointed in the manner suggested below confirms the fact on which the Company acted in imposing discipline or punishment upon an employee, then the umpire's functions should be ended and he should have no power to vary or modify any discipline or punishment. Any mitigation of discipline or punishment for a breach of the Company's rules should be in the discretion of the Company.

Subject to the foregoing, it is the opinion of the majority of the Board that all grievances except in so far as they affect probationers charged with a breach of the Company's rules, should be taken up and dealt with by the Union. If the grievance procedure has been exhausted and the parties have failed to agree on the decision, an impartial umpire should be appointed, either by common consent or by the nomination of the Minister of Labour of the Province of Ontario. The decision of the umpire should be final and binding upon all parties. The

Board believes that both the Company and the Union hitherto have acted with fairness towards each other and is of the opinion that the knowledge that disciplinary or punitive action is subject to impartial review would operate for the maintenance and extension of mutual goodwill.

REPRESENTATION

Both the Company and the Union made proposals respectively for the restriction and extension of representation by shop stewards and committee men. The Board is unanimously of the opinion that the present arrangements be continued without change. If, however, further time is necessary for the Union's Committee Chairman, such extension of time should be permitted by the Company without, however, any change in the present provisions for payment.

The majority of the Board is also of the opinion that with respect to Union activity on Company time or premises the present provision should be amended to provide that Union activities should not be allowed on Company premises when they usurp Company time. This would obviously involve no restriction on Union activities during the lunch hour and other agreed recesses.

With reference to the question of the citizenship of union representatives, the majority of the Board believes that as long as there are no restrictions on the citizenship or racial origin of employees, there should be no restriction on the citizenship or racial origin of Union representatives. The Board noted that preference was at present given to American citizens. It would be interesting to learn whether an equivalent preference to Canadian citizens was given on the other side of the international border.

SENIORITY

Provisions regarding seniority in an industrial undertaking of the complexity and size here involved are difficult and require working out in very considerable detail. We will content ourselves with a few general observations.

The majority of the Board believes that if an employee is transferred at his own request, he should have no right to return to his former position. After a transfer is made for cause, the matter should be subject to the grievance procedure as outlined above, and the employee should have the right to be restored to his former position if the basic fact is found in his favour by the final and binding adjudication of the umpire.

It would also appear not unreasonable that if an employee elects for a transfer instead of a layoff, he should have a right to be

restored to his former position. Difficulties arise with reference to the definition of a temporary and major layoff. It was suggested that a temporary layoff be defined as one which does not exceed an agreed period of ten days or some other definitive time, and that seasonal layoff for model changes should be interpreted as indefinite or permanent layoffs.

While it is not possible to make a final decision on this subject, we recognize the hardship and insecurity to employees under the system of intermittent employment which is natural to the industry. From the evidence and the observations of the Company's representatives, we conclude that the Company has been fair and wishes to be fair in all these matters. We can, therefore, only hope that the parties will be able to agree on provisions which will reduce as far as possible, the incidents of hardship that flow from the inevitable conditions that govern the manufacture and assembly of automobiles.

In all matters dealing with seniority, it is only fair to the Company for us to observe that retransfers to a former position must to some extent be guided and determined by undue lapse of time, proved loss of skill and other reasonable causes that make retransfers uneconomical and unadvisable.

Respectfully submitted,

(Sgd.) NORMAN LEVY,

(Sgd.) LEONARD W. BROCKINGTON,

Chairman.

Minority Report

First of all I wish to associate myself with the other members of the Board in my appreciation of the co-operation extended by the Union and the Company in our deliberations and also to the other members of the Board with whom I am in general agreement with many of the fundamental principles over which there is not agreement between the parties.

There are, however, some items in dispute between the parties upon which I find myself entirely in disagreement with the other members of the Board:

(1) The request of the Union for closed shop, maintenance of membership, check off, or as the Union put it, some advanced form of Union Security. In my view, if and until such time as legislation is passed making labour unions legally and financially responsible for their actions or inactions with respect to collective bargaining agreements they have no right to ask for or try to compel a Company to grant the so-called advanced forms of Union Security, other than recog-

nition, freedom of choice and grievance procedure, as provided for under Order in Council, P.C. 1003.

In the instant case the relations between the Union and the Company have been reasonably good. Since the original contract was signed in September, 1942, at which time the Union claimed 78 per cent of the employees in the bargaining unit as members, they have increased their percentage according to their statement as of November, 1945, to 85 per cent of employees in the bargaining unit. There was no evidence submitted to show that the Company in any way impeded the progress of the Union in increasing their membership and indications are that as a result of service rendered the Union did increase its membership in the unit. This, in my opinion, is as it should be and should remain, for so long as labour unions remain the servant of and not the master of the working-man, the Company, the Union and the working-men are safe.

Working men unwilling to pay dues voluntarily into a Union should not be compelled to do so, unless they are assured that the funds so collected will be used for the benefit of themselves or society generally and not for purposes inimical to the welfare of the Company or society in general.

Union security, maintenance of membership, check-off or any other form of advanced union security when assured Unions for a definite period, while they are in no way legally liable for the action of their officers or members, places in the hands of that Union tremendous authority without responsibility, and a certain amount of compulsion and intimidation may be practised in forcing employees against their own free will to pay dues into an organization without redress.

The fundamentals of our laws including labour relation regulations, as outlined in P.C. 1003, would seem to give a man freedom of choice as to whether he desires to belong or not to belong to a trade union or association without being deprived of the right to earn a living by working, and so-called union security or check-off provisions if a condition of employment would seem to infringe upon such right.

Section 19, Clause 2 "C" of Order in Council P.C. 1003 provides that "no employer or employees' organization or any person acting on behalf of same shall seek to compel an employee to abstain from becoming or *continuing to be a member* or officer or representative of a trade union or an employees' organization, or from *exercising his lawful rights*." Lawful rights would seem to give one freedom to join and also freedom to resign from a trade union without fear of loss of opportunity to earn a living.

It does seem to me that a small minority of a bargaining unit, while not members of the Union, is a good check valve on the actions of a trade union in seeing to it that they live up to their responsibility and obligations to their members and fear of loss of membership when no legal or financial responsibility is placed on the Union would seem to be the only available check at the present time. It must be borne in mind that the Company who is the other party to any collective agreement is both legally and financially responsible for any breach of contract entered into.

(2) An employee should be aware of the fact that he is free to join or not to join any Union or Association of his choice.

(3) While there would seem to be some justification in an impartial umpire reviewing the essential facts with reference to a violation of Company rules, on the other hand it does appear that management should, in accordance with their rights as outlined in Section 2 of the Contract, be permitted to promote, demote or transfer employees without interference from an outside party, who may or may not be at all familiar with the conditions necessitating any such promotion, demotion or transfer.

(4) Union activities should not be undertaken or carried out on Company time or premises except as provided under the terms of the collective agreement.

(5) The experience in this industry proves that seasonal layoff for model changes varies in accordance with the time required for changing over equipment and term a seasonal layoff as a permanent layoff, requiring the Company to invoke plant-wide seniority, would seem to impose an unnecessary hardship, for obviously what happens on an action of this kind is that men laid off first are returned to work first so that all men would seem to lose the same proportionate amount of time.

From the record of the relationship between the parties since the signing of the present agreement, viz., July 1, 1944, up to the present date it would seem that by incorporating amendments proposed by both parties which have been agreed to into an amended agreement for a period of a further year from this date and withdrawing by each party of proposed amendments upon which there is a disagreement would not interrupt the reasonably amicable labour relations and working conditions which have prevailed during the past twenty-two months, and I respectfully recommend to the parties that they agree to do so.

All of which is respectfully submitted.

(Sgd.) A. F. FUERTH,
MEMBER OF CONCILIATION BOARD.

Report of Board in Dispute between John East Iron Works, Ltd., Saskatoon, Sask., and Local 3493, United Steelworkers of America

On April 14, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: Mr. F. C. Cronkite, Chairman, Saskatoon, appointed on the joint recommendation of the other two members of the Board, Major M. A. MacPherson, K.C., Regina, and Mr. Peter G. Makaroff, K.C., Saskatoon, appointed on the nomination of the employer and employees respectively.

Report of Board

The members of the Board have had four formal sittings which were attended by Mr. M. A. East, representing the Company, and Mr. Norman Riches, international representative of the United Steelworkers of America, as well as three members of Local 3493. The discussions were most amicable and the members of the Board appreciated the frankness displayed by both parties to the dispute. Written submissions were filed by both parties to the dispute, information was given on all points brought forward by the Board and the members had the benefit of a visit to the Company plant along with representatives of the Company and the Union.

After full discussion and consideration and after conferences with the parties to the dispute it is evident that an agreement cannot be reached on the issue of union security. It should be pointed out, however, that some disposition was shown to abide by the report of the Board. In the written brief filed by the Union the following appears on page 1:

We are aware that Boards of Conciliation are established to try and bring about a satisfactory settlement in cases of this nature, however, if no satisfactory settlement is reached in this particular case, I would like to go on record, on behalf of the employees whom I represent, that we are quite prepared to accept and agree to any recommendation that the Board may make, if the Company also, is prepared to accept your recommendation.

In the Company brief, on page 3, the following is found:

The Company's observations in respect to the proposal of the Union simply resolves itself to the fact that in the event that the Board brings in a unanimous decision under its considered judgment that the Company, through its Directorate, would give full cognizance to any such unanimous decision with a view to undertaking the implementation of any such unanimous agreement which the Board may present—but it is respectfully pointed out that the Directorate conscientiously contends that the right of Management must be maintained for the successful operation of a business which is extremely diversified and complex.

The Company, both in its written brief and in oral representations, took a firm stand against any form of union security and also against a recognition of Local 3493 as the sole bargaining agency, maintaining that the two matters could not in the circumstances be separated. As to the point of union recognition I can find no merit in the contention of the Company. If collective bargaining is to be recognized—and there is a general recognition of the principle—then it would seem that Local 3493 merits recognition as the sole bargaining agency for the employees designated. Indeed this seems to have been the intent of the certifications dated February 7, 1945, and September 12, 1945, under the signature of H. J. Smith, Chief Executive Officer, Wartime Labour Relations Board for Saskatchewan.

The matter of union security is more difficult and the reasons supporting any suggested solution are not particularly compelling. The Company objects to any form of union security on the general grounds that it interferes with the freedom both of the employer and potential employees, that the union is under no responsibility and that it in a real sense will interfere with management of the business by the company officials. The Company also relies on the fact that this business is unusually complicated having in mind the comparatively small number of employees. In truth the Company is really carrying on a jobbing business which involves the shifting of employees about a good deal from one department to another. The Union, on the other hand, maintains that collective bargaining is not secure unless there is some guarantee that the union itself will persist.

After an examination of all the factors involved I have concluded that the arrangement which holds out most promise to all concerned, is a maintenance of membership clause, which gives a measure of union security. I would normally prefer that at least one agreement should be effected merely on a collective basis and that with experience gained and harmony established, union security might come after a year or two. Unfortunately I do not believe this solution will meet the circumstances of the present case. For this conclusion I suggest the following reasons: (1) the general tendency in the development of industrial relations has been in the direction of some form of union security; (2) the dispute in this case has already extended over a considerable period, and without assigning any blame for this, long-continued disputes are very undesirable

and may get out of hand. A reasonable compromise should be effected; (3) the employees see around them other enterprises in which the employees have, or can have, union security provisions in their contracts. The denial of such a privilege in the present case undoubtedly impresses the employees as being unreasonable; (4) As far as possible labour contracts should conform to the social feeling of the locality. In Saskatchewan maintenance of Membership is provided for in *The Trade Union Act*, Statutes of Saskatchewan 1944 (Second Session) c. 69, s. 25. That the Company is not subject to this legislation is something of an accident. This argument would also seem to dispose of the Union's demand for a Closed or Union Shop, which would go far beyond the legislation noted above even though it is probably the most advanced labour legislation in Canada.

In my opinion this arrangement would be in the interests of both the Company and the employees and would work in the direction of the effective operation of a plant which renders very essential services in the economic life of this community.

The maintenance of membership clause should apply to new employees only, and should not become effective until a new employee has been in the service of the Company for a minimum period of 60 days. It may be noted that the period under the Saskatchewan legislation is 30 days but the nature of the business of the Company would seem to warrant a longer period. There should also be provision for a revocable check-off with collection of union dues by the Company by deduction from the wages of the employees.

RECOMMENDATIONS

(1) That Local 3493, United Steelworkers of America, be recognized as the sole bargaining agency for the designated employees of John East Iron Works, Limited, Saskatoon.

(2) That the collective bargaining agreement between the Union and the Company shall if the Union so requests, contain a clause providing that present members of the union shall maintain their membership in the union during the tenure of the agreement and that new employees shall as a condition of employment apply for membership in the union within sixty days of their employment and maintain their membership during the tenure of the agreement.

(3) That if requested by the Union the collective bargaining agreement shall contain a clause obligating the Company to collect union dues from union members by deduction from the wages of such members, and to remit the same to the union. Such obligation to cease with reference to any particular

union member who has notified the Company in writing to that effect.

(Sgd.) F. C. CRONKITE,
Member and Chairman.

(Sgd.) P. G. MAKAROFF,
Member of the Board.

Saskatoon, Sask., April 12, 1946.

Minority Report

I have listened to the evidence which was submitted in this hearing and feel that everything has been done which could be done to get the parties interested in this dispute to agree. Failing in this the responsibility then falls on the individual arbitrators to deal with the dispute on the merits.

I am glad that on certain points, in so far as the Board is concerned, there has been unanimity. I cannot agree, however, with the majority decision that there should be a recommendation for a maintenance of membership clause in the agreement between the Employer and the Union. What we must remember is that we are proceeding under P.C. 1003 and that Order does not write into a collective bargaining agreement any such term as that. We then have to consider the facts and circumstances in the particular case, and in the light of the circumstances here and the facts as given I feel it would be a mistake to recommend under a first agreement as between the parties that there be any provision whereby membership of the Union is a condition of employment.

I am very strongly of the view that in first collective bargaining agreements between employers and their employees the inclusion of such clause is bound to result in such lack of harmony, confidence and understanding as will ultimately defeat the main purpose of such agreements. I feel that the Union should be recommended to sign an Agreement in the first instance without such a clause, and then by experience in collective bargaining further developments in due course might take place and might be expected to take place extending the terms of the Agreement, if and when that confidence which it is hoped will develop has developed, and that understanding has been created in practice which should develop in practice as between the contracting parties. Likewise I feel that in the matter of the check-off clause that there should be no recommendation in this regard, and in short my recommendation would be that an Agreement be signed between the parties and that on the points in issue the Company should recognize the Union as the sole bargaining agent, but that no recommendation should be made on the other clauses.

Member.

**Report of Board in Dispute between Robbins and Myers Co. of Canada, Ltd.,
Brantford, and International Union, United Automobile, Aircraft and
Agricultural Implement Workers of America (UAW-CIO)**

On April 23, 1946 the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Hon. Mr. Justice W. D. Roach, appointed on the joint recommendation of the other two members of the Board, Mr. J. G. McMillen, and His Worship J. H. Matthews, both of Brantford, appointed on the nomination of the employer and employees respectively.

Report of Board

The undersigned members of the Board of Conciliation established by you in this matter, hereby submits its report as follows:—

The Board met with the parties at the City of Brantford, Ontario, on the 28th, 29th and 30th of March, 1946.

The Company was represented by Mr. K. C. Berney, Vice-President and Managing Director, and Mr. S. O. Allen, Superintendent.

The Union was represented by Mr. Alfred John Brooks, International Representative.

We found the representatives of the parties to be most anxious to reconcile their opposing views on the matters that were an issue between them before us. Those matters were many in number and we are pleased to report that due largely to the co-operation of the parties and such assistance as we were able to give them, they have agreed to all of the terms of a Collective Bargaining Agreement.

The Union requested that the agreement should contain a provision whereby, in the event of an ex-serviceman becoming employed by the Company within twelve months from the date of his release from any branch of the military services of Canada, even though he had never previously been employed by the Company, after a satisfactory probationary period he should automatically acquire seniority among the employees of the Company dating back to the date of his induction into the military services.

After considerable discussion the Union agreed to withdraw this request but urged that your Board should make such reference in this report as would reflect the nature of the discussion and the views of the parties.

Many young men entered various branches of the military services of Canada during the recent Great War either direct from school or in any event, due to their youth without ever having been previously steadily employed. Those men have now returned or are returning to civil life and a great number of them will be entering upon employment

in industry. Among them there are doubtless many who, had the war not intervened would have been in civil employment in various industries during the war years and during the period of such employment would have been accumulating seniority. It was to protect them from the loss of such accumulated seniority that the proposed provision in the agreement was suggested.

The Company made it plain that it would not be outdone by the Union or any other person, firm or corporation in any matter pertaining to rights and privileges to be extended to personnel returning to civil life from any branch of the armed services of Canada. Notwithstanding the goodwill and generous disposition towards such men held by both the Union and the Company the parties were unable to agree with respect to the proposed term.

The problem which the Union sought to solve by the introduction of the proposed provision is not at all simple. During the War years this Company was engaged solely in the production of war equipment. Many other of our Canadian manufacturers were in a similar position during those years. Their output went to various theatres of the war to service the fighting forces not only of Canada and the Empire but also of all our Allies. Without the equipment for war the armed services could not have waged war. Many of those who went into industry during those years if they had been permitted to follow their own inclinations would have enlisted in some branch of the armed services but were prevented from doing so by reason of physical unfitness or by reason of special technical knowledge or training which qualified them to contribute more towards the war effort in industry than elsewhere. There is merit in the argument that these men should not now be penalized by surrendering seniority which they may have acquired and for isolated employers in industry by a collective bargaining agreement to compel them to do so would engender resentment against those particular manufacturers. The very purpose of such an agreement is to ensure stable and harmonious employer-employee relations and the introduction of such a provision might mitigate against that result rather than promote it. An employer in any given industry is desirous that no element should be introduced into his business that might result in his competitors being placed in a more advantageous position than himself and

not least among the desirable and important features in any such business is harmonious employer-employee relations.

The Company urged that in the absence of any legislation which would make the provision which was suggested by the Union applicable to all industry that it should not be asked to incorporate it in a collective bargaining agreement with its employees.

All of which is respectfully submitted.
Dated this 15th day of April, 1946.

Member.

Activities under the Conciliation and Labour Act and Order in Council P.C. 4020

OFFICERS of the Industrial Relations Branch dealt with 18 industrial disputes during the month of April, involving 10,467 workpeople employed in 38 separate establishments of these, 14 were new disputes which originated during the month and 4 were situations which had been untermiated as of March 31, and received further attention in April. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Rubber Products Workers, St. Jerome, P.Q.
—The February issue of the *LABOUR GAZETTE* contained a report of a strike by some 1,425 employees of the Dominion Rubber Co., Ltd., St. Jerome, P.Q. which was terminated by an agreement to submit to arbitration the question of the wage-rate grievance of four eye-

letters. On April 8 the Department received a report of the decision rendered unanimously by the Arbitration Committee, of which Prof. James A. Coote, of Montreal, had been appointed independent chairman by the Minister of Labour. The Arbitration Committee decided that the claim for a portion of the wage increase demanded was justified. Certain retroactive wage adjustments were also paid over to the four employees from a fund deposited by the Company with the Department of Labour.

Merchant Seamen, Montreal, P.Q.—On April 16 the Department received a decision rendered in arbitration by Mr. Lucien Rodier, K.C., who had been appointed by the Minister of Labour to arbitrate a dispute between the Park Steamship Co. Ltd., Montreal, P.Q., and the Canadian Seamen's Union over the claim for overtime rates of pay by an employee for carrying out the extra duties of a sick member whilst the vessel was at sea. The Arbitrator decided in favour of the claimant, and directed the company to pay overtime rates for the performance of aforementioned duties.

Coal Miners, Canmore, Alberta.—The Department received word on April 10, that some 234 miners employed by Canmore Mines Limited, Canmore, Alberta, were on strike. The strike was found to have been precipitated by an assignment of work to a miner, holding papers as a fireboss, requiring him to alternate between the jobs of fireboss and rock miner. On request of the Western Representative of the Department of Labour, District Officers of the United Mine Workers of America instructed the men to return to work and subject their grievance to the procedure provided for in the collective agreement. The request went unheeded. The secretary of the local union contended that, primarily, the dispute concerned the right of the employee in question to maintain his membership in the union, as acceptance of the position of fireboss, which the company insisted upon, would have terminated his membership in the union by making him an agent of management. He further alleged that the agreement contained strike pledges only in respect to wages and working conditions and did not cover the existing issue.

However, on April 22 the Department was notified by its Western Representative, who had kept in contact with the parties, that the men had agreed to resume work, pending further negotiations under the procedure in the agreement.

Plastics Workers, Toronto, Ontario.—Pursuant to a request received from the

Minister of Labour for Ontario, His Honour Judge James A. Parker was appointed during April an Industrial Disputes Inquiry Commissioner by the Minister of Labour under Section 5 of P.C. 4020, to investigate the charge that nine employees of Wm. E. Dixon, Limited, Toronto, Ontario, had been dismissed or discriminated against because of union activity. The company's claim that the nine employees were inferior workers and were discharged because the plant was over-staffed was disputed by various other employees.

The Commissioner expressed the opinion that the nine employees were discharged not because of union activities, but as a result of economic necessity occasioned by scarcity of raw materials and disturbed markets.

Coal Miners, Lethbridge, Alberta.—Notification of a strike of some 245 miners employed at Number 8 Mine of the Lethbridge Collieries, Limited, Lethbridge, Alta., was received by the Department on April 15.

The controversy arose when insufficient miners reported for work the previous Saturday morning to insure a full day's work for the tippie crew, and the company sent them home after four hours. The latter employees demanded a full day's pay and refused to return to work until their demands were acceded to. The Company claimed that it had acted in accordance with the provisions in the agreement covering part shifts and that the strikers were at fault.

The Western Representative of the Department of Labour took the matter up with officers of District 18, United Mine Workers of America, and suggested that it was the responsibility of the District Executive of the union to instruct the employees to resume work immediately and take up their grievance in accordance with the provisions of their agreement. Work was resumed on April 17.

Coal Miners, Stellarton, Nova Scotia.—On April 15 the Department received word of a work stoppage by employees of the Acadia Coal Company in protest against the utilization of blasting powder which emitted a small flame when fired. An Industrial Relations Officer was successful in having the District Executive Board of District 26, United Mine Workers of America, advise the employees to resume operations.

Agreement to resume work was reached on April 23 when, subsequent to an investigation by an Inspector of Mines, it was decided to ship the defective material to the supplying company for testing and an alternative supply procured. The strike involved about 1,120 employees in all the company's mines.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible, because of limitation of space, to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour, and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying: Coal Mining

CAPE BRETON AND SPRINGHILL, N.S.—DOMINION COAL COMPANY LIMITED AND CUMBERLAND RAILWAY AND COAL COMPANY AND UNITED MINE WORKERS OF AMERICA, DISTRICT 26.

Agreement effective from the retroactive date of February 1, 1945, until January 31, 1947, and thereafter from year to year subject to notice. The company recognizes the mine committee in the discharge of their duties as provided for in the agreement which applies to all union members and to all eligible to membership in the union. Check-off: the company agrees to deduct from all union members' pay all dues, fines, and initiation fees, also assessments and levies strictly for union purposes. The maximum amount to be so deducted not to exceed \$5 in any one month.

Hours of work: 8 per day for underground, 8½ per day including ½ hour for lunch for surface workers, except when on continuous operations, when the hours are 8 per shift for both surface and underground workers. Overtime: machinists, blacksmiths, carpenters, and electricians, time and one-half for overtime, double time for Sundays; underground workers, time and one-half for Sundays. Vacation: employees covered by the agreement to be granted vacations with pay in accordance with Findings and Directions of the National War Labour Board.

Wage rates, effective March 1, 1946, including the 17 cents per shift increase granted from that date: surface workers, per day—labourers, teamsters \$5.84, tippie men \$5.84-\$5.94, wash-house and boilertenders \$6.23, electricians, carpenters \$6.39, blacksmiths \$6.53, mechanics \$6.65, machinists \$7.86, hoisting enginemen \$6.96-\$7.45, stokers \$6.40; underground workers, per day—labourers, drivers, pit stablemen

\$5.84, pickmen \$5.94-\$6.11, timbermen \$5.94, dispatchers \$6.31, pipemen \$6.40; shops, per hour—machinists, blacksmiths, boilermakers, moulders 91-98 cents, patternmakers 98 cents, carpenters 93 cents, welders 90-98 cents, tin-smiths 93-98 cents, drillers 84-98 cents, apprentices to start at \$3.62 per day, increased by 43 cents per day each six months for four years; electrical department—electricians and linemen 91-99 cents per hour, helpers 80 cents and labourers 73 cents.

Provision is made for penalties of absenteeism, appointment of checkweighmen and grievance procedure.

Mining, Non-Ferrous Smelting and Quarrying: Metal Mining

PREMIER, B.C.—SILBAK PREMIER MINES LIMITED AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 694.

Agreement to be in effect from October 16, 1945, to October 15, 1946, or so long as the union maintains a majority of the employees, whichever period is shorter, and until a new agreement is made. This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE* for March, 1945, p. 346, with the following additions—Vacation: joint application has been made to the National War Labour Board for an additional vacation day with pay for each additional year of service to a maximum of six extra days vacation for all employees with seven or more years of continuous service. Wage rates: joint application was also made for permission to increase wage rates of certain specified classes of workers.

Manufacturing: Fur and Leather Products

OSHAWA, ONT.—ROBSON LEATHER CO., LIMITED AND THE INTERNATIONAL FUR AND LEATHER WORKERS UNION OF U.S.A. AND CANADA, LOCAL 205.

Agreement to be in effect from September 12, 1945, to October 1, 1946, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees.

Hours of work: standard work week shall consist of 48 hours and 2 hours overtime, consisting of 9 hours per day Monday through Friday and 5 on Saturday for day workers; 10 hours per night Monday through Friday for night workers. Overtime of time and one-half the employee's regular basic rate shall be paid for all work performed after regular working hours or in excess of 48 hours per week, or on Sundays and any of six specified statutory holidays. Vacation: one week with

pay for employees with one to five years' service with the company and an additional day for each year's service over five to a total maximum vacation of two weeks.

Wage rates: existing scale, subject to any changes ordered by Regional War Labour Board, shall remain in effect during the term of agreement.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

OSHAWA, ONT.—GENERAL MOTORS OF CANADA LIMITED AND THE INTERNATIONAL UNION UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 222.

Agreement to be in effect from February 1, 1946, to November 1, 1947. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1943, p. 1528, with the following addition—Check-off: the company will deduct the sum of \$1, union dues, monthly from the pay of employees who so authorize and will remit same to the union.

TORONTO, ONT.—FORD MOTOR COMPANY OF CANADA LIMITED (TORONTO PLANTS) AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 584.

Agreement to be in effect from February 21, 1946, to April 30, 1947, and thereafter subject to two months' notice before May 31, or November 30 of any year. The company recognizes the union as the sole collective bargaining agent for all eligible employees. Compulsory check-off: effective February 1, 1946, the company will deduct monthly from the pay of all employees covered by the agreement (whether members of the union or not) such sum as may from time to time be assessed by the union on its members according to its constitution for general union purposes and remit same to the union. The compulsory check-off does not apply to special assessments relating to special union benefits, nor to entrance fee. Any employee shall have the right to become a member of the union by paying the entrance fee and complying with the constitution and by-laws of the union.

No strike, general or partial, shall be called by the union before a vote by secret ballot supervised by an officer of the Department of Labour for Ontario appointed by the Minister of Labour for that province shall have been taken of all employees to whom the agreement applies and a majority voting have authorized the calling of a strike within two months from the balloting. The union shall repudiate any strike or other concerted cessation of work whatsoever that has not been authorized and called by the union by any group or number of employees and the union shall declare that any picket line set up in connection therewith is illegal and not binding on members of the union. Should the union violate either of the above conditions it shall be liable to the penalty of a suspension of the check-off, in the case of any unauthorized strike by the union or an unauthorized general strike or concerted cessation of work by employees, which it does not repudiate or of a picket line in connection therewith in respect of which it does not declare for not less than two and not to exceed

six monthly deductions; and in the case of an unauthorized partial strike or cessation of work by employees, for failure to repudiate or declare, not less than one and not more than four monthly deductions. Employees participating in any such unauthorized strike or concerted cessation of work shall be liable to a fine of \$3 a day for every day's absence from work and to loss of one year's seniority for every continuous absence for a calendar week or part thereof.

Wage scales and classifications may be the subject of a supplementary agreement. Two ten-minute rest periods during each shift shall be granted the employees contingent upon the strict adherence to the time limits thereof by the workers.

Provision is made for seniority rights and grievance procedure.

WESTON, ONT.—MOFFATS LIMITED AND UNITED STEELWORKERS OF AMERICA, LOCAL 3129.

Agreement to be in effect from August 1, 1945, to July 31, 1946, or 1947, if two months' notice shall not have been given. The company recognizes the union as the sole collective bargaining agency for all eligible employees.

Hours of work and overtime: standard work week shall not exceed 48 hours; time and one-half for all time worked in excess of 48 hours per week. In computing the 48 hours credit will be given for hours not worked on any of six specified statutory holidays or because of illness or accident or other cause proven satisfactory to the company. Time and one-half also shall be paid for work on statutory holidays except as part of regular shift. Vacation: one week with pay for employees with one or more years' seniority and regular attendance during previous year; after 25 years' service with company two weeks with pay.

Wages: present scale now in effect shall prevail during the period of the agreement subject to any changes directed by the Regional War Labour Board provided that either party may appeal to the National War Labour Board from any decision of the former.

Provision is made for seniority rights and grievance procedure.

HAMILTON, ONT.—THE B. GREENING WIRE CO., LIMITED AND UNITED STEELWORKERS OF AMERICA, LOCAL 2950.

Agreement to be in effect from July 1, 1945, to June 30, 1946, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the bargaining agency for all eligible employees.

Hours of work and overtime: standard work week shall not exceed 47½ hours and standard day 9½ hours; when continuous operation is necessary a 48-hour week and an 8-hour day shall be the standard. All time worked in excess of the above weekly or daily standard hours shall be paid for by adding to the total number of incentive hours one-half of the employees base rate for each hour of overtime worked; overtime rates also for all work between 7 a.m. and 9.30 p.m. on Sunday and eight specified legal holidays except for those whose regular duties embrace these days. Vacation: one week with pay for employees with one to 10 years' service with the company, two weeks with pay for those with 10 or more years' continuous service with the company contingent upon regular attendance at work during preceding year.

Hourly wage rates: carpenter shop, cleaning and annealing (wire mill), light jobbing looms

56 to 76 cents; heavy jobbing looms 56 to 70 cents; cloth stock 56 and 66 cents; wire drawing (wire mill) 74 to 80 cents; wire stock 62 and 66 cents; wire mill (general) 56 and 64 cents; wire works, netting mill 56 to 74 cents; perforating 60 to 90 cents; rope 56 to 80 cents; screen bar 52 to 74 cents; screen stock 56 to 66 cents; die maker 74 cents; electrician, machinist 88 cents, electric galvanizer 68 and 74 cents; timing operator 74 cents; light splicing 56 to 78 cents; heavy splicing 52 to 80

cents; spooling 56 to 66 cents; stapling 64 cents; millwright, welder 86 cents; helpers 60 to 68 cents; oiler 70 cents; painter 66 and 76 cents; helper 56 cents; shipping and receiving 56 to 62 cents; firemen-third class 64 cents; watchmen, gatemen 54 cents; general labour 52 cents. Starting rates are somewhat lower than the above basic rates.

Provision is made for seniority rights and grievance procedure.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the act include the amendment of eight Orders in Council and the correction of four others, all of which are noted below. Requests for the amendment of the agreements for barbers and hairdressers at Valleyfield, for building trades at St. Hyacinthe and Quebec, for the sash and door industry at Quebec, for hospital employees at Quebec, Three Rivers, etc., and for both the fine glove and work glove industries for the province were published March 23. Requests for the amendment of the agreements for building trades at Joliette, St. Johns and Sherbrooke, for barbers at Sherbrooke, for wholesale food stores at Quebec, and for barbers and hairdressers at St. Johns were published March 30. Requests for the amendment of the agreements for the tannery industry for the province, for the hardware and paint trades at Quebec, for

funeral undertakers at Montreal, for tavern employees at Quebec, for manufacturing sheet metal products at Montreal, for the ladies' cloak and suit industry for the province, for the paint industry for the province, for barbers and hairdressers at Quebec and Montreal, and for the retail fur industry at Montreal were published April 6. Requests for the amendment of the agreements for the furniture industry for the province, for retail trade at Chicoutimi, for policemen and outside municipal employees at Quebec for municipal employees at Kénogami, for the embroidery industry at Montreal, for building trades at St. Jerome, for barbers and hairdressers at Farnham, and for the wholesale fur industry at Montreal were published April 13. Requests for the amendment of the agreements for building trades at Sorel, municipal employees at Jonquière, and lithographers in the province were published April 20.

Orders in Council were also published approving the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated March 21, and gazetted March 30, amends the previous Orders in Council for this industry (L.G., April, 1945, p. 517, March, p. 349 and other issues) by the addition of one company as a contracting party.

WORK GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated March 28, and published April 6, amends the previous Orders in Council for this industry (L.G., October, 1945, p. 1520, and previous issues) by increasing the piece rates for certain operations.

Manufacturing: Textile and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated March 21, and gazetted March 30, extends the term of the agreement (L.G., April, 1945, p. 517, and previous issues) to June 1, 1946.

Manufacturing: Paper and Paper Products

**MANUFACTURING PAPER BOXES (CORRUGATED),
PROVINCE OF QUEBEC**

A correction of the Order in Council relating to this industry (L.G., April, 1946, p. 499, and previous issues) was published in the *Quebec Official Gazette*, March 30, 1946. This correction does not affect the summary already given.

Manufacturing: Printing and Publishing

PRINTING TRADES, QUEBEC

An Order in Council dated March 28, and gazetted April 6, replaces the previous agreement for this industry. Agreement to be in effect from April 6, 1946, to October 15, 1947, and from year to year thereafter until 60 days' notice. Territorial jurisdiction comprises the judicial districts of Quebec, Beauce, Montmagny, Kamouraska, Rimouski, Gaspé and those parts in the districts of Three Rivers, St. Francois and Arthabaska not subject to the decree governing the printing industry in the Montreal district.

Establishments governed by the decree are divided into four classes for the purpose of rating the wages and the duration of labour. Class "A" includes: (1) all shops operating one or many rotary presses for any purpose whatever; (2) all shops operating three or more automatic or hand-fed presses capable of taking a sheet of 24" x 36" or of a larger size. (Shops in rural districts are not included in class "A"; the same applies to bag manufacturers.) Class "B" includes all shops operating two cylinder presses or more, or one or more composing machines, as well as photogravure, electrotyping, lithographing, offset, photolitho, ruling and bookbinding establishments not specifically mentioned in classes "A" and "D"; it also includes the paper bag manufacturers. Class "C" includes all shops or establishments not included in the other categories. Class "D" includes all shops or establishments engaged exclusively in bookbinding operations.

Hours: for day work—45-hour week for establishments of classes "A", "B", and "D" in judicial district of Quebec, 48 hours for class "C"; hours for night work are 42 per week with a maximum of 9 hours per night. Overtime and all work after noon on Saturday is payable at time and one-half, double time on Sundays and five specified holidays.

Journeymen on night shifts shall receive \$2 more per week than the regular rates established for day workers. Foremen shall receive \$4 per week more than journeymen in classes "A" and "B" and \$3 more in the other classes. Apprentices—from \$9 in first year to \$21 in second six months of fifth year, and \$1 more per week for night work in their first, second, and third years, and \$2 in their fourth and fifth years. Bookbinding female employees—from \$7 to \$14 in the second six months of the third year. Vacation: one week with pay after one year's service. In judicial districts other than that of Quebec wage rates may be reduced 15 per cent and overtime work shall be paid at time and one-half, with a 48-hour day week, and 45 hours at night.

Home work is prohibited. Special provision is made for board and lodging and for apprenticeship regulations.

Manufacturing: Miscellaneous Wood Products

SASH AND DOOR INDUSTRY, QUEBEC

A correction of an Order in Council, relating to this industry (L.G., March, 1945, p. 349; April, 1946, p. 498) was published in the *Quebec Official Gazette* March 30, changing the rate for junior journeyman-joiner (one year) from 60 cents to 58 cents.

Manufacturing: Metal Products

CLOCKMAKERS: MONTREAL

An Order in Council, dated March 28, and gazetted April 6 amends the previous Orders in Council for this industry (L.G., Nov., 1943, p. 1530; Aug., 1944, p. 1007, Dec., p. 1515). Territorial jurisdiction now comprises Montreal and Jesus Islands and the county of Terrebonne.

Construction

BUILDING TRADES: MONTREAL

An Order in Council, dated March 21, and gazetted March 30, amends the previous Orders in Council for this industry (L.G., Feb., 1946, p. 187, April, p. 499 and previous issues by providing for the 1 cent increase in the wage-rates for common labourers.

BUILDING TRADES: CHICOUTIMI

An Order in Council, dated March 21, and gazetted March 30, amends the previous Orders.

Minimum Wage Rates for Printing Trades in Judicial District of Quebec

	A	B	C	D
1. Composition shops, journeyman-typographers, keyboard operators and castermen.....	\$0.88	\$0.79	\$0.57
2. Printing shops (hourly journeyman pressmen and stereotypers).....	0.84	0.76	0.65

Trade

RETAIL STORES, QUEBEC

A correction of an Order in Council relating to this trade (L.G., April, 1943, p. 490; August, 1944, p. 1007, Sept., p. 1142 and previous issues) was published in the *Quebec Official Gazette* April 13. This correction does not affect the summary already given.

Service: Professional

RELIGIOUS INSTITUTION EMPLOYEES: ST. HYACINTHE

A correction of an Order in Council relating to this agreement (L.G., March, 1945, p. 350, April, p. 518) was published in the *Quebec Official Gazette* April 6. The correction does not affect the summary already given.

Canadian Railway Board of Adjustment No. 1

Summary of Decisions

REPORTS have been received covering the following cases heard by the Canadian Railway Board of Adjustment No. 1.

The Board was established under a voluntary agreement concluded in 1918, between the several railway companies and certain of the railway organizations. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

This agreement was supplemented by a Post-War Agreement continuing the Board's functions entered into April 15, 1921. The text of the Post-War Agreement was published in the Board's ninth triennial report, dated September 30, 1945, together with changes in the personnel of the Board and a tabular summary of the cases adjusted during the preceding three-year period.

The Board consists of six representatives of the railways and six representatives of labour, one from each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Rail-

way Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 549—Canadian National Railways (Atlantic Region) and the Brotherhood of Locomotive Engineers

The Joint Statement of Facts disclosed that an engineer and a fireman were assigned to work train service in a subdivision and went off duty in a town at 8.50 p.m. They came on duty at 11 o'clock p.m., the next day after being off duty for 26 hours and 10 minutes.

The dispute arose over the application of article 2, Clause (e) of the current schedule for Locomotive Engineers which reads as follows: "Engineers assigned to work train service will be allowed one day for each twenty-four hours so held, whether at or away from home terminal".

The employees contended that the twenty-four hour period should apply in accordance with the wording of the article.

The Railway Company maintained in its brief that the men "were compensated for each calendar day". The Company's interpretation of the clause was "that the 24 hours

Manufacturing: Paper—Every day and in the clause has always been

MANUFACTURING P.

PROVINCE OF in its decision sustained the A correcti of the employees. to this in

previ-

Case No. 550—Canadian Pacific Railway Company (Western Lines) and the Brotherhood of Locomotive Engineers

The dispute emanated from three claims for 50 mile runs made by an engineer because of the failure of the Company to utilize his services when extra engineers were required when he was not on duty, but available.

The Joint Statement of Fact disclosed that on two occasions extra engineers were required for extra road work due to the Engineers' Spare List having been exhausted. The engineer in question was the junior engineer on the Engineers' Working List, and at that point had been required to fill a yard vacancy because of the lack of applications for the assignment. He was not on duty at the time the extra engineers were required for road trips, and as he was available and not called he made claim for 50 miles run around in each case. The claims were denied.

The employees' contention was based upon article 25, Clause (g) of the Engineers' Schedule which reads as follows: "If run

around available, Engineers will be entitled to 50 miles at minimum road rates". The Employee Committee supported its claims under two separate provisions: (a) Article 3, Clause (d) of the schedule which reads in part "... Should there be no available engineers, the senior available qualified fireman will be used..." The claimant was available; his claim, therefore, they contended was justified. (b) "... Correspondence between the M.M. of the District and the General Chairman constitutes an agreement...and inasmuch as it does not provide for termination of its terms," (agreeing to the utilization of junior engineers in yard service, when the spare engineers' list has been temporarily exhausted) "by other means than mutual consent," it constitutes a valid one.

The Company's contention was that subsequent developments necessitated the annulment of the unauthorized local agreement and the reinstitution of the provisions of previously-existing schedules. The Company maintained that the provisions of the governing schedules had been observed and there was, therefore, no basis for the claims.

The Decision of the Board was that the engineer was in assigned service and therefore not available. The claim of the employees was not sustained.

Exchange of Farm Workers and Equipment Between Canada and U.S.A.

Arrangements have again been made this year, between Canada and the United States for the exchange of harvesting labour and equipment between the two countries.

The plan, similar to arrangements in effect in recent years (L.G., June, 1945, p. 805), covers chiefly the movement of harvesting equipment, usually combine reapers, between the Canadian Prairies and adjacent states of the United States. In so far as labour is concerned the arrangement affects not only the harvest workers moving to and from the Prairie Provinces but certain other movements as well—notably tobacco curers for Southern Ontario from the Southern States, and potato pickers who move out of Quebec into the State of Maine.

The first movement of labour and equipment took place between the Prairie Provinces and the Mid-Western United States. The arrangements will enable operators, with their machines and members of their crews, to cross the border with a minimum of delay during the harvesting season.

This year Canadian operators with their harvesting crews and equipment were permitted to enter the United States as early as May 15. The latest date for their return has been set at September 1. Later in the summer, when Canadian harvesting commences, United States crews and equipment will be entering Canada and will be permitted to remain until December 31.

In announcing the completion of negotiations, the Hon. Humphrey Mitchell, Minister of Labour, declared: "Similar arrangements during the latter years of the war helped us out of manpower shortages on the farms in a great many cases. It worked to the mutual advantage of both countries. With farm labour shortages again prevailing this year, and with a serious situation to be faced at harvest time, we look to the assistance we will receive from men and machines coming in from the United States, to give us a seriously needed helping hand."

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:—

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the province for vocational schools.

Cumulative Enrolment

From its inception up to March 31, 1946, the gross enrolment in all types of projects has been 488,083 made up as follows:

Full-time Pre-employment classes for war industry	108,430
Part-time classes for persons employed in war industry	35,256
Full-time Plant Schools in industry ..	38,000
Industrial Supervisors and Foremen ..	114,649
R.C.A.F. Tradesmen	65,214
Army Tradesmen	49,262
Navy Tradesmen	9,056
Discharged Members of the Forces ..	58,096
University Students	10,120

Training of Discharged Members of the Forces

The number of new trainees enrolled during the month in all types of training was 6,595, which was slightly less than the number of new trainees enrolled during the month of February.

The total under training at the end of March was 36,341, showing a gain of approximately 3,000 over the enrolment at the end of February.

Further progress has been made in securing supplies of capital equipment and tools, materials and supplies. Arrangements have been made to expand the training facilities by providing board and lodging accommodation at the training centres in North Sydney, Pictou, Windsor and Moncton. Although there are still substantial numbers of veterans awaiting training for certain occupations the size of the waiting list has been greatly reduced in most centres during the month.

The new co-operative arrangement with the National Employment Service offices for the expansion of training-on-the-job of the trainees is beginning to produce gratifying results, following increased publicity through the press and radio and by letters and personal contacts with individual employers

throughout the country. It is expected that the anticipated increase in industrial employment during the spring and summer months will provide still further training-on-the-job opportunities, and it may also reduce the number of veterans enrolled in pre-employment vocational classes.

Training of Civilian Apprentices

During the year there has been a substantial increase in the number of apprentices who are indentured to employers and registered in the various trades designated under the Provincial Apprenticeship Act. In the seven provinces with which the Dominion Department of Labour has an Apprenticeship Agreement, the number of apprentices so registered and indentured as of March 31, 1946, was:

Nova Scotia	113
New Brunswick	23
Ontario	2,869
Manitoba	144
Saskatchewan	92
Alberta	386
British Columbia	1,282

making a grand total of..... 4,909

The great majority of these apprentices are in the building and construction trades or in automobile repairing work. The number of designated trades is being gradually added to in the different provinces with purchase of apprenticeship varying from 2 to 5 years according to the trade.

Vocational Schools Assistance Agreement

Under this Agreement, which is operated in all provinces, the Dominion Department of Labour has allotted among the provinces an annual contribution of \$2,000,000, together with a special contribution for capital expenditures of buildings and equipment. These sums are utilized in sharing equally with the Provincial Government for expenditures incurred for vocational training in the regular secondary vocational schools. Projects have been submitted by all provinces for Dominion contribution. Owing to the shortage of building materials and machine tool equipment most of these projects for the fiscal year 1945-6 deal with operating and maintenance costs of the vocational schools, but several building projects for additional schools have been submitted by some of the provinces. These new buildings will be commenced in the spring of 1946 and will serve to expand the vocational training facilities available in many parts of the country.

*Activities of Unemployment Insurance Commission**

Statistical Analysis of Claims and Benefit—Registrations—The Fund— Decisions of Umpire—Administrative Board Appointed

DURING March the total applications filed for Unemployment Insurance benefit declined as compared with February, the totals being 50,706 and 59,098 respectively. In March, 1945 claims totalled 13,307. January of this year, with 71,932 claims, represents the high point so far in the monthly claims figures.

Similarly, the number of live claims at March 31 was fewer than the number at February 28. At the end of March, 154,820 persons (122,506 males and 32,314 females) had signed the live unemployment register during the preceding six days, whereas 161,997 persons (130,061 males and 31,936 females) signed during the last week of February and 27,110 persons (19,727 males and 7,383 females) had live claims at the end of March, 1945.

This net decrease in live claims is the result, however, of conflicting tendencies in the Province and sex breakdowns. For example, all three Maritime Provinces showed a moderate increase in live claims at March 31, as against February 28, the increase being attributable almost entirely to males. Quebec and Ontario accounted for the bulk of the decline, but in both provinces the number of females increased slightly. In Manitoba an increase of some 300 is composed almost entirely of males, whereas in Saskatchewan an increase of some 80 males and a decrease of about 40 females bring about a net increase of approximately 40. Alberta and British Columbia each account for some 1,200 of the net decrease with each sex being proportionately represented.

A total of 61,059 claims were adjudicated at Insurance offices during March, 48,875 being considered entitled to benefit and 12,184 not entitled to benefit. The chief reasons for

non-entitlement were "Insufficient contributions while in insurable employment" (6,409 cases), "voluntarily left employment without just cause" (3,469 cases) and "discharged for misconduct" (769 cases).

Insurance Registrations

Reports received from offices of the Unemployment Insurance Commission, showed that as at March 31, 1946, 3,225,201 employees were issued with Insurance books and had made contributions to the fund at one time or another since April 1, 1945, an increase of 69,443 since February 28, 1946.

As at March 31, 1946, 160,527 employers were registered as having insurable employees, an increase of 2,057 since February 28, 1946.

Registration to March 31, 1946 by regions are shown in Table I.

Unemployment Insurance Fund

Total employer-employee contributions for March amounting to \$6,001,917.86 were 17.1 per cent above the average for the previous eleven months due to the fact that employers were required to renew the insurance books of their employees at the end of March and contributions had to be brought up to date. In March last year employer-employee contributions amounted to \$5,818,040.05.

The upward trend in benefit payments continued during March when a new high figure of \$7,202,786.63 was reached. This represents an increase of \$1,302,064 over the figure for February. In March last year benefit payments amounted to \$1,226,536.48.

The net increase to the Fund during March this year amounted to \$558,615.39.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the Provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the *LABOUR GAZETTE* and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C

CU-B 40

(June 15th, 1945)

The claimant left his employment voluntarily because he was not satisfied with his wages and conditions of work, and his employer refused to transfer him to another department. He was disqualified by the Insurance Officer—HELD: As the Court of Referees had the opportunity of hearing both the claimant and the claimant's employer and was satisfied that the claimant left his employment voluntarily without just cause, the Umpire finds no reasons to disturb the decision.

The material facts of the case are as follows:

The claimant, a married man, aged 53 years, was employed as a clerk by one of the Armed Forces at a salary of \$114.12 per month from October 23rd, 1944 to December 30th, 1944, when he left his employment voluntarily because he was not satisfied with his wages and the conditions of work and because the employer allegedly refused to transfer him to another department.

The claim was disallowed by the Insurance Officer and the claimant disqualified for a period of six weeks beginning on December 30th, 1944, on the ground that he had left his employment voluntarily without just cause.

From this decision the claimant appealed to a Court of Referees and was granted an oral hearing. The Court of Referees unanimously disqualified the claimant from De-

cember 31st, 1944, on the ground that the claimant had voluntarily left his employment without just cause and that, even had he not left his employment, he would have been dismissed for cause.

The claimant applied for leave to appeal to the Umpire. The Chairman granted the appeal, giving as his reason: "In order to clarify the case."

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons:

The Court of Referees' decision recites that the claimant left his employment of his own volition after his employers advised him of their intention to dismiss him for various reasons, among which were "insubordination" and failure to fulfil his duties in a satisfactory manner. The Court of Referees is satisfied that the representatives of the Armed Force involved established that the claimant was guilty of insubordination in refusing to obey the directions of his superiors. The Court found, as a matter of fact, that the evidence adduced established that the claimant's services were quite unsatisfactory.

The Court of Referees, having had the opportunity of hearing the claimant and the claimant's employers, came to the unanimous conclusion that the claimant should be disqualified on the ground that he left his employment voluntarily without just cause. I find no reason to disturb this decision.

CU-B 46

(July 13th, 1945)

The claimant, a married woman aged 24, formerly employed as a packer in a biscuit factory, was employed during the war as a sheet metal worker in an aircraft plant. She was laid off and applied for benefit. Four months later she was notified of a position as a packer in a biscuit factory at wages lower than that which she received at the war plant. She refused and was disqualified by the Insurance Officer—HELD: In this case a reasonable time had elapsed for the employment offered not to be deemed unsuitable only on account of the wage factor, as they were at the prevailing rate of the district.

The material facts of the case are as follows:—

The claimant, a married woman, aged 24 years, was employed as a sheet metal worker in an aircraft plant at a rate of sixty-five cents

per hour from May, 1942 to December 18, 1944, when she was laid off.

On December 20, 1944, the claimant filed an application for benefit and her claim was allowed. The claimant received benefit from December 20, 1944 until April 14, 1945, when she was notified by telephone by the local office of the Commission of a vacant situation as a packer in a biscuit factory at a rate of thirty-two cents per hour. The next day the claimant refused to apply for the position offered, stating that she did not feel the job was suitable, as the wages were too low. The record before me also indicates that prior to the refusal of employment just mentioned the claimant had also been offered employment as a sheet metal helper at a steel plant and had refused that employment. The Insurance Officer was of the opinion that the employment offered at the biscuit factory was suitable employment in view of the fact that the claimant had been unemployed for four months.

The Insurance Officer disallowed her claim and disqualified her from receipt of benefit for a period of six weeks ending May 25, 1945.

The claimant appealed to a Court of Referees and the Court decided that in view of the change in occupation from that of a highly-skilled worker to that of an unskilled worker and in view of the considerable reduction in remuneration which the Court described as "too precipitate", the employment offered to the claimant was not suitable.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons that:

The appeal is of unusual interest and importance and perhaps it is the forerunner of a number of problems arising out of the transition from a wartime economy to a peacetime economy. Prior to her employment in the aircraft factory the claimant had been employed for some nine months as a packer in a biscuit factory. Then as a consequence of the change brought about in Canadian manufacturing as a result of the state of war she succeeded in obtaining employment in an aircraft plant and continued in that employment as a sheet metal worker for a little over two and one-half years. In her wartime employment in the aircraft factory she received a very considerably higher rate of remuneration than she had obtained in previous employment. In

December of 1944, as a result of a change and reduction in this particular branch of war manufacturing, she was laid off. While the claimant was unemployed, the local office in accordance with usual practice attempted to find other suitable employment for her but as a result of the reduction in war production in the district there was little or no prospect of finding for the claimant similar employment at the corresponding rate of remuneration. This became more and more evident as the period of unemployment lengthened. The local office apparently considered that a sufficient time had elapsed to conclude that there was really no prospect remaining of placing the claimant in the same type of employment and at the same rate of remuneration as she had enjoyed during the wartime expansion of Canadian industry and therefore offered her employment similar to that in which she had been engaged prior to taking this wartime employment. I note in the record that the claimant had become married in the fall of 1944 and presumably this made it impracticable to suggest that she take employment elsewhere.

Ordinarily, and in accordance with the provisions of the Act, the local office must in the first instance attempt to place the insured person in employment in his usual occupation at his usual wages and under conditions not less favourable than those observed by agreement between employers and employees or than those recognized by good employers. If such employment is not available, then the next alternative is to try to place the applicant in some other occupation at the usual wages and under conditions not less favourable than those in the usual occupation. Then the Act goes on to provide in the proviso to Section 31 that after the lapse of such an interval from the date on which the insured person becomes unemployed, as in the circumstances of the case is reasonable, employment in some other occupation and at a lower rate of remuneration may be offered provided the wages are not lower and the conditions not less favourable than those observed by agreement or than those recognized by good employers.

The question then is, firstly, was there suitable employment available in the claimant's usual occupation and at her usual rate of remuneration or, secondly, was employment available in some other occupation at the usual rate of remuneration? On the record it is amply evident that the answer to both these questions is "no". Then the remaining question is whether a reasonable time had elapsed since the claimant became unemployed and the evidence before me would seem to indicate clearly that the answer

must be in the affirmative. There had been an expansion of war production but in this particular area and in this particular industry the expansion had apparently come to an end and a reduction became necessary. During the period while the claimant was unemployed there was ample time to determine whether there was any reasonable prospect of placing the claimant either in the type of employment in which she had most recently been engaged or in some other occupation paying a similar rate of remuneration. When it became evident that there was no reasonable prospect of placing the claimant

in such employment it seems to me quite proper that the local office looked at the claimant's previous employment record in order to determine what her previous employment history had been and to determine what was now suitable employment in light of the changed conditions brought about by reduced war production. It is not possible, nor do I think it would be advisable, to lay down any general rules as to what is a reasonable time as this must necessarily depend on the particular circumstances existing in each case. In the case before me I am satisfied that a reasonable time had elapsed.

To Co-ordinate Activities of Department of Labour and those of Unemployment Insurance Commission

UNDER date of April 2, 1946, Order in Council 1271 made provision "for the proper co-ordination of the activities of the Department of Labour with those of the Unemployment Insurance Commission." All matters of common interest were included under the Order, such as labour supply, employment and training of unemployed persons, reinstatement in civil employment of members of the Armed Forces and other questions in the field of employer and employee relations.

For this purpose the Order set up an Administrative Board, Department of Labour, comprised of the following members: The Deputy Minister of Labour (Chairman); A. H. Brown, Assistant to the Deputy Minister of Labour (Vice-Chairman); The Chairman of the Unemployment Insurance Commission; R. J. Tallon, member of the Unemployment Insurance Commission; M. M. Maclean, Assistant to the Deputy Minister and Director of Industrial Relations, Department of Labour; R. F. Thompson, Director of Vocational Training, Department of Labour; H. A. Black, Chief Administrative Officer, Department of Labour; Byron F. Wood, Director of Rehabilitation, Department of Labour; S. H. McLaren, Chief Executive Officer Unemployment Insurance Commission; Harry H. Hereford, assistant to the Deputy Minister of Labour. The Board may add to its members with the approval of the Minister of Labour.

The functions of the Board are to make provision for the proper co-ordination of the activities of the Department of Labour and those of the Unemployment Insurance Commission in all matters of common interest, including labour supply, employment and training of unemployed persons.

"(a) The duties and responsibilities of the Administration Board shall be to co-ordinate the various activities of common interest of the Department of Labour and of the Unemployment Insurance Commission under the Unemployment Insurance Act or otherwise carried on by the Commission for or under the direction of the Minister of Labour; and in particular and without restricting the generality of the foregoing, this shall include matters relating to labour supply, employment, vocational training, reinstatement of members of the Armed Forces in civil employment and other matters relating to employer and employee relations.

"(b) The Board may make recommendations to the Minister of Labour or the Unemployment Insurance Commission as the circumstances warrant and as it deems advisable in the discharge of its duties and responsibilities which recommendations, however, shall not be acted upon until approved by the Minister."

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment, hours and earnings in Canada.

Canadian Labour Force, February, 1946.—Unemployment in Canada reached an estimated 213,000, by February 23, an increase of 40,000 over the level three months earlier, a labour force survey of the Dominion Bureau of Statistics showed. The increase was confined almost wholly to men; the unemployment rate for women remaining relatively level although a decrease of 136,000 in the total female force was recorded. The male labour force increased by about 125,000, principally through the return of soldiers to civilian life.

Employment at the beginning of March, 1946.—Industrial employment showed a moderate contraction at March 1, but the decline was decidedly smaller than the loss reported at February 1 covering the month of January, according to reports received by the Dominion Bureau of Statistics.

The relatively slight shrinkage in industrial employment lowered the index, on the 1926 base, from 167.2 at February 1, to 166.9 at March 1, as compared with 178.2 a year earlier. The seasonally-corrected figure showed little change, being 173.7 at February 1 and 173.9 at March 1. The 15,644 establishments reporting had a combined working force of 1,702,983 men and women, a reduction of 2,522 persons, or 0.1 per cent, during the month.

Claims for unemployment insurance benefit.—During March, 50,706 claims were filed in local employment offices for unemployment insurance benefit, a decrease of 8,392 from the previous month. There were 156,180 receiving benefit in March as compared with 139,222 a month earlier. For the last six days of March, 154,820 persons signed the live unemployment insurance register. (N.B. Benefit is paid only to those who had been employed in insurable employment and who comply with the statutory conditions.)

Employment situation at April 25, 1946, as reported by Employment Offices.—Unemployment, as measured by unplaced

applicants registered at employment offices, dropped considerably during the month of April, although demobilization continued at a high level. At April 25, the number of unplaced applicants numbered 247,751, as compared with 263,215 five weeks earlier.

On the other hand labour demand increased markedly during April. The number of positions vacant (exclusive of agriculture) was 98,781 at April 25, an increase of 26 per cent from March 20.

Man-hours and hourly earnings, March 1, 1946.—Average hours per week worked by hourly-rated wage-earners employed in manufacturing was 44 hours during the week preceding March 1. The average hourly earnings were 67.9 cents.

Applications for employment: vacancies and placements; March, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the four weeks March 1 to March 28, 1946, showed a fairly substantial gain in the average number of placements made daily when compared with the previous four weeks ending February 28, and a sharp decline when compared with the four-week period March 2, to March 29, 1945. During the period under review there were 129,539 vacancies reported, 151,501 applications for employment and 57,078 placements effected in regular and casual employment.

Unemployment in trade unions at the close of the quarter ending March 31, 1946.—Returns from 2,463 local unions in Canada with a combined membership of 414,487 indicated an unemployment percentage of 1.9 at the end of the first quarter of 1946. At the end of December, 1945, 2,460 locals with a total of 410,089 members reported 3.0 per cent unemployed, while in March, 1945, 2,337 locals representing 421,779 members, registered 0.7 per cent unemployment.

Survey of civilian labour force.—The second in a series of quarterly surveys of the civilian labour force undertaken by the Dominion Bureau of Statistics indicates that at February 23, 1946, 4,525,000 were employed, while the number of unemployed was estimated to be 213,000 making a total labour force of 4,738,000.

Canadian Labour Force, February, 1946

Second Survey Undertaken by Dominion Bureau of Statistics

THE second labour force survey of the Dominion Bureau of Statistics shows that unemployment in Canada had reached an estimated 213,000 by February 23, an increase of 40,000 over the level three months earlier. (The first such survey was summarized in the January *LABOUR GAZETTE*, p. 73.)

The increase in unemployment was confined almost wholly to men, male unemployment being estimated at 179,000, while unemployment among women remained almost the same at about 34,000.

At the same time, the number of women in the labour force (the total of the employed and the unemployed) fell by 136,000, indicative of the retirement of women from the labour market on a fairly large scale. On the other hand, the male labour force grew by about 125,000, an increase to be accounted for principally by the return of soldiers to civilian life.

Male employment rose by over 80,000 to a level of 3,332,000, while the number of women employed decreased by over 130,000. Although the changes in the levels of employment and the labour force may be partly a result of seasonal factors, the rapid influx of demobilized personnel into the labour market makes it difficult to estimate the influence of seasonal variation.

The primary aim of the labour force surveys is to provide quarterly an exhaustive classification of all civilians in Canada over 14 years of age and not living in institutions, according to their status in the labour market.

The classification is based on the activity or status of a person in a specified week, and not on normal or usual activity over a longer period. This approach is useful in showing the short-term changes in the labour force and its components. All persons are included in one of the following groups:—

1. *Working*: In general, anyone who works one hour or more in the survey week for pay or profit or who does unpaid work, which contributes to the operation of a farm or business operated by a relative, is classed as working. An exception to this rule is that unpaid female family workers on farms are not classed as working unless they do more than 20 hours work in the week which contributes to the operation of the farm as distinct from the farm household.

2. *Unemployed*: The unemployed group comprises those who were looking for work

in the survey week, but who did no work. To be classed as looking for work, a person must be making active efforts to obtain a job or begin a business, for example by registering at an employment office or placing and answering advertisements. Those who have been laid off without instructions to return to work within 30 days, and are not actively seeking work in the expectation of returning to their old jobs are classed as unemployed. Included also are those who are sufficiently familiar with the conditions of the labour market in their community to know that no suitable work is available.

3. *With a job but not at work*: This category refers to anyone who had a job or business but did not work during the survey week because of illness, bad weather, vacation, labour dispute, or temporary layoff with definite instructions to return to work within 30 days of being laid off.

4. *Non-workers*: Persons in this class fall outside the labour force, in the sense that they are not in any of the above classes. The largest group among the non-workers are those who are keeping house. There is, of course, no implication in the term "non-worker" that persons in this group are idle. In addition, this class includes persons who are too old or permanently unable to work, those who are going to school, retired or voluntarily idle persons and a residual group classed as "other", containing for example, those who work for charitable organizations without pay, or recently discharged veterans who have not resumed their usual civilian activities.

Often, persons will have a dual status in the labour market. For example, students or housewives may also work part-time, or a person looking for work may also perform some work. In such cases, they are classed according to the activity which is highest on the above list. That is, if a person works this takes priority over any lower classification, or if a person is looking for work, in addition to being classed in a lower group, he is regarded as unemployed.

It should be understood that the labour force statistics here presented are all subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For this reason, caution should be exercised in interpreting the smaller population classes which are shown.

¹ Federal, provincial or local.² The distinction between an own-account worker and an employer is that the latter has one or more paid employers, while the former has none.

Employment and Payrolls at the Beginning of March, 1946

INDUSTRIAL employment throughout the Dominion showed a further moderate contraction at March 1, in a seasonal movement which did not greatly differ in extent from that indicated as normal in the experience of the period since 1920. The decline was decidedly smaller than the loss reported at February 1 as compared with a month earlier, being also less than that at March 1 of last year. The 15,644 establishments co-operating in the Dominion Bureau of Statistics' latest survey of employment and payrolls had a combined working force of 1,702,983 men and women. As compared with 1,705,505 at February 1, there was a reduction of 2,522 persons, or 0.1 per cent. On the other hand, the weekly salaries and wages paid at the date under review, aggregating \$55,249,434, showed an increase of 1.3 per cent over the amounts disbursed by the same firms at the beginning of February.

The relatively slight shrinkage in industrial employment lowered the index, on the 1926 base, from 167.2 at February 1, to 166.9 at the date under review, as compared with 178.2 a year ago. The seasonally-corrected figure showed little change, being 173.7 at February 1, and 173.9 at March 1.

There was a small recession of a contra-seasonal character in manufacturing at the

beginning of March, repeating the experience at the same date in 1945 and 1944; these three are the only years in the record in which the trend at March 1 has been downward. The general loss was not on a large scale, approximately 1,300 persons having been released since February 1. The most pronounced declines took place in animal-food factories, mainly in the meat-processing division, in which seasonal inactivity was a factor; the contraction was greater than usual for the time of year, although it was rather smaller than that indicated at March 1, 1945. There was also a fairly large reduction in iron and steel works, resulting, in the main, from shortage of materials brought about by the steel strike in the United States. Among the non-manufacturing classes, logging, transportation and construction and maintenance showed curtailment, chiefly of a seasonal character. There was little general change in services, while in mining, communications and trade, expansion was reported. The advances were contrary to the usual movements in these industries at the beginning of March.

Payrolls

As already stated, the weekly payrolls reported at March 1 totalled \$55,249,434, as

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

compared with \$54,520,508 distributed by the same firms on or about February 1. The gain amounted to \$728,926, or 1.3 per cent. The average earnings of the typical individual in recorded employment were \$32.44, as compared with \$31.97 at February 1, 1946, and \$32.81 at March 1, 1945; in earlier years for which data are available, the March 1 figures were as follows:—1944, \$32.27; 1943, \$30.72, and 1942, \$27.92.

The latest survey shows that, when the statistics for financial institutions are included, the total number of persons in recorded employment was 1,775,381, as compared with 1,775,931 a month earlier. The salaries and wages paid to these employees were given as \$57,769,968 at March 1 and \$56,932,324 at February 1. The per capita weekly earnings in the nine main industries, including finance, were \$32.54 at the date under review, as compared with \$32.06 at the beginning of February, and \$32.81 at March 1, 1945.

Table II summarizes the latest statistics of employment and payrolls for the main industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at February 1, 1946, and March 1, 1945. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table I indicates that during the period of observation, there has been a general increase of 9.3 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly earnings of these workers have risen by 37.3 per cent; including finance, the gain in

employment from June 1, 1941, to March 1, 1946, amounted to 9.7 per cent and that in payrolls, to 37.6 per cent. The explanation previously given for the greater rise in the salaries and wages than in employment may again be stated:—(1) the concentration of workers still existing in the heavy manufac-

turing industries, where rates of pay are above the average and overtime has been a factor of considerable importance; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their absorption into the

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

basic wage-rates as from February 15, 1944; (3) the progressive up-grading of employees as they gained experience in their work, and (4) the payment of higher wage-rates in a large number of cases.

Until quite recently, the growth in employment and payrolls in manufacturing has been relatively greater than that in the non-manufacturing industries taken as a unit. The curtailment since last autumn in the production of munitions and other commodities for wartime use has, however, brought about a reversal of this situation, the levels in manufacturing generally now being lower in relation to June 1, 1941, than is the case in many other branches of non-agricultural industry. Thus, at March 1, 1946, the index numbers of employment and payrolls in manufacturing were 108.6 and 135.3, respectively, on the base June 1, 1941=100, whereas in the non-

manufacturing classes taken as a unit the index of employment on the same base was 110.2, and that of payrolls, 140.0.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime will also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used. The degree of skill generally required of workers in the industry is obviously also an extremely important factor.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Man-Hours and Hourly Earnings, March 1, 1946

THERE was a decline at March 1 as compared with February 1 in the average hourly earnings of wage-earners in manufacturing. The average of hours worked per week also dropped.

Statistics were furnished to the Dominion Bureau of Statistics by 6,070 manufacturers employing 707,097 hourly-rated wage-earners, who were paid the sum of \$21,139,429 for services rendered in a total of 31,133,550 hours. The latter aggregate represented a mean of 44 hours per employee, while the earnings average 67·9 cents per hour, or \$29·88 in the week. In the preceding period of observation, the same employers had reported 709,383 hourly-rated workers and had disbursed \$21,297,917 for services rendered in 31,264,353 hours; the latter had averaged 44·1 per wage-earner, and the earnings, 68·1 cents per hour, or \$30·03 in the week. There was thus a reduction of 0·3 per cent in the number of employees in the week under review, of 0·4 per cent in the total hours paid for, and of 0·7 per cent in the weekly wages of the hourly-rated personnel on the payrolls of the co-operating manufacturers as compared with the last week in February.

The average of hours worked in the week of March 1 showed little change from February 1, but was a good deal lower than at March 1, 1945, when the mean was 45·8 hours. Overtime had then been more commonly reported.

There was a slight decline in the latest figure of average hourly earnings in manufacturing; this fell from 68·1 cents in the preceding return, to 67·9 at March 1, when the rate was rather more than two cents lower than that of 70·1 indicated at the same date in 1945. The last figure had included payment for a good deal of overtime work, while another significant factor contributing to the higher rate reported at March 1 of last year was the greater concentration of workers then existing in the more highly-paid heavy manufacturing industries. The average hourly and weekly earnings at the first of March of the present year were affected to some extent by loss of working time due to industrial disputes in the United States.

Table I summarizes the statistics of average hours worked and average hourly earnings in manufacturing, and in the durable and non-durable goods' divisions, in the period for which data are available.

Average Hours Worked—An insignificant reduction was indicated at March 1 in the average hours worked in manufacturing as a whole as compared with February 1; the

latest mean was also a little lower than in any other period of observation except in the holiday week of January 1, in 1945 and 1946, and Easter week of last year. The slight falling-off from February 1 took place largely in the iron and steel industries, in which the average fell from 44·8 hours in the week of February 1, to 44·1 in the week of March 1; shortage of materials due to the steel strike in the United States was an important factor in producing the decline. There were small increases in the average hours reported in most other branches of the durable manufactured goods industries. The trend in this respect was also slightly upward in many division of the non-durable manufactured goods industries. In these industries taken as a whole, there was an increase from 43·8 hours in the week of February 1, to 43·9 in that of March 1. In comparison with the hours worked a year ago, however, there was a reduction at the date under review in the light manufacturing industries, as in the durable manufactured goods industries. The decline in both divisions was due in part to diminution in the amount of overtime.

Average Hourly Earnings—The average hourly earnings in manufacturing as a whole in the week ending March 1 stood at 67·9 cents, fractionally lower than the mean of 68·1 cents in the week of February 1. The latest figure was the same as at January 1, but was higher than in any earlier period since September 1, 1945. As compared with March 1 of last year, there was a reduction of 2·2 cents per hour in manufacturing generally; as previously stated, the decline which has taken place in the 12 months, in spite of the payment of higher wage-rates in several important industries, is due in the main to changes in the distribution of the workers in manufacturing, together with reduced work at over time rates. In regard to the first of these factors, it is interesting to note that at March 1, 1945, over 55 per cent of the reported total of hourly-rated wage-earners were classed in the durable manufactured goods industries, in which the earnings averaged 77·8 cents, while not quite 45 per cent of the indicated workers, employed in the light manufactured goods industries, received an average of 60·3 cents per hour. At the date under review, the distribution showed less than 49 per cent of the wage-earners in the heavy manufacturing industries and over 51 per cent in the light manufacturing division, while the earnings in the former category were 74·6 cents, and in the latter, 61·5 cents per hour.

Average Weekly Wages.—Statistics of man-hours and hourly earnings are not available for all classes of wage-earners, but only for those of whose hours a precise record is kept, being, in the main, persons paid at hourly rates; this restriction in general also results in the exclusion of salaried personnel. Among the classes of wage-earners for whom accurate records of hours worked are usually not maintained are piece-workers in some, but not all establishments, route-drivers, delivery men, etc; in many cases, employers report that the earnings of their wage-earners paid at other than hourly rates exceed those of their hourly-rated personnel. In general, however, the wage-

earners for whom statistics of man-hours and hourly earnings are available constitute important proportions of the total personnel of the co-operating firms. Thus the wage-earners for whom data are given in the present bulletin made up 75.5 per cent of the total employees of the manufacturers furnishing monthly statistics on employment and pay-rolls at March 1, 1945; in the heavy manufactured goods industries, the ratio was 78.3 per cent, and that in the light manufactured goods division, 73.1 per cent.

In view of the large proportions which hourly-rated wage-earners constitute of the total working forces¹ currently reported, con-

siderable interest attaches to the comparisons contained in Table 2, showing the variations in the combined weekly salaries and wages reported by the co-operating manufacturers in the last 17 months, and those indicated in the weekly earnings of hourly-rated wage-earners, obtained by multiplying the hours worked in the week of observation by the average hourly earnings in the same week.

Although there was a slight increase at March 1, as compared with February 1, in the weekly salaries-and-wages figure, the earnings of the hourly-rated personnel were a little lower, partly as a result of a very slight lessening in the average time worked. In the heavy manufactured goods industries, the salaries-and-wages figure fell by 32 cents, and the average hourly rate by 42 cents, while in the light manufactured goods industries there was an increase of 30 cents in the week of May 1 in the salaries-and-wages figure, and of 15 cents in the earnings of hourly-rated personnel.

In the comparison with the week ending March 1 of last year, the earnings of all workers in recorded employment in manufacturing as a whole show a reduction of about \$1.19 per week, and those of hourly-rated wage-earners, of approximately \$2.23. As has previously been pointed out, the more important factors contributing to the declines are changes in the industrial distribution of workers, curtailment in the number of hours worked, and industrial disputes, the last-named affecting the situation directly and indirectly. In the case of the heavy manufacturing industries, the loss in weekly earnings in the year amounted to \$2.13 in the combined salaries and wages, and to \$3.21 in the earnings of the hourly-rated staff. In the light manufacturing industries, there was an increase of about 53 cents in the combined salaries-and-wages figure, but the average

weekly earnings of hourly-rated wage-earners were lower by 14 cents than at March 1, 1945. Since then, the average hours worked by hourly-rated personnel in the durable manufactured goods industries have fallen by 2.3 hours per week, accompanied by a reduction of 3.2 cents in the rate per hour, while in the case of the non-durable manufactured goods industries, the average time worked has diminished by just over one hour, and the rate has risen by 1.2 cents per hour.

Non-Manufacturing Industries

In many of the non-manufacturing industries, comparatively few workers are employed at hourly rates, with the result that accurate records of the hours which they work cannot be obtained. The representation of the non-manufacturing industries in the monthly statistics of man-hours and hourly earnings is accordingly much smaller than that in manufacturing. At a later date, however, it is hoped that the representation in several important industries will be extended, permitting the publication of monthly figures for such groups.

In mining, the average of hours worked in the week of March 1 showed little change as compared with a month earlier, being 44.6 at February 1 and 44.5 at March 1. The mean in the same week of last year was higher, at 45.4. There was an increase of nine-tenths of a cent as compared with February 1 in the latest average hourly rate, which was higher by 1.9 cents than in the week of March 1, 1945. Local transportation reported small increases in the hourly average as compared with a month and a year earlier; this was also the case in building construction, and in hotels and restaurants. The means in highway construction and maintenance and in personal services were very slightly lower

than in the week of February 1, although they were a little higher than those reported at March 1 of last year.

Statistics for the Larger Cities

Table 3, appearing for the first time, contains preliminary statistics of average hours worked and average hourly earnings in manufacturing in the larger cities in which employers report considerable numbers of workers paid at hourly rates. The disparities in the average rates result to an important extent from variations in the industrial distributions of the wage-earners for whom statistics are available; an associated factor is that of the sex distribution.

The table shows the record of average hours worked and average hourly earnings reported monthly in the period commencing

June 1, in Montreal, Toronto, Hamilton, Winnipeg and Vancouver.

In four of these centres, there has been a reduction in the hourly average earnings in the period since June, Winnipeg being the exception. The declines are, of course, due to lessened overtime work and to changes in the distribution of workers as between industries in which the rates are relatively low and those in which they are relatively high. In the case of Winnipeg, the slight increase is due in part to the payment of higher rates in the animal food division since last spring.

The number of workers in the cities for whom statistics of man-hours and hourly earnings are available at the beginning of March are as follows:—Montreal, 125,217; Toronto, 107,980; Hamilton, 37,794; Winnipeg, 23,812, and Vancouver, 23,720.

The Sex Distribution of Persons in Recorded Employment at the Beginning of March, 1946.

AS was explained in a previous report it has been found necessary during the period of conversion to a peace-time economy, to obtain monthly data showing the sex distribution of the workers in recorded employment. In 1944 and 1945, such enquiries were made semi-annually, at April 1 and October 1, while earlier enquiries into sex distribution were undertaken at October 1 in 1943 and 1942. The statistics for March 1 therefore result from the second monthly survey of the kind; although this is the eighth occasion on which material on sex distribution has been obtained, none of the previous investigations yielded information which is entirely comparable with that of the present enquiry, the seasonal changes which ordinarily take place between the autumn, the early spring and the late winter affecting the validity of a comparison of the latest data with those obtained in the surveys made in 1945 and earlier years. Obviously, the greatest changes which have recently taken place in employment as a whole, and in the sex distribution of the workers included in the monthly record, have resulted from the termination of the war.

In view of the greater degree of similarity in seasonal conditions at April 1 and March 1 than exists in the case of the October 1-March 1, comparison, the statistics reported at April 1, 1945, are reproduced for comparative purposes in Table 11 in place of the statistics depicting the situation last autumn; as has previously been pointed out, employment ordinarily reaches its annual peak, particularly among women, about October 1, while industrial activity is usually low in late winter.

Pressure of work has prevented the adjustment of the April 1, 1945, data to take care of the changes in the co-operating employers in the last 11 months; however, the statistics serve in a general way to indicate the changes which have taken place in this period in the numbers and in the distribution of the workers in recorded employment.

The 15,644 employers furnishing returns at March 1 in the eight main industrial divisions (viz., manufacturing, logging, mining, communications, transportation, construction and maintenance, services, and trade), reported 1,315,894 men and 387,089 women on their payrolls, the latter constituting 227 per 1,000 of the indicated working force. At February 1, these firms had employed 1,705,505 persons, of whom 390,561, or 229 per 1,000 were women. Thus there was a decline of 0.9 per cent in the number of women, accompanied by an increase of 0.1 per cent in the number of men. The general reduction in the month was 0.1 per cent.

The number of women workers in the nine leading industries, including finance, was given as 423,135, in a total staff of 1,775,381, a ratio of 238 females per 1,000 of both sexes. A month earlier, the proportion was 241 per 1,000, there having been 427,746 women in the total of 1,775,931 on the payrolls of the establishments furnishing data. Employment for workers of both sexes at March 1 declined by a very small fractional percentage; there was a falling off of 1.1 per cent among the females, but an increase of 0.3 per cent among male workers. To some extent, these changes are probably seasonal in character.

Among women employees, the largest reductions in the month took place in animal and vegetable food, tobacco, beverage, paper product and chemical manufacturing, and in the mining, transportation, services, trade and finance industries; except in the last-named the declines were moderate. On the other hand, there were increases in the number reported in leather and textile factories and in communications.

The greatest expansion in employment for men at March 1 as compared with February 1 was indicated in the lumber, pulp and paper, textile, electric light and power, electrical

apparatus and non-ferrous metal manufacturing divisions, in mining (particularly of metallic ores) and in trade and financial institutions. On the other hand, there were fairly pronounced reductions in the month in the number of men reported in the food, tobacco, iron and steel, non-ferrous metal, logging, transportation and construction industries; as previously stated, the falling-off in the iron and steel group largely resulted from the strike in the American steel industry, while that in the non-manufacturing groups just mentioned was partly of a seasonal character.

THE SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE MAJOR INDUSTRIAL GROUPS, AS AT MARCH 1, 1946, FEBRUARY 1, 1946, WITH COMPARATIVE FIGURES FOR OCTOBER 1 AND APRIL 1, 1945, AND OCTOBER 1, 1942

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power.

² The March data are subject to revision.

In the last 11 months, there has been a decline of some 94,300 workers, or 5.1 per cent, in the number in recorded employment in the nine leading industries; of these persons, approximately 18,600 were men and 75,700 women, the latter making up just over 80 per cent of the total number released. In all provinces and in each of the cities for which data are segregated except Vancouver and Victoria, the reductions in the number of women workers have been relatively greater than those among male employees, reducing the proportions of women per 1,000 workers in recorded employment.

Industrially, the losses have been largely confined to manufacturing, in which there were declines of some 89,700 men and about 70,600 women in recorded employment at March 1, 1946, as compared with April 1,

1945. Establishments in the non-manufacturing classes have generally reported increased employment for men. In the case of the logging, communications and service divisions, the indicated numbers of women workers have also risen; in the latter two industries, however, the gains have been relatively less than those among male employees so that the ratios of women per 1,000 employees of both sexes have fallen. In financial institutions as a whole, there has been no significant change in the reported number of women, while employment for men has shown a decided increase. The women on the staffs of the co-operating firms in mining, transportation, construction and trade have diminished in numbers in the last 11 months, as have their proportions in the total reported working forces in these industries.

Report on Employment Conditions, April, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE labour situation improved decidedly during April. Employment opportunities available increased substantially during the month, while fewer applicants sought work at the employment offices. Manpower requirements rose to meet the needs of reconverted industry and the seasonal upswing in industrial activity. The shortage of materials, however, remains acute and in many industries is curtailing the expansion of job opportunities. Unfilled vacancies¹, exclusive of agriculture, increased by more than 25 per cent during April to reach approximately the 100,000 mark at April 25. The augmented demands for construction, service, and unskilled workers accounted mainly for the increased manpower needs during April. The number of unplaced applicants² slackened during the month, and at the end of April

totalled slightly less than 250,000. The decline in applicants seeking employment was due mainly to the drop in the number of men registering for work in the Ontario Region. Unemployment continues at a high level in the Maritime and Pacific Regions. No extensive transfer of workers is warranted at this time because of the acute shortage of housing accommodation in other areas. A markedly different labour situation existed at the comparative date in 1945. At April 20, 1945, the labour market remained stringent, with only 78,000 applicants to fill the 180,000 vacancies on file at the employment offices. Table I shows labour demand and supply by main occupational group and by sex, as at April 25, 1946. Table II presents a monthly comparison of total labour demand and supply. Unfilled vacancies classified by main industry group and by sex, as at April 25, 1946, with absolute and percentage changes in total demand during the last month are shown in Table III.

Clerical Workers

The general increase in industrial activity was reflected in a rise of 28 per cent in the number of clerical workers required during April. At April 25, there were 7,175 clerical workers needed across Canada while applicants seeking this type of work numbered 24,821. Male clerical workers, particularly, were in excess, with approximately eight workers for every unfilled vacancy on file. Demand for female clerical workers continues to be concentrated in Quebec and Ontario while many

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

²Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

of the applicants are registered in the Prairie and Pacific Regions. Additional orders for stenographic help were filed during April. The larger stores and florist shops especially required more workers to meet the increased seasonal activity. As demand for stenographic workers increases, the shortage of experienced and qualified help becomes even more acute. Employers are requesting, for the most part, single girls, who are well-educated and experienced, but suitable applicants are difficult to find. There were 2,859 stenographers and typists required across Canada at April 25, while unplaced applicants numbered 2,450. The need for general clerical workers rose slightly during April with printing and publishing firms reporting increased orders for this type of help.

Sales Workers

As commodity goods gradually become more plentiful, additional sales workers will be required. During April, the demand for sales workers rose slightly to total 4,423 at April 25. Although the number of applicants seeking sales work dropped during April, the available supply at April 25, numbering 14,464, was still well in excess of demand. Qualified help, however, is easily placed in most areas. Many local offices report a serious shortage of experienced applicants with a sufficiently high standard of education and appearance to meet the exacting requirements now specified by employers. Orders remain high for insurance and real estate salesmen, but many of the vacancies are on a commission basis, and applicants, generally, are reluctant to accept this type of work.

Service Workers

Although the total number of service workers registered at employment offices at April 25 exceeds the orders on file, the surplus is due to the large number of male applicants. Female service workers, on the other hand, remain in short supply. There were 16,430 service workers required across Canada at April 25 while unplaced applicants numbered 17,576. Demand for women in the service trades has tripled during the past three months as orders were received for additional help in hotels, restaurants, hospitals, and households. The present shortage of competent and experienced help, however, seriously handicaps placement activity. During April, many orders for summer workers in tourist resorts were filed at employment offices. There were 4,766 women required for domestic service at April 25 but the available supply totalled little more than one-sixth of the

demand. The institution of the Home Aid courses across Canada has somewhat alleviated this situation. Although the number of applicants registering as home aides is still relatively small, both employers and employees have reported very satisfactory results.

Skilled and Semi-Skilled Workers

The labour situation for skilled and semi-skilled workers improved markedly during April as employment opportunities increased while fewer applicants sought this type of work. The number of skilled workers required rose to 36,243 at April 25, while unplaced applicants dropped to 81,973. The shortage of female skilled and semi-skilled workers continues while the supply of skilled male workers is approximately triple the demand. Few qualified journeymen are available, however. Many of the applicants registering at the present time have received a limited training in war industry and are not proficient in the general trade. Any extensive transfer of qualified help is prevented by the lack of housing accommodation in industrial centres.

Textile Workers—Little change was evident in the labour situation for textile workers during April. Local offices are experiencing difficulty in securing trainees for textile work. Although orders have been cleared in areas where unemployment persists, the comparatively low wages offered, together with the lack of housing accommodation, handicaps the number of placements effected. At April 25, there were 8,261 textile workers needed across Canada while the number of applicants seeking this work totalled 3,799. The acute shortage of female sewing machine operators continued during April; in Quebec alone there were 2,730 women required for this type of work but only 812 applicants were available.

Lumber and Wood Products Workers—There were 9,822 men required for lumber and wood products work at April 25; almost 85 per cent of this demand was for loggers. Many sections of the country are now preparing for the river drives. As a result, the demand for skilled loggers remains high. In the Pacific Region, manpower requirements increased to fill the vacancies resulting from the exit of agricultural workers and fishermen. Sawmill operations are getting underway, and many additional workers are needed if production is to keep pace with the raw material required by the construction industry. Furniture manufacturers report an urgent need for skilled workmen, but qualified applicants are difficult to obtain.

Miners—The acute manpower shortage in the mining industry evident after V-J Day,

has been relieved to a large extent. However, the lack of housing accommodation continues to curtail the placement of workers in the mines. Many employers are requesting ex-servicemen only, and this, together with the strict physical requirements, is a deterrent factor in the expansion of employment in the mining industry. The number of skilled miners required dropped during April to total 1,259 at the end of the month. Labour supply increased slightly as university students accepted employment in the mines for the summer months; at April 25, unplaced applicants totalled 1,008. The demand for certificated coal miners stood at 868 at April 25, but only 322 applicants were seeking this type of work. In the Prairie Region a shortage of track layers and mine drivers persists. The need for qualified help is becoming more serious as temporarily employed agricultural workers return to their farms.

Construction Workers—The seasonal upswing in construction activity resulted in demand for skilled construction workers increasing by 70 per cent during April. Despite the continued shortage of materials, the number of building permits issued has been rising sharply. Highly skilled tradesmen are greatly in demand, but many of those registered as skilled construction workers are not qualified. Applicants, in many cases, are in the higher age bracket, while others are not able to perform the services required of specialized construction workers. To alleviate this situation apprenticeship schools for construction workers have been formed throughout Canada. At April 25, there were 5,652 construction workers needed across Canada, while the supply of skilled construction labour totalled

12,270. The need for bricklayers and plasterers remains acute, but suitable applicants are difficult to obtain. Orders for carpenters doubled during April to total 2,829 at April 25; the supply of workers, classified as carpenters, was almost triple the number required.

Workers in Miscellaneous Occupations—The surplus of metalworkers continues, with no immediate alleviation in sight. Although demand increased slightly during April and the available supply fell somewhat, there were still approximately seven applicants for every position registered at the employment service at April 25. Welders and flame cutters, particularly, were in excess supply. The demand for moulders and core makers persists, with an acute shortage reported in Ontario foundries. In some areas, additional labour is required to replace the agricultural workers returning to the farms. There is a good demand for experienced automobile mechanics throughout Canada. Although applicants seeking this work are considerably in excess of demand, many are unable to meet the exacting standards now specified by employers. A slight rise was evident in the demand for truck drivers, but these orders should be easily filled from the abundant supply of workers now registered. Increased activity in laundry and dry-cleaning establishments during the spring resulted in a sharp rise in the need for spotters and finishers. With the opening of the inland waterways during April, orders increased for stevedores and longshoremen. The coal strike in the United States, however, has reduced the number of employment opportunities available for this type of worker.

TABLE I—UNFILLED VACANCIES AND UNPLACED APPLICANTS BY OCCUPATION AND BY SEX,
AS AT APRIL 25, 1946

Total.....	57,706	41,075	98,781	201,282	46,469	247,751

Unskilled Workers

The gradual completion of reconversion in many industries, together with the normal upswing in industrial activity during April, was reflected in a sharp rise in orders for unskilled labour. At April 25, there were 32,402 unskilled workers required, as compared with

20,529, five weeks earlier. The supply of labour, on the other hand, fell slightly during the month to total 100,244 at April 25. Demand for unskilled construction workers doubled during April as additional labour was required for residential, industrial, and highway construction. Orders for extra gang

labour and section hands were received in April. These vacancies will undoubtedly increase during the next few months as extensive provincial programs for highway surfacing and the opening of new roads get underway. Workers, classified as light labour,

comprised over 40 per cent of the applicants seeking unskilled work at April 25. Employment opportunities to which these workers may be referred are very limited at this time, whereas during the war years light labour was easily placed in war industry.

Regional Analysis

The Regional analysis which follows is based on the semi-monthly reports received from Local Employment Offices across Canada. The report covers employment conditions during the month ended April 22, 1946.

Maritime Region

Agriculture.—The demand for farm help started to grow in the latter half of April, as preliminary spring work began. Although twice as many applicants are now listed as there are vacancies, most of these are returned veterans with no real desire to return to agriculture, even though it was their pre-war occupation. The first group of Newfoundlanders, totalling twenty, will arrive at the beginning of May to be trained on Nova Scotia farms. Thirty more are expected later in the month and the demand for these veteran trainees is keen.

In some areas, however, difficulty is being experienced in obtaining farm help because of competition with the forest industries for labour. Farmers cannot meet the higher wages paid by woods operators.

Logging.—In spite of the season of year and the prevailing weather conditions, a considerable demand exists in the logging industry, particularly for pulpwood and fuelwood cutters, and over 500 men were still required in the bush at the end of April. Spring stream driving should begin very soon, as water conditions are favourable owing to recent rains and snowstorms. Sawmill operations will create a further demand for labour almost immediately as spring sawing should commence at any time. Exit permits are being issued to woodsmen in the St. Stephen area for work in Maine.

Coal Mining.—Coal output has remained fairly stable. Several collieries were temporarily tied up because of industrial disputes in Cape Breton and the mainland, but now have resumed operations. Increased labour demand is evident—305 skilled miners are needed, 225 in the Sydney region and 80 in the Minto area. It is expected that discharges will fill these vacancies. In Inverness, the closing of a Nova Scotia Department of Mines colliery will displace 125 men.

Manufacturing.—A surplus of labour is reported in all areas and this situation is not

likely to change while the supply of materials remains at present levels. The Eastern Car Company of New Glasgow will be forced to release from 400 to 800 men if steel deliveries do not improve. A similar situation exists at the Maritime Steel and Foundry Company, despite a generous demand for its product. Activity in the Sydney steel plant is slightly under average, but with the opening of navigation, output is expected to increase. The shipbuilding industry of Halifax is maintaining its employment, small fishing boat construction being especially active. The Lever Bros. soap factory at St. Stephen is still closed because of the scarcity of fats and oils, while shoe manufacturers report that a serious shortage of materials is resulting in reduced production.

Construction.—Adverse weather conditions and material shortages are retarding the tremendous number of residential and commercial construction projects planned throughout the region. Uncertainty regarding supplies is causing contractors to hesitate in accepting building contracts. Skilled tradesmen, especially bricklayers, plasterers and finish carpenters, are in short supply. Unskilled labourers for excavation work are difficult to obtain.

Transportation.—Port work at Saint John and Halifax is slackening off, but it is hoped that with large shipments of grain and goods for UNRRA, a larger number of stevedores and freight handlers will be required than was usual in pre-war years. Nova Scotia has voted \$8,000,000 for highway improvement, and substantial grading and surfacing will be done in New Brunswick. Highway construction, however, will be influenced by the results of the recent Dominion-Provincial Conference.

Veterans.—Unplaced veterans are steadily increasing, although reinstatements are progressing satisfactorily. Training facilities are filled to capacity and over 1,200 applicants are awaiting an opportunity to commence their courses. No difficulty is experienced in placing qualified ex-service women.

Quebec Region

Agriculture.—Activity is still generally light throughout the region, but signs of normal spring revival are evident in several areas. Plans to meet the expected farm labour demand are being carefully formulated. An

innovation in the movement of labour to distressed areas is proposed by the organization of farmer-excursions from the lower St. Lawrence valley to the Montreal and Eastern regions for seeding and harvesting operations. This shuttling of farm labour is made possible by the different climatic conditions in the two regions, which causes about a three-week lag in farm production for the lower St. Lawrence valley.

Logging—Spring driving preparations are in full swing and the favourable conditions expected shortly should enable these operations to get underway. Operators' requirements are mounting, but ample labour is available in all sections.

Mining—Hardrock miners are urgently needed in the Rouyn area. Operators are training employees as qualified men are extremely scarce, but this is a slow process. If skilled miners were available, additional unskilled labour would be required. In the Thetford district, machinery installation is being retarded by a shortage of structural steel, and production of asbestos fibre is thus also delayed.

Manufacturing—The development of new industries is one outstanding feature of the present industrial situation. The former shell-making plant of Defence Industries Limited in Montreal has been converted into a Crown Industrial Building, and between 20 and 30 new industrial firms will be in operation there by fall. Sixteen new businesses are established in the Verdun Industrial Building, and will employ 3,000 persons when in full production. The Dominion Textiles Company reports production to be the highest in the firm's history but it is still unable to fill accumulated orders. The company plans to make a \$750,000 extension to its Magog plant. The clothing industry remains desperately in need of workers, particularly sewing-machine operators. In the building material field all companies report increased activity, with little difficulty being experienced in obtaining the required labour. Rumours persist that the Alcan smelter at Arvida is negotiating a new contract which would provide continuous work for about 4,500 men over a two-year period. Clerical workers are in general demand but although applicants are numerous, those qualified are few.

Construction—The supply situation in the building field has shown little or no improvement, and the acute shortage of every type of construction material remains a serious obstacle.

The accumulated number of new projects is growing daily. During the first part of April, 624 building permits, involving an outlay of

approximately \$3,000,000, were issued in the Montreal area alone. A recent wage increase granted to building trade workers should prove a stabilizing influence in this field. Labourers are particularly in demand, but the need for construction tradesmen is not as great as was anticipated owing to innovations in building methods and pre-fabrication, as well as to material shortages.

Transportation—The port of Montreal is showing renewed activity with the seasonal opening of navigation. The employment situation is somewhat uncertain as the coal strike in the United States is already affecting inland shipping to some extent. The Saguenay terminals are scheduled to open this week and about 100 men will commence work in connection with navigation in this district. The CPR will spend more than \$3,000,000 on lines radiating from Montreal, with the resulting variety of projects creating work for diversified types of tradesmen as well as for unskilled workers.

Ontario Region

Agriculture—Seeding of spring grain has been completed in most districts, dry weather having advanced this operation in the southern and western sections of the province. Present indications point to a full crop of fruits and an increased acreage of flue tobacco, but there is a general feeling that some crop acreages may be reduced because of a lack of labour. Orders for farm labour are reaching the local offices in large numbers, and in many areas anxiety is expressed over inability to interest workers in farm employment. Japanese labour is being used on farms, especially in the Guelph area.

Logging—River driving is in full swing except in the extreme northern part of Ontario. Nearly 200 river drivers were supplied for the Annprior area in one week. At Sault Ste. Marie, Timmins and Kapuskasing, pulp cutters are still in demand but the overall need for bushmen has decreased to approximately 1,700 men at the present time. Sawmill operations will commence early in May, and orders for workers now are being filed.

Mining—The general employment situation in Ontario mines is satisfactory. Demand for experienced gold miners is increasing but no trouble in filling these orders is expected.

Manufacturing—The upward trend in manufacturing activity is continuing at a slightly slower rate due to the material shortages affecting many industries. Automobile production is well underway, Oshawa plants resuming operations on April 8. A substantial surplus of labour remains in this city, however, a sur-

plus which is being tapped by outside areas. Skilled help is at a premium for certain machine occupations; in addition, moulders, tool and die makers, and lathe operators are in demand. Brantford, Orillia, Owen Sound, Peterborough and Guelph need such workers urgently. Foundry workers to replace those now leaving for the farm, are required in London.

The effects of the American coal strike was not felt in full force during April, but dwindling coal piles forecast a crippling of industry in May if the strike does not end. The furniture industry is working at full speed and more furniture is being produced today than ever before, despite a shortage of materials and skilled help. The increased production, however, is still inadequate to meet the huge "new family" demand. All classes of labour are required in the textile industry, particularly sewing-machine operators, spinners and doffers. New plants will open shortly in Kingston and Lindsay. Steady need for workers exists in the leather products industry, particular shortages being reported in the Stratford area.

Construction—Residential construction work has increased during the month, particularly in Toronto where 561 new houses were started. Building material shortages are becoming more acute. Skilled tradesmen such as bricklayers, carpenters and plasterers, and experienced labourers are needed. Numerous large contracts for industrial and public works projects in the building field have been awarded throughout the region.

Transportation—Track maintenance men are required by both the CPR and the CNR for work at various divisional points, although lay-offs in the running trades are taking place. Lake shipping activity is slow owing to the effects of the soft coal strike. The Ontario Department of Highways plans to spend about \$46,000,000 on highways in the present summer, a project which will absorb much of the unskilled labour surplus.

Veterans—Conditions are improving for veterans. The ratio of placements to applicants is steadily rising. The chief difficulty is that many veteran applicants are totally unskilled and therefore difficult to place.

Prairie Region

Agriculture—The urgency of demand for farm help varies throughout this region. In southern Manitoba, farm orders are steadily coming in, particularly for tractor men. Localized shortages are expected to appear as the season advances, but no general farm labour shortage exists as yet. The Saskatchewan farm labour situation is well in hand, supply of agricultural workers being adequate

at present. In Alberta, the competition of other industries is creating some farm placement difficulties but all demands are being filled. A local shortage is expected shortly at Edmonton where considerable activity is currently occurring. Rush demand throughout the Prairie region has not occurred this season as the past month of fine weather has given farmers more time to prepare for spring work.

Logging—Spring drives are now either underway or about to start throughout north-western Ontario, which is included in the Prairie Region. The withdrawal of German prisoners-of-war from pulpwood camps in the Port Arthur area has begun, despite the fact that all operating companies are still seeking cutters. The industry faces a serious manpower shortage as it seems that neither the average Canadian youth nor the returned ex-serviceman desires work in the woods. Activities in Manitoba, Saskatchewan and Alberta are currently at a standstill.

Coal Mining—Coal mining is rather slack except in the Lethbridge and Red Deer areas, where qualified miners are required; and in the Blairmore district where housing accommodation is proving a bottleneck to filling labour needs. In the Estevan area of Saskatchewan, mines are employing skeleton crews only, and displaced workers are reluctant to migrate to Alberta mining districts.

Base Metal Mining—Skilled and semi-skilled miners continue to be in short supply in the Fort Frances region, but clearance orders are producing excellent results and the situation is only temporary. Steep Rock Iron Mines announce definite expansion of operations. The northern mining areas are still inaccessible, but flying will recommence shortly. The Red Lake district of Kenora will be open by May 1, and orders for labour are being placed. Inexperienced or partially experienced men are available.

Manufacturing—Employment is expanding in the Canada Car and Foundry Company of Fort William, where one hundred employees were hired recently and approximately sixty more will be added weekly for an indefinite period. Rolling mills in Selkirk are also showing increased activity. Building materials manufacturing firms are extremely busy. Labour shortages are restricting output in brick yards at Medicine Hat and Edmonton, and material shortages are hampering sash and door factories. Expanded output of soil pipe at Winnipeg will result from plant extensions to the Anthes foundry. Activity remains slight at all packing house centres, with comparatively little labour turnover. Trainees are required by garment, fur, shoe

and leather firms but it is difficult to interest suitable applicants in this type of work.

Construction—Building construction is under way in all areas, although material shortages and lack of skilled labour are holding up numerous projects. Experienced tradesmen are urgently required in Calgary, Yorkton and Red Deer. Except for plasterers, the Winnipeg area is well supplied with labour. Restricting shortages of supplies are reported in Lethbridge, Prince Albert and Calgary.

Transportation—The opening of lake navigation near the beginning of April has effected the re-hiring of docks workers, including 300 stevedores and longshoremen. The CNR has re-employed nearly all men released in March in the Prince Albert, North Battleford and Yorkton areas, and additional workers will soon be required. Orders for track maintenance workers have been placed at Medicine Hat, Edmonton, Weyburn, Moose Jaw, Brandon and Winnipeg.

Veterans—Difficulty in placing veterans in available work opportunities is chiefly attributable to their reluctance to accept temporary employment; lack of proper qualifications for the type of work they desire; and their disinterest in returning to pre-enlistment farming occupations.

Pacific Region

Agriculture—Little increase in farm labour orders is evident, apart from the continuing demand for dairy workers which is concentrated in the Fraser valley. The lateness of the season will undoubtedly create an abnormal rush demand for labour when spring work commences, as farmers will have to speed up operations.

Logging—In the coastal region, logging vacancies have increased by about 75 per cent in the past month, all types of skilled and unskilled men being required. Several factors enter into this acute shortage—the seasonal migration of workers to farming and fishing; the increased production goals of forest operators; and unsettled labour relations in the industry causing workers to avoid this type of work.

In the Okanagan and Kootenay areas, demand for loggers and sawmill workers is mounting. Skilled men are so scarce that most camps are willing to accept untrained men in limited quantities for training purposes. Some of the operators in this area have formerly employed large numbers of Japanese many of whom are not available this year.

Better towing weather has brought about an increased supply of logs in the lower mainland area and several mills are now planning extra shifts.

Coal Mining—All employment offices in coal mining areas report unfilled orders for certified miners and underground labourers. The recall for discharge of military personnel on industrial leave has aggravated this condition.

Base Metal Mining—Operations are expanding and the demand for workers is mounting. At Dawson, 340 men were required for placer work in the middle of the month. Developmental work is progressing on a hard-rock project in this area, and if successful will create many new employment opportunities. A new wage agreement is being negotiated between the Consolidated Mining and Smelting Company of Trail and the Union, which is affecting employment for the present. The general shortage of labour may be temporarily relieved by university students, numbers of whom intend to seek work in the mines during their summer vacation.

Manufacturing—All labour requirements in excess of normal turnover are few. Shipbuilding yards are still suffering from the serious steel shortage, which has resulted in the temporary release of several welders and burners at Vancouver. Victoria yards are maintaining employment, and require the odd journeymen now and then. The lack of highly-skilled workmen is still proving a bottleneck in the wooden shipbuilding industry, and most firms are favouring training-on-the-job and boatbuilding classes to overcome this situation. The fish-packing industry is becoming more active and vacancies are easily filled. Clerical workers are needed, but few of the numerous applicants possess the necessary qualifications.

Construction—Construction work has commenced in all areas, but a shortage of materials restricts operations periodically. Demand for unskilled workers is rising at Vancouver. Skilled finishing carpenters are scarce. At Victoria, a shortage of experienced men, both tradesmen and labourers, exists. The semi-skilled carpenters available are not acceptable to employers. All types of workers are required for the pulp mill project now underway at Port Alberni. The supply of professional and technical personnel for the construction industry—engineers, mechanics, architects, draughtsmen—is not nearly adequate to meet the demand.

Transportation—Coastal shipping is becoming more active and orders for marine workers are being listed, the higher ranks of seamen being difficult to obtain. Railway gang labourers and bridgemen are needed at various points but placement is slow as wages are low. The Canadian Army requires some civilian workers for the Alaska highway. This

order is being filled from the local labour supply.

Veterans—Placements of veterans are steadily rising, but the number of unREFERRED male veterans remains fairly stable owing to

a corresponding increase in discharges. About one-third of the unplaced ex-service personnel are veterans of the 1914-18 war and are fit only for light duties. This is making their placements difficult.

Applications for Employment; Vacancies and Placements; March, 1946

REPORTS received from the National Employment Service Offices of the Unemployment Insurance Commission during the four-week period March 1 to March 28, 1946, showed an increase of 13.1 per cent in business transacted, when compared with the preceding period February 1 to February 28, and a decrease of 51.0 per cent in comparison with the four weeks March 2 to March 29, 1945, this computation being based on the average number of placements recorded daily. Under the first comparison, minor decreases were noted in forestry and logging and public utilities operation, and nominal losses in fishing and hunting and finance and insurance. All other industrial divisions registered increases the most noteworthy being a moderate gain in construction, and smaller advances in services and manufacturing. When compared with the four weeks ending March 29, 1945, except for a small increase in agriculture, losses were recorded in all industrial groups, the greatest being a substantial decrease in manufacturing and moderate declines in services, trade, public utilities operation, and forestry and logging.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work registered at Employment Offices throughout Canada. It will be seen from the graph that the trends of vacancies and placements in relation to applications took upward courses, the ratio of vacancies to applications being 85.5 during the four weeks ending March 28, 1946 in contrast with 67.8 during the preceding period and 116.4 during the four weeks March 2 to March 29, 1945. The ratio of placements to each one hundred applications was 37.6 as compared with 31.9 in the previous period and 69.0 in the four weeks ending March 29, a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the period under review was 5,398 compared with 4,477 during the preceding four-week period, and 8,218 during the period March 2 to March 29, last year. The average number of appli-

cations for employment received daily by the Offices during the four weeks March 1 to March 28, 1946, was 6,312 in comparison with 6,597 for the previous four weeks and 7,054 in the corresponding period in March, 1945. The average number of placements made daily by the offices during the period ending March 28, 1946, was 2,379 of which 2,170 were in regular employment and 209 in work of one week's duration or less, as compared with a total daily average of 2,104 during the previous four weeks. Placements in the period ending March 29, 1945 averaged 4,860 daily, consisting of 4,720 placements in regular and 140 in casual employment.

During the period March 1 to March 28, 1946, the offices of the Commission referred 89,621 persons to vacancies and effected a total of 57,078 placements. Of these, the placements in regular employment were 52,074 of which 38,684 were of males and 13,390 of females, while casual placements totalled 5,004. The number of vacancies reported by employers was 87,781 for males and 41,758 for females, a total of 129,539 and applications for work numbered 151,501 of which 110,671 were from males and 40,830 from females. Reports for the four weeks March 1 to March 28, 1946, showed 129,539 positions available, 151,501 applications made and 57,078 placements effected, while from March 2 to March 29, 1945 there were recorded 197,221 vacancies, 169,305 applications made and 116,653 placements in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1936 to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (13 weeks).....	157,571	15,386	172,957

Nova Scotia and Prince Edward Island

Positions offered through National Employment Service Offices in Nova Scotia and Prince Edward Island during the four weeks March 1 to March 28, 1946, averaged 178 daily in contrast with 160 in the previous period and 252 during the corresponding four weeks of 1945. The average number of placements effected daily was 92 during the period under review, in comparison with 90 in the preceding four weeks and 176 during the period ending March 29 a year ago. A fairly large decline in manufacturing together with moderate losses in services, public utilities operations and trade accounted for the reduction in placements from the four weeks ending March 29 last year. Placements by industries numbered: services 652; manufacturing 566; trade 357; construction 254; public utilities operation 134 and mining 100. There were 1,482 men and 575 women placed in regular employment.

New Brunswick

There was a decrease in the average number of positions available daily at Employment Offices in New Brunswick during the period under review, there being 120 in comparison

with 142 in the preceding four weeks and 202 during the period terminating March 29 last year. Placements showed a daily average of 67 compared with 59 in the previous four weeks and 146 during the corresponding period of 1945. When comparing placements by industrial divisions with the four weeks terminating March 29 a year ago, none of the changes was large, the most significant being moderate decreases in manufacturing, public utilities operation, trade, services, and forestry and logging. Placements by industrial groups included: services 460; manufacturing 360; construction 208; trade 197; public utilities operation 182 and mining 124. Regular placements numbered 1,081 of men and 361 of women.

Quebec

Employment opportunities as indicated by orders received at Offices in the province of Quebec during the four weeks ending March 28, 1946, showed a daily average of 1,156 workers, in comparison with 1,072 in the previous period and 2,405 during the four weeks March 2, to March 29, 1945. There was a daily average of 356 replacements compared with 319 in the preceding period and 1,406 during the four weeks ending March 29 a year ago. A pronounced decrease in manu-

facturing supplemented by substantial losses in forestry and logging, services, trade and declines smaller in volume in construction and public utilities operation were responsible for the reduction in placements from the corresponding period last year. In addition, moderate declines were noted in finance and insurance, and mining. Industries in which employment was secured for more than 300 workers included: manufacturing 3,592; services 1,406; construction 1,338; trade 715; forestry and logging 656; public utilities operation 326 and mining 304. Placements in regular employment totalled 6,543 of men and 1,882 of women.

Ontario

Orders received at Employment Offices in Ontario during the period terminating March 28, 1946, called for a daily average of 2,461 workers in contrast with 1,939 in the four weeks ending February 28, 1946, and 3,556 during the corresponding period of 1945. The average number of placements registered daily was 1,070, in comparison with 965 in the preceding four weeks and 1,984 during the period terminating March 29 last year. With the exception of a small gain in agriculture, all industrial groups showed declines when compared with the four weeks terminating March 29, 1945. The most noteworthy loss was reported in manufacturing, followed by substantial decreases in services, trade and public utilities operation, with reductions of more moderate proportions in finance and insurance, and forestry and logging. Industrial divisions in which most of the placements were effected were: manufacturing 10,066; services 5,491; construction 3,232; trade 2,608; public utilities operation 1,684; forestry and logging 1,297 and mining 577. There were 18,524 men and 5,839 women placed in regular employment.

Manitoba

Orders listed at Employment Offices in Manitoba during the four weeks ending March 28, 1946, called for a daily average of 272 workers, compared with 214 during the preceding period, and 387 in the corresponding four weeks a year ago. Placements recorded a daily average of 166 during the period March 1 to March 28, in contrast with 140 in the preceding four weeks and 242 during the period ending March 29, 1945. Placements were less numerous than those of the corresponding four weeks of last year, the highest decrease being in trade, while moderate losses were reported in manufacturing, services and public utilities operation. Placements by industries included: services 1,435; trade 882; manufacturing 784; construction 310; public utilities operation 194; agriculture 139 and

mining 119. Regular placements numbered 1,768 of men and 1,292 of women.

Saskatchewan

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Saskatchewan during the four weeks under review, was 212 as compared with 136 in the previous period and 206 during the four weeks terminating March 29 a year ago. There was a daily average of 91 placements in comparison with 85 in the preceding period and 117 during the four weeks terminating March 29 last year. Placements by industrial groups showed small variation from the corresponding period of 1945, the largest changes being moderate declines in trade and manufacturing. In the remaining groups, the losses exceeded the gains. Placements by industrial divisions numbered: services 992; trade 472; manufacturing 213; public utilities operation 159; construction 157 and agriculture 123. Placements in regular employment totalled 1,018 of men and 617 of women.

Alberta

During the period ending March 28, 1946, the daily average positions offered through Offices in Alberta was 303, compared with 218 in the four weeks ending February 28, and 337 during the period March 2 to March 29, 1945. The average number of placements effected daily was 161, in contrast with 138 in the previous period and 216 during the four weeks ending March 29 a year ago. The reduction in placements from the corresponding period of last year, was due to moderate declines in trade, services, public utilities operation, manufacturing and mining, as except for a small loss in finance and insurance, all other groups showed improvement, the most important being in forestry and logging, and agriculture. Placements by industries included: services 1,265; trade 620; manufacturing 568; construction 398; agriculture 321, public utilities operation 252; forestry and logging 249 and mining 158. There were 2,235 men and 1,086 women placed in regular employment.

British Columbia

Opportunities for employment at Employment Offices in the province of British Columbia during the period terminating March 28, 1946, numbered 695 daily in contrast with 597 in the previous four weeks and 873 during the period terminating March 29 last year. Placements showed a daily average of 374, in comparison with 309 in the preceding four weeks and 574 during the period terminating March 29 a year ago. The substantial loss in manufacturing was mainly

responsible for the decrease in placements from the corresponding four weeks of 1945, although forestry and logging, public utilities operation and services reported fairly large declines. Moderate reductions were recorded in trade, and finance and insurance but these were offset in part by gains in construction

and mining. Industrial divisions in which the majority of placements were affected were: services 2,463; manufacturing 1,935; construction 1,373; forestry and logging 1,139; trade 1,018; public utilities operation 531 and mining 289. Regular placements numbered 6,033 of men and 1,738 of women.

Quarterly Report of National Employment Service Offices, December 28, 1945 to March 28, 1946

EMPLOYMENT conditions as indicated by the work of National Employment Service Offices of Canada during the quarter December 28, 1945, to March 28, 1946, showed heavy losses in both vacancies and placements, there being reductions of 36.4 per cent in vacancies offered and 55.4 per cent in placements effected when compared with those reported during the corresponding quarter of 1945. A marked decrease in vacancies was reported in manufacturing together with substantial losses in services, trade, public utilities operation and fairly large declines

in mining, finance and insurance, construction and forestry and logging. An appreciable gain was shown in agriculture and a moderate increase in fishing and hunting. Placements were higher in agriculture but were greatly offset by losses in manufacturing, services, logging, trade, public utilities operation, construction, finance and insurance and mining. All provinces except Prince Edward Island reported fewer vacancies and all recorded reductions in placements, the most noteworthy declines in both vacancies and placements being in Quebec and Ontario.

The accompanying table gives the vacancies and placements of the National Employment Offices by industrial groups in the various provinces during the period December 28, 1945, to March 28, 1946.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of the National Employment Service Offices during March, 1946, it will be noted that the curve of vacancies in relation to applications took an upward course in January, a slightly lower trend in February, and an upward course during March. The curve of placements in relation to applications dropped during the first two periods, and took an upward course during the last four weeks,

the level at the close of the quarter being lower for both vacancies and placements than those shown at the end of the corresponding period last year.

During the period December 28, 1945, to March 28, 1946, there was a ratio of 73.6 vacancies and 33.4 placements for each one hundred applications for employment, as compared with 101.2 vacancies and 65.3 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 4,953, of applications registered 6,730, and of placements effected 2,246, in contrast with a daily average of 7,793 vacancies, 7,700

applications and 5,033 placements in regular and casual employment during the first quarter of 1945.

During the thirteen weeks December 28, 1945 to March 28, 1946, the offices reported that they had referred 268,787 persons to positions and had effected a total of 172,957 placements of which 157,571 were in regular and 15,386 in casual work. Of the placements in regular employment 117,164 were of males and 40,407 of females while casual work was found for 4,870 males and 10,516 females. A comparison with the corresponding period in

1945 showed that 387,529 placements were then effected of which 377,028 were in regular and 10,501 in casual work. Applications for employment during the period under review were received from 383,557 males and 134,619 females, a total of 518,176 in contrast with the registration of 592,887 persons during the same quarter of 1945. Employers notified the offices of 381,395 positions, of which 254,748 were for males and 126,647 for females, as compared with 600,133 opportunities for employment offered during the first quarter of 1945.

Unemployment in Trade Unions at the Close of the Quarter Ending March 31, 1946

RETURNS from 2,463 local unions in Canada with a combined membership of 414,487 indicated an unemployment percentage of 1.9 at the end of the first quarter of 1946. At the end of December, 2,460 locals, with a total of 410,089 members, reported 3.0 per cent unemployed, while in March, 1945, 2,337 locals, representing 421,779 members, registered 0.7 per cent unemployment.

In the following report unemployment refers only to involuntary idleness due to economic causes. Persons who are without work because of illness, a strike or a lockout, or who are engaged in work outside their own trades are not considered as unemployed. As

returns from unions reporting vary from quarter to quarter with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that the figures refer only to organizations reporting.

The decrease in the percentage of trade union unemployment at the end of March was due mainly to improvements in employment conditions in mining, the manufacturing industries, building and construction, and communication. A decrease in employment opportunities was indicated by trade unions in transportation and trade.

The percentages of unemployment, at certain dates, in each province are shown in

Table I. All the provinces with the exception of Manitoba, Saskatchewan, and Alberta showed an improvement at the end of March in comparison with the previous quarter. The percentage of trade union unemployment in Nova Scotia decreased from 4.6 to 4.0, in New Brunswick from 4.7 to 1.8, in Quebec from 1.8 to 1.4, in Ontario from 4.0 to 1.7, and in British Columbia from 3.5 to 3.0. The percentage increased in Manitoba from 1.2 to 1.6, in Saskatchewan from 1.3 to 2.1, and in Alberta from 0.9 to 1.0. Lower employment levels were indicated in all the provinces as compared with March, 1945, the decline being substantial in Nova Scotia, New Brunswick, Saskatchewan and British Columbia.

A separate compilation is made each quarter of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. For the quarter under review, as compared with the previous quarter, improvements were recorded in all but Edmonton, where the percentage of unemployment rose from 0.5 to 1.9. In this comparison, the percentage decreased in Halifax from 2.0 to 0.9, in Saint John from 16.3 to 3.1, in Montreal from 1.7 to 1.1, in Toronto from 1.0 to 0.6, in Winnipeg from 1.5 to 1.1, in Regina from 1.1 to 0.9, and in Vancouver from 3.8 to 2.9.

A comparison with March, 1945, shows lower employment levels in all these cities.

Returns were tabulated from 894 local union organizations in the manufacturing industries. These reported a combined membership of 195,351 of whom 3,597 (1.8 per cent) were recorded as unemployed. At the end of the previous quarter 7,555 (3.9 per cent) of 192,352 members reported by 912 locals were without work. In March, 1945, 0.4 per cent of 218,124 members were unemployed. In comparison with the previous quarter the employment situation was more favourable among union members engaged in the manufacture of pulp, paper, and paper products, wood products, men's and women's garments, iron and its products, non-ferrous metal products, and clay products. (See Table II.) Increases in unemployment were noted in printing and publishing, animal products, and in mineral products. A comparison with March of the previous year shows decreases in employment in the manufacture of vegetable products (other than wood and textile products), animal products, wood products, iron and its products, mineral products, and printing and publishing.

In the transportation industries returns were received from 908 local unions with a combined membership of 99,467 of whom 2,030

(2.0 per cent) were without work on the reporting date. In comparison, 1.4 per cent were unemployed at the end of the previous quarter and 0.6 at the end of March, 1945. Unemployment among union workers in shipping increased to 4.3 per cent from 2.8 in the previous quarter. In steam railway operations the unemployment percentage in the same period rose from 1.6 to 2.4. A slight improvement was noted in local transportation.

Unemployment in the mining group decreased from 4.0 per cent to 0.7. At the end of March, 1945, the percentage of unemployment registered was 0.6. For the quarter under review, 74 unions in mining reported a total of 25,085 members of whom 166 were unemployed at the reporting date. Unemployment in coal mining was recorded as 0.1 per cent in comparison with 0.2 in

TABLE I.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

March 1944.....	-4	-9	0.9	0.9	0.9	0.7	0.4	0.7	0.9
June 1944.....	-1	0.6	0.4	0.2	0.2	0.5	0.2	0.2	0.3
September 1944.....	-2	0.7	0.4	0.2	0.1	0.5	0.1	0.4	0.3
December 1944.....	0.0	-2	0.9	0.4	0.8	0.5	0.7	0.6	0.6
March 1945.....	-5	0.0	1.2	0.6	0.9	0.8	0.8	0.5	0.7
June 1945.....	1.2	-1	0.6	0.7	0.2	0.9	0.3	0.2	0.5
September 1945.....	2.0	0.5	2.4	0.5	0.4	0.4	0.3	2.4	1.4
December 1945.....	4.6	4.7	1.8	4.0	1.2	1.3	0.9	3.5	3.0
March 1946.....	4.0	1.8	1.4	1.7	1.6	2.1	1.0	3.0	1.9

the previous quarter and 0.3 at the end of March, 1945. Among metallic miners, the percentage of 0.5 was a pronounced drop from the 10.0 per cent at the end of December, 1945, but was higher than the full employment recorded in March of the previous year. Unions of non-metallic miners, other than coal miners, reported 4.0 per cent of 3,485 members unemployed; for the previous quarter, this group reported an unemployment percentage of 5.0 and of 3.4 per cent for March, 1945.

The Department received reports from 211 locals in the building and construction trades. These reported a combined membership of 37,887 of whom 3.1 per cent were unemployed. In comparison 3.5 per cent were unemployed at the end of December and 1.9 at March in 1945. Improvement of employment conditions was noted among carpenters and joiners, painters, decorators and paper hangers, plumbers, and hod carriers. The unemployment percentage increased among bricklayers, masons and plasterers, from 2.7 to 3.9, and among electrical workers, from 2.5 to 8.6. Slight variations in employment were indicated for other groups in this category.

Unemployment among trade union members in public and personal services decreased slightly from 0.8 per cent to 0.7. However,

the 0.7 per cent unemployment recorded was higher than the 0.3 per cent shown at the end of March in the previous year.

The communications group with an unemployment percentage of 0.3 was lower than the 3.2 per cent at the end of December although slightly higher than the percentage recorded in March, 1945.

Unemployment in logging rose to 4.2 per cent as compared with the full employment noted in the previous quarter. This figure was, however, lower than the March, 1945, unemployment percentage of 6.1. Although 50.0 per cent were reported as unemployed by trade unions in the fishing industry, this figure cannot be considered as representative of general conditions in the industry as it is based on returns from only four unions with a total of 430 members.

The accompanying chart illustrates the trend of trade union unemployment from January, 1940, to date. Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to March, 1946, inclusive. It also indicates the percentage of those without work for March of each year since 1932 and for each quarter since 1943 to date. Table II indicates the percentage of unemployment in the various groups of industries at certain dates since 1932.

Trade Unions in Great Britain

A RECENT issue of the United Kingdom Information Office's publication *Labour and Industry in Britain*, contained an article on British Trade Unions, culled from material which had appeared in previous issues and assembled into one article. A brief summary is presented below.

Collective bargaining in Great Britain has been conducted increasingly at the national level between unions and employers' associations; when an employer is not a member of an association terms generally conform to the national agreement existing for the particular industry. During the war a Government Order laid down a ruling to assure uniformity throughout an industry by enjoining employers to observe terms and conditions not less favourable than those recognized in the industry and in the district. This has been perpetuated in the post-war period. Under the terms of the Wages Councils Act (L.G., 1945, pp. 129, 874).

"Throughout the great part of British industry, therefore, it is by collective bargaining that standards of wages and working conditions are set for each industry".

Registration

British trade unions are prohibited from incorporating; but they may, if they wish, register with the Registrar of Friendly Societies. By registering, a union becomes a statutory association with the right to sue and be sued, and hold property subject to special provisions pertaining to such organizations.

"A non-registered union can hold property and has access to the courts with respect to its rights and property; but it is merely a voluntary association of individuals and can bring suit only with some difficulty". By the Trade Disputes Act of 1927* non-registered unions like those registered were required to submit an annual report on their political funds.

The latest published report covered the year 1936 and showed the registered labour unions to comprise about 80 per cent of the total labour unions.

Political Activity

The privilege of subscribing funds for political purposes was firmly established by the

* See elsewhere in this issue, page 584.

Trade Union Act of 1913. The Trades Disputes and Trade Labour Act of 1927 which required union members to "contract in" has been removed by the present government and now members are required to "contract out" if they desire to escape political contributions, that is, they must indicate their unwillingness or be deemed to be in favour of contributing to the political fund of the union.

Under the "contract in" system only a portion of the union members paid the political levy. By 1942 it was down to 36 per cent of the members.

In the 1918 Parliamentary election 49 of the 57 successful Labour Party candidates were trade unionists; and in 1935 it was 80 out of 152. The election in 1945 resulted in a further proportionate recession, 119 (or about 30 per cent) of the 393 Labour seats going to trade unionists. From 1918 to 1943 union membership in the Labour Party varied between 80 and 90 per cent of the party's membership.

Organization

The trend in recent years has been for "labour unions to amalgamate or federate into fewer and larger organizations". In 1900 there were 1,323 registered labour unions. By 1942 the number had decreased to 976, though total membership had increased by 285 per cent. Of these, 16 accounted for 60 per cent of the total union membership in the country.

Unions are centralized at two levels through Federations (in 1942 there were 57 containing 38 per cent of total union membership) and through the Trades Union Congress. Individual labour unions, or federations may affiliate to the Trades Union Congress. It encompasses at present over 80 per cent of union membership in the country. (Unions not affiliated to the Congress are mainly those of government employees and teachers.)

In negotiation, the affiliated unions (or federations) retain their complete independence, but when deadlock or dispute threatens, the General Council of the T.U.C. may be asked to intervene.

The counterpart of the Trades Union Congress is the British Employers' Confederation which exists to secure co-operation of the employers' federations on industrial policy.

Prevention of Disputes

Efforts to settle disputes are made, first, at the local level. Failing this, provision is usually included in agreements for reference of the dispute to a joint body composed of representatives of a district employers' association and of district union representatives. It is then referred to the national bodies, if no agreement is reached, on the principle

that no negotiation ensues while a strike or lockout maintains. Voluntary arbitration is usually provided for in agreements as a last stage in the process. "Inevitably, unauthorized strikes take place, but on the whole the system works well".

State machinery for assistance in conciliation and arbitration has been provided, but long before this various industries had set up their own conciliation and arbitration boards. "The history of these boards shows an almost unbroken record of acceptance and loyal observance, by both sides, of the decisions of the arbitrators."

In 1940 a Government Order made strikes or lockouts virtually illegal. Disputes were referred by the Minister of Labour to a "National Arbitration Tribunal" consisting of three public members and two panel members chosen from the British Employers' Confederation and the Trades Union Congress. Decisions of the Tribunal are binding on the parties and became part of their existing contract. So far this order has not been rescinded.

Labour-Management Co-operation

The principle of labour-management co-operation in securing effective production first received recognition in Britain during the First World War. Systematic two party consultation operated during the inter-war period, although on a greatly reduced scale. The Second World War gave work shop collaboration a new stimulus and its application, during the past five years, was extended over a much wider field.

Joint (labour-management) Production Committees in private firms in the engineering or allied industries numbered 4,432, by December, 1943, covering 2,271,000 employees.

"By far the greatest number of Joint Production Committees were established by individual employers in direct agreement with the Trade Unions.

The main function of the Joint Production Committee was to increase output by better use of manpower and material within the factory, by better planning of work and use of factory space and by the better co-ordination of the work of the individual factory to the total war effort." They were, in some cases, made responsible for investigating and controlling absenteeism and persistent lateness.

"Spokesmen for both management and labour have urged, since the end of the war, that the best features of the Joint Production Committees be maintained and developed as a permanent aid to efficient production."

An article relevant to a section on Trade Union Statistics may be found in the April, 1944, issue of the LABOUR GAZETTE, page 500.

Labour Law

Labour Legislation in Saskatchewan and Quebec in 1946

Saskatchewan

THE Saskatchewan Legislature, in session from February 14 to April 4, amended laws relating to collective bargaining, workmen's compensation, child welfare, factories and steam boilers. Statutory provision was made for new health and hospital services.

Collective Bargaining

Amendments in the Trade Union Act, 1944, include a revision of the sections dealing with votes to determine representation, the period for which collective bargaining agreements are to remain in force, and union security.

Another change provides that if a union member is discharged by an employer and the union alleges that he was dismissed for union activity, the employer will be presumed to have discriminated against him with a view to discouraging his membership or activity in a labour organization, unless the contrary is proved. Previously, the burden of proof rested on the worker.

In determining what trade union, if any, represents a majority of employees in an appropriate unit of employees, the Labour Relations Board may direct a vote to be taken by secret ballot of all employees eligible to vote, and must do so on application of any trade union which 25 per cent or more of the employees in any appropriate unit have, either by membership in such union or by written authority, within six months before the application, indicated as their choice as bargaining representative. The Board may refuse to order such a vote if it is satisfied that another union represents a clear majority of the employees, or if, within six months before the application, it has, on the same union's application, ordered a vote by employees in the same unit.

Every collective agreement must remain in force for one year from its effective date and thereafter from year to year. Not less than 30 days nor more than 60 days before the expiry date, either party may give written notice to the other to terminate or revise the agreement. Previously, one month's notice was required. Any trade union claiming

to represent a majority of the workers in an appropriate unit may, not less than 30 nor more than 60 days before the expiry date of the agreement, apply to the Board for an order determining it to be the trade union representing a majority of employees in the unit to which the agreement applies. If the Board makes such an order, the employer must bargain with the union and the former agreement is to be of no effect in so far as it applied to the unit of employees concerned.

A "maintenance of membership" provision must be included in any collective agreement, if requested by a union representing a majority of employees in any appropriate unit, and is to be effective whether or not any agreement is for the time being in force. Thus every person employed in a job to which a collective agreement applies who is or becomes a member of a union must maintain his membership in the union as a condition of employment, and every new employee must within 30 days after starting employment apply for and maintain membership in the union.

The City and Town Acts were amended in the light of a judgment of the Saskatchewan Court of Appeal on May 15, 1945. The Court held that the Regina Chief of Police was not an employer's agent and the Labour Relations Act did not apply to him (L.G. 1945, p. 1011). The amendment to the City Act provides that, for the purposes of the Trade Union Act, 1944, in cities of 15,000 people and over, the Board of Police Commissioners, which is to consist of the mayor, an alderman and the police magistrate, must be deemed to be the employer of policemen, and the chief of police, the employer's agent. Members of the police force are to be deemed to be employees. Similarly, the municipal council in a city of less than 15,000 and by an amendment to the Town Act, the Town Council, must, for the purposes of the Trade Union Act, be deemed to be the employer of members of the police force, the chief of police, an agent of the employer, and constables, officials and assistants, employees.

Workmen's Compensation

Amendments in the Workmen's Compensation (Accident Fund) Act bring telephone operators within the Act, raise, from January 1, 1946, the maximum wages or salary of a workman on which a levy will be made, or of an employer who wishes to be insured as a workman under the Act, from \$2,000 to \$2,500 and add to the list of diseases for which compensation may be paid.

The following occupational diseases are now compensable: dermatitis; bursitis arising from any process involving continuous rubbing, pressure or vibration of the parts affected; vascular disturbances in the upper extremities due to continuous vibration from pneumatic or power drills, riveting machines or hammers; respiratory, gastro-intestinal or physiological nerve and eye disorders due to contact with petroleum products and their fumes; poisoning by ammonia, chlorine, cyanide, formaldehyde and its preparations, sulphuric, hydrochloric or hydrofluoric acid, wood alcohol, and any volatile solvent used in the assembling or repairing of motor vehicles, the making of paints, paint removers or waterproof fabrics, printing, dry cleaning, welding or gasoline blending; glanders arising from the care or handling of any equine animal suffering from glanders or of the carcass of any such animal.

No compensation is payable for hernia unless the workman reported his condition to his employer within such time after the strain or accident occurred as the Board considers reasonable. Previously, the time was expressly stated as "within seven calendar days". The period of disability following an operation for hernia has been extended from 42 to 56 days.

Two classes of disease formerly described as "cancer arising from the manufacture of pitch and tar" and "infection or inflammation of the skin due to oils, cutting compounds, or lubricants, flour, liquids, fumes, gases or vapours" have been replaced by "epitheliomatous cancer or ulceration of the skin or of the corneal surface of the eye due to tar, pitch, bitumen, mineral oil or paraffin or any compound, product or residue of any of these substances." "Inflammation, ulceration or malignant disease of the skin or other tissues due to exposure to X-rays, radium or other radio-active substances" has been broadened to include any disease or disability due to exposure to X-rays, radium or other radio-active substances.

Amendments in the Workmen's Compensation Act, 1911, under which the employer is individually liable to pay compensation and which applies to certain classes of railway workers not covered by the Workmen's

Compensation (Accident Fund) Act, provide that a workman's injury or death must be presumed to have arisen out of and in the course of his employment whether or not he assumed any risk or acted contrary to the rules or instructions of his employer, and the fact that he did so must not be a defence under the Act. A new subsection stipulates that if a workman accepts money as an advance on account of compensation, he is not thereby debarred from proceeding independently of the Act against the employer.

Employment of Children

The minimum age for employment in factories has been raised to 16 by an amendment to the Factories Act. Previously, the minimum age was 14 for boys and 15 for girls.

The Child Welfare Act makes it an offence to cause or procure a child to be employed between 10 p.m. and 6 a.m., "child" under the Act being a person under 16. The Act as revised lowers from 16 to 13 the age under which employment of a child between 10 p.m. and 6 a.m. is prohibited. The provisions governing employment in street trades, public places of amusement, etc., are unchanged.

In the revision of the Village Act a clause was added enabling a village council to pass by-laws, subject to the Child Welfare Act, 1946, fixing the age and the conditions under which a minor may enter, play games, be employed or loiter in or about any place of public entertainment in which billiard or pool-tables, bowling-alleys, etc., are kept for hire, and prohibiting minors under the age specified from entering such place.

Attachment of Wages

The Attachment of Debts Act was amended to provide that the provision for exemption from attachment of wages or salary to the extent of \$60 no longer applies where the garnishee summons is issued under a judgment or order for alimony or a judgment founded upon a separation agreement.

Steam Boilers

Part I of the Steam Boilers Act which deals with registration and licence fees has been repealed. Other amendments relate mainly to certificates.

With respect to qualifications for the office of chief inspector or other inspector, the Act adds as an alternative to four years' experience as a practical machinist or boilermaker that a candidate must be a graduate in engineering from a recognized university. To the

qualification for a fourth-class certificate requiring a candidate to have had two years workshop experience in the manufacture or repair of engines or boilers and to have for six months fired a stationary high pressure boiler of not less than 25 horse-power, the Act now provides as an alternative that he must have acted as assistant for three months to a certificate-holder in the operation of a stationary high-pressure steam plant of not less than 100 horse-power.

A new section stipulates that every engineer and fireman holding a final or permanent certificate must apply annually on a prescribed form, having paid the prescribed fee, for re-registration of his certificate. If he fails for three consecutive years after May 1, 1946, to apply for re-registration, the Minister may cancel his certificate and in such case a new certificate may not be issued unless such person again passes the required examination for an engineer's or fireman's certificate. Upon receipt of application and prescribed fee, the Department must issue a new certificate of re-registration to replace one lost. A certificate of re-registration is not transferable, and the Minister may, upon due cause being shown, refuse to issue such a certificate or cancel one already issued. A subsisting certificate of re-registration together with any certificate held under the Act must be posted in a conspicuous place and produced when required.

The section dealing with provisional certificates now stipulates that an applicant for a provisional certificate must be 18 years of age. He must satisfy the Minister that he:

- (1) has operated or fired a high pressure boiler for at least one year; or
- (2) has served at least three years apprenticeship in an establishment for the manufacture or repair of steam engines or boilers; or
- (3) has held at least two fireman's certificates and fired a high pressure boiler not less than six months; or
- (4) holds a diploma from an approved engineering school and has had not less than six months experience in firing a high pressure boiler.

Upon the inspector's recommendation, a provisional certificate, valid for 12 months from its date, may be issued to every candidate who passes the oral examination, and also to any candidate who, upon examination, has failed to receive a recommendation for a fourth-class certificate. Such certificate during its currency entitles the holder to operate high-pressure boilers not exceeding 50 horse-power or low-pressure boilers of any capacity.

The Act now requires every boiler carrying a steam pressure of not more than 225 pounds per square inch to be provided with a fusible plug approved by the chief inspector. Previously, this was left to the inspector's discretion.

Public Health

Three measures were enacted providing for an extension of health services. The Health Services Act repeals and consolidates, with some revision, the Health Services Act, 1944, and the Municipal Medical and Hospital Services Act. The new Act empowers the Minister of Public Health to divide the Province into regions, in each of which a health board may, subject to the Minister's approval, establish and maintain hospitals and clinics and generally arrange for and administer health services. The Minister may provide for the appointment of a medical and sanitary staff for each region. He must determine what portion of the costs of health services is to be paid by the region, but the Local Government Board is to apportion the costs to be paid by each local authority. The Health Services Planning Commission will continue to function.

Under the Saskatchewan Hospitalization Act, to come into force by Proclamation, hospital services are to be provided for every person who has lived in the Province for six months. An annual tax not exceeding \$5 is to be paid by or on behalf of each person entitled to receive hospital services, but the levy for a family must not exceed \$30. Every Saskatchewan resident who is 21 or over, or, if under 21, is living apart from his parents and supporting himself is to be personally liable for the tax. Parents will be liable for payment on behalf of their dependents. The Health Services Planning Commission is to administer the hospitalization fund and provide for payment of hospital services.

The employer must deduct the tax due under the Act from the salary or wages of any employee whether due on his own account or his dependents', and pay it to the collector as soon as the amount of the tax is earned by the employee. In default, the employer may, on summary conviction, be ordered to pay the unpaid taxes with costs or be imprisoned for not more than 30 days. Fifty cents is to be added to the basic tax for every three months of delinquency.

Amendments to the Mutual Medical and Hospital Benefit Associations Act give medical co-operatives wider powers to provide medical services in the transition period while the Government's health plan is being put into effect. The procedure is set out for the winding up of an association.

Miscellaneous

Under amendments to the Fire Prevention Act the Lieutenant-Governor in Council may make regulations governing the establishment and operation of plant and equipment used in dry cleaning, dyeing, pressing and similar businesses in which gasoline, naphtha, benzine, benzol or other volatile or inflammable liquids are used.

The Housing Act, which enables municipalities to take advantage of the National Housing Act was amended to authorize the Lieutenant-Governor in Council to incorporate housing companies eligible for loans or guarantees or any other grant under Part II of the National Housing Act, 1944, (Canada) or any other Dominion Act in aid of low-rental or other housing projects, and to exempt such companies from any provisions of the Companies Act.

The City, Town, Village and Rural Municipality Acts were revised. Changes in the first two Acts enable municipal councils, by by-law, to prescribe conditions under which gasoline and oil may be sold or services, materials or parts supplied during the time when a by-law requires filling or service stations, machine or implement-shops to be closed.

Under amendments to the Power Commission Superannuation Act, 1944, one of the three members of the Board which administers the Act must be an employee and representative of the employees of the Commission. Where a Power Commission employee has received compensation under the Workmen's Compensation (Accident Fund) Act and has paid to the Power Commission Superannuation Fund four per cent of the salary he would have received had he not been absent, the amount he would have received as salary must be reckoned for the purposes of the Superannuation Act.

No contribution to the Fund may be required from an employee with respect to his absence on active service or subsequent hospitalization or while taking a vocational or educational course under any Government rehabilitation plan.

Deductions of any unpaid balance of contribution and interest must not be made so as to reduce a superannuation or yearly allowance below \$360, the minimum allowance under the Act.

The Board may discontinue the allowance of an employee superannuated because of ill health, who, on recovery, refuses to accept re-employment at a salary not less than two-thirds of the salary received before superannuation.

Employees of any electrical plant or system which has been since November 1, 1945, or will

be, taken over by the Saskatchewan Power Commission may be included in the superannuation plan, provided that service recognized does not exceed 10 years and that an employee's average salary in the service of the former owner be deemed to be \$2,400 for the purposes of the Act.

Amendments to the Co-operative Associations Act enlarge the purposes for which associations may be incorporated, extend the application of by-laws, decrease from six to five per cent the rate of interest paid, and change to some extent the amount of the surplus set aside as an educational or community fund. "Patron" is defined as a non-member who as customer of the association purchases goods or receives or contributes services of the value of \$50 yearly or of such lesser value as may be set forth in the by-laws.

Changes in the Credit Union Act revise the section dealing with loans to member corporations to provide that no director or officer of a member association or credit union who is a member of both the credit committee and the board of directors may vote respecting a loan to his own association. Any decision to make a loan must be unanimously agreed to and subject to the consent of the registrar. Conditions are laid down for the apportionment of the surplus and the investment and use of the reserve fund.

Bills Not Passed

A Government Hours of Work Bill applying to all workers except those in agriculture, domestic service or in a supervisory capacity, was introduced but withdrawn after first reading. It would have limited working hours to eight in a day and 44 in a week except in emergencies or with permission. Overtime at the rate of time and a half would be payable after eight or 44 hours. No reduction in wages was to be made on account of the shorter hours.

The Bill was withdrawn by the Minister of Labour with the explanation that it would be postponed until the next legislative session because it conflicted with the Wages Control Order.

Resolutions

On March 27 a Resolution was adopted requesting the Dominion Government to undertake a nation-wide reconstruction program for the purposes of raising Canadian standards of living, re-establishing discharged service personnel and industrial workers, providing for development of public works projects and assisting in the re-building of war-devastated

countries. The Dominion Government was urged to make available to each Provincial Government a per capita sum of not less than \$20 per year for five years to enable the Provinces to participate effectively in such a program.

Another Resolution carried unanimously on April 2 urged the Dominion Government to

make loans available to provincial, municipal and co-operative corporations for low-rental houses under not less favourable terms than are available to lending institutions under the National Housing Act, 1944. It further recommended that the Dominion Government subsidize the building of low-rental houses for tenants in the low income brackets.

Quebec

The Quebec Legislature, which met on February 13 and was prorogued on April 17, passed an Act to set up a new Department of Social Welfare and Youth and amended legislation respecting labour relations, collective agreements, minimum wages, workmen's compensation and pipe-mechanics.

Collective Bargaining

An amendment in the Labour Relations Act increases the membership of the Labour Relations Board from three to five. A majority of the members will constitute a quorum and decisions will be by majority vote with a casting vote by the chairman. The Board is now authorized to determine, by by-law, the conditions under which a person may be recognized as a member of an association, in order to assure itself that the association is representative of a group of employees or of employers.

No collective agreement may take effect until the association which has entered into it has transmitted two certified copies to the Board. Previously, one copy was required from every association and every employer. A collective agreement entered into under the Professional Syndicates Act takes effect only after a copy has been deposited with the Minister of Labour as required by that Act. In such case, the Minister must send two copies to the Labour Relations Board.

Changes in the Collective Agreement Act add to the provisions in collective agreements which may be made binding under the Act those concerning holidays with pay. Previously, **only provisions** covering wages, hours, apprenticeship and family allowances were capable of being legalized. Another amendment authorizes any joint committee, by resolution, to grant subsidies to any apprenticeship commission incorporated under the Apprenticeship Assistance Act.

Minimum Wages

The Minimum Wage Act, as amended, gives the Minimum Wage Commission authority to determine overtime rates of pay for hourly paid employees who are not covered by col-

lective agreements, and also the holidays with pay to be granted by employers to employees.

Workpeople subject to a collective agreement under the Professional Syndicates Act are no longer excepted from the application of the Minimum Wage Act and ordinances under it. Thus, farm workers, domestic servants, and employees governed by an agreement under the Collective Agreement Act are the only employees not within the scope of the Minimum Wage Act.

The Commission may, on the recommendation of the Minister, approved by the Lieutenant-Governor in Council, use its funds to acquire lands and erect buildings for its administrative services.

To the clause stipulating that an action for wages under the Act or under an ordinance is prescribed by six months from the due date is added the proviso that, in the case of workers in forest operations, the prescription runs from May 1 following the date of the work done. The mailing of a registered letter from the Commission to an employer claiming wages will suspend the prescription of an action, in which case the action will be prescribed for another six months as from the mailing of the letter.

Professional Syndicates

The Professional Syndicates Act, as amended, provides that an association or syndicate becomes incorporated upon publication of a notice in the *Quebec Official Gazette*. The deposit of the notice of authorization in the office of the Superior Court is no longer required. This provision is retrospective.

Another amendment reduces from one year to three months the maximum period during which a syndicate may claim an assessment from a member ceasing to belong to the union.

A revised section permits municipal corporations to exempt from taxes an immovable used as a hall for syndicate meetings by any syndicate formed under the Act.

Plumbers

Amendments in the Pipe-Mechanics Act add to the powers of the Lieutenant-Governor in Council to make regulations, power to

prescribe the rules to be followed by contractors, journeymen and apprentices in carrying out plumbing work in municipalities of over 5,000 people. Any municipality may be exempted which, by by-law, affords sanitary protection at least equivalent to that provided by the regulations. Penalties are provided for contravention of regulations made under the Act.

Workmen's Compensation

The Lieutenant-Governor in Council is empowered to grant a pension not exceeding \$450 per month to the widow of any person who has acted as president of the Quebec Workmen's Compensation Commission at least seven years and who held that office at the time of his death. The pension, to begin the first day of the third month following such decease, is to be borne by the accident fund.

Teachers

In a section of the Act to ensure the Progress of Education which was proclaimed in effect May 18, 1946, it is stipulated that teachers in all rural municipalities must receive a minimum annual salary of \$600, and the Government may contribute up to 75 per cent of such salaries. It is also provided that no dispute between teachers and school boards in rural municipalities as to remuneration or working conditions may be submitted to arbitration or conciliation committees. The Public Services Employees Disputes Act, 1944, provided for conciliation and arbitration in disputes involving public services including school corporations.

Department of Social Welfare and Youth

An Act to constitute a Department of Social Welfare and of Youth, to come into

force on Proclamation, repeals the Department of Social Welfare Act, 1944, which administered laws providing for old age pensions and needy mothers' assistance. These will now be entrusted to the Minister of Social Welfare and of Youth who will administer a series of social laws which were distributed among various departments, and who will generally promote the welfare of youth. Among measures which will come under the Minister's direction when the Department is established are the Trade-Schools Act, the Youth Aid Act, and a 1945 Act to facilitate the Establishing of Youth. The latter enables agreements to be made with the Dominion Government under the Dominion Vocational Training Act, 1942. The Government is authorized to spend \$150,000 out of the consolidated revenue fund to set up the Department and any part of the sums voted for the year 1946-47 for the carrying out of the Acts now transferred to the new Department may be placed at its disposal.

An amendment to the 1945 Act to facilitate the Establishing of Youth authorizes the Provincial Treasurer to pay, out of the consolidated revenue fund, the provincial Government's share in the expenses resulting from the carrying out of the agreements entered into under that Act.

Resolution

A Resolution adopted on March 5 recommended that the provincial Government institute intensive research with respect to materials, architecture, town-planning, building methods and social organizations, to ensure self-contained and cheap dwellings to large urban families, and that the Government establish an urban credit system to facilitate building.

Recent Regulations under Dominion and Provincial Legislation

THE wartime Order in Council limiting statutory holidays observed by banks and the Dominion Public Service to six, and suggesting that other employers and employees observe only those holidays, has been revoked. The application of the Reinstatement in Civil Employment Regulations to members of the Interim Forces was extended to April 30, 1946. The wartime Orders which brought employees of certain corporations working at the synthetic rubber plant at Sarnia, Ontario, under the Dominion Government Employees' Compensation Act have been revoked.

In Alberta, an Order under the Labour Welfare Act providing two weeks' holidays with pay for coal miners has been replaced

by a more detailed Order. Airplane pilots are now covered by the Workmen's Compensation Act. In Manitoba, new regulations deal with examinations for electricians' certificates and the inspection of steam boilers. In Ontario, the Dominion Order in Council which authorizes the appointment of Industrial Disputes Inquiry Commissions to investigate situations likely to interfere with the transition to a peacetime economy has been made applicable to industries ordinarily within provincial jurisdiction. In Saskatchewan, the minimum wage orders which have related to towns of over 1,000 people now apply to workers in towns with a population between 500 and 1,000.

Dominion

Reinstatement of Members of Interim Forces

The Order in Council (P.C. 6769) of November 6, 1945, which amended the Reinstatement Regulations made under the Reinstatement in Civil Employment Act, 1942, to apply the provisions of the Act to members of the Interim Forces until March 31, 1946, provided they had been on active service immediately before volunteering and continued to perform full-time duties until March 31, 1946, or the actual date of their discharge (L.G. 1945, p. 1843), was amended by an Order in Council (P.C. 1298) of April 9, gazetted April 15, to extend the date in both cases to April 30, 1946.

Observance of Statutory Holidays

The Order in Council (P.C. 4671) of June 7, 1943, (L.G. 1943, p. 745) which advised private employers, and made it mandatory for banks and the Dominion Public Service, to observe only six statutory holidays annually for the duration of the war was revoked by an Order in Council (P.C. 1452) of April 12, which was gazetted on April 22, 1946. The six holidays to be observed were New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. Normally, banks, under the Bills of Exchange Act, observe, in addition to the six holidays named, Easter Monday, Victoria Day, Remembrance Day, and any day proclaimed as the King's Birthday. Holidays for persons employed by other private employers are determined by

provincial law, collective agreements or custom.

Workers at Synthetic Rubber Plant Transferred from Dominion to Ontario Workmen's Compensation Act

Two Orders in Council (P.C. 9525 and P.C. 5573) of October 20, 1942, and July 14, 1943, which extended the provisions of the Government Employees' Compensation Act to the employees of certain corporations engaged in construction in connection with, or engaged in the operation of, the synthetic rubber plant at Sarnia, Ontario, have been revoked as of January 1, 1946, by Order in Council (P.C. 1385) of April 11, 1946, gazetted April 22. The construction work has been completed and the workers employed by other companies were brought under the Ontario Workmen's Compensation Act as of January 1, 1946.

The Government Employees' Compensation Act provides that a person employed by the Dominion Government who suffers injury by accident or disease in the course of his employment is to be compensated according to the Workmen's Compensation Act of the province where the accident occurred.

Other Orders

Orders in Council P.C. 1271, establishing an Administration Board, Department of Labour, and P.C. 1768, amending the National Selective Service Civilian Regulations, are summarized elsewhere in this issue.

Provincial

Alberta Labour Welfare Act

Order 1 under this Act, gazetted on April 30, 1945 (L.G., 1945, p. 915), which provided two weeks' holidays with pay for manual workers in the coal mining industry, has been replaced by Order 2 of March 25, gazetted March 30.

The new Order, retrospective to April 30, 1945, makes more detailed provision for the calculation of holidays in order to ensure uniformity throughout the coal fields. The Order stipulates that a mine employee must be given holidays, with pay at the basic daily rate, of one day for 23 days worked in any calendar month (22 in February), the period for calculation being the 12 months ending March 31. A worker is entitled to no more than two weeks for any 12 months, and the holidays must be taken during the 12 months following the year in which they were earned.

A work-day is an eight-hour shift; additional credit will be given for overtime worked. Time lost because of illness up to three days in a calendar month, or up to six days because of disability covered by the Workmen's Compensation Act and all time lost because of mine disability or lack of orders, will be counted as time worked. Other provisions require a discharged employee to be paid in lieu of his holiday an amount calculated to the date of his discharge if he was not dismissed for cause. Other employees who leave their employment are to be paid only the amount due as calculated to the end of their last completed twelve months' employment.

A Royal Commission, appointed by the Dominion Government to investigate demands of coal miners in District 18, United Mine Workers of America (Alberta and British

Columbia) and given the powers of a Regional War Labour Board under the Wartime Wages Control Order, directed in November, 1943, that two weeks' holidays with pay at basic daily rates be granted to all manual workers about mines who, between April 1 and September 30 in any year, had been employed by any one employer for at least 12 consecutive months and who had not been absent from work for more than 90 days (including Sundays, holidays and vacations), during that time except through causes beyond their control (L.G., 1943, p. 1495). Order 1 under the Alberta Labour Welfare Act, 1943, made the same provision with respect to holidays as the Commission had directed but applied it to all employees in the Alberta coal mining industry.

Alberta Coal Mines Regulation Act

The wartime regulations permitting emergency miners' certificates to be granted (L.G., 1943, p. 1032), have been revoked, effective March 15, 1946, by an Order in Council issued on March 18 and gazetted March 30.

Authority for emergency certificates during the war was first granted in 1942 (L.G., 1942, p. 1439), but the regulations applied only to coal mines in certain districts and the certificates were to expire on March 15, 1943. Regulations, now revoked, were again issued in 1943 in response to the Dominion Government's request for provincial co-operation in meeting the national emergency in coal production. They applied to all mines in Alberta, permitted District Inspectors to authorize applicants for certificates to work pending the issue of the certificates and placed no time-limit on such certificates.

Alberta Workmen's Compensation Act

Airplane pilots were brought under this Act by an Order of the Workmen's Compensation Board made on December 18, 1945, gazetted on December 31. A regulation of November 9, 1943, had excluded airplane pilots even when they were employed in an industry which was under the Act.

British Columbia Shops Regulation and Weekly Half-Holiday Act

Motor-vehicle repair shops in the City of Duncan have been exempted, as have such places in other cities, from certain weekly half-holiday provisions of this Act by an Order of March 22, gazetted March 28. Henceforth, these shops will not have to observe the half-holiday fixed by municipal by-law if they are closed from 1 p.m. on

Saturday until Monday morning, and if no employee works after 1.30 p.m. on Saturday except in case of emergency.

Another Order of the same date makes it clear that service stations in Duncan are not exempt from the Weekly Half-Holiday Act.

Manitoba Electricians' Licence Act and Steam Boiler and Pressure Plant Act

Regulations under these Acts governing examinations for certificates and prescribing the fees to be paid were issued recently. Both Orders exempt a returned soldier from paying a fee for his first examination and certificate after discharge from the Armed Forces.

The Regulations for electricians, gazetted on March 30, are in addition to those applying the standards laid down by the Canadian Standards Association to electrical installations and repairs (L.G., 1942, p. 1439). A licence granted to a contractor or a journeyman by the Board of Examiners, after an examination, expires on December 31 of each year but may be renewed without further examination for five years. A contractor may have his licence cancelled if he is found to be employing unlicensed persons as journeymen, and inspectors employed by the Canadian Association of Fire Underwriters or a municipality and holding licences under the Electricians' Licence Act are deemed inspectors for the purposes of the Act.

The Regulations dealing with steam boilers, gazetted on March 23, fix the same fees for inspection of boilers and pressure vessels as were set by an Order of July 30, gazetted August 2, 1941, but in addition, fix fees for engineers' certificates.

Ontario Labour Relations Board Act

The Dominion Order in Council (P.C. 6482) which authorizes the appointment of Industrial Disputes Inquiry Commissions to investigate situations likely to interfere with the orderly transition to a peacetime economy (L.G., 1945, p. 1603), was made applicable to employees ordinarily within the jurisdiction of the Ontario Legislature by regulations under the above Act which were approved on January 23, and gazetted February 9.

The Labour Relations Board Act applies the Dominion Wartime Labour Relations Regulations (P.C. 1003) to industries in Ontario ordinarily within provincial jurisdiction.

Quebec Apprenticeship Assistance Act

A Joint Apprenticeship Commission for ladies' hairdressers and for barbers of Mont-

real was incorporated under the above Act (L.G., 1946, p. 212) by an Order in Council of April 18, which was gazetted on April 27, 1946.

Saskatchewan Minimum Wage Act

New Orders, from 4 to 6 inclusive, gazetted February 28, have been issued by the Minimum Wage Board under this Act to cover all towns of 500 or more population.

They replace Orders 4 to 6 of 1944 which governed employment in towns of 1,000 or more population (L.G., 1944, pp. 1556-58), and come into effect on March 4, 1946. An Order in Council of September 14, 1945, extended the Act to towns of from 500 to 1,000 population (L.G., 1945, p. 1699). As the provisions of the new Orders are the same as those contained in the 1944 Orders they are not repeated here.

Protecting Workers from Coal Dust or Pitch in British Briquette Plants

THE Minister of Labour and National Service in Great Britain, under the authority given by the Factories Act, 1937, for special regulations for the safety and health of workers, has made the Patent Fuel Manufacture (Health and Welfare) Special Regulations, 1946, relating to the manufacture of briquettes or other fuel blocks consisting of coal, coal dust, coke or slurry with pitch as a binding substance. These Regulations replace a substantially similar Order of 1944. They require measures to be taken to prevent or remove dust as far as possible and to remedy its effect on the workers.

Mechanical tipping or unloading of coal or coal dust is prohibited, except where it is so damp that dust is not emitted, unless it is done in an enclosure provided with exhaust ventilation or vents discharging into the open air.

Driers, disintegrators and heaters must be constructed so as to prevent dust escaping into the work-place. Elevators and chutes for conveying dusty material, and any spaces through which such material falls, must be encased throughout their length. At the ends of the enclosure there must be mechanical exhaust ventilation or adequate vents to the open air. Band conveyors must be enclosed at points where dust is likely to be given off. Casings and enclosures must be kept dust-tight and in good condition. Adequate mechanical exhaust ventilation must be provided for pitch-cracking machines and where pitch is broken up on the floor of a workroom. Where this is done in the open air, screens must protect workers from wind and bright sunlight. Dust from mechanical exhaust apparatus must not be permitted to escape into the air of any workroom and excess steam from heaters, coolers and pug-mills must be discharged into the open air.

Accumulations of coal or pitch dust must be removed daily, floors cleaned once weekly

by sweeping or other suitable method, and the employer must appoint a competent person to see that these requirements and those of the Factories Act relating to cleanliness are carried out.

The employer must maintain proper facilities for baths, and for keeping separately, under lock and key, clothing not worn during working hours and work-clothing, and suitable means of drying clothing. In a factory employing less than 20 persons, which has made fuel blocks for five years, if the Chief Inspector is satisfied, having regard to the amount of pitch dust, that provisions for baths are not necessary, he may exempt the factory from these requirements.

The employer must provide for medical supervision of his workpeople. He must arrange for a medical examination of each worker within six months after the latter begins work, or within six months after his last examination under the 1944 Order, and for a re-examination at six-month intervals as long as he is employed, except in the case of a worker who has not been exposed to tar, pitch dust or mineral oil in his previous employment. Workers of the latter class must be examined within 12 months after they begin work in the factory. The employer must provide suitable facilities for such examinations, properly lighted and heated and under conditions of privacy, and employees must submit themselves for examination at the appointed times. A health register of all employees must be kept.

Barrier cream or similar protective substance for the skin and goggles for eye protection must be provided. Adequate accommodation for meals, means of warming food and facilities for buying tea and light refreshments must be maintained.

Strikes and Lockouts

Strikes and Lockouts in Canada During April, 1946

STRIKE activity in Canada during April, 1946, continued at about the same level as in March, but was much greater than in April, 1945. Preliminary figures show 24 strikes in existence during April, 1946, involving 6,907 workers, with a time loss of 47,116 man days, as compared with 28 strikes in March, 1946, with 5,976 workers involved and a time loss of 46,068 days. In April, 1945, there were 15 strikes, involving 4,622 workers, with a time loss of 23,533 days.

Preliminary figures for the first four months of this year show 64 strikes, involving 15,225 workers, with a time loss of 126,183 days. For the same period last year there were 70 strikes, with 19,856 workers involved and a time loss of 70,835 days.

Of the 24 strikes recorded for April, four were settled in favour of the workers, three in favour of the employers, three were com-

promise settlements, and seven were indefinite in result, work being resumed pending final settlement. At the end of the month seven strikes were recorded as unterminated, namely: bakery workers at Halifax, N.S., brewery workers at Montreal, P.Q., compositors at Winnipeg, Man., metal factory workers at Niagara Falls, Ont., woollen factory workers at Carleton Place, Ont., carpet factory workers at Brantford, Guelph and Toronto, Ont., and foundry workers at Guelph, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY-APRIL, 1945-1946†

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man- working Days	Particulars(2)
	Establish- ments	Workers		
Strikes and Lockouts in Progress Prior to April, 1946.				
FISHING AND TRAPPING— Fish net makers, Vancouver and district, B.C.	13	240	4,000	Commenced March 15; for a signed union agreement; terminated April 20; negotiations; in favour of workers.
MANUFACTURING— Vegetable Foods, etc.— Bakery workers, Halifax, N.S.	1	30	700	Commenced February 11; for a union agree- ment; unternminated.
Tobacco and Liquors,— Brewery workers, Montreal, P.Q.	4	700	8,000	Commenced March 28; against Finding and Direction of RWLB(3) cancelling wage in- crease previously approved; unternminated.
Printing and Publishing— Compositors, etc., Winnipeg, Man.	2	108	2,700	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; unternminated.
Metal Products— Electrical apparatus factory workers, Brockville, Ont., and Montreal, P.Q.	2	900	10,500	Commenced February 26; for a new agree- ment providing for union shop, increased wages, reduced hours, etc.; terminated April 13; conciliation, provincial; compro- mise (certain issues still in dispute to be referred to arbitration.)
Metal factory workers, Niagara Falls, Ont.	1	33	850	Commenced February 25; for a union agree- ment providing for union shop, check-off, etc.; unternminated.
CONSTRUCTION— Buildings and Structures— Electricians, Windsor, Ont.	9	120	600	Commenced March 22; against inclusion of clause in agreement that wage increases would be subject to approval of RWLB; terminated April 5; conciliation, provincial, and return of workers pending reference to RWLB; indefinite.

Strikes and Lockouts Commencing During April, 1946

MINING— Coal miners, Florence, N.S.	1	600	2,400	Commenced April 2; protest by shooters and loaders against increased lengths of sections on new longwall when using mechanical loaders; terminated April 5; return of workers pending reference to Adjustment Board; indefinite.
Coal miners, Canmore, Alta.	1	234	2,340	Commenced April 9; refusal of a miner to alternate between job of fireboss and rock miner; terminated April 20; return of workers pending negotiations; indefinite.
Coal miners, Sydney, N.S.	1	300	300	Commenced April 12; <i>re</i> method of conveying timber to wall face following mishap; terminated April 13; return of workers; in favour of workers.
Coal miners, Lethbridge, Alta.	1	245	490	Commenced April 15; for payment for full shift of 8 hours when work completed in less time due to failure of other crews to report for work; terminated April 16; return of workers; in favour of employer.
Coal miners, Stellarton, N.S.	3	1,120	5,800	Commenced April 15; protest against use of blasting powder alleged to be defective; terminated April 22; investigation by Inspector of Mines; in favour of workers.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1946⁽¹⁾—*Concluded*

Industry, Occupation and Locality	Number Involved		Time Loss in Man- working Days	Particulars ⁽²⁾

Coal miners, Glace Bay, N.S.	1	1,300	1,300	Commenced April 16; refusal of a surface worker to report for work on the screens; terminated April 16; return of workers; in favour of employer.
Coal miners, Sydney Mines, N.S.	1	39	78	Commenced April 18; protest against new method of payment for tonnage; terminated April 20; return of workers pending settlement; indefinite.
MANUFACTURING— <i>Vegetable Foods, etc.—</i>				
Bakery workers, Sydney, N.S.	1	56	300	Commenced April 15; protest against lay-off of workers due to reduced production; terminated April 27; return of workers pending reference to arbitration; compromise.
<i>Textiles, Clothing, etc.—</i>				
Woollen factory workers, Carleton Place, Ont.	1	160	3,800	Commenced April 2; for increased wages, union shop, check-off, two weeks' vacation with pay, etc.; untermiated.
Carpet factory workers, weavers, Brantford, Guelph and Toronto, Ont.	3	111	145	Commenced April 29; for reduced hours, increased wages and two weeks' vacation with pay; untermiated.
<i>Miscellaneous Wood Products—</i>				
Sawmill workers, Nanaimo, B.C.	1	69	78	Commenced April 15; protesting dismissal of mill superintendent; terminated April 16; negotiations; in favour of employer.
<i>Metal Products—</i>				
Automotive parts factory workers, Oshawa, Ont.	1	(4)100	200	Commenced April 25; for increased wages, piece rates; terminated April 26; return of workers pending further negotiations; indefinite.
Foundry workers, Guelph, Ont.	1	250	125	Commenced April 30; against dismissal of two workers for infraction of company rules; untermiated.
CONSTRUCTION—				
<i>Buildings and Structures—</i>				
Marble, tile and terrazzo workers, Montreal, P.Q.	17	125	1,800	Commenced April 8; for increased wages; terminated April 25; return of workers pending decision of RWLB; indefinite.
Bricklayers and masons, Windsor, Ont.	12	53	580	Commenced April 16; for increased wages; terminated April 30; return of workers pending decision of RWLB; indefinite.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Telegraph and Telephone—</i>				
Telephone operators, Teeswater, Ont.	1	4	10	Commenced April 22; for increased wages; terminated April 24; negotiations; in favour of workers.
SERVICE—				
<i>Business and Personal—</i>				
Cemetery workers, Kingston, Ont.	1	10	20	Commenced April 1; for increased wages; terminated April 2; negotiations; compromise.

¹ Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

² In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

³ RWLB—Regional War Labour Board.

⁴ 39 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in February, 1946, was 175, and 22 were still in progress from the previous month, making a total of 197 during the month. There were 50,500 workers involved and a time loss of 184,000 working days was caused.

Of the 175 stoppages which began during February, 21 arose out of demands for advances in wages; 57 over other wage questions; six on questions as to working hours; 18 on questions respecting the employment of particular

classes or persons; 66 on other questions respecting working arrangements; and seven were on questions of trade union principle.

British India

Preliminary figures for December, 1945, show 92 work stoppages, involving 120,872 workers, with a time loss of 685,952 man-days. For January, 1946, the figures are 87 work stoppages, involving 135,457 workers, with a time loss of 882,877 man-days.

Eire

Figures for industrial disputes are now available for the year 1945. They show 87 work stoppages beginning in the year with two carried over from 1944, making a total of 89, involving 8,785 workers and causing a time loss of 243,932 man-days. In 1944 there were 84 work stoppages, involving 4,387 workers, and causing a time loss of 38,308 man-days.

United States

Preliminary figures for March, 1946, show 385 strikes and lockouts beginning in the month, in which 130,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 14,000,000 man-days. Corresponding figures for February, 1946, are 260 strikes and lockouts, involving 130,000 workers, with a time loss of 21,500,000 man-days.

Compensation for Pneumoconiosis among Coal Trimmers in Great Britain

Under powers conferred by the Workmen's Compensation Act, 1943 which amends earlier legislation, the British Minister of National Insurance has introduced a scheme, in force from March 1, 1946, for compensation for coal trimmers suffering from pneumoconiosis. "Coal trimming" is defined as "the handling, moving, stowing or packing of coal for transportation in the hold of any ship, barge or lighter, in any dock or harbour, or at any wharf or quay."

Compensation is payable on the production of a certificate that a workman's death, total disablement or suspension from employment is the result of pneumoconiosis, with or without tuberculosis, arising out of his employment if he has been employed by one or

more employers in the industry for not less than five years. If a workman has worked in the industry for at least five years, the onus of proving the disease did not arise from the employment is on the employer.

Certificates are given by the Medical Board constituted under the Medical Arrangements Scheme established in 1931 in connection with compensation for silicosis and asbestosis. The Board carries out medical examinations of all workers exposed in certain specified processes to dust which may cause these diseases. The Board acts through panels of not less than two of its members which are set up at different centres and have charge of the work in particular areas.

Prices

Prices, Retail and Wholesale, in Canada, April 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE cost-of-living index rose 0.7 points to 120.8 between March 1 and April 1, 1946, due mainly to higher prices in the food group. Foods advanced 2.0 points to 135.1 supported by higher quotations for butter, pork products and vegetables. Three other groups were fractionally higher, home furnishings and services advanced 0.3 to 120.7; clothing 0.1 to 122.2 and miscellaneous items 0.1 to 111.0. Fuel and light at 107.2 and rentals at 112.3 remained unchanged. The April level of 120.8 in the general cost-of-living index was 0.3 above the August, 1945 wartime high.

Cost-of-living indexes for eight regional cities increased materially between February and April, 1946. Higher food costs lent principal support to these increases though homefurnishings and services, clothing, fuel and light and miscellaneous items were stronger at a number of centres. Toronto at an index level of 119.3 and Winnipeg at 118.4 were each up 1.3 points for the two-month period while Edmonton at 118.3 rose 1.2. Gains of 1.1 each were registered for Saskatoon at 121.7 and Vancouver at 119.3. Halifax moved 1.0 point to 120.3 followed by Saint John and Montreal, each up 0.9 at 120.6 and 123.1 respectively.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the

movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home-furnishings, etc., with their weight, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply

services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Price Control in Canada*.

Wholesale Prices, March, 1946

The general wholesale commodity price index rose three-tenths of a point to 104.9 between February and March, 1946. Appreciable increases in the textile group followed upward adjustments in a considerable number of ceiling prices. A gain of 3.3 points to 95.5 for this group was due to higher quotations for cotton yarns, cotton fabrics, worsted cloth yarns and sash cord. Vegetable products moved up 0.2 points to 97.4, reflecting strength in potatoes, oranges, onions, strawberry jam and unmanufactured tobacco which outweighed weakness in rye and hay. Another increase of 0.2 points to 116.2 was registered for iron and steel products supported by an advance in hammers and imported steel sheets and plates. Two groups were lower; chemicals and allied products dropped 2.7 points to 95.4 due to lower prices for tartaric acid and ether, while animal

* Indexes prior to 1926 have been recalculated, resulting in revisions from figures previously published. Typographical errors in 1945 averages and in rent indexes for 1941 and 1944 have also been corrected.

† Commodities in the cost-of-living excluding rents and services.

products were 0.1 lower at 108.9 following declines in codfish, whitefish, raw furs and live stock. Eggs and men's shoes were higher in this group.

Canadian farm product prices at an index level of 106.9 in March were 0.1 below the February figure. Lower animal product

prices were responsible for the decline, a drop of 0.2 to 125.4 in this index reflecting weakness in live-stock quotations which outweighed strength in eggs. Field products were unchanged at 95.9, increases in potatoes, onions and unmanufactured tobacco balancing lower prices for rye and hay.

TABLE II—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF APRIL, 1946

(Base:—August, 1939=100)

	Total	Food	Rent	Fuel	Clothing	Home Furnishings and Services	Miscellaneous

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

Activities of Wartime Prices and Trade Board During 1945

Annual Report of Board Outlines Policies for Reconversion Period

THE fourth report of the Wartime Prices and Trade Board,* published at the beginning of May, describes the problems of the civilian economy in the transition from war to peace. The Report covers the calendar year 1945, and includes important developments up to March 1, 1946. It provides a wealth of information on many of the questions people are asking, such as: Why do we still need price control? Why is meat still rationed? Why are there still shortages of certain kinds of clothing? Why can't all prices be maintained as rigidly as during the War? On what basis have certain price ceilings been suspended?

The causes of the continued shortages and of the pressures toward higher prices are summarized in the first three chapters of the report. "The defeat of the axis powers", it is pointed out, "brought into sharp relief the world-wide shortage of basic necessities such as food, clothing, fuel and building materials. To the requirements of such countries as the United Kingdom, where consumption has been forced down to a minimum wartime standard, and to the demands of North Americans looking forward to a removal of wartime restrictions, were suddenly added the urgent requirements of liberated countries and the Far East . . . the food crisis has steadily become more serious, resulting in malnutrition and disease and threatening mass starvation in parts of Europe and in China and India. Acute shortages of clothing, building supplies and other necessities have continued to prevail, and the demand for fuel and industrial materials, even a number of metals, have remained much in excess of the current supplies."

These world-wide shortages have been reflected in Canada: "To play her part in helping to meet the urgent demands of Britain and liberated countries, and to maintain her exports to traditional markets, Canada has found it necessary to continue limiting her domestic consumption of a number of important commodities, such as foodstuffs and wood and paper products, and in the case of meat, this involved the reimposition of consumer rationing. And, like other countries, Canada has been unable

to obtain an adequate volume of imports of such products as textiles, sugar and oils and fats."

In other spheres, of course, the reduction of war output opened the way for a great increase in civilian production and a renewed production of such things as passenger cars and radios which had been off the market for some time. Here too, however, shortages cannot be eliminated overnight. "While civilian production has increased steadily, the available supplies of goods and services have not caught up with the high level of demand. It takes time to reconvert war industries and to enlarge the capacity of civilian industries, and the process has been impeded and delayed by shortages of particular materials and parts, and of particular kinds of labour, and by industrial disputes . . . Canada's progress in reconversion has been seriously affected by the shortages and strikes in the United States because of this country's heavy dependence upon United States materials and parts."

While supplies of goods are therefore still limited, incomes and demand remain high. "Civilian employment has recovered rapidly, stimulated by the large accumulated demands of consumers and business, and by the very heavy export requirements. The impact of the changeover to peacetime activities has been cushioned by demobilization payments, by unemployment assistance and other social security payments, and by the expenditure of wartime savings. Income payments . . . have remained at an extraordinarily high level. The rate of private spending has continued to increase, and at an accelerated pace, as the rate of saving has decreased and as in some cases accumulated wartime savings have been drawn upon. . . . Thus, a continuing gap between supply and demand has sustained the pressures toward inflation. And to add further to these pressures, higher costs have been pushing against controlled prices, because of the loss of profitable volume which frequently resulted from the cancellation of war contracts, because of the continued shortage of labour in some civilian industries and because of the greater readiness of particular groups to demand higher returns." The fact that wartime price increases have been higher in other countries than in Canada has added to the pressure on Canadian prices

* Report of the Wartime Prices and Trade Board, Ottawa, King's Printer, 1946.

through higher import costs and a growing differential between export prices and domestic prices.

In view of the persistence of these pressures, war-imposed controls had to be continued in the transition period if Canada's outstanding record in preventing inflation during the war was not to be brought to naught by a post-war inflation. Canada's wartime achievement in keeping prices down is strikingly illustrated by a series of charts and tables in the Report. They show that during the six years of this war the Canadian cost-of-living index rose by less than 20 per cent, whereas during the last war, which was much shorter, it rose by 55 per cent, and in the six years 1914-1920 the index rose by 92 per cent. A chart on page 8 of the Report compares the Canadian record with that of the United States and the United Kingdom, and shows that in these two countries the wartime increase in the cost-of-living index amounted to well over 30 per cent, while it was less than 20 per cent in Canada.

Price Control in Reconversion Period

If a reasonable degree of stability is to be maintained until normal conditions of supply and demand are re-established, controls such as price control and rationing must be continued, and if they are to achieve their purpose they require the sort of intelligent public support that they were accorded during the war. The Report of the Prices Board points out, however, that the control mechanism is not operating in exactly the same way as it did under war conditions. It is being adapted to the needs of the reconversion period, and steps are being taken toward the ultimate removal of all wartime controls.

The general government policy, upon which the Prices Board's actions in the reconversion period are based, was outlined in a statement by the Prime Minister which is published as an appendix to the Board's report (L.G. Feb., 1946, p. 140). The statement emphasizes that the "steps in the direction of 'decontrol' represent no weakening in the Government's intention of preventing inflation" but are "simply an adaptation of the program to changing conditions." It is emphasized that "the one satisfactory answer to the danger of inflation is more and more production," and that "nothing would restrict a lasting increase in production more than a sharp rise in prices, which would cut demand down to the present restricted level of supply." It is recognized however, that it is no longer feasible to "attempt rigid maintenance of the price level" and that "by the time full 'decontrol' is

achieved, the level of Canadian prices may be moderately higher than is the case to-day." There is a great deal of difference, the statement points out, "between a gradual and planned policy of adjustment to post-war conditions, which may involve some modest increase in prices, and a policy of rapid removal of anti-inflation controls."

The second chapter of the report describes the changes in the administration of price control that were made necessary by the reconversion from war to peace. The war effort had absorbed so much of Canada's manpower and productive resources that it had not only ensured full employment but had actually required a curtailment of non-essential civilian activity. During the war, therefore, the government's prime concern was to encourage the largest possible war effort, and price control, which concerned chiefly the civilian sector of the economy, could be quite rigidly applied. A distinction between essential and non-essential goods was made in considering applications for price adjustment, and adjustments were made only in exceptional cases where an applicant could show financial need on the basis of his overall profit position. With the end of the war, however, the government ceased to underwrite production, and the maintenance of employment depended on the prompt expansion of production for civilian markets, which in turn depended greatly on the existence of adequate incentives. There was no longer any distinction between "essential" and "non-essential" production in matters of price control. Moreover, in certain cases too rigid an adherence to "basic period" standards would have obstructed production and employment, and the Board had to take into account *prospective* as well as *current* earnings in fixing maximum prices. While financial need on the basis of a firm's overall operations remained the prime determining factor in considering applications for price adjustments, the Board had to be prepared to "consider limited price adjustments to meet losses which can be shown to exist in the production of significant lines of goods, even when overall financial need cannot be established."

The production of new lines of civilian goods, many of which had been off the market for some time, and the loss of profitable war contracts meant that the number of applications for price fixations and price adjustments increased greatly in 1945. In many cases, however, the government's action in removing special war taxes, such as the excise taxes on automobiles and electrical appliances, gave manufacturers sufficient leeway to absorb increased costs without the necessity of changing established price ceilings.

COMPONENTS OF THE COST OF LIVING INDEX

COMPONENTS OF THE COST OF LIVING INDEX

Even before the end of the war the Prices Board had taken steps in the direction of decontrol. With victory enormous resources could be devoted to civilian production, and it was possible, for the first time, to make genuine progress in overcoming the shortages of civilian goods and equipment that had necessitated the maintenance of anti-inflation controls. A number of important decontrol measures could therefore be planned. The use of subsidies was gradually reduced, in view of the ultimate aim of returning to a free price structure. The end of the war eliminated the need for some import subsidies as shipping conditions improved, war risk insurance was eliminated, and more economical sources of supply became available. Other import and domestic subsidies, however, had been necessitated by cost increases which were likely to persist indefinitely, and which therefore had to be recognized sooner or later in the price structure. A program of gradual subsidy reduction and removal was therefore begun and a considerable number of the less important subsidies were removed in 1945 involving price increases in some cases. Early in 1946 the scope of import subsidies was narrowed down to a limited number of prime essentials, and in the textiles field most of the subsidies on imported wool were removed and the major subsidies on imported cottons were reduced.

A beginning was also made, early in 1946, with the suspension of price ceilings on a number of goods. The articles involved were mostly non-staple commodities, and included cosmetics, jewellery, books, games, novelties, millinery, drugs, tobacco products, and other items as well as a number of services. The list of goods had been carefully selected and supply conditions with regard to most of them were such that no serious price increases were expected. Most of the articles were of minor importance in the family budget, and in a number of cases it was doubtful if the trouble and expense of effective administration were commensurate with the benefits derived.

The report emphasizes that price ceilings were *suspended* and not eliminated, and could be re-imposed if unreasonable increases occurred. A survey made just before the suspension and repeated periodically thereafter shows that there have been few price increases, except in the case of silverware.

Removal of Restrictions on Production

Chapter three discusses the main factors influencing the supply of consumer goods during the year and the changes in the Board's controls over supply and distribution. Most of the Prices Board's controls restricting or

prohibiting particular kinds of civilian production were removed before the end of the war. Their removal began in the latter half of 1944, and shortly after VE-Day very few of them remained. Where production of essential goods was inadequate (e.g., textiles) the Board relied upon positive measures designed to increase the type of production needed, rather than upon negative restrictions.

The "policy of equitable distribution" was also modified to meet the needs of the reconversion period. Under this policy suppliers of scarce goods had been required to distribute their supplies among their established customers in proportion to 1941 sales to each one. In order to facilitate the establishment of new businesses and the distribution of goods that had been off the market for some time, this control was removed or relaxed in respect to a wide range of goods. Suppliers of most goods in short supply were permitted to distribute 20 per cent of their supplies as they wished, while 80 per cent remained under "equitable distribution". In the case of certain articles such as electrical appliances, autos, radios, all restrictions were withdrawn. In contrast to these developments the distribution of certain foods such as meat, sugar and butter remained under tight control.

These administrative changes reflect changes in the basic supply conditions that are summarized in this chapter. The effects of the curtailment of war production, of world shortages, and of reconversion difficulties at home and abroad are discussed. The chapter also contains a section on the Board's assistance to demobilized servicemen who are re-entering business. It is pointed out that "Regional and Local Offices of the Board are instructed that demobilized service personnel are to be given special attention in their dealings with the Board. . . . A special officer at the Board's headquarters is assigned to deal with particular problems affecting veterans and to co-ordinate the Board's activities in dealing with the problems of the veteran."

Commodities

Chapters 4 to 12 of the report deal with price and supply problems in the main commodity fields. The chapters of greatest interest to the consumer are probably those dealing with Foods, Textiles and Rentals.

Food.—The food chapter describes in some detail how the world food shortage has affected the Canadian situation. The reimposition of meat rationing in September "was the direct result of the urgent requirements of the United Kingdom and liberated Europe". A declining trend in hog output was gathering momentum and pointed to a decrease in total meat pro-

duction. An agreement made in April, 1945, added to Canada's already heavy export commitments for the United Kingdom and UNRRA. Various measures, short of rationing, designed to improve domestic supply and distribution while maintaining exports, proved inadequate and it became apparent that black marketing would spread and overseas shipments could not be maintained unless rationing and control of slaughterings were undertaken.

The urgent need to maintain heavy shipments of wheat overseas led to the adoption, early in 1946, of a program to reduce the use of wheat for flour milling by 10 per cent, and for distilling by 30 per cent.

The world shortage also affected supplies of foods imported by Canada. A reduced sugar allocation resulted in cuts, both in the consumer sugar ration and in the quotas of industrial users and restaurants. Decreased imports of fats and oils, together with declining domestic lard production, reduced the output of shortening and made it necessary to control the use of oils and fats in soap production.

Textiles.—Textile supplies were lower in 1945 than in the previous year, reflecting reduced imports and labour shortages at home. At the same time, consumer demand continued to expand and was augmented by the needs of demobilized service personnel. To forestall acute shortages of essential garments, the Prices Board extended its system of "production directives" to cover all essential garments. Production quotas were established for each garment and allocated among manufacturers. The production and distribution of fabrics was controlled to meet the requirements of the garment programs. Special emphasis was placed on the maintenance of output in the lower-priced lines.

While a variety of difficulties were encountered in operating this program, it did result in increased production and largely averted the widespread shortages of needed garments that had threatened. Many of the directives were continued into 1946.

At the end of the textiles chapter there is a discussion of the recently announced reduction in the subsidy on imported cotton and the elimination of wool subsidies in a number of cases. These changes involved compensating price adjustments for clothing and other textile products. Such increases were, however, small at the consumer level, and the Board took care to prevent unreasonable advances by tightening its control over wholesalers' and retailers' markups.

Rent.—The rent control problems arising from the severe overcrowding in Canadian towns and cities are discussed in chapter 12. The report emphasizes that effective rent control is impossible without "eviction control"—that is, the protection of tenants against arbitrary eviction. Eviction control was tightened greatly in July by an order which "postponed for an indefinite period the powers of a landlord to exercise his rights with respect to the eviction of a well-behaved tenant of any self-contained dwelling in those cases where a landlord might formerly have obtained possession after a six months' period of notice." This drastic step was taken by the government because of the serious social problem presented by the growing number of eviction notices, many of which were served upon families of servicemen.

This chapter clarifies the point that when a landlord exercises his right of changing a "term certain" lease into a monthly tenancy, the tenant is still protected against eviction in the same way as before. It is emphasized that "the government has no intention of abandoning the restrictions against eviction so long as the present acute shortage of housing continues".

Other chapters in the report deal with farm equipment, fuels, pulp and paper, metal goods, lumber, construction products, consumer credit, Board organization, enforcement and price movements. The appendices contain a great deal of interesting information relating to the Board, including a detailed statement of subsidy payments and price index numbers.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at March 31, 1946

IN the accompanying tables, which have been prepared by the Department of National Health and Welfare, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating. Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

The administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935. By a second Order in Council, P.C. 5942, dated September 7, 1945, the administration was transferred from the Department of Finance to the Department of National Health and Welfare from September 1, 1945.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

* Amended by Orders in Council P.C. 6367, August 10, 1943, P.C. 3376 and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

* Percentages based on the estimated population as at June 1, 1945—Dominion Bureau of Statistics.

Fatal Industrial Accidents in Canada During the First Quarter of 1946

THERE were 329 fatal industrial accidents in the first quarter of 1946 according to the latest reports received by the Department of Labour. In the previous three months there were 335 including 16 in a supplementary list. The accidents recorded are those occurring to persons gainfully employed during the course of, or arising out of their employment as well as fatalities from industrial diseases reported chiefly by provincial Workmen's Compensation Boards.

These total are compiled from reports received from provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, and LABOUR GAZETTE correspondents. Newspaper reports are also used to supplement these data.

The manufacturing group recorded the largest number of fatalities, 88. Of these 21 were in iron, steel and products; 18 in pulp, paper and paper products; 10 in saw and planing-mill products, while the remainder was distributed among the other manufacturing sub-groups. In the previous quarter 65 industrial deaths were recorded in manufacturing.

Industrial fatalities in transportation and public utilities decreased to 57 from the 61 recorded in the previous quarter. There were 38 in steam railways and 11 in local and highway transportation. The most marked decline as compared with the previous quarter was recorded in water transportation where fatalities decreased from 17 to 4.

Of the 49 deaths in the mining group 29 were in metalliferous mining, 13 in coal mining and 7 in non-metallic mineral mining and quarrying. In the previous quarter 39 fatalities were recorded in mining 24 being in metalliferous mining.

There were 46 logging fatalities, the same as in the previous quarter. Decreases were noted however in agriculture, from 30 to 22, in service from 21 to 19, and in trade from 22 to 18.

The construction group recorded 13 fatalities, of which 10 were in building and structures and 3 in highway and bridge construction. In the previous quarter 34 deaths occurred in the construction group, 25 of them in construction of buildings and structures.

The largest number of industrial deaths in the first quarter of 1946 resulted from industrial diseases, infections, etc. (see Table I). This number was 86. Moving trains and other vehicles accounted for 77 fatalities.

Ontario (see Table II) registered the highest number of industrial fatalities with 156. There were 48 in manufacturing and 23 in transportation. British Columbia had 55 indus-

trial deaths including 15 in manufacturing and 13 in logging. Quebec registered the next highest number with 42. Of these, 13 occurred in manufacturing and 11 in transportation. Of the 17 industrial deaths in Nova Scotia seven were in mining.

Of the total of 329 deaths, 130 occurred in January, 111 in February, and 88 in March.

Workmen's Compensation in Nova Scotia, Manitoba and New Brunswick

THE Annual Reports for the year 1945 of the Workmen's Compensation Boards of Nova Scotia, Manitoba and New Brunswick,

were issued recently. A brief summary of each of these Reports appears below.

Nova Scotia

The annual report of the Workmen's Compensation Board of Nova Scotia for the calendar year 1945 opens with a general review of the operations under the Act since it became operative on January 1, 1917. Since that date, 296,243 claims have been made to the Board, including those for 2,113 workmen who were killed. The total cost of compensation up to December 31, 1945 was \$44,429,715.44. During the period 1,272 widows were awarded pensions for life or until re-marriage; 2,698 children under 16 years of age were awarded monthly pensions while under that age, and life pensions were awarded to 10,195 workmen who were wholly, or partly, permanently disabled.

During the 29 years that this legislation has been in force in Nova Scotia the rates of compensation and related benefits have been increased from time to time. The maximum earnings on which compensation is now paid is \$2,000, as compared with \$1,200 in 1917 and the rate of compensation has

been increased from 55 per cent to 66½ per cent of average earnings. Free medical aid is now provided for injured workmen, burial allowances have been increased from \$75 to \$100, widow's pensions have been raised from \$20 a month to \$40 a month with a small increase in the cash settlement on re-marriage. Pensions for children under 16 are now double those allowed in 1917.

The Pension Liability Fund was \$11,311,704.39 at the end of 1945, "but the revaluation, using new actuarial tables, and adjustment to a three per cent interest basis—instead of 3½ per cent as formerly—will make a larger increase necessary in 1946 to fully cover all the following pensions: 2,490 workmen disabled for life (wholly or partially); 805 widows; 588 children under 16; 44 dependent mothers; 13 dependent fathers; 11 other dependents."

The total number of accidents for each of the past five years (1941-1945) was as follows: 1941, 16,819; 1942, 19,714; 1943, 18,666; 1944, 19,027; 1945, 18,396.

Industrial accidents during 1945 were classified as follows:—

Fatal accidents, dependency established and compensation commenced	41
Fatal accidents, burial expenses paid, no dependents	7
Fatal accidents reported, pending adjustment	3
Fatal accidents, claim non-compensable or disallowed	2
Accidents causing permanent partial disability	115
Accidents causing total disability for seven days or over	9,437
Accidents where medical aid only has been paid	6,457
Accidents pending adjustment, no payments	1,231
Accidents not compensable (other than fatal)	1,103
Total	18,396

The total of all payrolls on which assessments were levied in 1945 amounted to \$114,168,542. Administration expenses to compensation cost of accidents was 6.8 per cent.

The seven classes of industries from which assessments were derived, together with the

amount contributed by each in 1945 were as follows:—

Mining	\$1,511,972 10
Lumbering and woodworking	389,564 70
Iron and steel	343,554 74
Manufacturing and operating not otherwise specified	203,126 84
Building and construction	265,129 11
Public utilities	147,873 53
Transportation	588,148 04
Total	\$3,449,369 06

Penalties and interest increased the total income to \$3,653,884.54; less estimated adjustments of \$832,907.32, made a net total income for the year 1945 of \$2,820,977.22.

The total expenditure, actual and estimated for 1945, amounted to \$3,480,511.44 under the following headings: compensation paid, other than pensions, \$671,649.10; transferred to reserves for pension awards \$296,948.71; paid for medical aid \$118,799.48; administration expense, \$135,637.63; safety association, \$10,517.07; compensation, estimated outstanding, \$2,185,634.45; estimated to complete medical aid claims, \$61,325.

Manitoba

A total of 16,196 accidents were reported during 1945 to the Manitoba Workmen's Compensation Board, according to its report covering the operations of the Board during the last calendar year. Accidents in 1944 numbered 16,229. Fatal accidents, however, increased from 31 in 1944 to 40 in 1945. Details of the accidents as reported by the various groups for the last two years are as follows:—

Group	1944	1945
Steam railways	2,410	2,056
Province of Manitoba	208	244
City of Winnipeg	383	415
General body of employers	11,539	12,100
Winnipeg Electric Co.	237	287
Dominion Government	1,452	1,094
Total	16,229	16,196

The report also shows that on December 31, 1945, the Board had on its books as in receipt of pension 564 dependents of workmen killed

in industry during the period March 1, 1917, to December 31, 1945.

The total actual payroll for all classes for 1944 was \$117,885,140.93. The largest group was that of the general body of employers with a total of \$72,761,768, while the Canadian Pacific and the Canadian National railways had payrolls of \$13,464,848.08 and \$13,044,823.79 respectively. During 1945 the actual cash disbursed by the Board (less investments) amounted to \$1,258,661.46, as compared with \$1,304,374.09 disbursed during 1944.

The report also contains a detailed analysis of compensable accident claims for 1944. The accident claims were classified by causes as follows: prime movers, 160; working machines, 488; hoisting apparatus, 110; dangerous substances, 318; stepping on or striking against objects, 888; falling objects, 770; handling objects, 1,456; tools, 388; runaways and animals, 97; moving trains and vehicles, 191; falls of persons, 1,133; all other causes, 449.

New Brunswick

The twenty-seventh annual report of the New Brunswick Workmen's Compensation Board contains a fully audited balance sheet covering the financial transactions of the Board, together with statistics of accidents and compensation paid for the year ending December 31, 1945. The total income for the

year was estimated at \$1,476,292.15 and the expenditure at \$1,366,016.65, leaving an excess of income over expenditure for the year of \$110,275.50. Adding this to the cumulative credit balance of \$2,165,354.28 carried forward from the year 1944, the estimated surplus stood at \$2,275,629.78.

Accident Statistics.—Complete accident statistics for the year 1944 appear in this report. The cost of compensation amounted to \$1,378,918.34, when a total of 11,366 compensable accidents were reported to the Board. Of these 25 were fatal; 206 were permanent partial disability; 7,201 were temporary total disability and 3,933 required medical aid only. Non-compensable accidents reported to the Board numbered 938.

The following classifications enumerate the causes of accidents reported to the Board: Prime movers, 198; working machines, 734; hoisting apparatus, 328; dangerous substances, 381; stepping on or striking against objects, 1,366; falling objects, 1,941; handling objects, 1,731; tools, 1,389; runaways and animals, 90; moving trains, vehicles, etc., 268; fall of persons, 1,918; all other causes, 1,786.

Workmen's Compensation Bill in Great Britain

COMPENSATION for industrial accidents and industrial diseases will be paid under a radically different system when the National Insurance (Industrial Injuries) Bill, 1946, becomes effective. Although it is part of the National Insurance scheme (L.G., March, 1946, p. 287), industrial injuries insurance is being provided for in a separate Act. The Minister of National Insurance is to name the date on which the latter statute will go into effect. The Bill received third reading in the House of Commons on February 22.

Instead of the present system of workmen's compensation administered by the Courts in which injured workmen or their dependents bring actions for compensation, the Bill provides for a State system of insurance to be administered by the Minister of National Insurance. To advise the Minister on any questions he may refer to it and concerning any proposed regulations under the Act, there is to be an advisory Council which will include an equal number of employers' and workers' representatives.

The Bill applies to all persons employed under a contract of service or apprenticeship including seamen hired in the United Kingdom, except casual workers not employed for the purposes of the employer's business and a few other classes.

Claims will be decided by Insurance Officers first; their decisions may be appealed to local tribunals consisting of one or more representatives each of employers and workers and a chairman appointed by the Minister. A final appeal may be made to the Industrial Injuries Commissioner appointed, not by the Minister, but by the King. Questions of special legal difficulty, may be dealt with by a tribunal of three, the Commissioner and two Deputy Commissioners or three of the latter. Questions of fact which present special problems may be decided with the assistance of assessors having special knowledge of industry.

The extent of disablement is to be determined by boards of at least two medical practitioners. Medical tribunals of three members may hear appeals.

The Industrial Injuries Fund, which will bear the cost of benefits and of administration, is to be built up by equal contributions from employers and workers and a contribution from the Exchequer equal to one-fifth of the other contributions. The Bill, as passed by the House, provides that the weekly payments by workers and by employers with respect to each worker of the particular class, are to be 4d for men over 18, 3d for women over 18, 2½d for boys and 2d for girls under 18.

Benefits are related to the degree of disability and not to loss of earning power, but if a workman is made permanently incapable of work, or incapable of earning more than £52 a year, 20s a week sickness benefit is to be added to his disablement pension. For 100 per cent disablement, the Bill as amended by the House of Commons requires that 45s a week, plus 20s weekly if he is unemployable, is to be paid to an adult worker. The pension decreases 4s 6d for every drop of 10 points in the degree of disablement until for 20 per cent disablement 9s is to be paid weekly. For disability of less than 20 per cent, a gratuity is payable in instalments, the amount to be determined by the degree and the period of disability. If the workman is employable but incapable of resuming his former occupation or taking up suitable employment of an equivalent standard, he is to be paid weekly an additional 11s 3d. Such a workman, however, may not be paid more than 45s in all unless he is in need of an attendant or has a dependent. For an adult dependent, 16s a week additional is payable to an injured worker and for one or the eldest child, 7s 6d. (For each additional child under 16 the family allowance of 5s weekly is payable under the Family Allowance Act.)

In a fatal accident, the widow will be entitled to 30s a week if she has a child under 16, or if she is over 50 years of age or if she is incapable of self-support at her husband's death. In other cases a widow's pension will be 20s.

Proposed amendments to Unemployment Insurance Act

Bill L 5, "An Act to amend the Unemployment Insurance Act, 1940", was introduced in the Senate of Canada on May 16 by Senator W. M. Robertson.

It was given second reading on May 27 and referred to the Standing Committee on Immigration and Labour.

Many of the clauses in the amending Bill are matters of clarification, re-arrangement, and changes in sections dealing with legal proceedings and coverage, which administrative experience has shown to be desirable.

The more substantive clauses include a widening of the interpretation of "dependent"; an increase of subsidiary earnings permitted from \$1 to \$1.50 per day; the calculation of the daily rate of benefit to the nearest five cents; requiring the Advisory Committee to report in respect of the same period as the Commission; making the Employment Service more directly responsible to the Minister; requiring employers to notify the engaging of employees and persons seeking employment to notify the Employment Service; and the transfer of sections of the Veterans Rehabilitation Act dealing with unemployment insurance to this Act.

The report of the Unemployment Insurance Advisory Committee, which embodies many of the proposed amendments to the Act, is published as a supplement to this issue of the LABOUR GAZETTE. The amending Bill, as finally approved by the Senate and the House of Commons, will be reviewed in a subsequent issue.

Employment and industrial statistics

The latest available statistics reflecting industrial conditions in Canada are shown in the accompanying table.

The index of industrial employment, published by the Dominion Bureau of Statistics, was 168.5 at April 1, 1946, an increase of 1.5 points over the index in the previous month. The figure at the beginning of April is the highest so far recorded this year and is considerably above the pre-war level, exceeding the index at April 1, 1939, by 60.6 per cent. The index of the physical volume of business rose to 192.8 from 191.4 in March. The Bureau's cost-of-living index also showed an increase to 122.0 at May 1.

Employment and Earnings.—The advance of the index of employment at April 1 was unusual for the season in the experience of the years since 1920. Data were tabulated from 15,789 employers who reported a combined working force of 1,720,726 persons at the date under review as compared with 1,705,529 at March 1. Weekly payrolls reported at April 1 by eight leading industries amounted to \$55,931,903, an increase of 1.1 per cent over the previous month. Average weekly earnings at April 1, 1946, were \$32.50 as compared with \$32.44 at March 1. Per capita weekly earnings at April 1 in certain previous years were \$32 in 1945; \$32.37 in 1944; and \$31.14 in 1943.

A comparison of the trends in employment and payrolls for which data are available, indicates that since June 1, 1941, the staffs of eight leading industries have increased by

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

† Week ended May 30, 1946.

‡ Base 1926=100.

§ Daily averages.

* Base June, 1941=100.

† Base 1935-1939=100.

‡ Adjusted, where necessary, for seasonal variation.

§ Notes in the hands of the public at the end of the month.

¶ Figures for four weeks ended May 25, 1946, and corresponding previous periods.

10.3 per cent while the aggregate weekly earnings of these workers are higher by 38.9 per cent. The greater increase in total salaries and wages than in employment is due mainly to the concentration of workers still indicated in the heavy manufacturing industries. The pay is above average in this group and there has been a considerable amount of overtime work. Other factors are: (1) the payment to the workers of cost-of-living bonuses, increased several times before being incorporated into the basic wage rates; (2) the upgrading of employees as they gained experience in their work and (3) the payment of increased rates in many cases.

Employment in manufacturing was favourable at the beginning of April when additions to the reported staffs were greater than the normal shown in this period since 1920. Iron and steel registered an important recovery at April 1, the increase of employed persons in this group being the largest reported in any month since March of 1943. The gain was due in part to the resumption of operations following the termination of various industrial disputes. As compared with March 1, 1946, there were declines in employment in the paper products group, electrical apparatus, and a seasonal drop in tobacco; improvements were indicated in the other manufacturing industries. The non-manufacturing industries on the whole reported increases in their working forces with curtailment of employment indicated only in logging and coal mining.

Prices.—The general index of wholesale prices (base 1926=100) increased from 105.6 in March to 108.2 in April, 1946. This compares with 103.3 in April, 1945. Of the eight component groups, two were unchanged from the previous month; advances were indicated in the others with the largest increase, 9.9 points, being registered in the iron products group.

The cost-of-living index (base 1935-1939=100) advanced from 120.8 for April 1 to 122.0 at May 1, 1946. The increase since August, 1939, was 21.0 per cent. Five of the six component budget groups contributed to the increase. The food index rose from 135.1 to 137.7, reflecting higher prices for butter, fresh pork, lard, fruits and vegetables. Clothing moved from 123.2 to 123.7 and home-furnishings and services to 122.1 from 120.7. Rents advanced from 112.3 to 112.6, while rate increases for newspapers and periodicals caused the miscellaneous items group to advance from 111.0 to 111.5.

Index of the Physical Volume of Business.—An increase of 1.4 points was recorded by the index of the physical volume of business

to 192.8 in April, 1946. While the index number of distribution reached a higher level than in the previous month, due to increased imports, the remaining components of the general index experienced slight recessions.

For the first quarter of 1946, the average of the physical volume of business was 189.7 against 223.6 in the first three months of 1945. The index of employment in manufacturing receded more than 15 per cent to 181.7 in the same comparison. In the mining industry, the index of employment was about 1 per cent greater than in the first quarter of 1945. Gold receipts at the Mint rose 8.7 per cent, reflecting a considerable recovery in gold mining operations. An increase of 8 per cent was registered in coal production. Despite the elimination of war demand, the production of steel ingots and castings was only 8.7 per cent less than in the first three months in the previous year. The index of employment in industries producing durable goods, including munitions and producers' equipment, showed a decline of 25 per cent.

The value of imports showed an increase of 18.8 per cent but exports declined 7 per cent. The movement of freight was not greatly changed in the first quarter of the present year. An important advance was recorded in the volume of newsprint production; the index was 26 per cent greater than in the same period of 1945. In the same comparison, hog slaughterings declined 33.8 per cent, cattle slaughterings 5.1 per cent, creamery butter production 18.0 per cent, and factory cheese production 33.4 per cent.

In reply to an inquiry in the House of Commons as to the procedure followed in Dominion Employment offices with respect to the employment of persons to replace strikers, Hon. Humphrey Mitchell, Minister of Labour, said on June 4:—

“Officially I know of no instance in which our employment offices are being used for the recruiting of men to take the place of members of the Canadian Seamen’s Union who are on strike through a dispute with the lake boat operators. If an operator filed a request with one of our employment offices for men to work on lake boats, the office would canvass those looking for jobs, and if they were interested in taking the job they would be cautioned that there is a strike and that they were taking these jobs to replace men on strike. Printed instructions have been given to managers of all our offices to explain this point to the men referred to jobs under these circumstances.”

**Canadian
delegation to
ILO conference
at Seattle**

The Canadian delegation to the International Labour Conference in Seattle (L.G., March, 1946, p. 267) to set up minimum international standards governing the working conditions of seamen was as follows:—

For the Government:

Arthur MacNamara, LL.D., Deputy Minister of Labour, senior Government delegate, and Captain G. L. C. Johnston, Director of Merchant Seamen, Department of Transport, second Government delegate. Technical advisers to the Government delegates were V. C. Phelan, Director of Information, Department of Labour, Captain J. W. Kerr and J. Fortier from the Department of Transport and Dr. C. P. Brown from the Department of National Health and Welfare.

For the Employers:

The shipowners delegate was A. L. W. MacCallum of Montreal, Manager of the Shipping Federation of Canada, Inc. Technical advisers were Captain J. S. Thomson of Montreal and H. L. Hurford of British Columbia.

For the Employees:

The Canadian Seamen's delegate was J. A. Sullivan, President of the Canadian Seamen's Union. Technical advisers were J. M. Smith, Business Agent, Canadian Seamen's Union; Captain J. S. Dennis, President, Canadian Merchant Service Guild; and Alec Moffat, National Association of Marine Engineers of Canada.

In announcing the delegation for the Maritime Conference, which opened on June 6, the Minister of Labour said: "While Canada has taken an active part in the International Labour Organization since it was established immediately following the first Great War, we have a special interest in this Maritime Conference. As heavy exporters we are much concerned with world navigation as underlying world trade. Moreover, during the recent war Canada developed her Merchant Navy to a point where to-day we are somewhat of a factor in world shipping—a situation we did not occupy when the war began."

**Immigration
regulations
amended**

A change in the regulations governing Canadian immigration was announced late in May by Honourable James Glen, Minister of Mines and Resources. "It has been considered advisable", he said, "to permit a some-

what increased movement of immigrants to Canada beyond what would be possible under existing regulations."

By the amended regulations permission to enter Canada now is extended to the father, mother, unmarried son or daughter 18 years or over, the unmarried brother or sister, and the orphan nephew or niece under 16 years of age of any person legally admitted to and resident in Canada who is in a position to receive and care for such relative.

The necessity of possessing valid passports has been waived, by the new regulations, in respect to immigrants who have been displaced from their countries of origin as a result of the war. A regulation is provided authorizing the acceptance of travel documents that establish the identity of immigrants falling within the aforementioned category.

The Minister noted that in addition to British subjects and United States citizens the present regulations provide admission for the following:—

- (a) The wife or unmarried child under 18 of any person legally admitted to Canada who has sufficient means to maintain himself until employment is secured;
- (b) An agriculturalist having sufficient means to farm in Canada;
- (c) The fiancée of a man legally admitted to and resident in Canada who is in a position to receive, marry and care for his intended wife;
- (d) A person who having entered Canada as a non-immigrant, enlisted in the Canadian armed forces and, having served in such forces, has been honourably discharged.

**Repatriation
of Japanese
from Canada**

On May 31 the first group of Japanese repatriates, 663 in number, left Vancouver on the ss. *Marine Angel* for Japan. The second ship, ss. *General Meigs*, with approximately 1,200 Japanese repatriates, departed about the middle of June.

These people are all voluntary repatriates going of their own free will, but are being provided with free transportation and other assistance by the Dominion Government.

If sufficient Japanese volunteer to warrant it, a third ship will make the voyage to Japan later in the summer.

It is reported that the Privy Council hearing on the Japanese Deportation Orders will be held in London in July.

Justice M.B. Archibald resigns from National War Labour Board

Supreme Court. The duties of the Chairman were taken over temporarily by the Vice-Chairman, Judge J. C. A. Cameron.

Prior to his departure from Ottawa, Mr. Justice Archibald was honoured at a dinner given by the Minister of Labour, Hon. Humphrey Mitchell, in the Parliamentary restaurant. Right Honourable J. L. Ilsley, Acting Prime Minister, and several leading Departmental officials attended. High tribute was paid Mr. Justice Archibald for his fine service while he was Chairman of the Board.

Clifford A. L. Murchison, K.C., Alternate Chairman, National War Labour Board

Council P.C. 2416, dated June 14, 1946, Mr. Clifford A. L. Murchison, K.C. has been given the appointment.

Mr. Murchison is a veteran of the First World War. In 1921, he began the practice of law in Winnipeg where he continued until 1941. In that year he joined the legal staff of the Wartime Prices and Trade Board in Ottawa as legal adviser, later becoming supervisor of offices. In April 1944, he was assigned to the staff of the National War Labour Board and organized the Review Section of that Board. Upon the retirement of Mr. R. Haig as chief of the Enforcement Section, Mr. Murchison also took over the duties of that office. In June, 1945, he was appointed Secretary of the Board, a position he held until his recent promotion to his present position.

Day nurseries in Ontario and Quebec

The pronounced increase in the employment of women in industry during the war disclosed an urgent need for the establishment in the larger industrial centres of day nurseries for children of pre-school age, as well as day-care for those of school age, especially outside school hours.

To meet this emergency, plans were developed in the Department of Labour during the summer of 1942 to provide financial assistance to the provinces for this essential service. Agreements were entered into with the provinces of Quebec, Ontario and Alberta.

Mr. Justice Maynard B. Archibald resigned his position as Chairman of the National War Labour Board early in June. He has returned to his former position on the Nova Scotia

However, Quebec and Ontario were the only provinces that took advantage of the arrangement. The first wartime day nursery was established in September, 1942. Others followed from time to time during the next three years. They early proved their value in checking absenteeism and in increased production in plants employing a large proportion of female workers. By the end of the war a total of 28 day nurseries had been set up in Ontario and six in Quebec. In addition, 41 day-care centres for older children were organized in Ontario. Naturally they were all in larger industrial centres as Toronto, Hamilton, Oshawa, Brantford, Galt, and St. Catharines in Ontario and in Montreal, Quebec.

The cost was met by a small fee charged the parents and the balance by a 50-50 arrangement between the Dominion and the provinces concerned. As the project was designed for a wartime emergency only, the Federal government discontinued its support in Quebec on October 15, 1945 and in Ontario on March 31, 1946. In the latter case, the time was extended to June 30, 1946, at the request of the provincial government. In at least a few of the larger centres in Ontario day nurseries, having proved their value in an emergency, will, it is expected, be continued under joint provincial-municipal auspices on a permanent basis.

George W. Ritchie Under authority granted by Section 4 of the Unemployment Insurance Act, 1940, the Government of Canada, by Order in Council P.C. 1877, dated May 17, 1946, appointed

George W. Ritchie of Toronto a member of the Unemployment Insurance Commission, for a five-year term from May 15, 1946.

Mr. Ritchie was given the appointment after the Government had consulted with organizations representative of employers. He takes the place of Mr. Allan Mitchell of Montreal, whose term expired last year and who was unable to accept re-appointment because of failing health.

Mr. Ritchie received his early education in Hamilton. In 1910, he graduated in Arts at Queen's University. Subsequently, he graduated from the Toronto College of Education and was granted a professional teacher's certificate by the University of Toronto.

Instead of becoming a teacher, however, he entered business and for over 30 years was connected with the Ritchie Cut Stone Company of Toronto and Hamilton, as Vice-President and later President. For some years he was an alderman of the city of Hamilton and has had considerable experience as a public relations officer.

In 1942, the Ritchie Cut Stone Company's plant in New Toronto was taken over for war purposes. For some months in the early part of 1943, Mr. Ritchie taught English at Upper Canada College in Toronto and in the summer of the same year accepted a position as Regional Director of National Selective Service for the Ontario Region. In this position he acted as co-ordinator between the employment staff, the Mobilization Board and other activities of the Dominion Department of Labour.

Since the termination of hostilities, he has continued to act as the Regional Director for Ontario of the Federal Department of Labour as is, consequently, familiar with both the functional and administrative work of the National Employment Service and the Unemployment Insurance Commission.

The other members of the Commission are Louis J. Trottier (Chairman) and Robert J. Tallon (representative of Labour).

Maritime labour course

The annual course in labour relations sponsored by the Maritime Labour Institute was convened at Dalhousie University, Halifax, on

May 15, 1946.

The course, designed for Maritime trade union officers, extended over a three-day period. The representatives were addressed on various phases of labour activity by the following speakers: H. D. Woods, Associate Professor of Industrial Relations, McGill University; Norman S. Dowd, Executive Secretary, Canadian Congress of Labour; Hon. David Wilson, High Commissioner for New Zealand; Russel Harvey, Representative of the AFL; Dr. F. S. Parney, Chief of Division of Industrial Hygiene, Department of National Health and Welfare; and Ted F. Silvey, CIO Reconversion Officer, in United States.

Prisoners of war to assist in cultivation of sugar beets

In reply to inquiries in the House of Commons on May 24 as to the use of prisoners of war to assist in the cultivation of sugar beets, Hon. Humphrey

Mitchell, Minister of Labour stated that "705 prisoners of war have been assigned to Manitoba for this work and we are trying to get an additional 200. . . . Last year the average number of prisoners of war engaged in the sugar beet industry in Manitoba—that is throughout the year—was 860. . . . The availability of prisoners of war in Canada for work in the sugar beet industry, for the lumber camps and other projects, depends on the wishes of the British Government with respect to the transfer of these prisoners back to Great Britain."

In a supplementary statement to the House on June 10, the Minister said that "an additional 400 prisoners of war have been made available for the cultivation of sugar beets. Two hundred will be allotted to Ontario and 200 to Manitoba. This means that we shall have a total of 1,222 prisoners of war working on sugar beets in Ontario, 1,116 in Manitoba, 1,449 in Alberta, with others making up a total of 4,000 doing work at various points in the country."

"It should be explained," he continued, "that the distribution of these prisoners of war is decided upon by the representatives of the provincial and federal agricultural departments and not by the Department of Labour."

Amendment to Emergency Shelter Regulations

On May 7, 1946, the Central Mortgage and Housing Corporation was granted authority to lease and administer any real or personal property of the

Crown made available to the Corporation for emergency shelter purposes.

This amendment to the Emergency Shelter Regulations, established under Order in Council P.C. 9439, was promulgated upon the recommendation of Hon. C. D. Howe, Minister of Reconstruction and Supply, who recently assumed complete jurisdiction over their administration. It is designed to facilitate a more effective administration of the Regulations.

Alternate members for Regional War Labour Board

Authority to appoint alternate members to Regional War Labour Boards has been established under an amendment to the 1943 Wartime Wages Control

Order (Order in Council P.C. 9384 of December 9, 1943). The purpose of the amendment, which was recommended by the Minister of Labour, is to permit the appointment of a representative of employers or employees to act as an alternate to the representative member in the event of the latter's absence.

T. F. Flahiff appointed co-ordinator of housing

T. F. Flahiff, formerly executive assistant to Honourable C. D. Howe, Minister of Reconstruction, has been appointed co-ordinator of housing the Minister recently announced.

The move was in line with the centralization of Dominion government housing activities (L.G., Dec., 1945, p.1769), under the Central Mortgage and Housing Corporation, as indicated in the Speech from the Throne at the opening of the present session of Parliament.

Mr. Howe said the unification of housing groups was decided upon because it was felt that provinces, municipalities and people interested in non-farm housing should have a single operating group with which to deal.

The change, it was noted, does not amalgamate the personnel of the corporation and Wartime Housing Ltd., and "in no way alters the operations of the Veterans' Land Act, but does bring within the purview of a single operating group the activities of the small holdings provision within those areas in which Wartime Housing Ltd., and the National Housing Act are operating."

The Minister stated that Mr. Flahiff would work closely with the Committee of the Canadian Construction Association.

Paul Goulet
appointed chief
of I.L.O. Section

Hon. Humphrey Mitchell has announced the appointment of Paul Goulet, Special Assistant to the Deputy Minister of Labour, as

Chief of the Section of the Department of Labour dealing with matters relating to the International Labour Organization.

In making the announcement, Mr. Mitchell stated that Mr. Goulet as a member of the Administration Board and as a senior officer of the Department, having held important offices since his joining the Department in March, 1942, was highly qualified for the post.

Mr. Goulet who recently returned from the Mexican Conference of the I.L.O., attended the Sessions of the various Committees of the I.L.O. which opened in Montreal, on May 13, and later acted with Mr. MacNamara and Mr. P. Renaud of External Affairs on the Governing Body of the I.L.O. which met in Montreal on May 23, 1946.

Changes in
membership
of RWLB
of Quebec

Under Orders in Council P.C. 1439 and P.C. 2003 dated April 16, 1946 and May 17, 1946 respectively, the appointment of Paul

E. Marquette as a member of the Regional War Labour Board of Quebec was revoked. In his stead, J. M. Bedard, Regional Director of Organization, Canadian Congress of Labour, Montreal, was appointed. Mr. Bedard assumed his duties with the Board on April 30.

It was also considered necessary to appoint an alternate member of the Regional War Labour Board of Quebec to act in the absence of any member appointed as representative of employers. To meet this need, Order in Council P.C. 1998, dated May 17, 1946, confirmed the appointment of Hector McDonald Sparks, Director of Personnel of the Northern Electric Company, Limited, of Montreal, as alternate member of the Board.

J. Boulanger
appointed
chairman, courts
of referees,
Quebec region,
UIC

Labour, on June 5.

Courts of Referees are provided for under the Unemployment Insurance Act, 1940, in each of the several regions into which the country is divided for the administration of the Act. Each Court consists of one or more members chosen to represent employers, with an equal number of members chosen to represent insured persons and a Chairman appointed by the Governor in Council. The function of the Courts is to settle appeals from the decisions of insurance officers of the Unemployment Insurance Commission.

E. C. Desormeaux
appointed
Canadian
representative
of Public
Employment
Services Ass'n

Ernest C. Desormeaux, M.A., LL.D., Secretary of the Unemployment Insurance Commission, was elected as Canadian Representative of the International Association of Public Employment Services at the annual Conference

which was held in Minneapolis, Minnesota, at the end of May. The Association is a professional society of several thousand officers of public employment services in Canada, the United States and Hawaii.

Dr. Desormeaux last year won the award of the Professional Institute of the Civil Service of Canada for his thesis on unemployment insurance. He is a member of the Ottawa Collegiate Institute Board, a Past President of the Ontario Trustees' and Ratepayers' Association and a Professor at the School of Political Science at Ottawa University. He has been secretary of the Unemployment Insurance Commission since it was established in 1940.

Group Capt. Wood
joins United
Nations
Organization

Hon. Humphrey Mitchell, Minister of Labour, recently announced the resignation of Group Captain Byron F. Wood as Special Assistant to the

Deputy Minister of Labour, a post which he has held during the past eighteen months.

The Minister stated that Mr. Wood has resigned in order to accept a post as Director with the United Nations Organization, and will take up his new duties with the U.N. at its temporary headquarters in New York on the first of June.

On the occasion of Group Captain Wood leaving the Labour Department, Arthur MacNamara, Deputy Minister of Labour, stated that the Department regrets very sincerely "losing the services of this able officer". Coming to the Department following a distinguished service with the R.C.A.F. during the war, Mr. MacNamara said, he has carried through many important assignments under the Labour Department, and in every case he acquitted himself with distinction and to the advantage of the Department. "I understand Group Captain Wood is the first Canadian to be named to a senior post with the new United Nations Organization. I feel that his selection is an excellent start, as far as Canada is concerned", the Labour Deputy concluded.

Forty-hour week in New Zealand A measure enabling the 40-hour week to be established universally has been passed in New Zealand. It empowers the arbitration court to fix hours of work for shops and offices and direct the day of closing so as to reduce the working week to five days.

A simultaneous amendment to the Factory Act has provided for adjunctive application of the 40-hour week in all factories in the Dominion and time and a half as the statutory rate for all Saturday work.

The method of adoption places the responsibility of deciding the manner in which the five-day week should be introduced on the court of arbitration and gives interested parties the opportunity of supplying evidence and testimony.

The day of closing will not necessarily be the same for all establishments throughout the country but will be staggered in a manner which provides, in the opinion of the court, the maximum benefit and convenience to the communities. Government spokesmen have stated that the five working days could not coincide for all workers as it would not be advisable to close all shops on the one day.

Threatened coal strike in Australia Reference to a threatened major strike of coal miners in Australia was made recently in press reports. The dispute, it is stated, arose from the Australian miners' "demands for state control of the industry in New South Wales."

New South Wales produces most of the coal used in the country, which is entirely dependent upon indigenous supplies.

Nationalization of the industry is at present beyond the constitutional authority of the Federal Government, but the Union has suggested that it seek to have the constitution amended in this regard when the national

referendum on the extension of Commonwealth powers is held in September.

"The last general strike of Australia's 27,000 coal miners was in December, when the miners were joined by the steelworkers and seamen. An estimated 550,000 tons of coal and \$40,000,000 worth of production were lost."

Five-day week proposed in British Mines The New York Times of May 28 reported that a five-day week for British coal miners is being discussed by Emmanuel Shinwell, Minister of Fuel and Power and union officials. It stated that the Minister was believed "to be prepared to order what would be a revolutionary step in the industry's history, if the unions guaranteed that it would not result in decreased production."

The plan, it claims, would be introduced as an inducement to young men to enter the mines and also as a means of combatting absenteeism.

The government nationalized the coal mines in January 1946.

Soft-coal dispute in United States The strike of some 400,000 soft coal miners of the United Mine Workers Union (A.F.L.) was terminated on May 29 when an agreement

was signed by the Union and the United States Government, pursuant to the authority of President Truman's seizure order, permitting Secretary of the Interior J. A. Krug to negotiate with union representatives on "appropriate changes in the terms and conditions of employment for the period of the operation of the mines by the Government". The Government seized control of the mines on May 11.

The salient point of disagreement between the mine operators and Mr. John L. Lewis, the United Mine Workers President, in negotiating a new contract, was over the latter's demand for the provision of a health and welfare fund financed by the operators on the basis of a royalty of 10 cents on every ton of coal mined, to be administered solely by the union. The royalty was subsequently changed by Mr. Lewis to a flat seven per cent payroll levy. These demands were rejected by the operators whose spokesmen characterized the fund as a "new social theory and philosophy which is properly the field of social legislation."

The work stoppage, which began on April 1, was followed by Government decrees restricting normal coal consumption in order to conserve the nation's rapidly diminishing reserves. Following an appeal by the President, Mr. Lewis declared a two-week truce on May 10, and the resumed production resulted in a general easing of the situation.

The agreement reached by the Union and the Government provided for the establishment of a health and welfare fund financed by a royalty payment of five cents a ton by the operators. It is to be administered by three trustees, one named by the union, one by the mines administrator, J. A. Krug and one chosen by them jointly. It is estimated the fund will approximate 25 million dollars annually. A wage increase of 18½ cents an hour conforming to the Government's established general wage pattern was also granted.

Other terms covering items in dispute were:

Sole union control of the medical and hospital fund now paid by the miners through check-off to the operators who provide these services.

Mandatory compliance of the operators with a federal mining safety code.

Permission of mine-safety committee consisting of miners to remove men to safe areas "unless and until" the federal coal administrator modifies or cancels the miners' authority.

Agreement that the coal mines administrator will be guided in considering the union demand for inclusion of foremen, by the decisions and procedure of the National Labour Relations Board.

The N.L.R.B. has ruled in certain recent cases that foremen may join unions of rank-and-file production workers (L.G., April, 1946, p. 439).

U.S. railroad strike

The railroad strike in the United States which for 48 hours stopped practically all railway transportation except milk, troop and hospital trains was settled on the basis of a plan proposed by President Truman granting an 18½ cent hourly wage rise on the condition that demands for changes in working conditions would be waived for one year. The roads were under Government administration during the strike.

This proposal had been previously rejected by Alvah Johnston and Alexander F. Whitney, heads of the striking Brotherhoods of Locomotive Engineers and Railroad Trainmen respectively. The leaders of 18 other unions engaged in similar negotiations with the 337 carriers accepted the plan when first proposed.

On Friday, May 24, the President broadcast an appeal to the union's members to return to work. The following day he asked Congress for emergency and permanent legislation to curb strikes in which he sought for authority to draft strikers into the armed services in industries where the Government had assumed control. The rail strike he declared was no longer between management

and labour but against the Government of the United States.

The House of Representatives approved the President's proposal but it was rejected in the Senate.

U.S. Supreme Court terminates "superseniority" for veterans

The United States Supreme Court has rendered a decision terminating the super-seniority principle with respect to veterans returning to pre-war jobs.

This ruling, which supports the view of organized labour, upholds the decision of the Circuit Court of Appeals (L.G., April, 1946, p. 433) in reversing an early lower court recognition of superseniority, and overrides what has been the official view of Selective Service headquarters.

The opinion holds that while Congress meant to protect a veteran "against loss or demotion on his return", he is entitled to step back on the "security escalator" only to precisely the point he would have been if he had not entered military service, that no "step-up or gain in priority can be fairly implied" and that the language of the law would be distorted if interpreted "as granting the veteran an increase in seniority over what he would have had if he had never entered the government service."

Job reclassification in the United States steel industry

A joint committee, composed of representatives of the United Steel Workers of America (CIO) and the United States Steel Corporation which was constituted to reclassify some 62,000 jobs in the basic steel industry, is nearing completion of its task an article in the New York Times points out.

"The ultimate object is a simplified standardized guide of about 2,000 job classifications and pay increases for many of the half million steel workers to erase wage inequities, long a bone of contention among the workmen and a breeder of wild-cat strikes," the article states.

The committee found that 62,000 job classifications existed in the industry, with United Steel listing 25,000. Many similar activities went under different appellations in the same mills. Some 140 representative job classifications were set up for comparisons in each of the United States Steel's 36 plants.

The task, undertaken in August, 1945, in the Carnegie-Illinois' Gary, Ind. mill, a United States Steel subsidiary regarded as the most highly integrated in the industry, was completed in April, 1946. The result provided a standard measuring unit for approximately 85 per cent of the jobs in the industry.

"One of the most important results, from a labour standpoint, is the elimination of the quota system whereby promotions in the maintenance departments often depended on deaths and retirements." Three basic classifications have been instituted, starting, intermediate and craftsman, with a worker being advanced through the first two grades in a year.

Reclassification within the entire industry is expected by mid-July.

California Labour School The Veterans' Administration in the United States has granted approval to the California Labour School in San Francisco for veterans' study under the country's rehabilitation program.

The school is designed to prepare students for union leadership and, conversely, to provide trade unions with fully trained personnel capable of assuming positions of responsibility in the labour movement. It is sponsored by over 75 trade unions and councils of the AFL, CIO and railroad brotherhoods.

The curriculum offers, adjunct to its courses in labour organization and union activity generally, technical courses in the fields of industrial arts, journalism, public relations and creative writing. A portion of the training consists of active participation in trade union functions through field visits to trade union meetings, working with shop stewards in industrial establishments, and learning the manner of publication of labour papers.

The institution's educational director is Dr. Holland Roberts, formerly associate professor of education at Stanford University. Besides the permanent staff, the school frequently utilizes labour leaders from the surrounding area as lecturers and discussion leaders.

The school services numerous trade unions and organizations in the California area over and above the regular day and night classes. Although a substantial portion of the students are trade unionists, and some are in positions of leadership, there are no entrance requirements.

It is the only labour school in the United States accredited under the educational section of the Serviceman's Readjustment Act.

Women's hourly wage increased in State of Washington The basic minimum wage for women will be raised to 65 cents in the State of Washington on June 5, This new order will supplant all previous orders and cover most women employed in the state over eighteen years of age engaged in all types

of work except domestic service, agriculture and employment in telephone and telegraph companies in communities of less than 3,000 population. Domestic service is defined as housework in a household where no room and board is offered for sale.

The order also limits the work day to eight hours and the week to forty hours; over these amounts an additional eight hours of overtime is permitted at time and a half. It also calls for a lunch period of 30 minutes within the first five hours of each day.

Union members expelled for racial prejudice in United States The National Maritime Union (CIO) in the United States expelled 16 members from the union for 99 years for refusing to sail with a negro as a crew member.

Another crew member received a 10-year suspension and two others were found guilty on the same charge. This is alleged to be one of the most severe penalties ever inflicted upon Great Lakes sailors by labour organizations.

Critical world wheat situation The world's critical wheat situation will not end with the harvesting of this year's crop, a bulletin of the Dominion Bureau of Statistics declares. Exportable surpluses of wheat have dwindled steadily during May as all export areas attempt to meet the wheat requirements of deficit areas.

The bulletin states that "while relatively favourable crop reports have been received from many of the famine-stricken countries, it is obvious that production will attain pre-war levels in few, if any, of these areas."

"War has taken too great a toll of manpower, and has brought about such serious shortage of farm machinery, fertilizer and draught power that complete agricultural recovery is bound to be a slow and laborious procedure. Realization of this fact is reflected in long-range agricultural programs and policies now being developed by most of the governments concerned. The general trend of policy is in the direction of encouraging production of more cereals and less live stock, based on the premise that more people can be fed directly with grain than can be fed if the grain is first converted into live stock."

The bulletin quoted the conclusions reached by Mr. Hoover in his Famine Report to President Truman: "The dominant need of the world in this crisis is cereals, particularly wheat and rice. There is great need of fats and special food for children, but as cereals can furnish 85 per cent of an emergency diet, we considered cereal requirements were the first concern, and the best indicator. If a

foundation of bread can be assured, and as much fats and children's food as possible, mass starvation can be prevented." Mr. Hoover's report contains detailed data on month-by-month (May 1 to September 30) requirements for the various deficit and famine areas, the requirements being summarized as follows: Europe, 8,390,000 tons; Latin America, 1,000,000; South Africa and New Zealand, 198,000; Middle East, 100,000; Indian Ocean Area, 2,886,000; Pacific Ocean Area, 1,910,000; Total, 14,484,000 tons.

Mr. Hoover estimated probable supplies as of May 1 to September 30 as follows: United States, 4,220,000 tons; Canada, 2,300,000; Australia, 992,000; United Kingdom, 200,000; Argentina, 2,375,000; Brazil, 200,000; other Western Hemisphere States, 40,000; Burma, 75,000; Siam, 195,000; Russia to France, 300,000; total, 10,897,000 tons. On the basis of these data on requirements and supplies the deficit amounts to around 3,600,000 tons (approximately 134 million bushels) as against

a gap of 11 million tons (approximately 410 million bushels) indicated in some earlier appraisals. Mr. Hoover also located another 1,500,000 tons of potential supplies not taken into account above, but which may conceivably be borrowed or released from stocks in certain countries.

Total exports of wheat and wheat flour from Canada for the nine months ending April 30 amounted to 281,583,000 bushels. Exports for the month of April totalled 23,684,000 bushels. If overseas shipments can be maintained at this rate during May, June and July there will be no difficulty in reaching the goal of 340,000,000 bushels for export during the crop year, the Bureau stated.

In the United States an increase of 15 cents per bushel on the ceiling price of wheat was made effective May 13 through June 30, 1947. This increase, together with the bonus plan announced last month had been largely instrumental in securing delivery of over 43,000,000 bushels from farmers up to May 17.

Meeting of Minister of Labour and Wage Stabilization Committee of C.C.L.

A DELEGATION representing the National Wage Co-ordinating Committee of the Canadian Congress of Labour met with the Honourable Humphrey Mitchell, Minister of Labour, in Ottawa on May 21, to discuss the Congress' wage-program and various proposed amendments to the wage-

control regulations now in effect. The amendments to the regulations and conciliation procedures advocated by the Committee and the Minister's statements regarding the present wage-price structure were read from prepared statements during the meeting. The texts of these statements are presented below.

Statement of the Committee

Dear Mr. Minister:

This delegation appears before you to-day for two reasons:—

1. To offer the co-operation of the Canadian Congress of Labour and its affiliated unions in settling strikes now under way in the West Coast lumber industry and in New Toronto, Ontario, and in averting disputes which are threatening in several important industries of the Dominion.

2. To urge that the Government co-operate with the Congress to the same end by the immediate adoption of amendments of the wage-control regulations and conciliation procedures now in effect.

You are aware of the strike of lumber workers in British Columbia, which directly affects some 37,000 employees, and which, if permitted to continue, may indirectly affect many other thousands of workers. You are also aware of the strike of employees of the Anaconda Copper and Brass Company in New Toronto. We feel we should advise you that there is a danger of additional strikes of even larger proportions in the steel, automobile, electrical hard-rock mining, chemical, and packinghouse industries, which, should they occur, will seriously set back production of all kinds in all parts of the country. Of most immediate urgency is the danger of an industry-wide stoppage in the Canadian rubber industry, scheduled to begin on Monday, May 27, unless suitable progress has been made in the negotiation of agreements within the industry by that date.

We are aware that all disputes are fundamentally caused by the failure of employers' and employees' unions affected to reach common agreement. No legislation can prevent disputes if either or both parties adopt an unreasonable attitude. The workers for whom we speak are anxious to reach reasonable settlements, and to avoid industrial strife. They cannot imagine that the employers, par-

ticularly at a time when full production is desired by Canadian and international consumers, are not equally desirous of reaching settlements. We are therefore forced to assume that, if settlements are not reached, a certain share of the responsibility must be laid upon inadequate regulations and procedures.

The unions of the Canadian Congress of Labour are asking an increase in rates of pay designed to offset increased living costs, and a work-week of forty hours. We believe that this is necessary if the producers of goods in Canada are to have enough purchasing power to buy back the goods they make, and in order that unemployment be reduced as much as possible.

We have learned that some employers are prepared to concede wage-increases, but their counter-offers are so far removed from employee proposals that there is no basis for bargaining. In many cases there has been a blank refusal to amend wages or hours. We believe that one reason for this attitude is that in most cases negotiations have had to be conducted on an individual plant basis rather than on an industry-wide basis. These isolated discussions invite and permit each employer to hold back settlements until his competitors establish a wage-hour pattern. The same attitude, repeated throughout an industry, makes agreement in any one instance impossible.

Another reason for lack of agreement is an apparent conviction on the part of employers that the Government will not approve wage-increases beyond the inadequate concessions they offer. Employers also seem convinced that, should they agree to an adequate wage, they will not be able to secure price-relief, where this is necessary to cover wage-increases.

The third reason for lack of agreement is the division in procedure for dealing with questions affecting wages and questions affecting labour relations. In normal collective

bargaining there is give-and-take between both parties regarding each of these matters. However, under present Federal regulations, disputes over labour relations are handled by a Board of Conciliation, while wages come under the authority of the War Labour Boards. A Board of Conciliation cannot discuss wages, nor can the War Labour Boards discuss labour relations. A settlement on the basis of mixed concessions is therefore impossible.

When strikes take place, another flaw in the Government procedure becomes apparent. Despite the fact that prices, wages, and labour relations are under federal control, the Government takes the position that strike settlements come under provincial jurisdiction. The provincial government therefore steps into a situation caused by factors beyond its control, and without power to make the adjustments of those factors necessary to bring about a resumption of work.

The Canadian Congress of Labour is anxious to help the Federal Government to avoid large-scale disputes. We want to assure you that our affiliated unions will:

1. Do everything possible to reach agreement with employers, either on a plant-wide or industry-wide scale.

2. Keep the Department of Labour constantly informed of any dangerous developments in the progress of negotiations.

3. Will take no strike action without giving reasonable notice to the Federal Department of Labour, in order that the Department may have every opportunity to attempt conciliation.

The Congress itself is prepared to assist the Department in re-establishing negotiations in those cases where strikes have already taken place, in the hope that they can be ended as soon as possible.

Further to this end, the Congress suggests that the Government make the following immediate changes in procedure:

1. Wherever a single union or a group of unions now bargain for the major firms in any clearly-defined industry, the Government shall, upon request of either the employers or unions concerned, order that negotiations over wages, hours and working conditions be conducted on an industry-wide rather than on a plant-wide basis, if necessary, with the assistance of a Government conciliator.

We are aware that industry-wide discussions were carried on in the West Coast dispute, and that they did not prevent the outbreak of strike action. Nevertheless, we would point out that mutual agreement between employers and employees over wages did come closer in these discussions than has been the case in many other industries. The very fact that

the discussions were conducted on an industry-wide basis will also make overall settlement of the current strike that much easier.

In the case of the Amalgamated Clothing Workers of America, settlement has been reached between the employers and the union without any talk of strike action, and credit for this happy result is given to the fact that competitive employers in each community bargained as a group with their workers.

Furthermore, any settlement reached under such circumstances would tend to eliminate unnecessary differentials. This would remove the fear of unfair competition which now stands as a barrier to individual settlement, particularly in highly-competitive industries.

2. By amendment of the Wages-Control Order, automatic approval shall be given to any wage-hour pattern negotiated directly between unions and employers, which results in a minimum take-home pay for forty hours, not more than 20 per cent higher than the minimum take-home pay possible prior to such agreement for a work-week of forty-eight hours or more. Automatic approval shall also be given in cases where employers and unions negotiate a wage-hour pattern not higher than the top wage-hour pattern obtaining in each industry.

We cannot believe that any such wage-increases can be inflationary. Inflation is possible only when total purchasing power in circulation is greatly in excess of goods. Current union proposals merely call for maintained purchasing power, plus a moderate compensation for increased living costs due to price-increases already permitted by the Wartime Prices and Trade Board.

If total earnings are possible within a forty-hour week rather than within a longer work-week, no additional purchasing power is put into circulation. The Congress proposal would tend to spread employment over a larger number of available workers. If these employables are not working, they are not producing. Yet they will still have to receive buying power, whether through unemployment insurance, the cashing of war-bonds, the spending of gratuities, or public relief.

As a matter of fact, total national purchasing power has already been seriously reduced by the fact that, where several persons in a family might have been receiving income during the war years, now only one breadwinner is gainfully employed. The additional productive capacity created during the war-years makes total potential production per employee far higher than total actual production per employee in pre-war years. This is a further argument for the adoption of the forty-hour week. These factors will also

offset any purchasing power put into circulation by means of equalization of rates within an industry.

Most current wage-hour demands will permit forty-hour minimum earnings ranging from \$30 up to \$35. In view of rising living costs, it cannot be reasonably argued that any family receiving such a minimum weekly income would be tempted to spend it for anything but the bare necessities of life. It is certainly not a total income which would encourage unnecessary spending.

3. Where no agreement is reached on either wages or labour relations, the government shall provide for conciliation under the auspices of an individual or a board authorized to discuss wages, labour relations and prices.

We cannot emphasize too strongly the necessity for unhampered discussions between employers and unions. It is not possible to separate wage and hour issues from labour relations issues, since very often, as has been pointed out, the settlement of one issue can be reached by means of a concession on the other issue.

Two obvious cases come to mind. In the dispute between the Steel Company of Canada in Hamilton and the United Steelworkers of America, the Board of Conciliation is hampered because of disagreement between the Company and the union over wages, a problem which the Board of Conciliation is not authorized to discuss. On the west coast, a commissioner appointed to avert a strike found himself restricted to labour relations, when the chief point under dispute was wages. His efforts were therefore unsuccessful.

The Government never wearies of reminding the public of the close connection between wages and prices. But in controlling wages and prices, the Government does not practise this close relationship. Wage-control and price-control are under separate administrations. Labour has no say over price-control, but employers have an equal voice with labour and government when it comes to wage-control.

Labour repeats that price-control must not be relaxed more than is absolutely necessary.

The only justification for a price-increase is proof by the employer that such an increase is absolutely necessary in order to pay employees a living wage. We doubt if that condition exists in any major industry in the country.

In order to facilitate settlements, and in order that prices may be controlled as strictly as possible, we suggest that the Wartime Prices and Trade Board authorize the special conciliator, designated under the procedure outlined above, to discuss prices as well as other factors during negotiations. As things now stand, labour, not having the facts at its disposal, cannot fairly argue against an employer's claim that price-increases are necessary, and discussion proceeds on the basis of one party having all the facts and the other party being deprived of those facts. Satisfactory settlement is impossible under those conditions.

4. In cases where strikes have already begun, we urge that the Federal Government accept full responsibility for re-establishing negotiations. As stated above, the Congress is prepared to render every assistance in this regard.

We appreciate that, under the British North America Act, the settlement of labour disputes may come under provincial jurisdiction. But at present we are functioning under the Transitional Powers Act. Prices, wages and labour relations are all supervised by agencies of the Federal Government. These factors are the very factors involved in any union-management dispute. It is not logical that the Federal Government should control all factors involved in a union-management dispute, and take the position that when disputes degenerate to the point of a strike or a lock-out, the responsibility for settlement should revert to the province. Not only that, but, in many industries, any labour dispute will directly affect employers and employees in more than one province. Any one province cannot then effectively resolve the disagreement. Only the Federal Government can create suitable machinery for conciliation on an inter-provincial scale leading to the speedy re-establishment of normal production.

Statement of Minister

Demand and Supply

No argument should be needed to show that without wage control any effective price control would have been impossible. One of the principal reasons for the success of price control in Canada has been that we have always recognized that the two types of control are complementary — that production

costs must be kept in hand if prices are to be kept down; and that production costs cannot be kept in hand if wages and salaries (which on the average constitute some 45 per cent of production costs) are not kept within certain well defined limits.

Today the pressure toward soaring prices is becoming increasingly heavy, and it becomes

more difficult to resist as we move further away from the self-imposed discipline of the war years.

The high demand for goods would be most welcome if we had the means at hand to supply it. But we haven't. It takes time to change over from 6 years of all-out war production to civilian production. Factories have to be re-modelled, stocks of materials have to be built up, new machinery and machine parts manufactured and set up before the assembly lines can start moving.

With everybody wanting to buy things and with the supply strictly limited the stage is all set for inflation on an even more disastrous scale than that which followed the last war.

The situation may be summed up in this way. Demand and supply are still out of balance over a very wide field. This lack of balance can be righted in one of two ways. One of these ways is to let go the stabilization controls and allow sharply rising prices to curtail the demand for goods and services. As prices mount people's income would buy less and production would not have to increase nearly as much to meet the demand. But that is not the way to high employment and decent living standards. The other way is the one the government intends to keep on following. That is to keep prices in hand until supply can catch up with demand. Which means keeping costs in hand as well, for prices are controlled by costs. And costs cannot be kept in hand if wages, which form so high a proportion of production costs, are not subject to some degree of stabilization. We are entering the last round in our battle against inflation. We have only to maintain the existing modified controls a little longer to see the job through.

Effect of Wage Control on Wage Rates

Criticisms that have been voiced against the amended Wage Stabilization Regulations recall the criticisms that were made when the War-time Wages Control Order was first instituted in 1943. At that time the government was accused of having frozen wages. Was this charge true?

During the 26 months that the regulations have been enforced by the National and Regional Boards 68,739 applications have been received covering about 3½ millions of work-people, of whom about 2 millions were employed in the manufacturing industries.

More than half of these applications (35,160 to be exact) were for wage increases.

The decisions of the National and Regional Boards in these 68,739 cases were as follows:

	<i>Cases Employees Affected</i>	
Application granted in full	57,244	2,394,245
Application granted in part	7,761	419,827
Application refused	3,734	422,089

These decisions increased the nation's payroll by many millions of dollars. Index numbers of wage rates in the manufacturing industries rose from 100.0 in 1939 to 141.1 in 1944.

The amended Wage Stabilization Regulations came into effect on February 15, 1946. Under the Regulations as they now stand the Boards are given power to authorize or direct an employer to increase wages if it can be shown that he is paying less than the rates prevailing for the same or similar work in the same locality or in a comparable locality. Further, the Boards can authorize an employer to raise wages on any other reasonable basis provided such increases will not compel an increase in the prices of the goods and services which the employer sells.

Let us examine the record for the first 6 weeks after the amendment came into effect. Between February 15 and March 31, 1946, the Boards dealt with 3,404 applications concerning more than 50,767 employees.

It is of interest to note that of these 3,404 applications not less than 3,057 or 90 per cent were granted in full.

These affirmative decisions by the Boards do not support the contention that the amendment is restrictive.

It is claimed that under the Wage Stabilization Regulations, when an employer is confronted with a demand for higher wages he simply claims that he cannot pay higher wages and continue to sell his goods at the same price. An employer may claim that; but that does not mean that the workers must accept it as final. On the contrary, they have every right to take their case to a Wage Board for decision.

If the employer does not accept the Board's finding, the workers are then free to ask for the conciliation service provided by the War-time Labour Relations Regulations.

If after this legal conciliation procedure has been gone through the employer still holds out, the workers have every legal right to engage in a strike to enforce their demands. If they should be forced to resort to the strike weapon they will be in the favourable position of being able to tell the world they are striking for a wage rate which an impartial tribunal has already ruled is fair and within the means of the employer to pay without increasing his prices to the consumer public.

Statement in Conclusion

Having heard your representations and being aware that your organizations have already

publicly announced the adoption of a policy of by-passing war labour boards and striking to force employers to grant increased wages, shorter hours and other concessions in violation of the Government's Wage Stabilization Order and the Wartime Labour Relations Regulations, I desire to make this formal statement.

"The Government of Canada is determined to pursue its policy of preventing an inflationary situation arising in this country which would bring suffering and hardship to all its citizens. In carrying out this policy, we must, for the necessary period of time, maintain price control as well as a reasonable measure of wage and salary stabilization. In line with this policy the Government has up to the present time relaxed control of prices only on the classes of goods that have come into such full supply that competitive bidding will not force up prices to an inflationary level. It has also recently modified the Wage Stabilization Order so as to make it more realistic and in keeping with changed conditions.

"You gentlemen have indicated that this amendment of the Order is not satisfactory and that nothing less than its abolition will meet your demands. I have, on the other hand, pointed out to you that price control cannot be successfully maintained unless at the same time we maintain a reasonable measure of wage and salary control.

"I have shown you that the price-wage policy of the Government, since it was instituted, has kept the cost of living, which includes the items of food, clothing, rent, fuel, etc., from rising beyond a reasonable limit. I have also shown that wage stabilization has not prevented wages, during the same period, from reaching the highest point they have ever attained in the industrial history of Canada. I have furthermore demonstrated to you by factual presentation that the recent amendment of the Wage Stabilization Order has resulted in a genuine relaxation of wage control. All this, I submit, adds up to the fact that the real wages of the workers of Canada and therefore their standard of living, are better to-day than ever before in our history.

"In recent weeks four labour unions, three in the Province of Ontario and one in Quebec (which struck in violation of the provisions of the Wartime Labour Relations Regulations

and the Wage Stabilization Order) have suffered defeat; in two instances the workers concerned returned to work virtually on the employer's terms, and in the other two the workers were not re-employed. Within the past week the lumber workers in the Province of British Columbia have also refused to recognize our laws and are now on strike; and it is my opinion that continued negotiations would have prevented the stoppage of work and resulted in adjustment of the differences.

"I desire, however, to make it clear at this time that the Department of Labour will, as it has done in the past, give the Unions and employers every assistance in composing their differences, and it is my earnest hope that disputes will in the future be dealt with in an orderly way and in accordance with the law of the country.

"I am aware that certain public statements have been made, said to emanate from officers of Unions you represent, to the effect that a decision has been reached to follow a policy of striking in defiance of Government legislation, and as Minister of Labour I feel it is my duty to say to you that if you give effect to this policy you will be endangering the organizations you represent and the welfare of your members. Nothing can be accomplished by approaching settlement of disputes in an illegal manner; on the contrary, such a course leads to delay, confusion and chaos and puts your organizations in positions where neither the Labour Department nor the Government can render assistance.

"It is my earnest hope, however, that in visualizing the great damage that may be done to our nation and its people, including the members of the unions, by unwarranted and unlawful strikes, the trade union leaders concerned will see the desirability and necessity of proceeding in a lawful manner to obtain what they regard as their legitimate objectives.

"The Government will always consider any reasonable suggestions that your unions or other unions may put forward for further amendment of the Wage Stabilization Order with a view to ensuring that it will more readily give effect to the declared intention of the government to bring about the gradual relaxation of controls of all kinds. The government will welcome any suggestions of this kind and I can assure you that they will be given prompt and careful consideration."

Meeting of I.L.O. Committee on Iron and Steel in Cleveland

PURSUANT to a decision of the Governing Body of the International Labour Organization in January 1945, to set up Industrial Committees in a number of important industries, the Committee on Iron and Steel met in Cleveland from April 23 to April 29, 1945.

These committees were decided upon in order to provide a more detailed consideration of the problems in various industries than the annual conference, covering the general field of industrial relations and social welfare, could accord.

Canada's representatives on the committee, which dealt with the problems of safety, industrial relations and full employment in the iron and steel industry, were as follows:

Representing the Government of Canada

Dr. A. W. Currie, Assistant to the Director-General of Economic Research, Department of Reconstruction, Ottawa.

Mr. V. C. Phelan, Director of Information, Department of Labour, Ottawa.

Representing Canadian Workers

Mr. C. H. Millard, National Director, United Steelworkers of America, Toronto, Ont.

Mr. George P. Schollie, Secretary, International Association of Machinists, Montreal, P.Q.

Although the Dominion Government had urged Canadian employers to be represented, the employers' organization found it impossible to arrange representation.

The following nations sent delegations to the meeting:

United States of America, Australia, Belgium, Canada, France, United Kingdom, India, Italy, Luxembourg, Sweden, and Union of South Africa.

The Governing Body of the International Labour Office was represented by Nathan Feinsinger of the U.S.A., for the Government group, Mr. H. W. Macdonnel of the Canadian Manufacturers' Association, for the employers group and Mr. Anderson of Sweden, for the employees' group. Mr. Nathan Feinsinger acted as chairman of the Conference.

Following a general discussion during the early sessions, the Conference appointed three sub-committees to deal with items on the agenda. The draft reports drawn up were adopted with minor amendments at a plenary session on the concluding day.

A summary of the recommendations adopted by the sub-committees is presented below.

Safety

The Sub-committee on Safety recommended the preparation of a factual survey of the various measures taken in different countries for the prevention of accidents and the protection of health in the iron and steel industries. It suggested the survey cover the following subjects:

1. Technical measures of protection against accidents (safety appliances, etc.);
2. Co-operation between State factory inspection services, employers and workers in matters concerning the prevention of accidents;
3. Measures of education and propaganda employed for the same purpose;

4. Accident statistics, including causes, and the methods of compiling these statistics;
5. The legislation in force concerning accident prevention in the iron and steel industry in different countries.

The Sub-committee stressed the desirability of arriving at an international standardization of accident statistics, pointing out the fact that these statistics as they exist to-day allow no direct comparison to be made as to the accident experience in the different countries. The setting up of joint employer-worker committees in all undertakings to promote accident prevention and health protection was also recommended.

Industrial Relations

Mr. Phelan, Canadian Government Representative, was elected chairman for the Sub-committee on Industrial Relations. He submitted the following recommendation and resolutions which were adopted by the Committee.

Preparation of Studies

The Sub-committee declared itself much impressed with the apparent progress made up to this time in the development of procedures for adjusting or solving matters in dispute

between employers and employees in the various countries, and it felt that further improvement and development of existing provisions and practices might be brought about through a more detailed attention to all matters of industrial relations at the next meeting of the Iron and Steel Committee. Ten particular studies were recommended in order that information may be made available to Member States as soon as possible, to form a basis for further consideration.

Resolution I

1. Employers and workers in the iron and steel industry, without distinction of race or creed, should be entitled to form or join occupational organizations, i.e., industrial, of their own choosing without previous authorization;

2. Occupational, i.e., industrial, organizations of employers and workers should not be subject to arbitrary dissolution by administrative order;

3. Occupational organizations should have the right to constitute federations and confederations of trade organizations; and

4. Where any country now possesses legislation designed to abridge the rights herein asserted, it is recommended strongly that such legislation be removed, and further that all Governments, whether through legislation or policy, should lend themselves to the promotion of the principles contained in this resolution.

Resolution II

The Iron and Steel Committee of the I.L.O., endorses the principle of the right to collective bargaining between employers and workers, looking to the formulation of collective agreements, and recommends strongly that State Members should give full and unstinted support, both in law and policy, to the continuance and development of the free right to bargain collectively in the iron and steel industry.

Resolution III

The Iron and Steel Committee of the I.L.O., affirms the necessity for the strict observance of the terms and conditions of agreements between the two parties to the industry, when once entered into; and

Recommends that each collective agreement when entered into should carry an appropriate clause, providing for the resolution of such differences as may arise during its currency, whether by negotiation, mediation or arbitration.

Full Employment

A resolution recommending consideration by the Governing Body of the I.L.O., the respective Governments and the Economic and Social Council of the United Nations of all means to relieve the near paralysis of the steel industries of France, Belgium and Luxembourg and especially to safeguard the allocation of fuel to the above-mentioned countries, was adopted.

Resolutions of Workers' Members

The workers' members submitted draft resolutions which were adopted after certain amendments had been agreed to as follows:

1. Resolution on Full Employment

This resolution declared the committee's willingness to co-operate with the I.L.O. and with various Governments in obtaining factual information as a basis for the formulation of constructive plans and programs designed to bring about full and regular employment in the iron and steel industry.

2. Resolution on Wage Schemes

The second resolution proposed by the workers' members invited the Sub-committee to declare that it would be desirable for the iron and steel industry to accept the principle of guaranteed work or wages for workers who remain in continuing service and who are retained on the employment register of a given company. The resolution further suggested that an enquiry be made by the International Labour Office into schemes already in operation for the provision of guaranteed work or wages. The employers' members took the view that the results of the enquiry should be known before the Iron and Steel Committee committed itself to the principle, and the United States employers' member submitted an amendment inviting the Office to undertake the enquiry but not containing any declaration of principle.

This was agreed upon and embodied in a resolution which was adopted unanimously.

3. Resolution on Purchasing Policies

The third resolution suggested that the International Labour Office invite steel producers and large consumers of steel to co-operate in an enquiry into purchasing policies for the purpose of ascertaining to what extent if any, they tend to influence fluctuations in operations and employment, and what revisions in such policies would contribute to the regularization of employment in the industry.

4. Resolution on Technological Changes

The fourth of the workers representatives resolutions was unanimously adopted after reference to specific items of a proposed study on this subject were deleted.

The United States employers' member deemed it undesirable to draw attention to specific items mentioned in the original resolution, since they were not the only subjects to be taken into consideration. The revised text, which was adopted, read as follows:

The Iron and Steel Committee of the I.L.O., meeting in Cleveland 23-29 April, 1946, invites the International Labour Office to study the practices pursued in regard to the introduction of technological improvements in the iron and steel industry and their immediate and long-range impact upon employment, with special reference to the training and the absorption of displaced workers into other work, having regard to the rate of labour turnover and wastage.

Other Resolutions

Also adopted were resolutions concerning the facilitation of industrial development in underdeveloped countries through international co-operation, and proposals to improve, extend and make available statistics relating to employment and economic problems of the industry.

Government Planning Since the War in Great Britain

SUMMARY of the main legislative program of the British Government since its accession to office on July 5, 1945 together with development in related fields is contained in the May issue of *Labour and Industry in Britain*, the monthly review published by the United Kingdom Information Office. Some of the features are described below.

Manpower

There were approximately 4,510,000 in the armed services or working on supplies and equipment at the end of February, 1946, a reduction of 4,490,000 from the peak total of 9,000,000 in mid-1945. "The target for the end of 1946 is 1,100,000 in the forces and 500,000 working on supplies, a total of 1,600,000". The review states that, "demobilization has been carried out smoothly and quickly so far, but drafting continues and the Government is obliged to maintain a large military force for occupation purposes."

There has been a gradual relaxation of manpower controls and the Essential Work Order was withdrawn from a wide range of industries in May. "In mid-1945 out of a total working population of 21,571,000 there were just over 3,000,000 persons working in manufacturing industries on some supplies and exports. By the end of February 1946, the total working population had declined by 876,000, but the number employed in home and export manufacturing industries has risen roughly by 2,029,000 to 5,070,000.

"The transition has been accomplished so far without serious unemployment. The number of insured unemployed rose from 103,000 in mid-1945 to 356,000 by the end of February, mostly very transitional unemployment. These figures do not include men and women on terminal leave from the Forces who have not yet taken up employment. The number of these veterans was 875,000 at the end of February.

"Industrial disputes have not been serious so far", the article states, "and in no case has any official union strike been called". The largest single dispute was the unofficial strike of dockworkers in September-October 1945, when approximately 1,100,000 working days were lost. Man-hour days lost due to strikes, excluding the dock strike, averaged 127,000 a month in the six months between September and February.

Planning Industrial Location

"With the twofold object of bringing peacetime industry to existing labour and developing a variety of industries in areas formerly subject to depression because they concentrated on single heavy industries, the Government has paid particular attention to reconversion in the so-called Development Areas. In these areas (known during the 1930's as Depressed or Special Areas) the Government have leased wartime munition plants to industrialists, built new plants for leasing, developed Trading Estates, and given many facilities to encourage the growth of a great variety of industries useful both for satisfying essential home needs and for increasing exports. To help industrialists choose suitable plants in these areas and to guide them, also, in other districts, the Board of Trade maintains a Location of Industry Planning Room in London where all relevant information is freely available. It supplies useful information, too, through regional offices in every part of Britain."

Production for Export

In order to provide the funds with which to pay for her vast annual imports, production for export in Britain has been given priority over production of all but the most essential goods for home needs. In February and March exports rose to about 80 per cent of the 1938 average monthly volume of £39,200,000. In 1943 the monthly average stood at about 30 per cent of the 1938 average.

"It is hoped that by the end of this year there will be 1,550,000 persons working on exports which should by that time be running at their pre-war volume. From then on the task will be to raise the level by 75 per cent further."

Nationalization

In addition to the Bank of England, the coal mines and civil aviation, which have already been nationalized, the Government has announced its intention of bringing "electricity, gas, telecommunications, and inland transport under national ownership. Shipping will not be nationalized, though docks and harbors will be brought under a national plan. With regard to the iron and steel industry, the Government, after considering a plan prepared by the owners for modernization under private ownership, announced on April 17 that the importance of the industry would necessitate

a large measure of public ownership. In the interim, a new Control Board would supervise and develop the industry".

Other industries and services have been informed that "they are not to be nationalized unless new circumstances indicate that this is essential in the cause of efficiency." In order to help them to secure quickly any major improvements or reorganization needed, the President of the Board of Trade has initiated a system of "working parties" for 15 of these industries. In every case, a working party consists of an independent Chairman and 12 members, representing in equal proportion management, labour and the public, all appointed by the President of the Board of Trade after consultation with the industry concerned. They all serve part-time and unpaid, receiving expenses when sitting.

"The terms of reference of each working party are to examine the various plans and suggestions put forward for improvements in organization, production and distribution in the industry, and to report on the steps which should be taken in the national interest to strengthen and stabilize the industry. Cotton was the first industry to have a working party, and the publication of its report is expected shortly. The other industries are pottery, hosiery, furniture, boots and shoes, linoleum, carpets, jute, wool, china, clay, jewelry and silverware, cutlery, lace, clothing and glassware."

Housing

The urgency of the housing problem, the article claims, is due not only to the six-year hiatus in new building but to the effects of enemy air attacks which destroyed 460,000 houses and damaged nearly 3,500,000 more.

A complete housing subsidy program was put before the Parliament on February 5. The standard subsidy in England and Wales will be £22 (\$88) a year for 60 years, a capital value of £594 (\$2,376) of which three-quarters will be paid by the State and one-quarter by the Local Authority. Higher subsidies are given for agricultural dwellings, houses in poor areas, apartment houses on very expensive land, and houses built experimentally by non-traditional methods.

"Minimum standards for houses being built have been set by the Ministry of Health, and licences are granted almost exclusively for houses to be built for letting to low-income groups."

Supplementing the general housing program is a scheme to begin creating entirely new communities. The legislation (New Towns Bill) promulgated in April provides a fund of \$200,000,000 for the erection of a number of new scientifically planned communities (L.G., May, 1946, p. 585). "Each new town would be started by a Government-appointed Development Corporation and would aim at being completely self-contained."

Social Services

Reference is made to the Labour Government's proposals, promulgated in February (L.G., March, 1946, p. 287) providing social security for everyone, through a single compulsory weekly payment for all who can pay for all the eventualities that call for the need of funds, and a National Health Service making available complete medical, dental, specialist and hospital services to everyone free without qualification or limitation, but "retaining the choice of doctors by patients and the choice of activity of doctors" (L.G., April, 1946, p. 437). "Strong opposition is expected on some of the proposals of the Health Bill from the British Medical Association and other bodies, but the Government expect to enact the Bill by autumn and to have it in operation early in 1948."

Control of Investment

On February 5, the Government passed the Borrowing (Control and Guarantees) Bill extending the wartime control over the raising of money by the issue of shares and securities. The measure is designed to ensure that "the priority for raising new capital is determined by the relative importance of the national interest." The Bill also empowers the Treasury to guarantee loans up to \$200,000,000 in any one financial year in order to provide assistance in times of threatening depression.

In order to provide the public with "the fullest possible information of the progress being made in the struggle for recovery the Government initiated a new publication entitled *Monthly Digest of Statistics* on a great variety of trade and financial subjects."

Articles relevant to sections of the article dealing with the repeal of Trades Disputes and Trade Union Act and with the decasualization of dock workers may be found in the May issue, page 584 and the April issue, page 548 respectively of the LABOUR GAZETTE.

Collective Bargaining and Union Recognition in United States, 1945

ABOUT 13.8 million workers were covered by written collective bargaining agreements in the United States during the past year. This number represents 48 per cent of all eligible wage earners; that is, wage earners engaged in occupations in which unions were organizing and endeavouring to obtain written agreements in 1945. Although the total number covered decreased from 14.3 millions in 1944, the ratio of those covered by collective bargaining to the total number employed and eligible for coverage increased slightly from about 47 per cent to about 48 per cent.

These statistics are contained in an article in the April issue of the *Monthly Labour Review*, a publication of the United States Department of Labour.

The article states that in manufacturing industries slightly over 67 per cent (8 millions) of the production wage earners were employed under union agreements during 1945, compared with 65 per cent (over 8.75 millions) in 1944. Comparable totals in non-manufacturing industries were 34 per cent (5.8 millions) in 1945, and 33 per cent (slightly over 5.5 millions) in 1944.

Types of Union Recognition

The proportion of workers covered by closed- and union-shop clauses remained fairly stable in 1945, but employment under main-

tenance-of-membership clauses increased from 27 per cent (3.75 millions) in 1944, to 29 per cent (more than 3.9 millions).

Thirty per cent (almost 4.25 millions) of the workers were employed under closed- and union-shop with preferential hiring; a rise of about 2 per cent over 1944. Union-shop clauses without hiring preference, accounted for 15 per cent in 1945 compared to 18 per cent in 1944. Preferential hiring was provided for 3 per cent (2 per cent in 1944) of all the workers, and 23 per cent were covered by agreements specifying recognition only compared to 25 per cent in the previous year.

Check-off

Slightly over 5.3 million workers, or about 39 per cent of all employees under agreement, were covered by check-off provisions in 1945. A little less than half of these were under automatic check-off provisions and the remainder were under clauses which necessitated authorization by the worker before the employer would deduct his union dues.

Nearly 4 million workers, representing about half of those under agreement, were employed under check-off provisions in 1945. In non-manufacturing, check-off applied to over 1.3 millions or about 24 per cent. One-third of these specified automatic deduction of dues, while two-thirds specified check-off only on individual authorization.

TREND IN UNION RECOGNITION IN THE UNITED STATES, 1941-45

Item	1941	1942	1943	1944	1945
Eligible for union-agreement coverage:

Annual Wage Plans in the United States

A REPORT on annual wage plans in the United States (L.G., Aug., 1945, p. 1266) was published in the January-February issue of the *International Labour Review*. It gives a brief review of the advantages and objections to guaranteed wage and employment plans and conditions of their operations.

"The Annual Wage", it states, "is being increasingly advocated in the United States as a means of providing income security for the workers and thereby contributing to the solution of the problem of intermittent unemployment". The methods of achieving this vary greatly, but the two principle types of plans are the guaranteeing of a fixed number of hours or weeks of employment and the guarantee of a regular weekly wage throughout the year regardless of fluctuations in employment. There are a number of variants and combinations of these two in existence. Only a few guarantee employment or wages for a whole year or to all or the great majority of the employees.

"Advocates of the annual wage system maintain that it affords one of the most practicable ways of mitigating the unfortunate social and economic effects of unemployment, both seasonal and cyclical". Reduction of labour costs, through the diminution of labour turnover and absenteeism, coupled with increased productivity, could be expected from the introduction of such a plan, the report holds. It would also encourage stabilized production and employment within the plant thereby improving the efficiency of operation by eliminating the uneconomical irregular utilization of equipment.

Employers are willing to concede certain advantages of the annual wage, the report states, but they frequently oppose it on the grounds that enforced wage payments over a 12-month period would impose an unbearable expense upon business. The plan is impracticable, they claim, where cyclical or seasonal fluctuations in business activity make regularized employment very difficult or more expensive. "Another argument against annual wage plans is that they create a preferred class among workers, probably to the advantage of organized workers strong enough to enforce their demands for the plan and that it would aggravate the sense of insecurity among those workers who were employed under other wage systems".

The report states that a company can do much to reduce internal fluctuations so as to

regularize employment preparatory to introducing an annual wage plan. Control over demand is most frequently the salient factor in achieving control over production and in turn over employment.

A study of distribution techniques based upon market and product analysis may bring forth methods of placing sales on a more uniform basis. It can encourage more regular consumption by advertising and by education of the customer, by its price policy, and by other means. Regularization will require a more careful planning and control of production schedules; "it may also be useful to arrange with other employers to dovetail labour requirements and to adopt central hiring methods."

The study states that the possible variations in both schemes and in the adaptation of them "constitute a safeguard for employers and enable them to offer guarantees without assuming too great financial responsibilities." Furthermore, specific safeguards which permit modifications to be carried out during exigencies are sometimes provided for in agreements.

Demand for the Annual Wage

The report reviews the statements of some representatives of management and labour regarding annual wage plans. "The demand for an annual wage plan has become a feature of C.I.O. policy in all industries". A past president of the Chamber of Commerce urged businessmen to study the means of regularizing employment in their industries; he remarked that "those concerns that have worked out a greater job stability have found that it is good business".

The American Management Association, in a report on annual wages, concluded that employment stabilization is more practicable in industry than is generally thought. Sixty per cent of the work force, it claimed, was engaged in non-durable goods production which is relatively stable.

In March, 1945, pursuant to a request from the late President Roosevelt, the Advisory Board of the Office of War Mobilization, which includes representatives of labour, management, agriculture and the Government, undertook a comprehensive study of wage plans for the purpose of determining the applicability of annual wages to American industry. The results of the study have not as yet been released.

Rehabilitation

Manuals on Armed Forces' Trades

Department of Labour Co-operates with Services in Rehabilitation of Veterans

ACCORDING to estimates recently released by officials of the Armed Forces, at least 50 per cent of demobilized personnel have some recognized qualifications or skill that can be turned to account in civilian industry. Many of these skills were acquired and developed by such personnel while they were on active service. They are among the discharged veterans' most valuable assets and it is recognized that both the veterans and their future employers in peacetime industry should obtain the greatest possible benefit from them. This can only be attained after adequate appraisal of these specially acquired skills in terms of civilian industry.

A realization of the need for accurate interpretation prompted officials of the Employment Service of the Unemployment Insurance Commission to prepare, in 1943, a series of volumes entitled "Manual of Service Trades and Civilian Equivalents". These volumes were issued in August of that year. While they were incomplete in several details, nevertheless they served a useful purpose in rehabilitating veterans then being invalided out of the Services.

Revision and Enlargement of Manuals

The Armed Forces, however, felt that when full-scale demobilization began, it would be necessary to provide employers with more complete details than were given in the UIC manuals and, as a result, the Services began to compile their own volumes.

Air Force Manual.—The RCAF experimented by preparing a manual explaining Air Force trades, as part of their counselling program. Early in 1945, Air Force officers made a canvass of Canadian employers to determine the type of material that would be of greatest value for the placement of Air Force personnel after their return to civilian life. As a result of this canvass the officers decided that it would be sufficient to provide a detailed outline of each Air Force trade and allow the prospective employer to make his own evaluation of Air Force veterans.

This procedure differed from that in the earlier manuals prepared by the UIC in that it did not relate Air Force trades directly to civilian occupations. The Air Force officers felt that it would not be desirable to limit the extent of a man's usefulness by pinning him down to a specific category in a prospective employer's mind. The "Employers' Guide", which was prepared by the RCAF's Directorate of Personnel Counselling, was ready for distribution in July, 1945.

Instead of giving definite fields of civilian employment into which certain RCAF tradesmen could assimilate themselves, the "Employers' Guide" contained a series of charts showing related occupational aptitudes. These were based on an interpretation of tests which were intended as a guide for Air Force personnel in order that they might classify themselves according to intelligence, as well as to mechanical and clerical knowledge.

Naval Manual.—"Naval Rates—Their Meaning for Employers" was undertaken in August, 1944, and was completed in May, 1945.

The Naval manual, prepared by the Navy's Directorate of Personnel Selection, described approximately 90 ratings or trades and information was given concerning the qualifications for entry into the Navy; the academic, technical and practical training received by Naval Personnel, the type of work each sailor or wren had been doing; and the qualifications required for promotion. Descriptions of each rating were followed by an outline of related civilian employment.

In addition to the manual, each man or woman discharged by the Navy is provided with a document giving information with regard to their capabilities which could be used in conjunction with "Naval Rates—Their Meaning for Employers".

Another feature of the Naval Manual is the provision of an Industrial Location Summary, which can be referred to in order to show all the Naval Trades which are applicable to each civilian industry. In this manner nearly 100 main industries have been cross-referenced so that a prospective employer may

pick up this Industrial Location Summary and, at a glance, discover which naval trades apply to the particular employment which he has to offer.

Army Manual.—The manual "Army Employment—Civilian Jobs" was prepared jointly by the Department of National Defence (Army) and the Research and Statistics Branch of the Department of Labour (L.G., Feb., 1946, p. 162). The basic material for the description of Army trades was gained through analyses of work sheets on which full and technical answers described in detail each job element, including tools, materials, machines and skills. Once this information had been gathered, the task of describing the Army trades and relating civilian occupations was undertaken by the Occupational Research Division of the Research and Statistics Branch.

The description of the Army trades is followed by three groupings of related civilian occupations, the first requiring no additional training, the second requiring brief additional training and the third requiring considerable further training, in most cases, preferably, on the job.

In addition to Related Civilian Employment, the Army manual also gives "Related Fields of Work" which suggests other related fields in which the Army tradesman can rehabilitate himself.

Distribution and Extension of Use of Manuals

The manuals were distributed to all employers of more than 15 persons, officials of the National Employment Service, Trade Unions, Universities, Vocational Schools, and other rehabilitation authorities. Then began the task of explaining and interpreting the manuals to those who would use them.

The Air Force followed up the distribution with a series of meetings across the country. The purpose of these meetings was to explain the use of the manuals to National Employment Service officials at Regional centres and to recommend methods to be followed in familiarizing employers with the manuals. It was left to personnel of both the Air Force and the Employment Service to insure that this information was passed on to the personnel of the Local Offices within the Regions.

As a further step to bring the "Employers' Guide" before employers, Air Force rehabilitation liaison officers undertook personal visits to employers to explain the use of the manual and provide information on Air Force veterans.

The Navy carried out a similar promotional and instructional campaign for its manual about the same time. Following the lead of the Air Force, a series of Dominion-wide conferences was held between officials of the Navy and those of the Employment Offices. Following these conferences, naval officers stationed at regional points across the country made periodic visits to local offices of the National Employment Service to assist in the use of "Naval Rates—Their Meaning for Employers".

The Army Manual was not printed until January, 1946. It was found that, due to the large number of Army Trades, this manual could not be ready for the commencement of the demobilization period. It is expected however, that Army veterans who were discharged before the publication of "Army Employment—Civilian Jobs", can obtain assistance in their re-employment problems by consulting officials at local offices of the National Employment Service who use the manual when placing ex-army personnel.

Employment for Silicotic Miners in South Wales

A committee set up by the British Board of Trade has investigated the problem of providing work in South Wales for miners no longer fit for their jobs because of silicosis and pneumoconiosis. After consulting medical experts, the committee, which included two Members of Parliament, officials of the Board of Trade and Ministry of Labour, silicotics, and municipal officials, found that most of the men suffering from these diseases are capable of work in any light industry not involving work in dust or fumes, heavy lifting, or long-distance travelling. The few ex-miners requiring "sheltered" employment could be given it by a scheme to induce new industries to settle in the areas where the victims live and to persuade firms to employ these men.

It was recommended that the Government build a small number of factory premises throughout South Wales and that occupiers of these factories should be obliged to have at least half their staffs composed of "disabled persons" as defined under the Disabled Persons (Employment) Act, 1944. In return, the occupiers would pay only half the usual rent. The committee considers that silicotics and pneumoconiotics would naturally be preferred to other "disabled" persons since they are reasonably fit. In addition, other government-owned factories should be leased at lower rates in proportion to the number of disabled persons employed by the occupiers.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

Corbin Lock Company of Canada, Limited, Belleville, Ont., Belleville-Sargent and Company, Limited, Belleville, Ont., and United Automobile Workers of America (CIO).

The American Pad and Textile Company, Chatham, Ont.

Donald Ropes and Wire Cloth Limited, Hamilton, Ont.

United Packinghouse Workers of America and Alberta Meats Ltd., Vancouver, B.C., Burns and Company, Ltd., Vancouver, B.C., Canada Packers Ltd., Vancouver, B.C., Swift Canadian Company, Ltd., Vancouver, B.C., Swift Canadian Company, Ltd., New Westminster, B.C., Gainers Ltd., Vancouver, B.C., and Fletchers Ltd., Vancouver, B.C.

A. V. Roe Canada Limited, and Aeronautical Lodge 717, International Association of Machinists.

Alberta Hotel Licensees and Hotel and Restaurant Employees and Beverage Dispensers International Alliance, Locals 265, 185, 172, 308.

International Silver Company, Limited, and the United Electrical, Radio and Machine Workers of America, Locals 520 and 505, Hamilton and Niagara Falls, Ont.

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Burns and Company, Limited, Vancouver, B.C., and United Packinghouse Workers of America, Local 249.

Dominion Steel and Coal Corporation Limited, and United Steelworkers of America, Local 1064.

Algoma Steel Corporation Limited, Sault Ste. Marie, Ont., and International Association of Machinists, Lodge 485.

Corporation of Penticton, Penticton, B.C., and International Brotherhood of Electrical Workers.

Royalite Oil Company, Limited.

Coleman Lamp and Stove Company, Limited, Toronto, Ont.

The John Bertram and Sons Company, Limited, and the International Association of Machinists, Lodge 1740.

Re: Corbin Lock Company of Canada Limited, Belleville, Ont., Belleville-Sargent and Company, Limited, Belleville, Ont., and United Automobile Workers of America (CIO).

Interim Reasons for Decision

The Union applied to the Regional War Labour Board for Ontario for orders directing both Companies to increase wage rates for the several hourly rated occupational classifications in their respective plants at Belleville, Ontario. In and by its decision of January 3, 1946, the Regional Board dismissed the Union's applications, except in respect of starting rates. In the case of Corbin Lock they directed increases in the starting rates amounting to 1½ cents per hour for female employees and up to 10 cents an hour for males. In the case of Belleville-Sargent they directed increases amounting to as much as 15 cents an hour for male employees. The Regional Board's direction apparently did not alter the starting rates for females in the Belleville-Sargent plant. In addition to the foregoing the Regional Board directed the Companies to add to those starting rates 4

cents an hour for females and 5 cents an hour for males when the employee concerned had served for three months.

The Companies applied to the Regional Board for leave to appeal and the Regional Board dismissed the application. Following such dismissal applications for leave were made to this Board and at the same time briefs on appeal were filed.

The facts of and the principles involved in the Corbin Lock case are the same as those in the Belleville-Sargent case. Accordingly we deem it expedient to deal with both cases in this decision.

The main ground in support of the application for leave to appeal and the appeal is that the starting rates, as directed, have the effect of disturbing the entire wage schedules of the two Companies. It is also argued by the Companies that some distinction should be made between the rates of pay for boys

and girls and apprentices, on the one part, and for adults who are starting to work for one or other of the Companies, on the other hand.

Apparently, the Regional Board thought that the directed starting rates would not have the effect claimed by the Companies. However, Counsel for the Companies and one of the representatives of the Union gave some examples showing how and to what extent the increases in the starting rates would affect the wages of other employees. This argument was to some extent confirmed when we examined the schedules of rates of the two Companies.

In view of the fact that the Regional Board dismissed the greater portion of each of the Union's two applications, it becomes obvious to us that the Regional Board did not intend to have in its decisions all the implications which it now appears to have. Accordingly, we allow the application for leave to appeal.

Having regard for all the circumstances in these cases, we consider that it would be

inadvisable to render decisions on the appeals at this time. It seems to us that it would be in the best interests of all concerned if the parties negotiated on the issues involved herein. For this purpose we shall adjourn these appeals until June 18, 1946. In the meantime the parties should endeavour to reach a settlement and to report to this Board before that date on the results of those negotiations.

We suggest to the parties that they consider whether there should be differentials in the starting rate for boys under 19, girls under 18 and apprentices and adult male and female employees. We also ask the parties to endeavour to agree upon what those several starting rates should be. Further we ask the parties to show us what adjustments, if any, should be made to the rates for experienced adult workers to maintain proper differentials. In the meantime, the decisions of the Regional Board made in these cases shall not have effect.

May 7, 1946.

Re: The American Pad and Textile Company, Chatham, Ont.

Reasons for Decision

The Company engaged the services of a firm of management engineers to develop a standard hour production bonus plan to replace a piece rate system in effect for production workers in four departments in its plant at Chatham. While the engineers were developing the plan it was made to appear to them that the plan they proposed for the production workers would operate more effectually if there was also in effect a companion plan for the supervisors in those departments. Both plans were developed and in due course presented to the Regional War Labour Board for Ontario, for approval. The Regional War Labour Board approved the standard hour production bonus plan and rejected the other plan.

With leave of the Regional War Labour Board the Company appeals from that part of the Regional Board's decision which rejected the plan for supervisors.

In and by the Regional Board's decision the Company was directed to furnish the Board with a detailed report showing the results from the first three months of operation of the production workers plan, on the earnings of the employees concerned and the effect on production. The plan has not yet been installed. The Company takes the position that the two plans must be operated contemporaneously in order that the results of the production workers plan might be as visualized by those who developed it.

The Regional Board's reasons for rejecting the plan for supervisors were that it was not, in the Board's opinion, a proper method of remunerating such employees, and further, that because the plan provides means whereby the supervisors might, in addition to their regular rates, obtain remuneration consequent upon increased production in the plant, there would be a tendency on the part of those supervisors to step up production to a level which could not be maintained without causing harm to the health of the workers and labour unrest.

With respect we must say that the evidence presented on appeal does not lead us to the view held by the Regional Board. Our view is that the two plans working together will result in greater co-operation between the supervisors and the production workers. The supervisors can contribute extra effort directly and in a measurable extent by giving more intensive training to the workers, obtaining the best usage of materials, reducing time lost in repairing mechanical faults of equipment and seeing to it that material to be processed or manufactured is available to the workers at the proper time. Admittedly, the supervisors will benefit under the scheme, but so will the production workers. As the supervisors streamline their jobs so will the opportunity become available to the workers to step up their productivity and earnings.

We believe that it is reasonable to permit the Company to give the plan a trial. The

appeal is, therefore, allowed. The conditions as to reporting results as imposed by the Regional Board in respect of the standard hour production bonus plan shall apply with

equal effect to the supervisors' plan hereby approved. There will be a Finding and Direction accordingly.

May 13, 1946.

Re: Donald Ropes and Wire Cloth Limited, Hamilton, Ont.

Reasons for Decision

In June, 1945, the Company and United Steelworkers of America, Local 3325, applied to the Regional War Labour Board for Ontario for a direction authorizing the Company to increase wage rates, adjust certain working conditions and install a standard hour incentive plan for production workers. The Regional Board approved the application in full. The Company thereupon gave effect to that approval.

In February of this year the Company applied to the Regional Board for permission to inaugurate an incentive plan for supervisors. The Regional Board rejected the application, and later granted leave to appeal from its decision.

The Company reports that its standard hour incentive plan is working satisfactorily but that it is not as beneficial to the workers concerned as it should be. It is also said that there is too much delay in time and work which is of non-standard nature; as a result the workers are not getting as full an opportunity as the plan contemplates, for them to earn a reasonably good incentive bonus.

Management engineers have made a study of the problem and have assigned definite reasons why the production workers' plan has not achieved the results anticipated. Those reasons need not here be mentioned. The engineers offer, as a means of correcting the situation, an incentive plan for supervisors.

The plan for supervisors is designed to achieve two results. Firstly, it should increase the amount of incentive time for production workers and, conversely, reduce the extent of avoidable delays. Secondly, the plan provides incentive to the supervisors to maintain increased efficiency.

As to the first point, the plan would operate as follows. When a production worker loses time from incentive work for such reasons as waiting for work (material), imperfect materials, power failure or break-

down of machinery, he receives an allowance expressed in hours and paid for at his base rate. The total of such allowance is accumulated and is compared with the total standard hours produced to determine the allowance ratio for the period (four weeks). Under the supervisors' plan a special incentive of 4 per cent on salary will be paid the supervisors for each reduction of 1 per cent below the past minimum, in the ratio of allowance (non-productive) hours to standard hours.

For maintaining the performance rating of the department, an incentive reward is paid the supervisor. The reward increases as the departmental efficiency of direct labour increases.

The Regional Board did not give reasons for dismissing the Company's application. It is fair to assume, however, that their views on this case correspond to those expressed in the American Pad & Textile Company Limited case (*see above*). Our reasons for approving the application in the American Pad case apply in this case.

We have ascertained the attitude of Local 3325 towards the proposed plan for the supervisors. We find that the Union, on behalf of the production workers, is prepared to co-operate with the Company in giving the plan a fair trial.

We allow this appeal and authorize the Company to inaugurate its incentive plan for supervisors. We direct the Company to report to us the results of such plan upon the first three months' earnings of the supervisors. At the same time, the Company must provide us with a statement showing the earnings of the production workers for the same three months. Such matters as unit labour cost and the results in production should also be disclosed.

There will be a Finding and Direction accordingly.

May 13, 1946.

Re: United Packinghouse Workers of America and Alberta Meats Ltd., Vancouver, B.C., Burns and Co., Ltd., Vancouver, B.C., Canada Packers Ltd., Vancouver, B.C., Swift Canadian Co., Ltd., Vancouver, B.C., Swift Canadian Co., Ltd., New Westminster, B.C., Gainers Ltd., Vancouver, B.C., Fletchers Ltd., Vancouver, B.C.

Reasons for Decision

On or about March 20, 1945, the Union applied to the Regional Board for:—

- (a) A minimum wage of 75 cents per hour.
- (b) A standard work week of 44 hours.
- (c) Night Shift premium of 5 cents per hour for all the hourly rated employees of the following companies:

Alberta Meats Ltd., Vancouver, B.C.

Burns and Co., Ltd., Vancouver, B.C.

Canada Packers Ltd., Vancouver, B.C.

Swift Canadian Co., Ltd. (Branch House), Vancouver.

Swift Canadian Company, New Westminster, B.C.

Gainers Ltd., Vancouver, B.C.

Fletchers Ltd., Vancouver, B.C.

On July 3, 1945, the Regional War Labour Board for British Columbia dismissed the Union's application, and later the Union applied for and obtained leave from the British Columbia Board to appeal to the National Board. Prior to November 2, 1945, the Union perfected its appeal to the National Board and elaborate briefs were filed in support of the application and on behalf of the companies affected, in reply thereto. Before the appeals were heard the Honourable Mr. Justice Richards was appointed as Industrial Disputes Inquiry Commissioner and after protracted negotiations Mr. Justice Richards did on November 2, 1945, publish his conclusions which will be hereafter referred to as the "Winnipeg Settlement".*

Counsel for both the Union and the Companies involved, signed these conclusions indicating their acceptance thereof on behalf of their respective clients.

Following the Winnipeg Settlement no steps were taken with regard to the Union's appeal until recent weeks when the Union advised this Board that they intended to abandon all matters raised in their notices of appeal, except the night shift premium of 5 cents per hour. Inasmuch as the Winnipeg Settlement provided for payment of the night shift premium, the only point in the appeal was the effective date.

The hearing was scheduled for May 8, and all interested parties were duly notified. Present at the Hearing were representatives of the Union; Swifts Canadian Limited;

Canada Packers Limited; Burns and Company, Limited and was restricted by agreement to the date upon which payment of the night shift premium of 5 cents per hour should become effective. The Union contended that the effective date should be March 20, 1945, the date upon which the Union filed its application with the Regional Board. The Union also suggested that there were other dates that might be considered, viz: July 3, the date upon which the Regional Board dismissed the Union's application or September 25, the date of an order made by the Regional War Labour Board which will be referred to later, or November 1, upon which date all agreements between the Union and the Packing House Companies were to become effective.

There are four clauses in the Winnipeg Settlement which have a bearing on this application—Clause 10, Clause 31, Clause 32, and Clause 33, as follows:—

- 10. It is agreed that night premiums on the scale now in force are acceptable to the Companies provided that they apply to hours worked between 6 p.m. and 6 a.m., except where by local agreement other hours have been or shall be agreed upon.
- 31. All new agreements between the Companies and the Union or local Unions shall be deemed to have become effective on November 1, 1945, and wage increases shall be retroactive to that date. All such agreements shall continue in effect until August 1, 1946. Any Company or the Union may give notice of intention to open negotiations for a new agreement, provided that such notice must be given in writing on or before July 1, 1946. Failing such notice, the agreements shall be deemed to be renewed on August 1, 1946, for a further period of one year.
- 32. All applications now pending before any Labour Board which are inconsistent or at variance with the provisions of these recommendations shall be withdrawn.
- 33. The parties will jointly seek the approval of the Dominion Government and such other authorities as may be interested so far as may be necessary to give effect to this understanding at the earliest possible date.

Clause "10" deals with night premiums and the language used amounts to an agreement to pay night premiums particularly as the Winnipeg Settlement was approved by Counsel for both the Union and the Companies.

Clause "32" provides for the withdrawal of all applications now pending before any Labour Board which are inconsistent or at

* L.G., Nov., 1945, p. 1673.

variance with the provisions of the Winnipeg Settlement. This Board finds that the present appeal is an application which was pending before a Labour Board (the NWLB) at the time of the Winnipeg Settlement, and inasmuch as Clause "10" contains an agreement as to the night premium, the subject-matter of the present appeal would be at variance with the terms of the Winnipeg Settlement.

It will be noted that by Clause "31" all new agreements are retroactive to November 1, 1945.

For the above reasons, this Board is of the opinion that the present appeal was disposed of by the terms of the Winnipeg Settlement and the present application by the Union will therefore be dismissed.

On September 25, 1945, the Regional Board for British Columbia issued its Finding and Direction directing the said companies to pay a night premium of 5 cents per hour effective March 20, 1945. This Finding and Direction was a reversal of its order made on July 3, 1945, and was made after the Regional Board had granted leave to the Union to appeal on the very question contained in the Finding and Direction of September 25, 1945. This order was made without notice to either Swift Canadian Company, Limited, or Canada Packers Company Limited. Both these companies have appealed to this Board for an order setting aside the order of September 25, 1945, in so far as it affects them.

In our opinion, Swift Canadian Company and Canada Packers Company Limited were entitled to notice from the Regional Board of any application to direct payment of a night premium and should have been given an opportunity to be heard before such order was made. For these reasons, the order in question cannot stand and will therefore be revoked in so far as it applies to Swift Canadian Company Limited and Canada Packers.

Following the Winnipeg Settlement, Swift Canadian Company Limited and the appropriate Union applied jointly to the Regional War Labour Board for an order implementing certain terms of the Winnipeg Settlement including the night shift premium applicable to the employees of Swift Canadian Company Limited at New Westminster.

On November 22, the Regional Board issued its Finding and Direction granting all items referred to in the joint application with the exception of the night shift premium of which no mention was made.

It should be noted that by this joint application, the effective date for payment of the night shift premium was to be November 1, 1945.

In our opinion on this application the Regional Board should have made an order for payment of the night shift premium, consequently, there will now be an order directing Swift Canadian Company Limited to pay to its employees at New Westminster employed between the hours designated in clause "10" of the Winnipeg Settlement, the night shift premium of 5 cents per hour effective November 1, 1945.

The Branch House of the Swift Canadian Company, Limited, at Vancouver was not included in the Winnipeg Settlement. For the sake of uniformity, the Company now desires to pay a night shift premium of 5 cents per hour to its employees at Vancouver, and requested this Board to so direct. Strictly speaking, this application should be referred back to the Regional Board but as the same Union represents both the employees at Westminster and Vancouver, it was felt that the matter should be dealt with now. Accordingly, there will be a Direction that Swift Canadian Company pay its employees at Vancouver a night shift premium of 5 cents per hour effective November 1, 1945, on the same terms as at the Company's plant at New Westminster and for those employees engaged between 6 p.m. and 6 a.m.

The position of Canada Packers presents more difficulty. In November, 1945, Canada Packers and the Union applied jointly to the Regional Board for an order approving certain terms of the Winnipeg Settlement applicable to the employees of Canada Packers Limited. They did not include in their application a request for approval of the night shift premium. This term of the Winnipeg Settlement, therefore, has not received approval of the Regional War Labour Board.

Clause "10" of the Winnipeg Settlement states in effect that the parties thereto have agreed upon the payment of a night shift premium and there was no dispute before this Board that a night shift premium should be paid to the employees of Canada Packers. According to the Winnipeg Settlement, all new agreements were to be effective November 1, 1945. Strictly speaking, this matter should be referred to the Regional War Labour Board for approval but as all the parties were before this Board and in agreement on the question of payment of the night shift premium, this Board felt that the matter should be disposed of without the necessity of a further hearing. For the sake of uniformity and to give effect to the terms of the Winnipeg Settlement, there will be an order directing the Canada Packers to pay to its employees at Vancouver engaged between the hours of

6 p.m. and 6 a.m. the night shift premium of 5 cents per hour effective November 1, 1945.

The position of Burns and Company Limited, likewise presents some difficulty. This Company entered into an agreement with its employees in October, 1944, which provides for payment of a night shift premium. While it is not altogether clear just when the Company commenced payment of the night shift premium, it would appear that they at least did so in January, 1945, for those employees engaged between 10.30 p.m. and 7 a.m. and have continued so to do up to the present time.

On September 25, 1945, the Regional Board directed Burns and Company to pay a night shift premium of 5 cents per hour effective March 20, 1945, and apart from this order there is no authority for such payment by Burns and Company Limited. Neither the Union nor Burns and Company Limited, have appealed from this order, and it therefore

stands in so far as Burns and Company Limited is concerned.

At the hearing it was stated that the Company had entered into an arrangement with its employees that the hours for which the night shift premium should be paid would be 7 p.m. to 7 a.m. Clause "10" of the Winnipeg Settlement provides for payment of the night shift premium between the hours of 6 p.m. and 6 a.m., except where by local agreement other hours have been or should be agreed upon. There will, therefore, be an order directing Burns and Company Limited, to pay its employees at Vancouver a night shift premium of 5 cents per hour for hours worked between 7 p.m. and 7 a.m. effective November 1, 1945.

This Board makes no Finding with respect to the night shift premium paid by Burns and Company Limited prior to November 1, 1945. There will be Finding and Directions accordingly.

May 14, 1946.

Re: A. V. Roe Canada Limited and Aeronautical Lodge 717, International Association of Machinists

Reasons for Decision

On December 1, 1945, A. V. Roe Canada Ltd., took over the enterprise formerly carried on by Victory Aircraft Limited at Malton and assumed the obligations of Victory Aircraft Limited including its agreement with Aeronautical Lodge No. 717 International Association of Machinists. This agreement had some two months to run when assumed by A. V. Roe Canada Ltd., and the said Company continued to pay the wage rates established by the said agreement including a travelling allowance of 25 cents per day.

The agreement covering the travelling allowance in question included only those workers represented by the Union. For the sake of uniformity, both A. V. Roe Canada Ltd., and its predecessor paid the travelling allowance to its monthly rated as well as to its hourly rated employees. A new agreement was negotiated by the Company with the Union incorporating the rates paid by Victory Aircraft Ltd., and setting out other working conditions and it was agreed that a joint application should be made for approval of said rates.

It was understood that the Company would apply to the Regional Board for leave to discontinue the payment of a travelling allowance and that the application would be opposed by the Union.

The said applications were made to the Regional Board and the rates were approved and by the said Finding and Direction the

Company was refused permission to discontinue the travelling allowance on the ground that it varied an established working condition resulting in a decrease in pay. From such refusal the Company appealed to this Board.

Strictly speaking, A. V. Roe Canada Ltd. being a new enterprise should have applied to the Regional Board for approval of its rates as established by the agreement with the Union of Victory Aircraft Limited. From the material submitted, it would appear that A. V. Roe Canada Ltd., accepted the rates and working conditions of Victory Aircraft Limited and therefore established the payment of the travelling allowance as a working condition. This practice was recognized on December 1, 1945, and is still being followed by the Appellant Company.

Furthermore, in view of the scarcity of building materials and the prevailing housing shortage it would not be possible for employees to change their residence.

This Board is of the opinion that it would be unwise to disturb any established working condition at this time and therefore directs A. V. Roe Canada Ltd., to pay its hourly rated employees a travelling allowance of 25 cents per day effective December 1, 1945.

The Company will also be authorized to pay its weekly and monthly rated employees a travelling allowance of 25 cents per day, and to the extent aforesaid, the Finding and Direction of the Regional Board for Ontario will be varied.

May 8, 1946.

Re: Alberta Hotel Licensees and Hotel and Restaurant Employees and Beverage Dispensers International Alliance, Locals 265, 185, 172, 308

Reasons for Decision

In this matter the facts and the decision relate to four Findings and Directions of the Regional War Labour Board for Alberta. In each of the said Findings and Directions, the Regional Board for Alberta directed the owners of all hotels in Calgary, Medicine Hat, Lethbridge, and the Crows Nest Pass Region to pay:—

- (a) Tapmen \$35 00 per week
- (b) Floormen 32 00 per week
- (c) Sparemen 5 50 per day

Some other matters were referred to in the said orders but the hotel proprietors in each of the said districts have only appealed from that part of the said Findings and Directions fixing the wages of Tapmen, Floormen and Sparemen as above set forth. The wages prevailing in Calgary prior to the order were Tapmen \$34.60, Waiters and Floormen \$28.60 and Sparemen \$5 per day. It will be noted that the order of the Regional Board increased the weekly wage of the Tapmen by 60 cents and any such increase cannot be regarded as a gross injustice or a gross inequality requiring correction by war labour boards.

For some years, the Union has had an agreement with hotelkeepers in the districts above named and by these agreements a differential as high as \$6 per week in Calgary was established between Tapmen and Waiters. So far as we can ascertain, there was no evidence before the Regional Board and certainly there was no argument advanced before this Board which would justify interference with the established differential above referred to.

The hotel units are competitive with each other in their respective localities and for comparative purposes, references should have been limited to the hotel units in each locality. Comparison as to rates should not have been made outside the districts where the individual hotels are located, and assuredly comparisons with rates effective in other provinces should not be permitted. It may well be that rates higher than those established by agreement with the Unions were paid by one or more hotel proprietors in isolated cases and for each of these exceptions there was offered an adequate explanation. In any event, the rates payable to the majority of employees rather than the rate to the exception would be the standard of comparison.

The applications which led to the Regional Board's decisions now under appeal, were made at the time when a war labour board was empowered to direct wage increases in order to rectify a gross injustice or inequality in the previously established rates. The onus was upon the applicants in each case to prove that such injustice or inequality existed. In our view, the applicants failed to provide such proof. Moreover, the analysis which we made of the cases in question did not support the plea that any injustice or inequality existed in the current wage rates. In the circumstances, the appeals must be allowed.

That part of the Regional War Labour Board's Order fixing wage rates for Tapmen, Floormen, and Sparemen will be set aside. There will be a Finding and Direction accordingly.

May 7, 1946.

Re: International Silver Company, Limited and the United Electrical, Radio and Machine Workers of America, Locals 520 and 505, Hamilton and Niagara Falls, Ont.

Reasons for Decision

The United Electrical, Radio and Machine Workers of America, Locals 520 and 505 joined with International Silver Company Ltd., in an application to the Regional Board for permission to increase its prevailing piece-work rates by 15 per cent and increase its basic hourly rates by 15 per cent for all employees engaged in the Company's plants at Hamilton and Niagara Falls. This application was dismissed by the Regional Board and from such dismissal, both the Company and the Union appeal by leave of the Regional Board.

The application to the Regional Board is dated December 4, 1945; the case was heard in the month of February and the decision of the Regional Board was handed down on February 25, 1946, after the effective date of P.C. 348. The Regional Board apparently proceeded on the principle that the Company's rates did not amount to a gross injustice or gross inequality. The application was based upon a complete study of the wage structure both by the Company and the Union.

The production of International Silver Company Limited, is distinct and different

from that of any other similar industry in Canada, and therefore appropriate comparisons are impossible. During the depression years, the Company found it necessary to reduce wages by three successive 10 per cent cuts, one of which was restored up to 1939, and a further 10 per cent was restored in April, 1941. Since the inception of wage control, wages of these employees have been increased only by the required cost-of-living bonus. During the war years, employees worked 48 hours. Since then, and by agreement the work week has been reduced to 45 hours which amounts to a reduction in take-home pay of approximately 6.7 per cent.

It would be difficult to say that these facts amount to a gross injustice and because of the fact that there is no other similar industry, it cannot be said that the rates are low by comparison. However, rather than put the parties to the expense of a new application this Board is of the opinion that under Sec-

tion 20 (1) (a) as amended by P.C. 348, the Board should endeavour to find some other "basis" upon which it would be "reasonable" to consider the application.

The Company filed with the Regional Board an undertaking that it would not use any increase granted pursuant to this application as a basis of an application to the Wartime Prices and Trade Board for an increase in the price of the commodities which it sells.

It seems to the Board that it would be reasonable in the light of all the circumstances and in view of this undertaking to grant the joint request and there will therefore be an order authorizing the Company to increase its prevailing hourly rates by 15 per cent and its prevailing piece-work rates by 15 per cent.

The order of the Regional Board will be revoked and Finding and Direction will issue accordingly.

May 14, 1946.

Re: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

Reasons for Decision

This is an application by the Union to direct the CPR Company to pay to its freight truckers at Port McNicoll, Ontario:—

(a) 68 cents per hour

(b) 5 cents night premium

(c) Time and a half for work done on Sundays.

In support of the said application the Union established that the above rates were payable to freight truckers at other inland lake ports.

It was also established that workmen at Port McNicoll loaded ships which would later be unloaded by other workmen receiving the higher rates of pay, and likewise, that ships which had been loaded by workmen receiving the higher rates of pay would in turn be unloaded by the Company's employees at Port McNicoll. In other words, the Company's employees at Port McNicoll are doing the same work as is done by other workers at comparable points in Ontario.

For the Company it was urged that its employees at Port McNicoll do work similar to that which is performed by employees in standard freight sheds throughout the Company's system and therefore should not receive greater remuneration than is paid in the standard freight sheds. Loading freight into box cars and into ships have some comparable features but it will be admitted that great care is required in loading a ship which will travel several hundreds of miles in weather

that cannot be predicted beforehand.

Employment at Port McNicoll depends upon the arrival of the ships, incoming and outgoing cargoes and is necessarily uncertain both as to hours in the day and days of the week, whereas, the workers in the standard freight sheds have regular hours six days a week the year round.

In its agreement with the Union, the Company has recognized the principle of payment of a night premium and those who work the night shift receive a premium of 2 cents per hour. It is true that night shift premiums vary. The principle having been accepted, it only remains to determine what is fair and reasonable under the circumstances. Night shift workers similarly employed at other points on the Great Lakes receive a 5-cent premium and as the Board has already found a similarity of work at Port McNicoll and other lake ports it seems to the Board that a night shift premium of 5 cents per hour would be reasonable.

In view of the uncertainty as to time of arrival of boats at Port McNicoll, it seems to the Board that Sunday should be designated as the day of rest for the employees and that any work done on Sunday should be paid for at the recognized rate of time and a half. This is the established practice in other lake ports and to do otherwise with the workers at Port McNicoll would amount to an injustice.

The principle involved in this application is one of comparison with a comparable in-

dustry in a comparable locality. The Board has not overlooked evidence to the effect that the principle of one day's rest in seven is accepted railroad practice. However, the Company has entered into the business of water transportation competitive with many other lines, and in that particular line of business will have to conform to its practices and established working conditions rather than those which obtain on the railroad.

This question has been before this Board on previous occasions dated as far back as 1942, and in the judgment of this Board dated August 20, 1943, there is this statement:

The freight handlers at Port McNicoll are railway workers engaged in railway operations.

Whatever the conditions in 1942 and 1943 which justify the foregoing statement, the facts are that to-day the Company's employees at Port McNicoll are engaged exclusively during the shipping season in the loading and unloading of ships, and that the extent of work depends entirely upon the cargo to be loaded and unloaded. There is no regularity or continuity about the work. The Company gives them employment when there is work to do, and assumes no responsibility for these men during the winter season when the port is closed. These men are on their own

resources in the winter season and obtain employment where they can find it. When one contrasts the position of these freight handlers at Port McNicoll with the position of the regularly employed freight handlers at standard freight sheds, it will be immediately apparent that the employees at Port McNicoll are not to-day railroad men in the true sense of that designation. There has been no Sunday work done at Port McNicoll since the opening of navigation in 1943, which is some evidence that Sunday work can be avoided.

It is not the intention of this Board to change standard railroad practice and this order should be so interpreted. There will therefore be an order directing the CPR to pay its employees at Port McNicoll:

- (a) 68 cents per hour.
- (b) 5 cents per hour night shift premium and for such hours commonly accepted as night shift.
- (c) Maintain present differentials.
- (d) Pay time and a half for all work done on Sundays.

There will be a Finding and Direction accordingly.

May 8, 1946.

Re: Burns and Company, Limited, Vancouver, B.C., and United Packing-house Workers of America, Local 249

Reasons for Decision

The Company appeals to the National War Labour Board from the decisions of the Regional War Labour Board for British Columbia as expressed in letters of the said Regional Board to the Company, which letters are dated October 11 and October 18, 1945.

This appeal is in respect of the wage rates which should be paid to two employees of the said Company. Prior to September 29, 1938, the Company had no "base rate schedule". By the Company's own admission, wage rates were determined according to the bargaining ability of the individual employee. On September 29, 1938, following a study by the Company, a wage rate schedule was introduced. By this schedule a rate or a range of rates was placed on each of the jobs performed in the Company's plant, but provision was made that where an employee received more than the rates prescribed, such employee would retain his higher rate so long as he remained on the job. This higher rate was referred to in this case as the "inherited rate".

The two employees in question recently resumed jobs of two men who, being old em-

ployees of the Company, were paid "inherited rates". The Union contends that the "inherited rates" in question are the established rates for those occupations since they were the rates which actually were being paid by the Company on November 15, 1941. The Company, on the other hand, argues that the "inherited rate" was a purely personal rate which was paid to employees earning more than the scheduled rate at the time of the introduction by the Company of its schedule. The Regional War Labour Board for British Columbia was of the opinion that the Company is obliged to pay the wage rates for the two job classifications in question which were being paid by them on November 15, 1941.

With much respect for the Regional Board, this Board is of the opinion that the wage schedule of the Company must be considered in its entirety. The wage schedule of the Company provides for differentials for various occupational classifications and a War Labour Board should not interfere with the Company's schedule per se as long as such schedule does not offend against Section 20 (1) (a) and 21 of the Wartime Wages Control Order,

P.C. 9384, as amended. The National Board accepts the Company's explanation which appears reasonable, namely, that the "inherited rates" are rates of pay above the going or agreed rates, and that the payment of such higher rates represents a special and personal arrangement between the Company and certain of its older employees to ensure the maintenance of the wage rates for such older employees. The wage rate schedule should not, therefore, be interfered with, but should

be regarded as the Company's established rates or ranges of rates for the purpose of the Wartime Wages Control Order, 1943, so that when an employee enjoying the "inherited" or higher rate leaves the Company's employ or is moved to some other classification in the Company's service, a new employee is entitled only to the scheduled rate for the occupational classification.

A Finding and Direction will be issued accordingly.
May 22, 1946.

Re: Dominion Steel and Coal Corporation Limited, and United Steelworkers of America, Local 1064

Reasons for Decision

The Union applied to the Regional War Labour Board for Nova Scotia for an Order, directing the Company to establish a minimum earning rate of 64½ cents an hour for all 8-hour employees over 18 years of age, being paid hourly, tonnage or piece work rates, or a combination of such rates, which result in present earnings of 59½ cents to 60½ cents an hour. The Regional Board was also asked to direct increases of 4 cents an hour for all other 8-hour employees over 18 years of age, excepting those employees who were affected by the Direction of the National War Labour Board, dated May 3, 1945 (L.G., June, 1945, p. 820). Corresponding increases were requested for other employees working on shifts of more than 8 hours' duration.

The Regional Board by its Decision of January 8, 1946, dismissed the application. The Union obtained leave to appeal from the Regional Board's Decision and the parties have been heard by us.

On behalf of the appellant, it was argued that the increases requested should be granted in order that the wage rates for the employees concerned be brought into parity with the wage rates in effect at Algoma Steel Corporation, Ltd., Sault Ste. Marie, Ontario, and at Steel Company of Canada Ltd., Hamilton,

Ontario. The same argument was presented to the National Board by this appellant in an appeal which came before the Board in 1945. The factors involved in this appeal are precisely the same as in the 1945 appeal (L.G., July, 1945, p. 955). In that case, the National Board, as then constituted, had this to say:

In the administration of wage control, both under Orders in Council P.C. 5963 and P.C. 9384, this Board does not subscribe to the doctrine that of necessity, wage rates should be equalized or standardized. The fact that one Regional War Labour Board directs an increase in wage rates, does not necessarily justify a Regional Board in another Province in directing a similar increase. The fact that wage rates in an industry may not be uniform, or have not been equalized in all sections of Canada, does not, in itself, indicate a gross inequality or gross injustice within the meaning of the Order in Council.

In the opinion of the majority of the National Board, nothing has been submitted in this appeal that would justify a departure from the National Board's previous Decision.

The Board therefore confirms the Regional Board's Decision and dismisses the appeal. There will be a Finding and Direction accordingly.

Note: Mr. J. A. McClelland, Member of the Board, dissents from the foregoing Reasons for Decision.
May 30, 1946.

Re: Algoma Steel Corporation Limited, Sault Ste. Marie, Ont., and International Association of Machinists, Lodge 485

Reasons for Decision

This is an appeal by the Company from a Decision of the Ontario Regional War Labour Board dated March 6, 1946. In that Decision the Regional Board directed the Company to increase wage rates for the classifications of Machinists, Fitters and Drill Hands. Whereas the Union requested the Regional Board to direct the Company to increase the said wage rates by 5 cents an hour, the Regional Board directed the Company to pay employees in

the three classifications at the same rate. This Direction had the effect of increasing wages of the Machinists and Fitters by 2½ cents an hour and of Drill Hands by 27½ cents an hour.

It is obvious that the Regional Board was not aware of the fact that at the time of the application the rate for Drill Hands was 25 cents an hour below that for the other two classifications. It is our view that no case has been made out in support of the request for an increase for the Drill Hands.

In April, 1944, the Ontario Board rejected a previous application of the Union for increases in the rates for Machinists and Fitters. That application was based upon a comparison of the rates paid to Machinists and Fitters in other Companies. The Regional Board's Decision was appealed by the Union and in this Board's Reasons for Decision, May 10, 1945 (L.G., June, 1945, p. 823), the National Board had this to say:

The rate now being paid to Machinists and Engine Fitters is 92½ Cents. The rate adopted by this Board for Journeymen in other maintenance classifications is 90 cents. The Union, however, argued that the rate for Machinists and Engine Fitters should be established by comparison with the rate being paid in other industries. We do not think that this argument will prevail against the necessity of keeping all employees in the maintenance group in line with the rates recently adopted. On that basis, there would seem to be no alternative but to dismiss the appeal.

The Company argued in this appeal that since the Decision of the National Board on May 10, 1945, there has been no change in the surrounding circumstances nor in the law as would justify or compel the abandonment of the policy then established, namely "the necessity of keeping all employees in the maintenance group in line with the rates recently adopted". There was no evidence presented to us to indicate any change in conditions or circumstances in respect of the two classifications in question that would justify a reversal of our Decision of May 10, 1945.

In view of the foregoing, we must allow the appeal and revoke the Regional Board's Decision. There will be a Finding and Direction accordingly.

May 29, 1946.

Re: Corporation of Penticton, Penticton, B.C. and International Brotherhood of Electrical Workers

Reasons for Decision

With leave of the Regional War Labour Board for British Columbia, the Corporation appeals from two Findings and Directions of that Board, dated April 5, 1946, and April 10, 1946.

On the application of the Union, the Regional Board directed the Corporation to increase the wage rates for certain occupational classifications in respect of the Corporation's employees employed in the distribution of electric power. The Finding and Direction directing such increases in wage rates was issued on April 5, 1946. Subsequently, on April 10, 1946, apparently without notice to the Corporation, the Regional Board decided that the wage rates granted in its Finding and Direction of April 5 were inadequate and, by another Finding and Direction, ordered the Company to pay wage rates which are higher than those stated in its Finding and Direction of April 5.

A careful study of all relevant material in this case leads us to the conclusion that the Regional Board made a thorough investigation of wage rates generally prevailing for the same or comparable occupational classifications in substantially similar localities.

Such investigation by the Regional Board apparently convinced them that the rates paid to the Corporation's employees are low in comparison with rates of other organizations which distribute power in localities similar to Penticton. We have made a careful comparison of relevant wage rates and have made allowance for wage rates in dissimilar localities. We are of the opinion that the Regional Board was justified in reaching the conclusion which it did, and that the said Board exercised reasonable discretion in the application of Section 20 (1) (a) of the Wartime Wages Control Order, 1943, Order in Council P.C. 9384, as amended.

It is unfortunate that the Regional Board reconsidered this case without giving prior notice to the Corporation. We do not find, however, that the Corporation has been prejudiced in any way by this action, nor do we think that such reconsideration resulted in any injustice to the Corporation.

Under the circumstances, therefore, we consider it reasonable to dismiss the appeal of the Corporation.

Finding and Direction will be issued accordingly.

May 30, 1946.

Re: Royalite Oil Company, Limited, and the Joint Industrial Council of Royalite Oil Company Limited, Calgary, Alta.; Madison Natural Gas Company, Limited, and the Joint Industrial Council of Madison Natural Gas Company Limited, Calgary, Alta.; Valley Pipe Line Company, Limited, and the Joint Industrial Council of Valley Pipe Line Company Limited, Calgary, Alta.

Reasons for Decision

On November 16, 1945, the Companies and the Unions entered into collective agreements, which agreements provided, inter alia, for the reduction in the work week from 48 to 40 hours and for an increase of 10 per cent in hourly wage rates. On January 19, 1946, the parties applied to the Regional War Labour Board for Alberta for permission to implement the collective agreement as and from November 16, 1945. The Regional Board, on March 7, 1945, approved the agreements, but with effect from February 16, 1946. The parties now join in an appeal from the Regional Board's Decision and ask that the effective date of that Board's Decision be November 16, 1945.

Nowhere in the submissions before the Regional Board was it shown or even alleged that the proposed adjustment in wage rates

was necessary to rectify gross injustice or gross inequality. The Regional Board was, therefore, without power to approve the application under Wartime Wages Control Order, 1943, prior to February 15, 1946. On that date, P.C. 348 came into effect and amended the said Order. It was in pursuance of that amendment, and not otherwise, that the Decision under appeal was made.

It is obvious that the Regional Board concluded that it would be improper to provide as the effective date of its Decision, any date prior to the effective date of the amendment under which the Board's power to make the Decision was obtained. With this conclusion we are obliged to agree.

The appeal is dismissed. There will be a Finding and Direction accordingly

May 30, 1946.

Re: Coleman Lamp and Stove Company, Limited, Toronto, Ont.

Reasons for Decision

With leave of the Regional War Labour Board for Ontario, the Company appeals from a Decision of that Board dated January 4, 1946. That Decision was made upon an application by the Company for permission to adjust ranges of rates for twelve occupational classifications. This appeal concerns six of the occupational classifications, namely, Production Engineer, Schedule and Production Manager, Purchasing Agent, Personnel Manager, Time Study Supervisor and Process Chemist and Supervisor of Sub-contracts.

The incumbent in each of the first three named occupational classifications is in receipt of a salary in excess of \$250.00 per month and the employer proposes to pay the Personnel Manager within a range, the low of which is \$250.00 per month. Wartime Wages Control Order, 1943, provides in effect, that whenever an employee is in receipt of a salary in excess of \$250.00 per month, it must be presumed that he is above the rank of foreman, unless the nature of his duties and

responsibilities and his relationship to other employees indicates clearly that he is not above such rank.

The submissions on appeal as the same concerning the Production Engineer, Schedule and Production Manager, Purchasing Agent and Personnel Manager, do not rebut the presumption above mentioned. We are therefore obliged to declare that each of the incumbents in these classifications is above the rank of foreman and subject to Wartime Salaries Order P.C. 1549.

We are prepared to declare that the Time Study Supervisor and Process Chemist, and the Supervisor of Sub contracts are of the rank of foreman. Moreover, we hold that the appellant has indicated sufficient grounds in support of the ranges of wage rates requested.

The appeal is allowed to the extent above indicated. There will be a Finding and Direction to provide formal effect to the foregoing conclusions.

May 31, 1946.

Re: The John Bertram and Sons Company, Limited, and the International Association of Machinists, Lodge 1740

Reasons for Decision

With leave granted by the Regional War Labour Board for Ontario the Company appeals from two decisions of that Board dated

January 8, 1946, made in respect of the Company and its Pratt and Whitney Division. The decisions were made upon applications by the Lodge for directions which would

require the Company to increase the bottoms of the rate ranges in some cases and to increase the entire ranges in others. The Regional Board was also requested to direct increases in single rates for apprentices.

While the applications were being developed by the Regional Board, an Industrial Relations Officer, on the instructions of the Board, investigated the matters at issue. It is evident that his recommendations, upon which the Regional Board's Decisions were based, were designed to narrow the ranges of rates in question. It should here be pointed out that on March 31, 1944, upon a joint application by the Company and the Lodge, the Regional Board authorized the Company to increase the tops of the ranges of rates then in effect. The joint action taken in 1944 produced ranges of rates which in our view are too wide. The Regional Board's decisions, now under appeal, restored substantially the spreads which existed before the 1944 decisions. The ranges directed by the Regional Board in its Decisions of January 8, 1946, cannot be regarded as narrow, and we are not disposed to disturb them.

The Regional Board directed the Company to increase the single rates for apprentices by amounts varying from 5 to 11 cents an hour. Apparently the Regional Board in so deciding, relied upon a report on a certain survey. With much respect, we do not regard the evidence on this point, and upon which the direction was made, as sufficient to warrant the increases. The rates and step increases in effect for the apprentices in the Company's plants, prior to the effective date

of the Decisions under appeal, compare favourably with those in plants of comparable employers in the same of comparable locality.

The result of our Decision is that the Company's appeal concerning the adjustment of ranges of rates for hourly rated employees, other than apprentices, is dismissed, but we allow the appeal on the question of the single rates for apprentices.

It should here be said that the Regional Board did not grant the Lodge's application in full. The Lodge, in its counter-submissions, requested the National Board to consider its original applications. This request might be taken to mean that the Lodge seeks relief by way of a cross appeal. The request was not supported by evidence upon which any action could be taken by this Board. The Lodge did not press this part of its submissions during the hearing. However, to avoid misunderstanding and to clear the record on this point, we dismiss the cross appeal.

The Company criticized the action of the Regional Board in disposing of the cases in question without first conducting a formal hearing as was requested by the Company. It is our view that such requests should be honoured in all cases. However, after examining the material contained in the Regional Board file, it is only right to say that the Regional Board had before it practically the same arguments, statements and other material as were presented to us. We fail to see where or in what manner the Company was prejudiced by the Regional Board's oversight.

June 3, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of May. During this period the Board received nine applications, held six hearings, issued five certificates designating bargaining representative, ordered one representation vote, and rendered decisions in six appeal cases.

Certificates Issued

Five applications for the certification of bargaining representatives were approved by the Board and certificates issued, as below:—

1. Mr. C. T. O'Sullivan and Misses Mamie May, Ruth E. Morrison and F. G. Whelan and the *Accounting Employees' Association* for the employees employed in the Accounting Departments of the *Bell Telephone Company of Canada* in the following classifications: Accounts Inquiry Clerk, Addressing Clerk, Addressing Machine Clerk, Addressing Typists, Advance Payment Clerk, Assembly

Clerk, Cash Additions Verification Clerk, Cash Assignment Clerk, Cash Control Clerk, Check Ticket Verification Clerk, Coin Box Ticket Clerk, Collect Ticket Clerk, Computing Machine Clerk, Control Records Clerk, Custom Work Clerk, Distributors, Estimate Clerk, Filing Clerk, Foreign Settlement Clerk, General Books Clerk (save and except General Books Clerks in the offices of the Statistician or the General Accountant), Hotel Attended Ticket Clerk, Inventory Clerk, Invoice Clerk, Journals and Reports Clerk, Junior Statistical Clerk (save and except Junior Statistical Clerks in the offices of the Statistician or the General Accountant), Labour Clerk, Labour Distribution Clerk, Machine Billing Clerk, Machine Billing Verification Clerk, Mailing Clerk, Material Clerk, Material Distribution Clerk, Northern Electric Bills Clerk, Northern Electric Distribution Clerk, Office Junior, Order Clerk, Order Verification Clerk, Payment

Record Clerk, Payroll Clerk (save and except Payroll Clerks who have access to Special General payroll records), Payroll Deduction Clerk, Payroll Report Clerk, Plant Classification Clerk, Plant Measurement Clerk, Plant Records Clerk, Plant Unit Clerk, Production Records Clerk, Rate and Station Clerk, Replacement Clerk, Reports Clerk (save and except Reports Clerks who at times act as secretaries), Results Clerk, Revenue Statistical Clerk, Senior Clerks (save and except Senior Clerks in the offices of the Statistician or the General Accountant, or who have access to Special General payroll records), Special Accounts Clerk, Special Order Clerk, Special Services Accounts Clerk, Subscribers' Accounts Clerk, Supervising Computing Machine Clerk, Statement Typist (save and except Statement Typists in the offices of the Statistician or the General Accountant), Stationery Clerk, Stenographer (save and except Stenographers who at times act as secretaries), Tax Record Clerk, Toll Analysis Clerk, Toll Billing Clerk, Toll Inquiry Clerk, Toll Order Clerk, Toll Rate Checker, Toll Settlement Clerk, Toll Totaller, Trial Balance Clerk, Typist, Voucher Clerk, Zone Message Clerk. Chief Stenographers were excluded from the unit for which application was made.*

2. Messrs. T. McGregor, S. H. Eighteen, F. H. Gillespie, W. J. Smith and W. H. Thompson and the *Canadian Brotherhood of Railway Employees and Other Transport Workers* for the employees of the Regional Bureau of Operating Statistics, Canadian National Railways, Winnipeg, Manitoba. The Chief Statistical Clerk and Assistant Chief Statistical Clerk were excluded from the bargaining unit*

3. Messrs. Robert McDougall, D. MacGillivray, Alex Young and Andrew Tate and *Bartenders, Hotel Service and Restaurant Employees Union Local 796, Hotel and Restaurant Employees, International Alliance and Bartenders International League of America* for employees of the *Canadian Pacific Railway Company* engaged in its lunchcounter and dining room at *Moose Jaw, Saskatchewan*.*

4. Messrs. W. J. Smith, Gerald Devine, M. S. Weekes, J. A. Mackay, L. Lelay and M. Caron and the *Canadian Brotherhood of Railway Employees and Other Transport Workers* for employees below the rank of Foreman employed by *Colonial Coach Lines Ltd., Montreal, P.Q.*, in its operating and maintenance departments in the Provinces of Ontario and Quebec.*

5. Messrs. Edward Ervine, Wilfred Glousher and Bruce Grigg and *Local 23736, Federal Labour Union (A.F. of L.)* for the grain

trimmers, namely; Power Shovel Garmen, Tripline Operators, Lead Blockmen and Shovellers employed by *Goderich Elevator and Transit Co., Limited, Goderich, Ont.* Foremen were excluded from the bargaining unit.*

Application for Certification Rejected

Brotherhood of Maintenance of Way Employees and Niagara, St. Catharines and Toronto Railway, Toronto, Ontario (L.G., May, 1945, p. 664). Following an investigation of the application and a public hearing, the Board rejected the application for the reason that the proposed bargaining unit was considered inappropriate.

Representation Vote Ordered

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company, Regina, Saskatchewan (L.G., April, 1945, p. 462). Following an investigation and a public hearing, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Manitoba, was appointed by the Board to act as returning officer in a vote of the personnel in the Superintendent's Office of the *Canadian Pacific Railway Company, Regina, Saskatchewan*.

Applications for Certification Received During the Month of May, 1946

1. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of certain employees of the *Canadian National Railways* employed in the *Bessborough Hotel, Saskatoon, Saskatchewan*.

2. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of express employees of *F. J. Murray (Railway Express Joint Commission Agent, Canadian National Railways and Canadian Pacific Railway Company), Kirkland Lake, Ontario*.

3. *International Longshoremen's and Warehousemen's Union, Local 507*, on behalf of Grain Liners, Scalpers, Washers, etc., of the *Canadian Stevedoring Company, Limited, Vancouver, B.C.*

4. *International Longshoremen's and Warehousemen's Union, Local 507*, on behalf of Grain Liners, Scalpers, Washers, etc., of the *Empire Stevedoring Company, Limited, Vancouver, B.C.*

5. *International Longshoremen's and Warehousemen's Union, Local 507*, on behalf of Grain Liners, Scalpers, Washers, etc., of the

* Following investigation of the application.

Louis Wolfe and Sons (Vancouver) Limited, Vancouver, B.C.

6. *Brotherhood of Maintenance of Way Employees* on behalf of Coal Chute Operators and Coalmen in the Provinces of Manitoba and Saskatchewan employed by *Mr. Roland McMillan, Canadian Pacific Railway Coal Contractor, Winnipeg, Manitoba.*

7. *The Order of Railroad Telegraphers, System Division No. 43* on behalf of Chief Despatchers, including Night Chief Despatchers and Assistant Chief Despatchers employed on the *Western Region of the Canadian National Railways, Winnipeg, Manitoba.*

8. *The Order of Railroad Telegraphers, System Division No. 1* on behalf of Chief Despatchers including Night and/or Assistant Chief Despatchers employed on the *Central and Atlantic Regions of the Canadian National Railways, Toronto, Ontario, and Moncton, New Brunswick.*

9. *Brotherhood of Painters, Decorators and Paperhangers of America, Local Union No. 138* on behalf of Painters employed by the *Pacific Drydock Company Limited (formerly, North Van Ship Repairs Limited), North Vancouver, B.C.*

Decisions of Board in Appeal Cases

1. On May 20, the Board issued Reasons for Judgment on the appeal of the *Federation of Civic Employees Central Council* from a decision of the Manitoba Wartime Labour Relations Board granting certification of bargaining representatives appointed by *Locals 1037 and 1129 of the International Brotherhood of Electric Workers* for certain groups of craft workers in the employ of the City of Winnipeg Hydro Electric System and Municipal Signal Department.

The Manitoba Board had accepted as appropriate the group of craft employees designated by the International Brotherhood of Electrical Workers for the Reason that it had for a considerable number of years enjoyed a bargaining status for such employees with the City of Winnipeg.

The Federation contended that the Manitoba Board had fixed employee units which were not appropriate for collective bargaining as there were identical craft classifications in the City's employ which were excluded from the certified bargaining unit.

In its judgment, the National Board pointed out that the effect of the certification was to exclude employees, without apparent reason, who were in the same occupational classifications in other branches of the City Hydro

Electric System. Furthermore, the Board added, other classifications of employees which, according to trade union practice appeared to be equally part of the electrical craft, were also excluded.

The Board decided that the appeal should be allowed, the certification set aside and the applications for certification rejected without prejudice to any further application which might be made for the certification of bargaining representatives for an appropriate bargaining unit.

2. Following a hearing the Board dismissed the appeal of the *Winnipeg Electric Employees Federated Council, One Big Union*, from the decision of the Manitoba Wartime Labour Relations Board certifying *Locals 135 and 1037, International Brotherhood of Electrical Workers* as bargaining representatives for employees of the *Winnipeg Electric Company* in the following electrical craft classifications, namely: meter repairers, meter installers and all apprentices; foremen, sub-foremen, lamp trimmers, troublemen, linemen, cablemen and all apprentices.

An investigation made by the Board revealed that the above classifications comprised all the electrical craft classifications, with two minor exceptions, of workers in the railway distribution, overhead lines, light and power and electric meter departments of the electric utility of the Company and that in each such department the International Brotherhood of Electrical Workers had a majority in each classification covered by the certification. Evidence was produced before the Board to show that the International Brotherhood of Electrical Workers had organized the groups of employees covered by the certification and had bargained for them with the Company since 1918. The Board dismissed the appeal.

3. On May 22, the Board issued Reasons for Judgment on the appeal of *Local 852, Milk Drivers and Dairy Workers Union* from a decision of the Ontario Labour Relations Board rejecting the application for certification of bargaining representatives submitted by the Union.

The *Windsor Milk Drivers and Dairy Workers Union* had also made application for certification of bargaining representatives. Both applications were dismissed by the Ontario Board for the reason that neither union had obtained the support of a majority of the employees affected. In dismissing the applications the Ontario Board followed the

decision of the National Board in the Wright-Hargreaves Case. (L.G., March 1945, p. 290.)

Citing its decision in the Wright-Hargreaves case, the Board dismissed the appeal.

4. Following a hearing, the Board dismissed the appeal of a number of *Coal Dock Operating Companies* in Toronto from a decision of the Ontario Labour Relations Board certifying bargaining representatives selected by the *International Union of Operating Engineers* for a number of classifications of employees engaged in dockyard operations by each of the Companies.

The appellant Companies objected to the separate certifications issued by the Ontario Board with respect to the employees of each Company. It was argued that the Board should have established one bargaining unit consisting of the employees in dockyard operations of all the Companies since such operations are carried on in common.

The Union took the position that in view of past experience in negotiations with the employers' association certification on a multiple-employer unit basis was not satisfactory.

In its judgment, the National Board pointed out that Section 5 subsection 3 of the War-time Labour Relations Regulations, P.C. 1003, provided for certification of bargaining representatives for employees of several employers but this provision applied only "where more than one employer and their employees desire to negotiate a collective agreement." In this case, the employees were not willing to negotiate on this basis, and in the absence of consent on both sides, there was no authority for the Board to establish a bargaining unit involving a number of employers. On this ground the Board decided that the appeal had failed.

5. On May 22 the Board issued Reasons for Judgment on an application by the *International Typographical Union* for intervention by the Board with a view to the completion of a collective bargaining agreement between the *Southam Company, Limited, Montreal, P.Q.*, and the Union covering groups of employees in each of the several newspaper plants operated by the Company at Ottawa, Hamilton, Winnipeg, Edmonton and Vancouver. In argument before the Board, it was established that collective bargaining and resulting agreements covering groups of employees in each newspaper establishment at these points had been undertaken previously on a local plant basis between the local union

chartered by the International Typographical Union and the local newspaper management of the Company.

The union stated that as a matter of future policy it desired to negotiate with the head office management of the Company with respect to certain basic labour conditions in the agreements with the newspaper establishments of the Company in the several Provinces.

The Company stated that it was prepared to negotiate for the renewal of expired or expiring agreements held with locals of the union on a local newspaper plant basis but was not prepared to negotiate with the union on other than a local plant basis.

In its Reasons for Judgment the Board pointed out that the Regulations required an employer to bargain with authorized bargaining representatives of employees with a view to the completion of a collective agreement and provided for the intervention of the Board on request of either party. Bargaining must be undertaken in good faith where the appropriateness of the bargaining unit and the right of the bargaining representatives to bargain on behalf of employees in such bargaining unit have been established either by virtue of certification under the Regulations or, in the alternative, where the organization has, as a party to an existing agreement covering the employees in such bargaining unit, thus established recognition of its authority to represent the employees affected in new negotiations.

In the opinion of the Board, it was necessary for the union to become certified on a multiple-plant basis before the Company could be obliged to negotiate on such a basis.

In the circumstances, the Board stated it had no authority to intervene and the application was accordingly dismissed.

6. Following a hearing, the Board dismissed the appeal of the Trustees of the Queen Elizabeth Hospital from a decision of the Ontario Labour Relations Board which established as appropriate a unit of all engineers, firemen and helpers employed by the Hospital.

In dismissing the appeal, the National Board decided that the decision given by the Ontario Board was within the discretionary powers of that Board. The Board announced that Reasons for Judgment will be issued at a later date.

The texts of the Board's Reasons for Judgment in the appeals appear hereunder.

Between: The Federation of Civic Employees Central Council, Appellant (Intervener), and The City of Winnipeg Hydro Electric System and the City of Winnipeg Fire Alarm and Police Signal Mechanical Department (Outside) of Winnipeg, Respondent, and The International Brotherhood of Electrical Workers, Locals 1037 and 1129, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Deschamps, Mosher, Picard and Taylor.

Reasons for Judgment

This is an appeal by leave of the Manitoba Board from certifications granted by the Manitoba Labour Relations Board of bargaining representatives appointed by Locals 1037 and 1129 of the International Brotherhood of Electrical Workers for certain groups of craft workers in the employ of the city of Winnipeg.

The appellant contends that the Manitoba Board has fixed employee units which are not appropriate for collective bargaining as there are identical craft classifications in the City's employ which are outside of the certified bargaining units. The appellant further claims that there should be only one bargaining unit for all electrical craft workers in the City Hydro Electric Utility and the City Signals Utility.

The Manitoba Board, in this instance, accepted as appropriate the groups of craft employees designated by the respondent union holding that "it has for a considerable number of years enjoyed a bargaining status in respect of the actual groups of employees practising distinctive crafts within the general electrical field, that it has upwards of thirty distinctive crafts within the general electrical field for which separate locals are provided and that within the city staff two such operate, each with its own officers".

This Board is of opinion that in order to warrant recognition as an appropriate craft bargaining group for the purpose of certification under the provisions of Section 5 (4), the applicant group should ordinarily cover those employees in the employee unit who comprise the classifications recognized under trade union practice as constituting a craft group. In determining the scope of the employee craft group appropriate for collective bargaining the same may be established either on the basis of past collective bargaining practices in the employer's establishment or, failing this, on the basis of other considerations which normally apply in determining

the scope of the employee bargaining unit. The purpose of the subsection is to preserve the identity and bargaining rights and interests of craft groups but, on the other hand, the provisions of the subsection are not designed to merely protect the interests of a craft union in a plant without consideration of the identity and community of interest of the group of employees in the establishment or appropriate part thereof comprising the craft therein.

In the present case, the effect of the certifications is to exclude from the bargaining units, employees in the same occupational classifications in other branches of the City Hydro Electric System without apparent reason. Moreover, other occupational classifications of employees which, according to established trade union practice, appear to be equally part of the same electrical craft group, are excluded without apparent reason.

The groups certified have evidently been defined by the respondent union having regard for the present strength of the respondent union in the selected employee units and occupational classifications but it has not been established that these groups of employees are entitled to recognition as appropriate craft bargaining units upon the basis of either established collective bargaining practices in the employer's establishment or otherwise.

For the above reasons, the Board decides that the appeal should be allowed, the certifications set aside and the applications for certification rejected. This is without prejudice to any further application which may be made for the certification of bargaining representatives for an appropriate bargaining unit.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

L. MITCHELL, Esq.,
For the Appellant (Intervener)

J. L. MCBRIDE, Esq.
H. C. TRACY, Esq.
For the Respondent (Petitioner)

Dated at Ottawa, May 20, 1946.

Between: The Winnipeg Electric Employees Federated Council, One Big Union, Appellant (Intervener) and The Winnipeg Electric Company, Winnipeg, Respondent, and The International Brotherhood of Electrical Workers, Locals 435 and 1037, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Deschamps, Mosher, Picard, Taylor.

Reasons for Judgment

This is an appeal from a decision of the Manitoba Labour Relations Board from the certifications of representatives of Locals 435 and 1037, International Brotherhood of Electrical Workers as bargaining representatives for employees in the following electrical craft classifications, namely: meter repairers, meter installers, and all apprentices; foremen, subforemen, lamp trimmers, troublemen, linemen, cablemen and all apprentices.

A check made by this Board shows that these classifications comprise all the electrical craft classifications of workers in the Railway Distribution, Overhead Lines, Light and Power, and Electric Meter departments of the Electric Utility of the Company, and that in each such department the International Brotherhood of Electrical Workers has a majority of craft workers as well as a majority in each classification covered by the certification. There are two minor exceptions,

namely: a signal maintenance man and assistant signal maintenance man who are, however, already covered by a certification issued to the One Big Union.

Evidence goes to show that the International Brotherhood of Electrical Workers has had the groups of employees covered by the certifications organized and has had bargaining rights therefor with the Company since 1918.

In view of the foregoing, this Board decides that the appeal fails.

The Board is not called upon to decide whether or not the bargaining unit is appropriate on any other basis.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

R. B. RUSSELL, Esq.

Dated at Ottawa, May 20, 1946.

Between: The Milk Drivers and Dairy Workers Union, Local 852, Appellant (Intervener), and The Borden Company Limited (Walker-side Division), Windsor, Respondent, and The Windsor Milk Drivers and Dairy Workers Union, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an appeal by leave of the Ontario Labour Relations Board from a decision of that Board dismissing the application for certification of bargaining representatives filed by the appellant-intervener union.

The respondent-petitioner union had also made application for certification of bargaining representatives but both applications were dismissed for the reason that neither union obtained the support of a majority of the employees affected as required by the Regulations.

In dismissing the applications the Ontario Board followed the decision of this Board in the Wright-Hargreaves case (D.L.S. 7-542).

The issues raised in this appeal have been fully argued and considered by this Board on a number of previous occasions and the practice under the Regulations on this matter is well settled.

Following the decision of this Board in the Wright-Hargreaves case cited above, the appeal is dismissed.

Between: Canada Coal, Limited, Cargo Dockers, Limited, Century Coal Co., Ltd., Empire-Hanna Coal Co., Ltd., Halliday Coal Docks, Limited, Harbour Coal Company Limited, Ontario Dock & Forwarding Co. Ltd., The Milnes Coal Co., Limited, Toronto Fuels, Limited, The F. P. Weaver Coal Co., Limited, Appellants, and The International Union of Operating Engineers, Local 793, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an application for leave to appeal by a number of coal companies from a decision of the Ontario Labour Relations Board certifying the bargaining representatives selected by the International Union of Operating Engineers for a number of classifications of employees engaged in dockyard operations by each of the companies. The appellants object to the separate certifications issued by the Ontario Board with respect to the employees of each company on the ground that the Board should have established one bargaining unit consisting of the employees in the said classifications of all the said companies since the operations are carried on in common at the dockyards. In support of this, the appellants stated that the Fuel Dock Branch of the Board of Trade of the City of Toronto, an Association composed of representatives of the coal dock operators of the City of Toronto, had represented the appellant companies in all employer-employee negotiations over a period of years and that the necessity of negotiating separate agreements with the union by each company would be cumbersome in view of the small number of employees involved and the community of interest as between the operations of all companies. It was stated that the employees of each company affected are directly employed and paid by the Company involved.

The respondent union takes the position that in view of past experience in negotiation with the employers' organization, cer-

tification on a multiple-employer unit basis would be unsatisfactory and is unacceptable.

Section 5, subsection (3) of the Regulations provides for certification of bargaining representatives for employees of several employers but this provision applies only "where more than one employer and their employees desire to negotiate a collective agreement". In this case, the employees are not willing to negotiate on this basis and, in the absence of consent on both sides, there is no authority for the Board to establish a bargaining unit involving compulsory collective bargaining on this basis. For this reason, the appeal on this ground fails.

The appellants raised at the hearing some question as to whether the respondent union had the support of a majority of employees in the bargaining unit in the case of four of the companies. The Ontario Board has made a specific finding of fact after investigation that the union had a majority support in the case of each company and this Board is not prepared to disturb these findings on the basis of evidence furnished by the appellants at the hearing.

Leave to appeal is granted but the appeal is dismissed.

Between: The International Typographical Union, Applicant, and The Southam Company Limited, Montreal, Respondent.*

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an application by the International Typographical Union to the Board for intervention with a view to the completion of a collective agreement between the Southam

Company Limited and the Union covering groups of employees in each of the several newspaper plants owned and operated by the Company at Ottawa, Hamilton, Winnipeg, Edmonton and Vancouver.

Collective bargaining for the said groups of employees in each newspaper establishment

* See elsewhere in this issue, p. 778.

at these points has heretofore been undertaken on a local plant basis between local unions chartered by the applicant union and the local newspaper management of the Company and all collective agreements between the Company and such locals have been local plant agreements.

The applicant states that as a matter of future policy it proposes and desires to negotiate with the Head Office Management of the Company for a master agreement covering the aforesaid newspaper establishments of the Company in the several provinces but that the Company refuses to negotiate on this basis. This proposal, the union states, is in accordance with its policy in negotiating with newspaper chains in the United States and is necessary in order to maintain uniformity in the terms and administration of agreements covering its members. The Board's intervention is requested with a view to requiring the Company to negotiate with the Union on this basis.

The Company states that it is prepared to negotiate for the renewal of expired or expiring agreements held with locals of the union on a local newspaper plant basis but is not prepared to negotiate with the union on other than a local plant basis. It states that in accordance with the past practices and present policy the local management of each of its newspaper enterprises has full autonomy in the matter of employee relations and collective bargaining with employees engaged therein as well as in direction of editorial policy. All collective bargaining has been carried on and agreements negotiated on a local plant basis. The Company further states (1) the Ottawa local typographical union has been certified under P.C. 1003 by the Ontario Labour Relations Board as bargaining representatives of the employee unit in the Ottawa Citizen; (2) the Winnipeg local typographical union no longer represents employees in the Winnipeg Tribune plant; (3) there is an existing agreement with the Edmonton local of the union negotiated in November, 1945; (4) the existing agreement between the Vancouver local of the union and the Company negotiated in Novem-

ber, 1945, will not terminate until June 4, 1946.

The Regulations require an employee to bargain with authorized bargaining representatives of employees with a view to the completion of a collective agreement and provide for the intervention of the Board, on request of either party. Bargaining must be undertaken in good faith where the appropriateness of the bargaining unit and the right of the bargaining representatives to bargain on behalf of employees in such bargaining unit have been established either by virtue of certification under the Regulations (see Sec. 10, 11 and 12 of the Regulations) or, in the alternative, where the organization has as a party to an expiring agreement covering the employees in such bargaining unit thus established recognition of its authority to represent the employees affected in new negotiations (see Sec. 16 of the Regulations).

In the present case, the union's bargaining rights with respect to a bargaining unit have been established as provided in Section 16 for local units only. Therefore it is clear that in order to invoke the provisions of the Regulations to compel the Company to bargain with the applicant union with a view to the completion of an agreement covering newspaper establishments of the Company in the several provinces, it would be necessary for the union to first establish its authority to do so by obtaining certification under the Regulations as the bargaining representative of the employees in a single bargaining unit extending to all plants involved.

In the circumstances the Board has no authority to intervene and the application is accordingly dismissed.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred

to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and

reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matter in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During May, 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:—

City of Brandon, Brandon, Manitoba, and Local No. 803, International Association of Fire Fighters (A.F.L.-T.L.C.). H. S. Johnstone, Conciliation Officer.

City Chevrolet Sales Company Limited, Hamilton, Ontario, and Lodge 1258, International Association of Machinists. William Dunn, Conciliation Officer.

Gibson Brothers (Rock Realty Investments Ltd.), Toronto, Ontario, and Local 204, Building Service Employees International Union (A.F.L.-T.L.C.). F. J. Ainsborough, Conciliation Officer.

Hilton Brothers Limited, Winnipeg, Manitoba, and Local 87, Printing Pressmen's and Assistants' Union (A.F.L.-T.L.C.). H. S. Johnstone, Conciliation Officer.

Lunenburg Sea Products Limited, Lunenburg, N.S., and Local No. 2, Canadian Fish Handlers' Union. H. R. Pettigrove, Conciliation Officer.

Silverwoods Dairies, Limited, Hamilton, Ontario, and Local 422, United Dairy and Creamery Workers (C.C.L.). H. Perkins, Conciliation Officer.

Standard Pattern Works, Hamilton, Ontario, and Pattern Makers' Association of Hamilton and Vicinity. William Dunn, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement.

James Davidson's Sons, Ottawa, Ontario, and Local No. 6 (C.C.L.), National Union of Woodworkers. J. L. MacDougall, Conciliation Officer.

Royal Canadian Tobacco Company, Toronto, Ontario, and Local 254, Tobacco Workers International Union (A.F.L.-T.L.C.). William Dunn Conciliation Officer.

Standard Pattern Works, Hamilton, Ontario, and Pattern Makers' Association of Hamilton and Vicinity. William Dunn, Conciliation Officer.

L. A. Young Industries Limited, Windsor, Ontario, and Local 195, United Automobile,

Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.). F. J. Ainsborough, Conciliation Officer.

Century Coal Company, Midland, Ontario, and Local No. 1, National Union of Coal Dock Workers. F. J. Ainsborough, Conciliation Officer. (Case withdrawn.)

Grand Trunk Pacific Development Company, Limited, Prince Rupert, B.C., and Local 510, International Union of Operating Engineers. G. R. Currie, Conciliation Officer. (Case withdrawn.)

Boards Established

During the month, one Board of Conciliation was established but not fully constituted as follows:—

Corporation of the Township of York (York Township Hydro System) and Branch No. 1, National Organization Civic Utilities and Electrical Workers (C.C.L.).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:—

Eaton-Wilcox Limited, Windsor, Ontario.—The Board of Conciliation established to deal with a dispute between Eaton-Wilcox Limited, Windsor, Ontario, and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, was fully constituted on May 17, 1946, with the appointment of His Honour Judge H. E. Fuller, Welland, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. B. A. E. Clouse, Kingsville, Ontario, and Mr. C. Dubin, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

International Nickel Company of Canada Limited, Sudbury, Ontario.—The Board of Conciliation established to deal with a dispute between International Nickel Company of Canada Limited, Sudbury, Ontario, and Local 598, Sudbury Mine, Mill and Smelterworkers' Union (International Union M.M.S.W.-C.I.O.-C.C.L.), was fully constituted on May 25, 1946, with the appointment of Honourable Mr. Justice W. D. Roach, Toronto, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. R. Biglow, Toronto, Ontario, and Mr. E. B. Joliffe, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

Kirkland Lake Gold Mining Company Limited, Kirkland Lake, Ontario.—The Board of Conciliation established to deal with a dis-

pute between Kirkland Lake Gold Mining Company, Limited, Kirkland Lake, Ontario, and Local 240, International Union of Mine, Mill and Smelter Workers, was fully constituted on May 27, 1946, with the appointment of Mr. J. H. Stitt, Ottawa, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Col. J. F. C. Thompson, Ottawa, Ontario, and Mr. Drummond Wren, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

National Steel Car Corporation, Hamilton, Ontario.—The Board of Conciliation established to deal with a dispute between National Steel Car Corporation, Hamilton, Ontario, and Local 2352, United Steelworkers of America (C.I.O.-C.C.L.), was fully constituted on May 31, 1946, with the appointment of Dr. A. Brady, Toronto, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Messrs. Norman L. Mathews, and David Archer, both of Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

Ontario Steel Products Company, Limited, Gananoque, Ontario.—The Board of Con-

ciliation established to deal with a dispute between Ontario Steel Products Company Limited, Gananoque, Ontario, and Local 3209, United Steelworkers of America (C.C.L.), was fully constituted on May 7, 1946, with the appointment of His Honour J. P. Madden, Ottawa, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. E. M. Dillon, Toronto, Ontario, and Mr. H. Cartwright, Kingston, Ontario, were appointed on the recommendation of the employer and employees respectively.

Smith and Stone Limited, Georgetown, Ontario.—The Board of Conciliation established to deal with a dispute between Smith and Stone Limited, Georgetown, Ontario, and Local 526, United Electrical, Radio and Machine Workers of America, was fully constituted on May 20, 1946, with the appointment of His Honour Judge Egerton Lovering, Toronto, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. Norman L. Mathews, Toronto, Ontario, and Mr. Weir Reid, Georgetown, Ontario, were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister, or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during May:—

Report of Board in Dispute between Cosmos Imperial Mills, Ltd., Hamilton, Ont., and Local 28, Textile Workers' Organizing Committee (CIO-CCL).

On May 21, 1946, the Minister of Labour received the Report of the Board of Conciliation the personnel of which was as follows: His Honour Judge T. H. Barton, Hamilton, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Norman L. Mathews, and C. L. Dubin, both of Toronto, on the nomination of the employer and employees respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

The Board of Conciliation appointed by you to deal with the above dispute has com-

pleted its sittings and now submits its report.

After a preliminary meeting of the members of the Board in Toronto, the Board held a hearing in Hamilton on March 14 to hear representations of the parties. The Company was represented by R. R. Evans, K.C., and by A. F. Knight. The Union was represented by Jack Robinson, Organizer; John Wignall, John Robertson, Miss Hilda Pearce, Ray Ruggles, and John Martinson. A very complete brief was presented by the Union and the position of the Company was ably presented by Mr. R. R. Evans, K.C.

Following the hearing in Hamilton, the Board has had two meetings and has discussed the matters in dispute. The questions on which the parties were not in agreement when

the matter came before the Board may be enumerated as follows:

1. Definition of an employee.
2. Hours of work.
3. Overtime.
4. Wages.
5. Vacations with pay.
6. Payment to stewards and committee-men for time spent in connection with grievances.
7. Clause providing for no discrimination, coercion or intimidation.
8. Reservation of Management rights.
9. Grievance Procedure.
10. Seniority.
11. Arbitration.
12. Clause dealing with strikes and lockouts.
13. Request of Union for union shop.
14. Request of Union for compulsory check-off.

For convenience, the Board proposes to deal with these various matters in the order in which they are enumerated above.

1. This arises out of the wording of Article II, Section 2, in the proposed agreement, which reads as follows:

The word "employee" or "employees" wherever used in this agreement shall mean any or all employees in the bargaining units as defined above except as hereinafter provided.

The Union objects to the inclusion of the four last words "except as hereinafter provided". The Board can see nothing in the agreement which would be affected by these words and agrees that "employees" should mean all employees in the bargaining unit with no exceptions. The Board recommends, therefore, that the last four words be deleted from this Section.

2. During the hearing, the Board suggested a compromise draft of Article VIII, Section 1, dealing with hours of work, and both parties agreed to this suggestion and to the substitution of the following section:

It is understood that the present hours of work are as follows: Day shift, Monday to Friday inclusive, 8 hours and 36 minutes per day, Saturday 5 hours. Night shift, 5 nights, Monday to Friday inclusive, of 9 hours and 36 minutes each. These hours may be exceeded pursuant to the existing ruling or any subsequent ruling of the Industry and Labour Board. The Company reserves the right to change the regular hours of work as it may deem expedient but, before doing so, will notify the Union committee and give them an opportunity of making representations to the Company with regard to same.

3. With regard to overtime provisions, the Company wished to continue paying overtime on a weekly basis as at present, while the Union requested that it be put on a

daily basis. In an effort to reconcile the two different viewpoints, the Board unanimously recommends the adoption of the following section in lieu of Article VIII, Section 2, as it appears in the draft:

Time and one-half shall be paid for all authorized hours worked in excess of 48 hours per week, and also for all authorized work performed on Saturday afternoon after twelve o'clock noon, on Sundays or on any of the following legal holidays: New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day; and on Civic Holiday and on Victoria Day if proclaimed as a public holiday, provided that such payment with respect to Civic Holiday and Victoria Day is approved and authorized by the appropriate Board. In weeks in which a public holiday occurs, the regular hours of work which ordinarily would have been worked on such day shall be treated as having been worked in computing the 48 hours for the purpose of figuring overtime. Exceptions to the above are those cases in which Sundays and holidays work form part of an employee's regular working week. Any employees in such occupations will be paid at the rate of one and one-half times their regular rate for any hours worked in excess of 48 hours per week.

No employee shall be required to lay off during regular working hours for the purpose of absorbing overtime. In the event of an emergency requiring a shut-down where employees are obliged to lay off and then work overtime, during the same week, to catch up on production, they shall be paid for such overtime at the regular overtime rate.

The Board feels that this section is eminently fair to both the Company and the employees.

4. In the clause dealing with wages, which is Article IX of the draft agreement, the Company proposed that the wages remain the same during the term of the agreement. The Union felt that there should be an upward revision of the wages. Both parties agreed that wage adjustments were beyond the jurisdiction of this Board but the Company requested the Board to recommend that the agreement provide that any application the Union desired to make to the Regional War Labour Board for wage increases should be made within a period of one month after the signing of the agreement in order to ensure stability of costs during the term of the agreement. While the majority of the Board felt that this was not an unreasonable request, it was decided that, without the consent of the Union, the Board should not recommend the inclusion of such a clause.

5. On the question of vacations with pay, as covered by Article X of the draft agreement, the Board feels that, if the Union wants increased vacation with pay for employees who have over five years' service

with the Company, this also is a matter for the Regional War Labour Board and that both parties should be free to present their respective positions to that Board. This Board declines, therefore, to make any recommendation on this issue.

6. The Union requested the Company to pay for the time spent by stewards, committeemen and aggrieved employees while settling grievances, while the Company felt that, if these were to be discussed during working hours, it should be done at the expense of the Union and not the Company. The majority of the Board feel that there is something to be said for both viewpoints and recommend as follows: Grievances which require discussion between an employee and his steward, or between the employee, his steward and the grievance committee, could be discussed at lunch time or after working hours, so that there will be no loss of production. On the other hand, where meetings between the grievance committee or stewards and the management are held during working hours at the request of, or by agreement with, the Company, then the Company should pay its employees for any time so spent when they would otherwise be at work.

7. Under the heading "No Discrimination", Article III, Section 1 (a) provides as follows:

The Company and the Union agree that there will be no discrimination, coercion or intimidation by either of them or their representatives or members as the case may be against any employee because of his Union or non-Union affiliation, or because of his activity or lack of activity in any labour organization.

The Union objected to the inclusion of this section and in particular to the last clause of it. The majority of the Board feels that this is a reasonable provision and is in accord with the spirit of P.C. 1003, and recommends the inclusion of this section in the agreement.

8-11. These points which cover the Articles dealing with Reservation of Management Rights, Grievance Procedure, Seniority and Arbitration, can conveniently be dealt with together because they all centre on one issue. The Company contends that, while all grievances may go through the Grievance Procedure up to the arbitration stage, the only matters which should go to arbitration are those involving an interpretation or alleged violation of the agreement as provided in Section 18 (1) of P.C. 1003 and, in addition, a claim that an employee has been discharged without reasonable cause. Similarly, under the seniority provisions of the agreement, the Company maintains that, in promotions,

demotions, transfers, reclassifications and lay-offs, skill competence and efficiency in the opinion of the Company should be the governing factor. The Company urges that, as it is charged with the management of the Company, it is its responsibility to retain and promote those employees best fitted for the work and that it is in the best position to judge the capabilities of its employees, and particular jobs for which they are best fitted. The Company further contends that it should not be required to substitute for its own opinion the opinion of an outside arbitrator on points such as these, hence its desire to restrict the matters that may go to arbitration to those above mentioned. The Union, on the other hand, urges just as strongly that all grievances should as a last resort be settled by arbitration. In support of this contention, the Union points out that, if the opinion of the Company on promotions, lay-offs, etc. is the determining factor, there would be every opportunity for favouritism and discrimination by the Company, particularly against Union employees. Arbitration, the Union urges, is the only safeguard the employees have against such discrimination, or even an honest mistake on the part of the Company. The Board feels that there is much to be said for both viewpoints. While realizing that Management is in the best position to judge the respective merits of its employees, and that the possibility of favouritism being shown is unlikely, the majority of the Board feels that the employees should be protected against unfair discrimination if it should arise in any matter affecting their work or employment. After giving the matter serious consideration, the majority of the Board recommends the following as a reasonable method of reconciling the two viewpoints:

(a) That Article IV, Section (b) of the draft agreement be amended to read as follows:

Hire, discharge, classify, transfer, promote, demote, and suspend, or otherwise discipline, employees.

(b) That Article V of the Grievance Procedure as amended by consent of both parties at the hearing be adopted.

(c) That Article VI dealing with arbitration be amended by deleting the words "or a claim of discharge without reasonable cause" in Section 1, and that the Article as so amended be included in the agreement.

(d) That Article XI dealing with seniority be included in the agreement, subject to the minor amendments made by consent at the hearing and subject also to the addition of

the following section immediately after Section 4:

Provided that nothing in this agreement shall be construed as affecting the right of any employee to have his claim determined in accordance with the grievance procedure, including arbitration, where such employee claims that in any promotion, demotion, transfer, lay-off, or rehiring, the Company did not act in good faith, or that its action was not based on the relative skill, competence, efficiency, good conduct, character, and seniority of the employees involved as the case may be.

The objection of the Union to Article VII providing for no strikes or lockouts was based on the refusal of the Company to consent to compulsory arbitration of all grievances. This having been dealt with above, it is felt that the Union should not now object to the inclusion of Article VII in the agreement, and the Board so recommends.

13. The Union requested an Article in the agreement providing for a Union Shop and presented an able brief in support of its claims. The Company opposed in principle the establishment of a Union Shop on the ground that the employees should be free to join or not to join the Union as they desired. It was pointed out to the Board that, at the time the Union was certified, the Union had a membership of 198 employees out of 380 eligible employees, without enlarging on the merits or demerits of the Union Shop, the majority of the Board recommends without any hesitation that no such provision be included in this agreement.

14. The Union also requested the Company to grant a compulsory check-off of union dues and, in its brief, presented many logical arguments in support of its request. The Company, on the other hand, argued that a compulsory check-off involved coercion of its employees to which it would not be a party. The majority of the Board felt that a compulsory check-off was undesirable and that, while under some circumstances, it would be disposed to recommend a voluntary, revocable check-off, this being a first agreement between the parties and there being no evidence that the Union was being handicapped by any hostility on the part of the Company, there was no necessity for the inclusion of any form of check-off in the present agreement.

In conclusion, the Board wishes to pay tribute to the representatives of both the Union and the Company for the able way in which they presented their respective viewpoints, and for their courtesy to, and co-operation with, the Board. While force-

fully presented, the arguments were advanced in a restrained manner and without any indication of bitterness. The Board expresses the hope that its recommendations will be favourably received by both the Union and the Company and that, if an agreement is signed, it will be productive of harmonious labour relations which will ensure to the benefit of both the Company and the employees.

All of which is respectfully submitted.

Dated at Toronto, this 15th day of April, 1946.

(Sgd.) T. H. BARTON,
Chairman.

(Sgd.) W. L. MATHEWS,
Member.

Minority Report

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa,
Ontario.

DEAR SIR:

I have now had the opportunity of reading the report of the majority members of the Board and regret that I cannot concur in their recommendations.

While there were many matters in which the parties were not in agreement, the particular points of difference revolved about two main issues and it was fairly generally conceded that if these two main difficulties were settled the other matters might easily follow suit.

One of these main issues was with respect to the clauses in the draft agreement with respect to the reservation of management rights, grievance procedure, seniority and arbitration, the difficulty in all these sections centering upon the one issue; while the Company were prepared to have all grievances go through the grievance procedure up to arbitration, they would not agree to arbitration with respect to any matters which might arise apart from the interpretation or alleged violation of the agreement, and a claim by an employee that he had been discharged without reasonable cause. The Union favoured a far more extensive arbitration clause so that all potential sore spots might be settled by arbitration as a final resort.

The Union contended that only by having all grievances settled by arbitration if necessary could the employees be assured that decisions were not based upon favouritism or

discrimination and mistakes on the part of the Company, even though they may be honest mistakes, might thus be avoided. It would only be in this way that potential causes of unrest might be put at rest so that industrial harmony might prevail. The majority of the Board recommended that the following clause be included in the contract:

Provided that nothing in this agreement shall be construed as affecting the right of any employee to have his claim determined in accordance with the grievance procedure, including arbitration, where such employee claims that in any promotion, demotion, transfer, lay-off or rehiring, the Company did not act in good faith, or that its action was not based on the relative skill, competence, efficiency, good conduct, character, and seniority of the employees involved as the case may be.

I concur in the recommendation that such a clause be included in the contract. However, I dissent from the opinion of the majority of the Board that the seniority clause in the proposed draft agreement be left unchanged. That seniority clause is in the following form:

In dealing with transfers, promotions, demotions, upgradings and lay-offs of employees, preference shall be given to employees having the greatest seniority provided the employee or employees concerned have *in the opinion of the Company* equal merit, skill, ability and efficiency. The Company may also take into consideration good conduct and character.

In my opinion the words "in the opinion of the Company" should be excluded. There would appear to be some inconsistency in leaving these words in the seniority clause while providing the additional clause as set out aforesaid. Leaving these words in might detract from the general clause providing for arbitration as recommended, and in addition I cannot subscribe to the view that questions of seniority are to be left wholly within the sphere of management.

The second main issue revolved about the request of the union for a union shop and check-off of dues. The majority members of the Board have not made any provision for what is commonly referred to as union security. It is with great respect that I vigorously dissent. While it appears true as pointed out in the majority report, that at time of certification the union obtained 198 votes out of an eligible list of 380 employees, nevertheless the representative of the union told the Board that at the time of the hearing the union did represent some 90 per cent of

the employees. I did feel that all the members of the Board were impressed with the responsible manner in which the Union position was presented to the Board and equally impressed with what would appear to be the responsible leadership of this Union. Under these circumstances failure to make any provision for union security would in my respectful submission ignore the advances made in collective bargaining for the past several years and would be a step in the opposite direction.

The Union at the request of the employees have organized the plant and are to enter into a contractual relationship with the employer which imposes upon the Union a heavy responsibility. Under the circumstances in my opinion they are entitled to have some form of security for the duration of the contract so that they will be in a position to fulfill their commitments, to administer the agreement, and to assist management. To deny them this security would impose upon the Union the task of being continually in an organizing rather than in an administering state which would react against the employer as well as being unfair to the Union.

As I understand the argument most ably presented by counsel on behalf of the employer, the chief opposition of management to union security provisions was that the Company did not feel that they should impose upon employees of long standing who were not members of the Union the duty of joining the Union. This opposition then, on behalf of the Company might be avoided by a maintenance of the membership clause with respect to present employees, who are members of the Union and whose support the Union is entitled to expect for the duration of the agreement, and a further provision that new employees must become members of the Union after an agreed upon time had elapsed from the date of their employment.

I should think the least management might do would be to agree to a check-off of dues, voluntary perhaps at its inception but irrevocable for the duration of the agreement. This would impose little if any hardship upon the employer and would indicate the willingness on the part of the employer to co-operate with the Union in accordance with their expressed desire that the Union might have an opportunity to properly fulfill its function.

All of which is respectfully submitted.

Member.

Report of Board in Dispute between Hamilton Cotton, Limited, Hamilton, Ont., and Local 26, Textile Workers' Organizing Committee

On May 14, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Dr. A. Brady, Toronto, Chairman, appointed by the Minister in the absence of a joint recommendation from Messrs. R. V. Hicks and C. L. Dubin, both of Toronto, nominees on the Board of the employer and employees respectively.

Report of Board

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

SIR:

The Board of Conciliation appointed by you begs to submit its report.

The Board met in Toronto, heard evidence from both parties and discussed with them their issues. The Company was represented by Mr. R. R. Evans, K.C. and Mr. W. M. McMahon. The Union was represented by Messrs. Jack Robinson, Nick Mohouk, and John Hill.

The Union was certified on June 26, 1945, and since that time has sought to obtain a collective bargaining agreement. Agreement has been reached on all matters except certain details respecting the functions of management and the arbitration procedure and the request of the Union for union shop and check-off. The Board considers each of these in turn and submits recommendations, which it hopes will be accepted by the parties and which will thus make it possible for them to sign a collective agreement. The Board takes the proposed draft of an agreement submitted by the Company, and submits its recommendations in respect to the clauses in dispute.

(1) Article III (c), which is a no-strike and no lock-out clause. The Union objected to the inclusion of this clause unless the arbitration outlined in a later clause was more embracing.

The Board recommends that Article III (c) remain as it is in the draft. It believes that its proposals on arbitration further on in this report will meet the points raised by the Union.

(2) Article IV (1). The contentious point here is the last sentence of the clause which reads: "Provided however that discharge without reasonable cause shall be deemed a violation of this Agreement within the meaning of the arbitration provisions in Article VI

of this Agreement and may be dealt with in accordance with the provisions of said Article." The Union asks that not merely discharge but also discipline, suspension, transfer and demotion without reasonable cause should be deemed a violation of the Agreement and hence subject to arbitration.

In view of the scope of the arbitration outlined later in this report, the Board recommends that the clause remain as it is in the present draft submitted by the Company.

(3) Article V, 1 (e). The Union objects to this present clause in the draft of the Company on the ground that it requires a steward or other employee to lose pay when dealing with a grievance during working hours.

The Board recommends that the present clause be redrafted to read: "If a steward or other employee deems it necessary to take time off in connection with a grievance, he must before doing so secure from his department head permission to be off, and, if such permission is given, the department head shall prescribe the time when and during which he may be off, and, provided that if the time so prescribed is during the regular working hours of such steward or employee, he shall not lose any pay." The Board is convinced that its recommended clause above will not merely satisfy the Union but in the long run is likely to give satisfaction to the Company.

(4) Article V, 2 (b) was also objected to by the Union. It reads in the original draft of the Company: "The members of this Committee (namely the Grievance Committee) shall be allowed reasonable time off from their regular work but shall not receive pay for time lost."

After discussion before the Board the parties agreed to a redrafted form of this clause which would read: "The members of this Committee shall be allowed reasonable time off from their regular duties for servicing stage three of the grievance procedure or such time as prescribed by the Company for the meeting, and, if the meeting is held during their working hours, the members of the Committee will receive their usual pay for time spent in the meeting."

(5) Article V, 4 (a) The Union takes exception to the present draft of this clause on the ground that it does not recognize the larger scope of the arbitration which it (the Union) seeks.

The Board recommends that the opening portion of the clause be revised to read as follows: "If the matter is one involving a

misinterpretation or a violation of this agreement or any matter arising under Section 6 of Article VI and an amicable disposition", etc. This change in the phrasing is required in view of the new section (number 6) which the Board recommends for inclusion in Article VI. Otherwise the Board recommends that no change should be made in Article V, 4 (a).

(6) Article VI. The Board recommends that the opening clause of this Article (at the bottom of page six of the draft) should be revised to read: "Where a written request for arbitration of a question of a misinterpretation or a violation of this Agreement or any matter arising under Section 6 of Article VI has been made pursuant to Article V hereof the same shall be submitted to arbitration pursuant to and disposed of in conformity with the provisions of this Article", etc.

The only other change that the Board recommends in Article VI is the inclusion of a new section 6 which should read: "Nothing in this Agreement shall be construed to affect the right of an employee to have his claim determined in accordance with the grievance procedure, including arbitration, where such employee claims that in any promotion, demotion, transfer, layoff or rehiring, the Company did not act in good faith or that its action was not based on the relative skill, competence and efficiency or the relative seniority of the employees involved as the case may be."

(7) Article IX, 4. The Union here objects to the inclusion of the phrase "in the opinion of the Company" in the clause which reads: "In dealing with transfers, promotions, demotions, upgradings and layoffs of employees, preference shall be given to employees having the greatest seniority provided the employee or employees concerned have in the opinion of the Company equal merit", etc.

The majority of the Board considers that, in view of the enlarged scope of arbitration under Article VI, an employee with a genuine grievance has the opportunity of obtaining redress. Hence it sees no reason why the Union should insist upon excluding the phrase "in the opinion of the Company". However,

the employee nominee on the Board recommends that the phrase be deleted.

(8) The final matter with which the Board wishes to deal is the request of the Union for a union shop and check-off, provisions which are usually regarded as insuring union security.

Whether, under present industrial conditions in Ontario, a Union is entitled to one or other provisions of Union security depends finally upon the circumstances of the given case. Employers and unions must examine together these institutional devices, without any spirit of dogmatism, seeking to discover what works and what does not work. In the present instance the Board of Conciliation, in formulating its recommendations on the matter, considered many circumstances, such as the peculiar competitive situation in the textile industry, the fact that the present is a first agreement, and the responsibility shown by the Union in pursuing its industrial policies. The majority of the Board would recommend that the Union withdraw its request for a union shop, and that both it and the Company agree upon a check-off, voluntary at its inception but irrevocable during the term of contract. It is needless for the Board to elaborate upon this recommendation, which it urges both parties to accept. Admittedly each is thus asked to sacrifice something of its former position, but the sacrifice asked is not drastic and will bear witness to the willingness on both sides to strive for an agreement. The employer nominee on the Board dissents from the recommendation for a check-off.

In conclusion the Board would like to commend and congratulate the parties for reaching an agreement on the wage issue prior to meeting the present Board of Conciliation. It hopes that the good will abundantly shown in this instance and shown also in the discussions before the Board will be exhibited further in completing the terms of a Collective Agreement.

All of which is respectfully submitted.

Dated at Toronto, this 10th day of May, 1946.

ALEXANDER BRADY.
CHARLES L. DUBIN.
ROBERT V. HICKS.

Report of Board in Dispute between J. B. Smith Lumber Company, Toronto, and Local No. 1487, United Brotherhood of Carpenters and Joiners (AFL-TLC).

On May 10, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. R. MacGregor Dawson, Toronto, Chairman, appointed by the Minister in the absence

of a joint recommendation from the other two members of the Board, Messrs. R. V. Hicks of Toronto, and Fred Molineux of Hamilton, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

The Board of Conciliation appointed by you in the above matter now submits its Report. Two formal sittings of the Board were held: the first on April 25, the second on May 2. At both sittings the Union was represented by Mr. S. White and Mr. B. Clark, with Mr. H. Simon as their Counsel; the Company was represented by Mr. J. B. Smith with Mr. J. C. Adams as his Counsel.

Three matters were found to be in dispute.

1. A paragraph in the proposed contract relating to the raising of standards of efficiency in the plant.

2. A paragraph in the schedule of working conditions relating to hours of employment.

3. A paragraph in the proposed contract relating to union membership.

It is with great regret that the Board must report that it was unable to secure the consent of both parties to any of these three matters.

The Board is, however, prepared to make recommendations concerning these issues and on two of these (numbers 1 and 2 above) the recommendation has the unanimous endorsement of members of the Board. Both of these recommendations represent what the Board considers to be a fair compromise between the two parties. On the third (number 3 above) the Employer's representative dissents from the recommendation of the other two members. This recommendation embodies a final proposal of the Union, which, in turn, represents a very substantial modification of the Union's original demands.

1. The Board unanimously recommends that in the proposed contract Paragraph 5 (relating to the raising of standards of efficiency in the plant) should read as follows:

It is mutually agreed that normal and reasonable standards of efficiency have not been maintained by certain employees during the period of the acute labour shortage of the war years, that these normal and reasonable standards will be restored as soon as possible, that each employee will be required to perform a fair day's work, and that employees who do not measure up to the

normal and reasonable standards of efficiency, as set forth by the Company, may be dismissed. The Company's judgment as to what is a normal and reasonable standard of efficiency shall be final. The Company shall consult, however, with the Union Committee, as at present constituted, before making any changes in the existing standard.

2. The Board recognizes the desirability of a standard 44-hour week and understands that this has been the recent practice of this Company with the great bulk of its employees. The Board approves in principle of this standard week, with four additional hours for certain special groups whose work may be necessary for the uninterrupted operation of the plant, such as, maintenance men, clean-up men, truck drivers, etc. The Board feels, however, that inasmuch as the great majority of the other firms engaged in the same industry are at present operating under longer hours, it would be disadvantageous to both employer and employees (pending a wider agreement embracing a substantial number of these other plants) to impose rigid conditions of work which are not prevalent in the industry as a whole.

The Board unanimously recommends that in the schedule of working conditions Paragraph 1 (relating to hours of employment) should read as follows:

The Company will accept as a desirable goal the 44-hour week (except for maintenance men, clean-up men, truck drivers, and others who may be necessary for the uninterrupted operation of the plant, for whom the standard will be four hours more a week) and will endeavour to continue on that basis. The Company, however, pending a wider agreement in the industry as a whole, reserves the right to extend the normal week, when in its opinion such extension is necessary, to a maximum of 48 hours.

3. The Chairman and the Employees' Nominee on the Board agree on a maintenance of membership clause. The vote for Union recognition was high, the present Union membership appears to be large, the relations between the Company and the Union seem to be reasonably good; and these two members of the Board feel that the Union is entitled to the mild protection which this clause would furnish. The Employer's representative on the Board is unable to agree. He is impressed with the brief existence of the Union, with the limited organization in the industry generally, and with the fact that this is a first agreement between the Union and the Company.

The Board recommends that in the proposed contract the first sentence of Paragraph 4 (relating to union membership) should read as follows:

All employees who are members of the Union at the date of this agreement and all those who may voluntarily join during the duration of the agreement shall maintain their membership for the entire term of the agreement.

All of which is respectfully submitted.

Dated at Toronto this 7th day of May, 1946.

Report of Board in Dispute between Prince Rupert Dry Dock and Shipyards, Prince Rupert, B.C., and Local No. 2, Marine Workers and Boilermakers' Union of Canada.

On May 11, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. F. M. Clement, Vancouver, Chairman, appointed on the joint recommendation of the other two members of the Board, Mr. W. S. Owen of Vancouver, and Mr. C. Cameron of Courtenay, appointed on the nomination of the employer and employees respectively.

Report of Board

The HON. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

DEAR SIR:

The Board appointed to deal with the above conciliation took evidence in Prince Rupert, reviewed the case as thoroughly as possible, and begs to report as follows:

The evidence indicated that there was no officer in Prince Rupert or in British Columbia who on his own authority could do more than negotiate within the framework of the general labour policy of the Canadian National Railways. This policy does not include the recognition of the principle of the union or closed shop. This, the union or closed shop, is what the union is asking for. Consequently, because of the conflict of company and union policy and because of the way in which the case was brought before us, we have been somewhat restricted in our approach. Other boards may find themselves in a similar position. Because of these circumstances we beg to recommend as follows:

- (1) That a contract or agreement be entered into as promptly as possible.
- (a) That the agreement include the seniority and ability clauses as worked out by the union committee and submitted to the company for tentative approval, subject to minor amendments.
- (b) That Section 6 of Article 4 of the proposed agreement be retained in order to make provision for the meeting of stewards in company time.

(c) That all of Article 1 in the proposed agreement, i.e., the article dealing with collective bargaining and union status, be deleted.

(2) That since the broad, general labour policies of the government and the Canadian National Railways and organized labour cannot be dealt with by this Board, we can do no more than suggest that these policies be clarified and harmonized by senior bodies of government, National Railways, and appropriate executive officers of organized labour. This is essential for the guidance of future boards.

(3) Broadly and generally speaking, we confirm the principle that the privileges and responsibilities of organized labour should be the same in government yards as in private yards.

All of which is respectfully submitted.

Chairman.

Minority Report

HON. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

DEAR SIR:

While finding myself in agreement with the main body of the Board's report and recommendations in the above case, I am hereby dissenting from section (c) of the first recommendation, and submitting a minority report dealing with union security.

At no time during the hearing did the Company's representative advance any reasons for the Company's refusal to accede to a provision for union security in the proposed agreement. He contented himself with the bald statement that it was contrary to established company policy, and attempted to justify the Company's position by reference to a directive from your department which, in rather ambig-

uous and contradictory terms, prohibits or disapproves of union shop agreements between Crown Corporations and their employees.

I am unable to accept this as valid grounds for refraining from a recommendation of union security clauses. The mere fact that the company has hitherto refused to adopt such a policy is to my mind, wholly irrelevant. In this their position is no different from that of any other employer who has not hitherto signed a union shop agreement.

Nor was I able to accept the department directive referred to above, as having any bearing on this case. Had it done so then I could see no reason why you should have appointed a Board to deal with the very matter the directive excludes from consideration in cases where the directive has application.

In view of the failure of the Company to offer any reasoned argument against a union security clause and in view of the fact that the Prince Rupert yard is the only yard on the Pacific Coast which does not operate under an agreement containing union security provisions, I recommend as follows: That the agreement recommended by the Board shall contain a union shop agreement in such terms as to ensure that all present employees shall remain and all new employees shall become members of the union as a condition of employment.

Respectfully submitted,

Yours truly,

(Sgd.) COLIN CAMERON,

Report of Board in Dispute between the Wellesley Hospital, Toronto, Ont., and Local 204, Building Service Employees' International Union

On May 16, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge Egerton Lovering, Chairman, appointed on the joint recommendation of the other two members of the Board, Messrs. Norman L. Mathews and Bora Laskin, appointed on the nomination of the employer and employees respectively.

Report of Board

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa,
Ontario.

DEAR SIR:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings and now submits its report.

The Board has had several meetings to consider the matters involved in the dispute between the parties. At the meeting held on April 5, 1946, the Hospital was represented by Mr. M. T. Morgan, Administrator, and the Union by Mr. H. Walker, Miss Julie Bartley and Mr. William Bain. After further meetings at which discussions took place among the members of the Board, it was decided to have the parties present at another meeting to present additional argument, and this took place on April 26. The Union was represented by the same parties and the Hospital was represented by Mr. Morgan and Mr. R. V. Hicks.

There were three matters originally in dispute when the matter came before the Board, i.e., wages, statutory holidays and

check-off. Through the assistance of the Board, the parties came to an agreement with regard to the latter two points. It was agreed that the employees of the Hospital would not be required to work on the following statutory holidays: New Year's Day, Good Friday, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, and Christmas Day. The Hospital also agreed to include in the agreement provision for a voluntary check-off of union dues. The employees who desired to authorize the check-off would be given the option of signing an authority which would be revocable on thirty days' notice or of signing an authority which would be irrevocable during the lifetime of the agreement.

This disposed of all matters in dispute with the exception of the question of wages. In view of the fact that the Hospital is exempt from the provisions of the Wartime Wages Control Order 1943, established by Order in Council P.C. 9384 and amendments thereto, this was a matter on which this Board was required to bring in a recommendation. The only point in dispute dealt with the wages of laundry workers in the Hospital. The Hospital has been paying the laundry workers \$75 per month for a 45-hour week or \$80 per month for a 48-hour week. The Union requested that the employees in the laundry receive \$90 per month for a 48-hour week.

The following facts were established by the parties in the course of the hearings: All of the employees in this Hospital were given a wage increase of approximately \$10 per month in August, 1945, and, as a result of that increase, the Hospital was losing money. The financial statement was presented showing that, in the year 1945, the Hospital lost

approximately \$10,000. A statement was also presented showing that, while during the first three months of 1945, the Hospital had a slight operating profit per patient-day, during the first three months of 1946 this was changed to a substantial loss per patient-day, and the Hospital claimed that this was largely due to the increase in wages already given last August. It also appeared that, in the case of the Toronto General Hospital, the laundry workers were receiving \$90 per month, but in all of the other Toronto hospitals the rate paid laundry workers was \$80 per month for a 48-hour week, which is the same rate as that being paid at Wellesley Hospital. It also appeared that laundry workers were among the highest paid of any of the classifications in the bargaining unit, the other classifications such as ward aides, floor maids, kitchen maids, diet-kitchen maids and seamstresses all receiving less than that amount.

Having in mind therefore that all of the employees received substantial wage increases last August, that no application was being made for increases for all of the other classifications, that the laundry workers were receiving the same rate as that being paid in the majority of the other Toronto hospitals for the same work, and that the Hospital was losing money at the present time, the majority of the Board felt that the present time was not an appropriate time to grant further wage increases to the laundry workers; and, under these circumstances, the majority of the Board recommends that the parties sign an agreement providing that the laundry workers receive \$80 per month for a 48-hour week.

All of which is respectfully submitted.

Dated at Toronto, this 9th day of May, 1946.

(Sgd.) EGERTON LOVERING,

Chairman.

(Sgd.) NORMAN L. MATHEWS,

Member.

Minority Report

The majority of this Board refuses to recommend an increase in the wages of eight (8) laundry workers from \$80 to \$90 per month, i.e. from \$960 to \$1,080 per year. I cannot concur in a conclusion that denies

to underpaid workers some encouragement towards an approach to a living and respectable wage. If the hospital were an ordinary profit making enterprise, it would deserve little sympathy in pleading inability to pay as a reason for asking its employees to subsidize its operations through the acceptance of substandard wages. The fact that the hospital classifies itself as a non-profit charitable institution does not make its plea of inability to pay any more laudable. Charity may well begin at home in this instance. The hospital's financial statement, indicating a loss on last year's operations, far from justifying denial of the increase sought here by eight (8) laundry workers, would support an endeavour to review its general wage structure in order to ascertain whether some sacrifice to charity ought not to be made by classifications of employees whose present wages are well above subsistence level.

The contention that an increase to laundry workers would disturb the wage equilibrium among the different classifications of building service employees is, in my view, without merit. It assumes an equilibrium which does not exist and ignores the fact that the union, as representative of all building service employees, sought to negotiate a schedule of wage rates for the various classifications in which the rate for laundry workers was fixed at \$90. We must assume that any differential in favour of the laundry workers which this \$90 rate would establish, was acceptable to the other classifications for the time being.

It is to me a rather grim and desperate logic that supports continuation of the present low wage to laundry workers on the ground that workers in the same and related classifications in other hospitals are getting an equally low wage. A formula of comparative rates, where such rates are of the subnormal kind involved in this case, may well be likened to an attempt to make poverty respectable by offering the consolation that others are equally poor. I do not think that that is any more solace to the mind than it is nourishment for the stomach.

All of which is respectfully submitted.

Dated at Toronto this 13th day of May, 1946.

Member.

Report of Board in Dispute between Weston Dairy, Limited, Weston, Ont., and Local 647, Milk Drivers and Dairy Employees' Union (AFL-TLC)

On May 1, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: His Honour J. Samuel Factor, Toronto, Chairman, appointed by the Minister in the

absence of a joint recommendation from the other two members of the Board, Messrs. J. J. Robinette, and G. R. Harvey, also of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

SIR:

The Board of Conciliation established by you in the above matter hereby reports as follows:

The Board held sittings at the City of Toronto, both privately and with the representatives of the parties, on April 11, April 16 and April 27, 1946. At the hearings the employer was represented by A. M. Cousins, the President; A. B. Cousins, the Vice-President; O. Hamilton, the Secretary, and N. L. Mathews, K.C., Counsel for the Weston Dairy Ltd. The employees were represented by D. J. Buchanan, business representative of Local 647, and A. F. McArthur, representative of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America.

The employer operates a small dairy at Weston, Ont., with about fifteen employees, all of whom are presently members of the union, and took over the business in September, 1944. At that time there was in existence an agreement (which was to continue in effect until January 14, 1945) between the Union and the employer, which provided *inter alia* for a closed shop.

The new management, as mentioned, took over in September, 1944, and it seems that since then the relations between the employer and the employees as represented by the Union have not been too harmonious. This is indicated by the following events:

The agreement above mentioned was not renewed on its expiry date, but on June 29, 1945, under the threat of a strike, and under protest, the employer signed a new agreement with the Union, which, under Clause I, provided that it shall become effective as of January 14, 1945, and shall continue in effect until January 14, 1946, and which also provided *inter alia* for a closed shop.

On October 5, 1945, Mr. Mathews, the solicitor for the employer, wrote to Mr. McArthur terminating the last mentioned agreement, entered into under protest, at its expiry date, namely January 14, 1946. On November 8, 1945, he enclosed a draft agreement containing the Company's proposals, and on the Thursday before the 14th January, 1946, Mr. McArthur came into his office, advised that the Company's proposals were not acceptable, and submitted a draft agree-

ment containing the Union's proposals, which include *inter alia* provision for a closed shop and voluntary check-off.

The employees went on strike on January 16, which lasted for two days, and as a result of which the parties resumed negotiation with Mr. H. Perkins, assisting as Conciliation Officer. Several meetings were held, as a result of which he recommended that an agreement on the matters in issue might be facilitated by the appointment of a Board of Conciliation.

It has been agreed by both parties that the Union request for adjustment in wage rates, commission, vacations and other items governed by P.C. 9384 will be referred to the Regional War Labour Board.

The parties have also agreed that the agreement between them shall provide for a voluntary check-off irrevocable during the existence of the agreement.

The parties have further agreed that the few small matters in dispute between them, such as the division of cost of uniforms, and the prohibition as to grooming of horses and cleaning the outside of wagons by the employee, are not to be considered by this Board, but that they will reach some settlement of these minor disputes.

The main and most important matter in issue and in dispute is the demand of the Union for a closed shop.

The employer has refused to accede to such demand, but is willing, as a matter of conciliation, to grant a provision for maintenance of membership, which proposal the Union has refused to accept.

The employer contends that it is not a Toronto dairy; that it operates in a small centre where everybody knows each other; that it is a small dairy with an intimate relationship between employee and management, and it would be unfair to impose a closed shop provision which would force it to engage a Union employee from Toronto when someone, not a Union member, and a resident of Weston, would be available, and which employee would be of greater benefit to the employer.

On the other hand, the Union contends that the present management have recognized the agreement providing for a closed shop from September, 1944 to January 14, 1945, and while admitting that this agreement was renewed on June 29, 1945, as a result of threat of a strike, that there was no stoppage of work as on January 14, 1945, when the agreement expired; that the closed shop is a fair

provision, and is in effect with fourteen other Toronto dairies, some of them as small as this dairy.

Your Board recommends that the provision for a closed shop be modified to permit the employer to employ residents in the delivery area only who are not Union members.

All of which is respectfully submitted.

Report of Board in Dispute between Opal Mfg. Co., Ltd., Toronto, Ont., and Local 514, United Electrical, Radio and Machine Workers of America (CIO-CCL).

On May 29, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge Egerton Lovering, Toronto, Chairman, appointed by the Minister on the joint recommendation of the other two members of the Board, Messrs. Norman L. Mathews and Paul Siren, also of Toronto, nominees on the Board of the employer and employees respectively.

Report of Board

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings and now submits its report.

A hearing was held in Toronto on May 13, 1946, to hear representations by the parties. The Company was represented by J. Munz, General Manager, and by J. C. Adams, K.C., Counsel; and the Union by John Wigdor, International Representative, Miss Rose Kopeck and Alex Felso.

The following facts appeared from the evidence: There are approximately thirty employees in the bargaining unit and, according to the Union, twenty of these are members in good standing of the Union. The first agreement between the parties was signed in February, 1944 and was to end with the termination of hostilities in Europe. The agreement now being negotiated between the parties is therefore a second agreement.

It was agreed between the parties that the proposed agreement as submitted by the Company was satisfactory to both parties except that the Union wanted two additional clauses providing respectively for union shop and checkoff of union dues, neither of which the Company was prepared to concede. Each side presented its arguments with regard to these two matters in dispute.

With regard to the request of the Union for check-off, it was stated by Mr. Munz that

Dated at Toronto this 29th day of April, 1946.

(Sgd.) S. FACTOR,
Chairman.

(Sgd.) JOHN J. ROBINETTE,
Employer's nominee.

(Sgd.) R. HARVEY,
Employee's nominee.

they had a very small office staff, that it was very much over-worked and that it would entail considerable extra work to deduct union dues from the pay cheques of the employees. In view of this and of the facts that the plant is compact and the number of employees is small, the Union agreed during the course of the hearing to withdraw its request for checkoff.

As it was impossible for the parties to arrive at an agreement on the question of union shop during the hearing, the members of the Board met again on May 15 to consider the recommendations that they should make. The majority of the Board feel that no case has been made out for any form of union security in this matter. It was established by the evidence that relations between the Company and the Union had been very good, although, according to the Company, this relationship had deteriorated considerably since Mr. Wigdor, the present organizer, succeeded to that office. There was no evidence whatever that the Company had shown any hostility to the Union, nor was there any evidence that the Union was losing ground or that its position as collective bargaining agent was being jeopardized in the slightest degree. Under these circumstances, the majority of the Board feel that no case has been made out by the Union for union shop or maintenance of membership, and recommends that no such provision be included in the present agreement.

All of which is respectfully submitted.

Dated at Toronto, this 28th day of May, 1946.

(Sgd.) EGERTON LOVERING,
Chairman.

(Sgd.) NORMAN L. MATHEWS,
Member.

Minority Report

The Board of Conciliation established to hear the dispute between the Opal Manufacturing Company Limited and Local 514, United Electrical, Radio & Machine Workers of America (CIO-CCL), heard the parties on

May 13, 1946. Both parties agreed that there was a dispute on only two clauses in the proposals submitted by the Union to amend the existing collective agreement with the Company. The two clauses upon which the dispute existed were the union shop and checkoff.

The Union, represented by Mr. John Wigdor, Business Agent for Local 514, United Electrical, Radio & Machine Workers of America (CIO-CCL), was prepared to concede on the two clauses in dispute. Upon the request of the Chairman of the Board, Mr. Wigdor dropped the request for a check-off and upon further questioning by the Chairman of the Board Mr. Wigdor indicated that the Union was prepared to accept a maintenance of membership clause in place of the union shop.

The Company, represented by Mr. J. C. Adams, K.C., announced that the Company will not accept any form of union security in the collective agreement between the Company and the Union.

The original agreement between the Company and the Union was concluded in February of 1944. This agreement has since been renewed once. I contend that in view of the period of time in which the two parties have maintained bargaining relations dating back to February, 1944, that it is not unusual or demanding on the part of the Union to request some form of union security. The Union in its presentation to the Board was quite prepared to bargain on the question of union security but were rebuffed by the adamant attitude of the Company's repre-

sentatives who refused to consider any form of union security.

I am of the opinion that in view of the fact that the employees of this plant consist in the main of workers of various nationalities who speak varied languages, that it is essential for the Union to have some form of union security in order to bring about stability in bargaining relations between the Company and the Union. As long as there is no form of Union security in the collective agreement, the employees of this Company will have a tendency to consider that it is necessary to maintain a very vigilant attitude toward the Company and due to the possible confusion of the various languages spoken by the employees of this Company, such a situation may prompt conditions where harmonious relations are not possible. The attitude of Management was expressed in the refusal of the Company to even consider any form of union security. This, of course, indicates that the Company was not prepared to bargain with the Union to the fullest extent possible and will leave a feeling among the employees of the Company that will not be conducive to stable relations.

I, therefore, depart from the opinion of the majority on the Board and recommend a Maintenance of Membership clause to be inserted in the collective agreement between the Company and the Union.

(Sgd.) PAUL SIREN,
Member of the Board.

Report of Board in Dispute between J. H. Connor and Son, Limited, Ottawa, Ont., and Local 641, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

On May 3, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: Mr. J. H. Stitt of Ottawa, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. G. Walsh of Montreal, and Alan Adamson of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

SIR:

We beg to report that in connection with the above conciliation that an agreement was effected between the employers and the employees on all points in dispute.

Yours very truly,

(Sgd.) J. H. STITT,
Chairman of Board.

(Sgd.) GEO. WALSH,
(Sgd.) ALAN H. ADAMSON,
Members.

Report of Board in Dispute between Dowell's Pacific Transfer and Storage Co., Ltd., Victoria, B.C., and Local 234, Canadian Brotherhood of Railway Employees and Other Transport Workers.

On June 1, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: Mr. H. A. Beckwith, Victoria, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. G. A. Cameron, Victoria, and D. O'Brien, Vancouver, appointed on the nomination of the employer and employees respectively.

Report of Board

To The Honourable The Minister of Labour.

The Conciliation Board herein, consisting of the undersigned Members, has the honour to report as follows:

(1) The Board sat on May 2nd, 20th and 23rd.

(2) The issue between the Parties related to sections in the proposed agreement pro-

viding for what is commonly described as a union shop.

(3) After considerable discussion, the Parties agreed upon a slight modification of the original provisions, and an agreement* has been entered into, a true copy whereof is forwarded with this report.

Dated this 28th day of May, 1946.

(Sgd.) H. A. BECKWITH,
Chairman.

(Sgd.) DANIEL O'BRIEN,
Member.

(Sgd.) GORDON A. CAMERON,
Member.

* The signed agreement will be summarized in another section in a subsequent issue of the *LABOUR GAZETTE*.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

OFFICERS of the Industrial Relations Branch dealt with 21 industrial disputes during the month of May, involving 62,269 workpeople employed in 299 separate establishments. Of these, 13 were new disputes which originated during the month and 8 were situations which had been untermiated as of April 30, and received further attention in May. These disputes were dealt with under the provisions of the Conciliations and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in

the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Rubber Workers, Province of Ontario.—In order to avert a strike in the rubber and rubber products manufacturing industry in the Province of Ontario, the Minister of Labour on May 23, 1946, following consultations with, and on the recommendation of, the Minister of Labour for Ontario, appointed His Honour Judge J. C. A. Cameron, of Belleville, to investigate the situation. Judge Cameron was given the powers of an Industrial Disputes Inquiry Commission under Section 8 of Order in Council P.C. 4020 which empowers the Minister to deal with any situation which in his opinion may interfere with the effective transition to a peacetime economy.

The dispute arose out of demands made by the United Rubber Workers of America upon ten companies for increased wage rates, a forty-hour week, payment for overtime work, payment for statutory holidays, premium payment for night-shift work and various individual adjustments in wage rates. The employers involved were the Barringham Rubber Company Limited, Oakville, Dominion Rubber Company, Limited, Kitchener, Dunlop Tire and Rubber Goods Company, Limited, Toronto, Firestone Tire and Rubber Company

of Canada, Limited, Hamilton, B. F. Goodrich Rubber Company of Canada, Limited, Kitchener, Goodyear Tire and Rubber Company of Canada, Limited, New Toronto and Bowmanville, Gutta Percha and Rubber Limited, Toronto, Kaufman Rubber Company, Limited, Kitchener, Seiberling Rubber Company of Canada, Limited, Toronto, Viceroy Manufacturing Company, Limited, West Toronto.

As a result of the appointment of the Commissioner, a strike which had been called for May 27, unless a settlement were reached before hand, was cancelled for the time being at least.

Textile Workers, Carleton Place, Ontario.—

Upon the request of the Minister of Labour for Ontario, Mr. L. W. Brockington, of Ottawa, was appointed on May 27, 1946, as an Industrial Disputes Inquiry Commissioner to investigate the dispute between Renfrew Woollen Mills, Limited, Carleton Place, Ontario, and its employees represented by Local 103, United Textile Workers of America. Employees of the Company had been on strike since April 2 in an effort to secure a wage increase of 15 cents per hour, a work-week of forty hours, two weeks' holidays with pay and other concessions. Several attempts to settle the dispute had been made by a conciliation officer assigned by the Provincial Department of Labour, but without success. The appointment of Mr. Brockington was made pursuant to Section 8 of Order in Council P.C. 4020 which provides that the Minister of Labour may appoint a Commission to investigate any situation which, in his opinion, may interfere with the effective transition to a peacetime economy.

Rubber Workers, St. Jerome, P.Q.—On behalf of the Quebec Labour Relations Board and with the joint consent of the parties, an Industrial Relations Officer of the Montreal office of the Federal Department of Labour conducted a representation vote on May 23, 1946, among certain employees of the Dominion Rubber Company, Ltd., St. Jerome, P.Q. The purpose of the vote was to determine whether the employees wished to continue collective bargaining through Local 144, Rubber Workers' Federal Union (T.L.C.C.) or to be represented in such matters by Local 79, Distillery, Rectifying Wine Workers' and Rubber Workers' International Union (A.F. of L.). The eligible voters comprised 1,344 hourly rated employees, excepting supervisors, clerks, laboratory employees, plant guards and employees of the leather shoe department of the plant. A total of 1,207 workers cast their ballots, 860 voting for Local 144, Rubber Workers' Federal Union, and 340 for Local 79,

Distillery, Rectifying Wine Workers and Rubber Workers' International Union. There were 7 spoiled ballots.

Hotel Employees, Toronto, Ontario.—In the latter part of April, 1946, the Department received a recommendation from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commissioner under Section 5 of Order in Council P.C. 4020 to investigate the dismissal of six employees of the Morrissey Hotel, of Toronto, allegedly for union membership. His Honour Judge Samuel Factor, of Toronto, was appointed on April 25 by the Federal Minister of Labour to deal with the charges, which had been laid by the representative of Local 280, International Beverage Dispensers' Union. The Commissioner found that five of the employees in question had been dismissed because of their union membership and recommended their reinstatement. He reported that the evidence fell short of establishing that the sixth man was dismissed for the same reason. On May 18, the Federal Minister of Labour ordered the Hotel Proprietor to reinstate the five employees who were wrongfully dismissed and to pay them the wages lost during the period between their dismissal and reinstatement.

Bus Drivers and Mechanics, Sydney, N.S.—Some 40 employees of the Sydney and Whitney Pier Bus Company, Sydney, N.S., went on strike on May 11, 1946, in protest against the dismissal of a coloured bus cleaner. An Industrial Relations Officer stationed at Glace Bay, N.S., immediately conferred with representatives of the Company and the Canadian Brotherhood of Railway Employees and Other Transport Workers, which Union represented the employees. A Halifax representative of the Union also undertook direct negotiations with the employer. Work was resumed on May 14, on the understanding that the dispute would be arbitrated in accordance with established grievance procedure.

Logging and Lumber Mill Workers, British Columbia.—The principal industry of British Columbia was brought to a virtual standstill on May 15, 1946, by a strike called by the International Woodworkers of America. It was reported to affect some 247 employers operating 1,122 logging camps and 605 sawmills, wood-working plants, shingle-and-planing mills, and sash-and-door mills. Some 37,000 coastal and interior workers were directly involved. On May 21 a further group of about 1,000 workers in the northern interior region also joined the strike.

The dispute arose out of union demands for general wage increases, a 40-hour week, union

shop conditions and a check-off of union dues. The woodworkers were receiving hourly wages ranging from 67 cents for common labour to \$1.27 for high riggers. The union originally asked for a 25 cents-an-hour increase.

In negotiations affecting operations in the coastal region and southern interior, which commenced on March 21 and continued intermittently until May, the union was reported as being willing to accept a wage increase of 18 cents an hour together with its other demands, and there were hints after the strike began that it would come down to a 16-cent increase. On the other hand, the operators' representatives made various offers to compromise, ending up with an offer of a 12½-cent per hour wage increase, and reduction of hours to a 44-hour week with time and one-half rates for work in excess of 8 hours per day or 44 hours per week. The proposals of the operators were conditional upon their approval by the employees prior to adoption.

Negotiations had also taken place between union representatives and a committee representing interior operators, assisted by the Chief Conciliation Officer for British Columbia. These had also broken down without agreement being reached on any important point.

When a complete deadlock had been reached in negotiations and a stoppage of work appeared imminent, the Dominion Minister of Labour on the recommendation of the Provincial authorities appointed the Honourable Chief Justice of British Columbia, G. McG. Sloan, on May 11 as an Industrial Disputes Inquiry Commissioner under the provisions of Section 8 of Order in Council P.C. 4020. The Commissioner at once called the parties into conference. Representatives of the employers would not enter into negotiations unless the union would forthwith rescind its strike order for May 15. The union, on its part, would not consent to call off the strike except on its own terms, which were that the industry agree to an 18-cent per hour general increase in wages; to a 40-hour working week; to the appointment of an arbitrator with power to make a binding determination in relation to union security and check-off; and to settle all other matters in dispute through the process of negotiation with the union. The operators' representatives agreed to the last two proposals of the union, but refused to enter into any discussion of rates of pay or hours of work unless and until the union cancelled its strike order. Neither side would recede and the conference broke up, the Commissioner reporting that he was unable to effect a settlement and that he was unaware of any course of procedure to settle the dispute in a manner binding upon the disputants.

When the strike took place, as scheduled, it quickly made itself felt far beyond the bounds of the forest products industry. Construction came to a halt on public works and on housing projects. Many box plants soon used up reserve supplies of raw materials for making crates for fruit growers and fish canneries. Ships intended to carry timber to Great Britain and UNRRA areas were turned away. Work stopped on a million railroad ties for China ordered by UNRRA. Even ships to carry grain to famine stricken areas were hampered by the lack of lumber to line their holds. Newspapers both in Canada and the United States were compelled to cut down in size.

On May 21, on the recommendation of the Minister of Labour for British Columbia, the federal Minister of Labour requested the Honourable Mr. Chief Justice Sloan to extend and continue his inquiry. The Commissioner was asked to invite the parties to meet him with the idea of negotiating a wage rate which might be submitted to the Regional War Labour Board for consideration, and further, to agree to act as arbitrator on the points involved in the question of union security if the parties would agree that his decision should be final and binding.

After five days of hearings, the Commissioner on June 1 presented to the representatives of the employers and the operators his recommendations as to the terms on which the dispute should be settled. His report proposed a wage increase of 15 cents an hour "across the board"; an average 44-hour week in the logging industry, to be arranged by adopting a 48-hour week from April to September, inclusive, and a 40-hour week during the remaining months of the year; a 44-hour week in sawmills throughout the year; time-and-one-half pay for hours worked in excess of the 44-hour week during the six months in which the logging industry adopts a 48-hour week; and a voluntary revocable check-off of union dues. The Commissioner pointed out that the voluntary check-off had had legislative sanction in the Province for 44 years under the Master and Servant Act (in connection with medical service). On the issue of the union shop, the Commissioner was unable to reach the conclusion that the union, during the life of the 1946 agreement, would stand in any need of any form of additional "security". With reference to the employers' request for a provision that in the event of a strike the agreement should immediately become null and void, the Commissioner found that the provisions of the existing Master Agreement were adequate.

As this issue of the LABOUR GAZETTE went to press, it was learned that the lumber operators at a general meeting had decided to

accept the report of the Commissioner and that they were prepared to sign a Master Agreement with the union for the period of one year from the date on which work was resumed in the industry, the agreement to be identical with the previous agreement except for the changes necessary to give effect to the Commissioner's recommendations. The delegates of the union rejected the recommendations, claiming that they were unacceptable to the membership of the various locals.

Unlicensed Seamen, Great Lakes and Upper St. Lawrence River.—On May 27 the Canadian Seamen's Union called a general strike of its members on all vessels plying the Great Lakes and Upper St. Lawrence River in connection with its demands for an eight-hour day and three-watch system for deckhands and other unlicensed personnel. The deck crews had been working an 84-hour week, firemen only being on an 8-hour day among the unlicensed personnel. The strike was directed particularly against 18 companies belonging to the Dominion Marine Association, but as the strike progressed ships belonging to other companies were also affected.

Prior to the calling of the strike, the Minister and officials of the Department of Labour had been in close touch with the situation and had made numerous efforts to avert a tie-up. Most of the larger shipping operators were parties to an agreement with the Canadian Seamen's Union which was effective until August 1, 1946, but contained a qualification that amendment could be made thereto by mutual consent of the parties.

Several conferences on the question of the shorter hour week took place between representatives of the shipping operators and the union in the months following the signing of the agreement, but without conclusive results. On March 21 and March 25, 1946, just prior to the opening of the navigation season, the Minister of Labour and the Minister of Transport and officers of their departments held conferences in Ottawa with a representative group of shipping operators and with officers of the Canadian Seamen's Union, respectively. To the operators the Minister of Labour stated that he could not defend the 84-hour week; and to both groups he stated his conviction that the issue could best be settled by the process of collective bargaining.

On March 27 the Minister of Labour sent telegrams to the union and to the Dominion Marine Association proposing a joint conference between them on April 8. In the telegrams he stated that if the parties concerned were agreeable, the conference could be held in the Toronto office of the Dominion

Department of Labour. In reply, the Minister was informed that arrangements for such a conference had already been made by the president of the union and the counsel for the Marine Association, and that it had been agreed between them that the meeting would be held in the office of the Association. A few days later the president of the union made representations to the Department that the other members of the Seamen's executive felt strongly that the meeting should be held in the Labour Department's office and that it should be presided over by a representative of the Government. He was informed that no firm arrangement had been made to this effect, and that departmental officers considered that the parties should try to reach a settlement through collective bargaining, but that a conciliation officer would be available should the parties need and ask for his assistance. However, the union officers refused to keep the appointment with the Marine Association members on April 8, as arranged by their President, when the operators turned down a union proposal that an officer of the Department should preside or, at least, open the meeting and remain on hand in case he was needed.

The union then announced that it had decided, as a result of the "refusal of the lake operators to allow a representative of the federal government to sit in" at negotiations, to take a strike vote beginning April 15. The Minister of Labour at once appealed to the union president, stating that inasmuch as the process of collective bargaining had not been concluded, a strike vote at that time seemed unnecessary and could not be said to be in accordance with the provisions of the Wartime Labour Relations Regulations, P.C. 1003. This appeal failed.

As a result of further efforts by departmental officers, a conference between the ship owners and the union was arranged and took place in Toronto on May 20 and 21, with a senior conciliation officer of the Department in attendance. At it, the operators agreed to accept the principle of the 8-hour day and 56-hour week, and, as a partial step towards implementing the principle, offered immediately to engage an additional oiler and an additional wheelman aboard each vessel and to make other concessions, including certain overtime pay. Disagreement ensued over the detailed application of the plan, which the union claimed did not go far enough, and the negotiations broke off.

Feeling that the parties were not very far apart, the Minister of Labour then arranged a meeting of the parties to be held in Ottawa on May 28, and both sides indicated their

intention of being present. However, on the morning of May 24 an incident occurred at Montreal which upset matters. The Department was informed that two union delegates who had boarded a vessel owned by Canada Steamships Lines, one of the operating companies, were ordered off by the Master, who said that they could not discuss their business with the crew except during the lunch period. Ten members of the crew, of whom eight were off duty, followed the union delegates to the wharf and when they attempted to go aboard the vessel again, were refused admittance. The union claimed that the Master's actions were a violation of the collective agreement and constituted a lock-out. The Company maintained that the agreement contained provisions for the settlement of grievances and that these should have been invoked by the men, instead of walking off the ship. Officers of the union then called a strike on all the vessels of the Canada Steamship Lines, and followed up this action by issuing orders on May 27 for a general strike on inland and coastal vessels.

On May 28 representatives of the union and of the ship owners came to Ottawa as previously arranged, but events proved that the opportunity for a harmonious discussion of their differences had been dissipated by the intervening occurrences. Numerous separate and some joint conferences were held up until the *LABOUR GAZETTE* went to press, but were hampered by the policies followed by both parties outside the conference chamber, and no agreement resulted.

With regard to developments of the strike itself, it was difficult to acquire an accurate picture from day to day, particularly during its early stages, because of conflicting reports upon the number of men on strike, the number of ships operating and the number idle because of strike action. At the commencement it was reported that, of some 146 vessels owned by the 18 companies directly involved in the dispute, only about 93 were operating and that the rest were tied up either through lack of cargoes or through lack of coal caused by the soft coal strike in the United States. The operators made a determined attempt to run their vessels with non-striking crews or with non-union labour recruited at various points. Violence flared at many points, with the Canadian Seamen's Union concentrating their efforts to prevent ships being manned by crews of any description at the Welland Canal, the Cornwall Canal, and to a lesser extent the Sault Ste. Marie locks. By June 7, it was clear that shipping was pretty much at a standstill from the Welland Canal to Montreal, but that

quite a number of vessels were still plying the Upper Lakes. At the instance of the employing companies, about 175 strikers were arrested and charged with desertion or violence. Crews walked off numerous vessels not belonging to members of the Dominion Marine Association and with which the C.S.U. did not have collective agreements. Other vessels in this category were successfully picketed, both in Canadian and United States ports. Oil tankers were the most important vessels in this group. A truce proposed by government officials and at first accepted by the negotiators for both sides failed to take effect because of sporadic incidents and because of the determination on both sides not to lose any possible advantage.

At the outset of the strike, owing largely to a misunderstanding, the crews walked off two or three vessels operated by the federal Department of Transport, while the crews of a couple of others of the Department's fleet refused to leave port. An understanding was quickly reached through conversations between federal officials and representatives of the union, and the vessels at once resumed their functions of tending lighthouses, servicing buoys, etc.

Textile Products Workers, Toronto, Ont.—Upon the request of the Minister of Labour for Ontario, the Federal Minister of Labour, on May 17, 1946, appointed His Honour Judge Samuel Factor, of Toronto, as an Industrial Disputes Inquiry Commission to investigate charges that six employees had been dismissed by Rose Marx Brassieres Company Limited, Toronto, because they were members of or working on behalf of the International Ladies' Garment Workers' Union. The Commissioner reported on May 29 that he had succeeded in arranging a settlement whereby the employer agreed to take back five of the employees involved and to pay them a money settlement for wages lost during their separation from employment. The case of the sixth employee was dropped by the union.

*Newspaper Compositors, Winnipeg, Man., and Other Points.**—In the April issue of the LABOUR GAZETTE (p. 493), it was reported that the Minister of Labour had appointed Mr. W. D. Card, K.C., of Portage la Prairie, Man., as an Industrial Disputes Inquiry Commissioner to endeavour to settle the dispute between the Southam Company, Ltd. (Winnipeg Tribune Division), the Winnipeg Free Press Co., Ltd., and the Winnipeg Typographical Union No. 191. Earlier, Mr. Justice W. J. Major had acted, without success, as a Commissioner in connection with the same situation, which began as a strike of some 120 composing room employees of the two companies on November 9, 1945. The chief issues in dispute between the parties were the union's policy of the non-arbitrability of disputes arising out of its "laws", the 40-hour week, and payment of overtime if the Union could not provide enough labour under its closed shop contract.

The report of Commissioner Card was made early in May. After reviewing the attitudes of the parties to the dispute, the Commissioner reported that he was unable to bring about a settlement, and that because of the position taken by the two sides, he regretted that he could make no useful recommendation for its solution.

On May 30, 1946, compositors of three other newspapers published by the Southam Company Limited went on strike and were joined by a fourth on June 5. The papers affected were the *Edmonton Journal*, the *Hamilton Spectator*, the *Ottawa Citizen* and the *Vancouver Province*. The strike was reported to be in sympathy with the employees affected by the Winnipeg situation. In addition, a strike of linotypers occurred on the *Edmonton Bulletin*, published by the Alberta Free Press Limited, when the publishers of the *Journal* and the *Bulletin* attempted to issue a joint paper with a double masthead.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts are summarized in separate articles following this.

Mining, Non-Ferrous Smelting and Quarrying: Coal Mining

STELLARTON AND SYDNEY MINES, N.S.—THE ACADIA COAL COMPANY, LTD., AND OLD SYDNEY COLLIERIES LTD., AND UNITED MINE WORKERS OF AMERICA, DISTRICT 26.

Agreements to be in effect from the retro-active date of February 1, 1945, to January 31, 1947, and thereafter from year to year subject to 4 months' notice. These agreements are similar to the agreements at Cape Breton and Springhill summarized in the *LABOUR GAZETTE*, May, 1946, p. 625.

Mining, Non-Ferrous Smelting and Quarrying: Non-Metallic Minerals Other Than Coal

ASBESTOS, P.Q.—CANADIAN JOHNS-MANVILLE COMPANY LTD., AND SYNDICAT NATIONAL CATHOLIQUE DE L'AMIANTE D'ASBESTOS, INC., (NATIONAL CATHOLIC SYNDICATE OF ASBESTOS WORKERS)

Agreement to be in effect from February 1, 1946, to January 31, 1948, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the exclusive bargaining agent for all eligible employees. Check-off: company will deduct union dues from members' pay who so authorize and remit same to the union. Members may also revoke their authorization at any time.

Hours: 8 per day, 6 days per week, a 48-hour week. Time and one-half for overtime and for work on Sundays and 8 specified holidays except as part of regular shift. Vacation: one week with pay for employees with one year's service of at least 2400 hours or 300 days.

Wage rates: scale of wages as of December 31, 1945, to be in effect with an increase of

10 per cent for hourly paid males and 6 per cent for hourly paid female employees subject to approval of Regional War Labour Board. Apprentices (in manufacturing) in the trades of machinists, carpenters, sheet metal workers, electrical workers, mechanics and welders who must be between 16 and 25 years of age when starting to work, will be paid 40 cents per hour during the first year, 45 cents per hour during second year, 52 cents in third year, 57 cents in fourth year and trade scale in fifth year. Boys in the manufacturing department under 21 years of age replacing girls or men will start at 42 cents per hour, increased by 3 cents per hour after each full year till maximum of 53 cents per hour is reached. Wage incentive rates: existing rates to continue unless there is a change in working conditions or methods of operation. Any new incentive rates shall be the result of a study by the Industrial Engineering Department and shall be agreed to by the Labour Relations Committee of the Department concerned and the officers of the Union. Provision is made for an apprenticeship plan, seniority rights and grievance procedure.

Manufacturing: Tobacco and Liquors

MONTREAL, P.Q.—W. C. MACDONALD INCORPORATED AND THE TOBACCO WORKERS' INTERNATIONAL UNION, LOCAL 235.

Agreement to be in effect from April 6, 1946, to April 6, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole bargaining agency for its employees, who are members of the union. All employees who are now or hereafter become union members will remain members in good standing as a condition of continued employment. New employees must also become union members after the 2 months' probationary period.

Hours of work: 10 per day on Tuesday, Wednesday, and Thursday, 9 on Monday and Friday, a 48-hour week. Overtime: except for watchmen and power plant employees, overtime is payable at time and one-half; all work on Sundays and nine specified holidays, six of which are paid holidays shall be paid for at the rate of double time. Factory will also close down on All Saints' Day if manufacturing conditions permit. Vacation: one week with pay for employees with one to seven years' continuous service, two weeks with pay for those with 7 or more years' service.

Wages: "It is the policy of the Company that its wage scale for similar work under similar conditions shall be at least as high as the wage-scale in other tobacco factories in Montreal". Presently existing scale of wage rates including incentive shall continue in effect during the life of the agreement.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Textiles and Clothing

HAMILTON, ONT.—HAMILTON TWINE MILLS OF INTERNATIONAL HARVESTER COMPANY OF CANADA, LIMITED, AND THE UNITED STEEL-WORKERS OF AMERICA, LOCAL 3697.

Agreement to be in effect from January 31, 1946, to January 31, 1947, and thereafter subject to 30 days' notice. The Company recognizes the union as the sole representative of the employees for the purpose of collective bargaining. Check-off: the company will upon authorization of employees deduct \$1 monthly for union dues from employees' pay and remit same to the union. This check-off is contingent upon more than 50 per cent of the employees' continued authorization and practice of it.

Hours and overtime: the present regular schedule of departmental working hours shall be continued, time and one-half will be paid for work in excess of 9 hours per day or 45 hours per week, and for work on Sundays and 8 specified holidays. Vacations to be in accordance with the Harvester Vacation Plan as amended, subject to Dominion or Provincial government Orders in Council.

Wage rates: prevailing general wage rates to remain in effect until either party proposes an increase or decrease, when a sincere effort will be made through collective bargaining to arrive at a satisfactory conclusion. A premium of 5 cents per hour will be paid for all work performed between the hours of 7 p.m. and 7 a.m. subject to the approval of the Regional War Labour Board. This premium is not to be taken into account in computing overtime remuneration.

Provision is made for an apprenticeship plan, seniority rights and grievance procedure.

Manufacturing: Printing and Publishing

JOLIETTE, P. Q.—LA COMPAGNIE CANADIENNE DE PAPETERIE, L'TEE AND LE SYNDICAT NATIONAL DES EMPLOYES EN IMPRIMERIE DE JOLIETTE, INC. (NATIONAL SYNDICATE OF PRINTING EMPLOYEES).

Agreement to be in effect from June 6, 1945, to June 5, 1946, and thereafter from year to year subject to 30 days' notice. The company recognizes the union. Check-off: the company will deduct from the pay of employees who so authorize it, union dues and pay these over to the union. Such authorization is for the duration of the agreement.

Hours of work and overtime to conform with Orders-in-Council governing the printing trades in Montreal and district, (L. G. Feb. 1946, p. 187, Apr. p. 499 and previous issues).

Hourly wage rates: females—first 6 months 20 cents, second 6 months 24 cents, thereafter minimum 28 cents, scale 28 to 35 cents plus production bonus in certain departments; males—first 6 months 35 cents, second 6 months 40 cents, truckers and stripping machine operators 40 cents; addressers (expediting department), warehousemen, and waste paper packers 45 cents; wrappers 50 cents; paging machine operators, first 6 months 42 cents, thereafter 50 cents; "Challenge" hole punching machine operators and binding machine operators 42 cents; cutting room and ruling department workers 45 cents during first year increased to 76 cents in sixth year; press and typography workers 57 to 76

cents; helpers 45 cents; millwrights and embossing machine operators 76 cents. Vacation: one week with pay in accordance with Regional War Labour Board regulation during summer months.

Provision is made for grievance procedure.

Manufacturing: Pulp and Paper

ESKANOLA, ONT.—THE KALAMAZOO VEGETABLE PARCHMENT COMPANY LTD., AND THE INTERNATIONAL BROTHERHOOD OF PULP SULPHITE AND PAPER MILL WORKERS (LOCAL 74) AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS (LOCAL 956).

Agreement to be in effect from April 1, 1946, to May 1, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the unions as the agencies representing all eligible employees. All permanent and seasonal employees on operation and maintenance covered by the agreement shall become members of their respective union within 30 days after entering the company's employ and shall maintain membership in good standing as a condition of continued employment. The Company, when hiring new men, shall give preference to members of the unions.

Hours of work: 8 per day, 6 days per week, a 48-hour week for both day and tour workers. Overtime for day workers: time and one-half will be paid for overtime and for work on Sundays and 4 specified holidays. Vacation: one week with pay for employees with one year's permanent employment with the company consisting of at least 2,100 hours.

Wage rates: agreement to be reviewed prior to August 1, 1946, at which time schedule of wages will be agreed upon by the company and the union and become part of the agreement as of August 1. The matter of pay for some statutory holidays will be given full deliberation and consideration prior to August 1.

Provision is made for grievance procedure.

Manufacturing: Metal Products

BROCKVILLE, ONT.—PHILLIPS ELECTRICAL WORKS LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 510.

Agreement following strike (L. G. March, 1946, p. 363, April, p. 543 and May, p. 687, to be in effect from April 11, 1946, to April 10, 1947, and thereafter subject to 60 days' notice. The company recognizes the union as the sole and exclusive collective bargaining agency for all eligible employees. Check-off: the company shall deduct upon authorization from employees monthly dues of \$1 and/or initiation fee of \$2 and remit same to the union. This authorization may be cancelled by the employer at any time.

Hours of work: 8 per day Monday through Friday, 4 on Saturday (except for Rod Mill), a 44-hour week for all. Overtime: time and one-half shall be paid for work in excess of regular hours and double time for work on Sundays and 8 specified holidays. Vacation: one week with pay for employees with one to 5 years continuous service with the company, two weeks with pay for those with 5 or more years' service. Two to five days with pay for those with 6 to 11 months' service.

Wage rates: starting rate for new male employees shall be 49 cents per hour and for females 41 cents, both automatically increased by 5 cents per hour at the end of 6 weeks employment. Subject to authorization under the War-time Wages Control Order the company agrees to pay a 5 cent per hour increase to all employees. There is an incentive bonus plan. All operators working on bonus rated jobs are guaranteed their established base hourly rates. After any bonus rate has been officially established, the company guarantees that the rate will not be changed as long as operating methods, conditions, designs and tools for making parts involved remain unchanged.

Provision is made for seniority rights and grievance procedure.

PETERBOROUGH, ONT.—PETERBOROUGH LOCK MANUFACTURING COMPANY, LTD., AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 527.

Agreement to be in effect from July 4, 1945, to July 4, 1946, or 1947, subject to 30 days' notice before expiry date. The company recognizes the union as the sole and exclusive bargaining agent for all eligible employees.

Hours of work: 9 per day Monday through Friday, 3 on Saturday (except for iron foundry and watchmen), a 48-hour week. Rest period of 10 minutes allowed each half shift. Overtime: time and one-half for work in excess of 48 hours per week, also for work on Sundays and 6 specified statutory holidays and 2 additional days when latter are declared holidays. Vacation: one week with pay for employees with one year's continuous service with the company.

Wage rates: present scale to be continued until another scale as may be agreed to by the company and the union and approved by the Regional War Labour Board.

Provision is made for seniority rights and grievance procedure.

LONDON, ONT.—SPARTON OF CANADA LIMITED AND THE UNITED STEELWORKERS OF AMERICA, LOCAL 3383.

Agreement to be in effect from February 21, 1946, to February 21, 1947, and for another year if agreeable to both parties within 10 days of expiry date. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1945, p. 1823, with the following additions—Check-off: the company agrees to deduct monthly the sum of \$1 union dues from the pay of employees who so authorize and to the extent authorized and to remit same to the union by the end of the month.

Wages to be in accordance with existing scale of wage rates and practices, subject to any modifications that may be ordered by the Regional War Labour Board, or that may be arranged by negotiations between the parties, provided, however, that this shall not take place for a period of at least six months.

Manufacturing: Non-metallic Minerals, Chemicals, Etc.

ASBESTOS, P.Q. — CANADIAN JOHNS MANVILLE COMPANY LTD., AND SYNDICAT NATIONAL CATHOLIQUE DE L'AMIANTE D'ASBESTOS, INC.

For summary of agreement see above under Mining, Non-Ferrous Smelting and Quarrying: Non-Metallic Minerals other than Coal.

Transportation and Public Utilities: Air Transport

TRANS CANADA AIR LINES AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 714 (AIRCRAFT MAINTENANCE MECHANICS, ETC.)

This agreement, which covers all landing fields of the Trans Canada Air Lines in Canada, to be in effect from December 1, 1945, to November 30, 1946, and thereafter subject to 30 days' notice. The company recognizes the union as the official bargaining agency of certain employees in its Maintenance and Overhaul Stores, Cargo and Commissary Departments, of which the majority of such employees are members of the union.

Hours of work: 8 per day exclusive of meal periods, 5½ days per week, where not practicable to relieve employees one and one-half days in seven. The number of days off for any such employee shall not be less than six in any four periods of 7 consecutive days. So far as practicable, consistent with the requirements of the service, the employee's day off shall be Sunday. Seven specified legal holidays will be observed. Employees required to work on these holidays will be credited with pro rata overtime with a minimum of 4 hours. Overtime to be credited on a pro rata basis and compensatory time off allowed. Time in excess of regular shift exclusive of meal period in any 24-hour period shall be considered over time except in the case of rotation of shifts. Vacation: 2 weeks with pay for employees who have completed one year or more of service by the end of March, those with less than one year's service by the end of March one day's vacation with pay for each full month of continuous service.

Minimum monthly wage rates: crew chief, \$204.93; sub-foreman, air engineer, aircraft inspector, senior mechanic, \$194.93; junior mechanic, \$139.93 during first 6 months to \$169.93 in fourth 6 months; learner, \$79.93 in first 6 months to \$129.93 in sixth 6 months; chauffeur, \$119.93 in first 6 months to \$149.93 in fourth 6 months and thereafter; cleaner, janitor and labourer, \$119.93; stockkeeper or shipper and receiver, \$159.93 in first 6 months to \$184.93 in third 6 months and thereafter; assistant stockkeeper or assistant shipper and receiver, \$129.93 in first 6 months to \$149.93 in third 6 months and thereafter; issuer, \$79.93 in first 6 months to \$119.93 in fifth 6 months and thereafter; cargo agent, \$124.93 in first 6 months to \$154.93 in seventh 6 months and thereafter; cargo handlers and commissary handler, \$109.93 in first 6 months to \$149.93 in ninth 6 months and thereafter.

Provision is made for seniority rights and grievance procedure.

Trade

**WINNIPEG, MAN.—THE WEARING APPAREL
ASSOCIATION OF WINNIPEG (15 STORES) AND
RETAIL CLERKS INTERNATIONAL PROTECTIVE
ASSOCIATION, LOCAL 286.**

Agreement to be in effect from November 17, 1945, to November 16, 1946.

Hours of work: stores to open and working day to commence at 9 a.m. and to close and working day to finish at 6 p.m. every working day except Saturday and except on the day when there is a weekly half holiday, provided however, that the stores which now keep open Saturday may remain open until 8 p.m. without additional payment to employees who shall be allowed one-half hour as a supper period. If a store chooses to remain open until 9 p.m. on Saturday, double pay shall be allowed for this extra hour plus one hour for a supper period. Stores which now close at 6 p.m. on Saturday shall continue to do so. There shall be a regular half holiday on either Wednesday or Saturday afternoon in every week when the store shall close at 1 p.m. except during December. Overtime: time and one-half for all work in excess of regular working day. Nine specified holidays shall be observed without reduc-

tion in pay and any other day on which the employer's store is closed. Every employee shall have at least one hour off for lunch and shall be allowed a 10-minute rest period each forenoon and afternoon of every working day except the day of the weekly half holiday. Vacation: full time employees who have been working for an employer for one year on the first of August in any year shall receive one week with pay. Those who have been working two or more years, 2 weeks with pay, while those with less than one year of work (but who entered the service of the employer not later than the first day of March in such year), shall be entitled to one week's continuous vacation without pay.

Wage rates: minimum of \$14 per week for female workers and \$16 per week for male workers over 16 years of age. An increase of 10 per cent in wage rates will be granted to the employees, with the exception herein stated, provided that no increase shall be granted to employees now receiving \$25 per week or over and that no increase shall bring the wage of any employee above \$25 per week. The exceptions are executives, managers, bookkeepers, bookkeeper-clerks, bona fide cashiers and office staff.

Provision is made for the immediate setting up of a grievance procedure.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension and later correction of one new agreement and the amendment of seven others, and the repeal of one agreement all of which

are noted below. Requests for new agreements for permanent municipal employees, employees of the gas and electrical departments, of Sherbrooke, and clerks at Richmond and Melbourne were published May 4. Requests for the amendments of the agreements for municipal employees at Sherbrooke, men's and boys' hat and cap industry for the Province, barbers and hairdressers in Hull, and the fur industry at Quebec were also published May 4. Requests for the amendments of the agreements for barbers and hairdressers in Joliette, millinery workers at Montreal, the men's and boys' clothing industry in the province, hospital employees at Quebec, and the fur industry at Montreal were gazetted May 11.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated April 18, 1946, and gazetted April 27, amends the previous Orders in Council for this industry (*L.G.*, March, 1945, p. 349, April, p. 517; May, 1946, p. 627, and previous issues). Amendments do not affect the summary already given.

WHOLESALE FUR INDUSTRY, MONTREAL

An Order in Council, dated April 18, and gazetted April 27 extends the term of the agreement (L.G., Nov., 1944, p. 1368; April, 1945, p. 517, Aug., p. 1197, Oct., p. 1520) to July 1, 1946.

Manufacturing: Textiles and Clothing

MILLINERY INDUSTRY, MONTREAL

An Order in Council, dated April 18, and gazetted April 27, amends the previous Orders in Council for this industry (L.G., January, 1942, p. 234 and previous issues). The names of the contracting parties are amended to read: The United Hatters, Cap and Millinery Workers International Union, Local 49, and The Association of Millinery Manufacturers. Other amendments do not affect the summary already given.

Manufacturing: Miscellaneous Wood Products

FURNITURE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated April 18, and gazetted April 27, repeals the Order in Council, November 1937 and all amendments relating to this industry. This agreement was replaced by that published in the LABOUR GAZETTE, April, 1946, p. 499.

Trade

RETAIL STORES, QUEBEC

An Order in Council, dated April 18, and gazetted May 4, amends the previous Orders in Council for this industry (L.G., April, 1943, p. 490; August, 1944, p. 1007, September, p. 1442; May, 1946, p. 629, and previous issues.) The names of the contracting parties are amended to read "La Section de la Nouveauté", and "La Section des Marchands de Meubles, d'Appareils et d'Accessoires Electriques" of The Retail Merchants Association of Canada, inc., and "Le Syndicat Catholique des Employés de Magasin de Québec, inc." and "L'Association professionnelle des Employés de Bureau du District de Québec, inc."

Weekly wage rates: departmental manager, \$45 for males and \$35 for females, if annual turnover is \$100,000; \$40 and \$30 if annual turnover exceeds \$50,000; \$35 and \$25 if annual turnover is less than \$50,000; head displayer (males) \$34.60; floor walker, \$33; bookkeeper, \$29.60; regular employee (males) from \$9.50 during first year to \$19 during fifth year; after five years from \$22 to \$30; (females) from \$8.60 in first year to \$12 in third year, after three years from \$13.50 to \$16.

Other amendments do not affect the summary already given.

GROCERS AND BUTCHERS AND RESTAURANT-GROCERY EMPLOYEES, JOLIETTE

An Order in Council, dated April 18, and gazetted April 27, and corrected in the May 4 issue of the QUEBEC OFFICIAL GAZETTE, makes obligatory the terms of a new agreement between "L'Association patronale catholique des Epiciers et Bouchers de Joliette, inc." and "Le Syndicat catholique et nationale des Employés Epiciers et Bouchers de Joliette, inc." Agreement to be in effect from April 27, 1946, to April 26, 1947, and thereafter from year to

year until 30 days' notice. Territorial jurisdiction applies exclusively to the City of Joliette.

Hours: 57-hour week, however, hours in grocery-restaurant are those required by the concern, but the sale of grocery goods will be prohibited before or after the hours mentioned. Hours may be extended on certain specified days. Overtime: employers may require two overtime hours from their employees without extra pay for the sole purpose of cleaning the establishment. Other overtime work is payable at time and one-half.

Minimum wage rates:	per week
1st butcher-clerk in charge of the butcher shop (when the employer himself is not a butcher).....	\$30.00

Minimum prices are changed in one zone.

*Industrial Standards Acts, Etc.***Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan, Alberta**

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers

that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario*Manufacturing: Wood Products***HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO**

An Order in Council, dated April 1, and gazetted April 13, makes binding the terms of a new schedule for the hard furniture industry of Ontario to be in effect from April 23, 1946, "during pleasure".

Hours: $8\frac{1}{2}$ per day, $4\frac{1}{2}$ on Saturday, a 47-hour week. Overtime is payable at time and one-half.

Minimum wage rates: (Class B—all employees with less than $2\frac{1}{2}$ years' experience, and under 21 when they entered the industry; Class C—male employees with less than $1\frac{1}{2}$ years' experience and over 21 years when they entered the industry; Class A—all other employees). Class B from 35 cents to 47 cents per hour during fifth six months, afterwards Class A rates; Class C from 41 cents to 47 cents per hour during third six months, afterwards Class A rates; Class A 55 cents per hour minimum and 62 cents minimum average in certain specified sections of the province, and 53 cents minimum and 60 cents minimum average in the rest of the province.

*Construction***PAINTERS, OTTAWA**

An Order in Council, dated January 15, 1946, and gazetted January 26, 1946, makes binding the terms of a new schedule for the painting and decorating industry for Ottawa

to be in effect from February 5, 1946, "during pleasure".

Hours: 8 per day, 4 on Saturday, a 44-hour week. Overtime is payable at time and one-half; double time on Saturday after noon, Sundays and specified holidays.

Minimum wage rates: \$1.01 per hour for spray-painting and 86 cents per hour for all other work. Night work is payable at 10 cents per hour in addition to these rates.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944. Apprentices shall be governed by the provisions of The Apprenticeship Act.

CARPENTERS, BROCKVILLE

An Order in Council, dated January 15, and gazetted January 26, makes binding the terms of a new schedule for employees of the carpentry trade, Brockville, to be in effect from February 5, 1946, "during pleasure".

Hours: 8 per day, 4 on Saturdays, 44-hour week. Overtime which is necessary to permit the pouring of concrete, if performed on Saturday before 6 p.m., to be paid at regular rate; ordinary overtime performed on Saturday before 4 p.m., or during the three hour period immediately following any other regular working day is payable at \$1.35 per hour; work performed at night, when it cannot be performed during regular working periods, is payable at the regular rate for the first eight hours only; all other overtime \$1.80 per hour unless advisory committee issues a special permit authorizing performance of the work at a lesser rate.

Minimum wage rate: 90 cents per hour; employees working on night shifts shall be paid 8 hours' pay for 7 hours worked.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944. Apprentices are governed by The Apprenticeship Act.

CARPENTERS, BELLEVILLE

An Order in Council, dated April 24, and gazetted May 4, makes binding the terms of a new schedule for the carpentry industry for Belleville, effective May 14, 1946, "during pleasure".

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime is payable at time and one-half unless advisory committee issues special permit authorizing work at a lower rate; double time on Sundays and specified holidays. When work is performed at night because it cannot be performed during the day, it is payable at regular rates.

Minimum wage rate: 95 cents per hour.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

CARPENTERS, OWEN SOUND

An Order in Council, dated March 8, and gazetted March 23, makes binding the terms of a new schedule for the carpentry industry, Owen Sound, effective April 2 1946, "during pleasure".

Hours: 44-hour week of 5½ days from November to March inclusive and 45-hour week of 5 days during the months of April to October inclusive. Overtime is payable at time and one-half, except the rate of wages for all overtime work in excess of 4 hours in any one day shall be double time.

Minimum wage rate: 90 cents per hour. Employees required to work on night shifts shall receive 8 hours' pay for 7 hours' work during the winter months, and 9 hours' pay for 8 hours' work during summer months.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944. Apprentices shall be governed by the Apprenticeship Act.

CARPENTERS, WINDSOR

An Order in Council, dated April 24, and gazetted May 4, makes binding the terms of a new schedule for the carpentry industry in Windsor, effective May 14, "during pleasure".

Hours: 8 per day Monday to Friday, a 40-hour week of 5 days. Overtime is payable at double time except for the first hour which is payable at time and one-half; work on Saturdays, Sundays and holidays at double time.

Minimum wage rate: \$1.18 per hour. Employees working on night shifts shall be paid \$1.23 per hour or shall receive 8 hours' regular pay for 7 hours worked.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

PLUMBERS, WINDSOR

An Order in Council dated January 23, and gazetted February 9, makes binding the terms of a new schedule for the plumbing and heating industry, Windsor, effective February 19, 1946, "during pleasure".

Hours: 8 per day Monday to Friday, a 40-hour week. Overtime is not permitted except with special permit and is payable at double time, except when emergency work is performed between 8 a.m. and 12 o'clock noon on Saturday

when the owner does not work on emergency repairs and does not employ more than one journeyman on emergency repairs when it is payable at regular rates.

Minimum wage rate: \$1.25 per hour. Employees on night shifts shall be entitled to 8 hours' pay for 7 hours' work.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944. Apprentices are governed by the Apprenticeship Act.

CARPENTERS, PORT ARTHUR AND FORT WILLIAM

An Order in Council, dated April 9, and gazetted April 27, makes binding the terms of a schedule for the carpentry industry, Port Arthur and Fort William, effective May 7, 1946, "during pleasure".

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime payable at time and one-half for first 4 hours and double time thereafter; overtime on Saturday afternoon for the pouring of concrete is payable at regular rates.

Minimum wage rate: \$1 per hour. Employees working at night shall receive 8 hours' pay for 7 hours' work.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

PLUMBERS, PORT ARTHUR AND FORT WILLIAM

An Order in Council, dated April 9, and gazetted April 27, makes binding the terms of a new schedule, for the Plumbing and Heating Industry in Port Arthur and Fort William, effective May 7, 1946, "during pleasure".

Hours: 8 per day Monday to Friday, a 40-hour week. Overtime is allowed only with permit from the advisory committee, and is payable at time and one-half between 5 p.m. and midnight. Overtime after 12 midnight to 8 a.m. and on Sundays and holidays is payable at double time.

Minimum wage rate: \$1.10 per hour. Employees on night shifts shall be entitled to 8 hours' pay for 7 hours' work.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

Transportation and Public Utilities: Local Transport

TAXICAB INDUSTRY, TORONTO

An Order in Council, dated April 24, and gazetted May 4, makes binding the terms of a new schedule for the taxicab industry in Toronto, effective May 14, 1946, "during pleasure."

Hours: 8-hour day, a 48-hour week. Overtime is payable at the rate of 65 cents per hour for drivers, 78 cents for dispatchers.

Minimum wage rates: \$20.95 per week or \$1.50 for the first three consecutive hours, 50 cents for each additional consecutive hour up to 5 on duty; dispatchers \$25 per week. Provision must be made for food and lodging on an out of zone trip. Uniforms are supplied by the employer at half the cost.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

Trade

RETAIL GASOLINE SERVICE STATIONS, TORONTO

An Order in Council, dated April 24, and gazetted May 4, makes binding the terms of a new schedule for the retail gasoline service industry in Toronto, effective May 14, 1946, "during pleasure".

BARBERS, REGINA

Two amendments to the Orders in Council relating to the barbering industry (L.G., Feb., 1941, p. 186, Apr., p. 475) were gazetted April 30, 1946, effective May 10, 1946. These amendments provide for a 48-hour week of 5½ days. The shops to close on Saturdays at 6 p.m. in place of 8 p.m. Weekly wage rates for full time experienced employees \$16.80; full time inexperienced employees from \$11 in first three months to \$14 in second three months and \$16.80 thereafter together with the bonus of 60 per cent of proceeds from the work of the employee in excess of the minimum rate.

BEAUTY CULTURE, REGINA

An Order in Council, dated April 16, 1946 and gazetted April 30, 1946, amends the previous Orders in Council for this industry (L.G., May, 1940, p. 502, Aug., p. 871, Aug., 1941, p. 1015) by providing that the minimum wage rate be \$16.80 per week with the bonus for full time experienced employees; full time inexperienced employees from \$11 for the first 3 months to \$14 for the second 3 months and \$16.80 with bonus afterwards. The bonus is the amount by which 40 per cent of charges made for permanent waving and dyeing done by an employee and 60 per cent of charges for other work done by the employee exceeds the minimum weekly wage.

CARTAGE, WAREHOUSE AND DISTRIBUTING INDUSTRY, CALGARY

An Order in Council, dated December 11, and published December 31, 1945, makes binding the terms of a new schedule for the cartage, warehouse and distributing industry, Calgary, effective January 10, 1946, to January 9, 1947, or thereafter during pleasure.

Hours: 9-hour day, 48-hour week. Overtime is payable at time and one-half.

Minimum hourly wage rates: experienced drivers, experienced furniture movers 50 cents; furniture craters and packers 50 cents; drivers with less than 3 months' experience, furniture movers with less than 6 months' experience 45 cents; jumpers (15 to 18 years inclusive) 35 cents. Vacation: one week with pay after one year's service. Holidays: all permanent employees are allowed the regular rate of wages for 5 statutory holidays.

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the provinces for vocational schools.

Cumulative Enrolment

From its inception up to April 30, 1946, the gross enrolment in all types of projects has been 498,109 made up as follows:

Full-time Pre-employment Classes for War Industry.....	108,430
Part-time Classes for persons employed in War Industry....	35,256
Full-time Plant Schools in Industry	38,000
Industrial Supervisors and Foremen	118,407
R.C.A.F. Tradesmen	65,214
Army Tradesmen	49,262
Navy Tradesmen	9,056
Discharged Members of the Forces	64,365
University Students	10,119

Training of Discharged Members of the Forces

The number of new trainees enrolled during the month in all types of training was 6,269, which represents a slight decrease from the numbers which were enrolled during the month of March.

The total under training at the end of April was 37,375. This figure represents a gain of approximately 1,000 over the enrolment at the end of March.

During the month of April, the numbers under training in all types of schools increased by a noticeably smaller figure than during the past two months. To offset this, the numbers placed for training on the job continued to increase at the rate which had been established during February and March. This is a very healthy condition and indicates that satisfactory results are being obtained from the new co-operative arrangements with the National Employment Service Offices, and also as a result of the publicity which is being given to this type of training in the press and radio.

Training of Ex-Service Women

A summary of figures in regard to training of ex-service women was made on 30th April, and it was disclosed that altogether 45,308 enlisted in the various Women's Divisions up to that date. The discharges up to 30th April numbered 37,908, leaving a total of 7,400 women still in the Forces.

Between 1st April 1945 and 30th April 1946, 4,233 women enrolled under Canadian Vocational Training. Of these, 531 were enrolled during April 1946. The types of training provided for the total enrolment are as follows: Training on the job—216; Training in schools—3,610; Pre-matriculation or Correspondence schools—407.

Of the total number of women who were enrolled, 903 graduated and were placed in employment. Another 777 discontinued their training for various reasons, personal and circumstantial. The number in training on 30th April 1946 was 2,553.

Training of Skilled Labour in Construction Industry

IT became apparent during the war that a construction program of huge dimensions could be expected in the immediate post-war period. To meet the skilled labour requirements, and at the same time to assist in the rehabilitation of ex-servicemen, an extensive vocational training scheme was instituted. The methods of training varied according to the demands of the different occupations. Formal training could be affected only through the medium of the apprenticeship plan. Accordingly, in 1944, the Minister of Labour entered into a 10 year agreement with the provinces having or willing to establish apprenticeship acts. The Dominion government provided a fund of upwards of one million dollars to help defray the cost of technical education provided by the provinces to the registered apprentices. The provinces had to abide by certain regulations laid down by the Federal government, but otherwise were free to establish their apprenticeship acts in accordance with their own respective regulations or requirements.

Under the present regulations there are the following formal arrangements for training skilled craftsmen in the building trades.

Veterans' Training

In all provinces with established apprenticeship acts, training has been shortened in favour of veterans. Ex-servicemen who indicate a desire to learn one of the designated trades of the construction industry are referred by the Department of Veterans Affairs counsellor to the Provincial Apprenticeship Board for approval. Included on this Board is an authorized union representative and a representative from Canadian Vocational Training. A person with some trade experience, whether obtained in the army or in civilian life, will receive credit toward the apprenticeship requirements, determined on the basis of practical tests. According to his qualifications he will be indentured to a contractor as a third or fourth year apprentice. At the end of the term he will receive his papers and all benefits of a qualified journeyman.

Ex-servicemen with no previous trade experience may attend a vocational course in a Canadian Vocational Training centre and upon successful completion of the work will be entered as third year apprentices. The length of apprenticeship varies by trade and by province, with the four year course being the most common. Refresher courses are available at the training centre to men who have attained journeyman or near-journeymen status.

Under the Veteran's Rehabilitation Act, the Department of Veterans Affairs will pay training allowances, varying with the earnings of the apprentice and his marital status, to an

extent whereby the combined total earnings do not exceed \$100 a month for a single man and \$120 per month for a married man plus allowances for children.

Civilian Training

According to the normal established practice the apprentice indentures himself to a master craftsman on the job for the entire period of apprenticeship. The duration of most of these contracts is for four years, starting at a low wage, with increases every six months. The trainees must also attend classes for several hours each week, or for several weeks during the slack winter season.

In pre-war years very little interest could be developed in the "hard" trades. Young men were not prepared to give four or five years, at very low remuneration during training, to learn a trade in which the skilled tradesmen of pre-war years were fortunate if they found six months work each year. In addition the intense cyclical fluctuation of the industry meant years of unemployment for many skilled men.

Employment opportunities look very good for a number of years to come, and with recent pressure for easing the apprenticeship requirements and raising the wage-rates during training, construction trades are attracting considerable number of ex-servicemen and former war-workers. Offsite pre-fabrication of standardized parts and pre-fabricated units should serve to ease the seasonal fluctuations, but these methods have not become universal enough to have considerable influence.

The accompanying table shows the number of persons by province, and by skill, now enrolled for training in the construction trades in Canadian Vocational Training schools and those actually taking their apprenticeship. Prince Edward Island has no organized apprenticeship scheme and figures for Quebec are not available.

On the demand side, the Joint National Conference of the Construction Industry held in February of this year, concluded that 5,600 apprentices per year, excluding those who broke their apprenticeship contract to join the armed forces, would be needed in the industry for the next four years. Because of the supply of casual partly trained men, in two of the trades, namely carpentry and painting, the requirement could be scaled down reducing the total requirement per annum. These figures do not include an estimated 50,000 workers who will be required as tractor operators, truck drivers and other trades needed for engineering projects.

If the rate of enrollment continues at the present high level, bricklaying, plumbing and steamfitting, sheet-metal and electrician trades

¹ Canadian Vocational Training.² Apprenticeship Training.³ Prince Edward Island has no organized apprenticeship training.⁴ No reports on apprenticeship are available for Quebec.⁵ C.V.T. figures are "almost exclusively" of ex-service personnel.

show signs of possible overcrowding. Two qualifications are necessary. The present rate of enrollment reflects the high rate of discharge from the armed services and war industry, and although it will probably maintain itself for some time it is bound to slacken. Many trainees will seek outlets for their acquired trades outside the construction industry. This is particularly true of the plumbing and steam-fitting, sheet-metal and electrical trades.

The painting and decorating trade is being overlooked in almost every Province with a total of 363 enrolled as against a 1,250 annual absorption capacity. Provincial breakdowns may run counter to the overall national totals. For example, the plastering trade is being

overlooked completely in the Maritimes, Saskatchewan and British Columbia. Approximately 290 apprentices in all trades are expected to become journeymen this year. The estimated national demand for skilled construction craftsmen as measured by unfilled vacancies is over 5,000, and this figure underestimates the real need since the construction industry is just coming out of its seasonal lull. It is quite apparent then that demand will greatly outstrip supply, with no prospects of improvement in the short run. A progressive number of skilled men will be forthcoming each year, and if construction activity maintains itself, an equilibrium position should be reached in about four years.

Industrial Conditions in New Zealand

THE New Zealand Year Book for 1945 was received in Canada during April. It presents a comprehensive account of conditions in the country. Some sections dealing with industrial conditions are briefly summarized below:

Prices

Price stabilization legislation was enacted in New Zealand in 1939, at the outbreak of hostilities in Europe. In January, 1940, control of foodstuffs generally, and sugar, wheat and flour specifically, was brought under the Control of Prices Emergency Regulations which superseded the Proclamation of Emergency governing price control up to December, 1939. In 1941 the Regulations were extended to the retail prices of 38 commodities comprising the more important foodstuffs, clothing, fares, fuel and lighting. In December, 1942 measures were undertaken to ensure that the price index did not rise above the mean for that month through the stabilizing of other essential household commodities. The list covered approximately 110 items. New elements of control were introduced in 1943 covering certain fruits and many kinds of vegetables. Price orders in 1944 merely revised earlier orders or covered a few additional items.

The Dominion index of retail food-prices, using as a base period 1926 to 1930 equal to 1,000, showed 1052, 1076, 1104 and 1127 for 1939, 1940, 1941 and 1942 respectively. House-rent index numbers rose from 887 in 1939 to 963 in 1942; and wholesale prices from 1071 in 1939 to 1558 in 1944.

Wage Rates

Wage rates in New Zealand rose steadily in regular yearly graduations after the slump that followed World War I. In May, 1931 a 10 per cent reduction in wage rates was ordered in accordance with the Dominion's policy of regulating wages on the basis of cost of living variations.

This reduction, applied on a strictly percentage basis, tended to reduce the disparity which existed between agricultural and pastoral workers and other higher paid groups of workers. In 1933 the lowest annual average index since 1919 was recorded. The two following years evidenced slight increases and in 1936 complete restoration to the pre-depression level was effected by legislation. A 10.7 per cent increase was recorded over 1935.

In August, 1940 the Court of Arbitration awarded an increase of 5 per cent in all remuneration in awards, industrial agreements and apprenticeship orders. This was followed by a similar increase in April, 1942 for males 21 years of age earning less than £5 per week and women who earned up to £2 10s. Apprentices, and males and females under 21 were included in this order, if their income did not exceed £1 10s per week. In February, 1945, the regulations were amended so as to provide adjustment for existing disparities in the wage levels of various classes of workers.

Trade Unions

In 1943 there were 270 unions of employers recorded in New Zealand with a total membership of 14,782. The latter figure contains a good deal of duplication, the publication states, as many employers hold memberships in more than one union. Industrial unions of workers numbered 397 by the end of 1943, with a membership of approximately 214,628. The population in 1936 totalled 1,491,484.

Union membership in the industrial unions displayed a steady rise from 1900 to 1914. During the first war it receded considerably but recorded a phenomenal rise in 1919. The present high figures are due primarily to the Industrial Conciliation and Arbitration Act, 1936, which provided for compulsory union membership on the part of workers subject to an award or industrial agreement.

Activities of Unemployment Insurance Commission*

Statistical Analysis of Claims and Benefit for April—The Fund—Decisions of Umpire

APPLICATIONS for Unemployment Insurance benefit in Canada numbered 35,781 in April, a decline of 14,925 from the 50,706 registered in March 1946. During April last year 8,430 claims were received. The decrease in claims took place in all provinces with New Brunswick registering the smallest decline (17) and Ontario the greatest (6,244).

A similar decrease occurred in the number signing the live unemployment register during the last week of April compared with the last week of March. At the end of April there were 123,950 live unemployment insurance claims (94,979 males and 28,971 females) as against 154,820 (122,506 males and 32,314 females) at March 31, and 19,197 (12,886 males and 6,311 females) at the end of April 1945. Only in two provinces (Prince Edward Island and New Brunswick) was there a slight increase in live claims at April 30, compared with March 31. The greatest decrease came in Quebec and Ontario where live claimants dropped from 60,640 and 47,905 respectively, at March 31, to 50,151 and 35,127, respectively, at April 30.

During April a total of 40,064 claims were adjudicated at insurance offices, 29,710 being considered entitled to benefit and 10,354 not entitled to benefit.

In all, 158,168 persons received benefit payments totalling \$7,011,579 for 3,446,271 compensated unemployed days during April compared with 156,180 persons paid \$7,205,264 for 3,461,900 days in March and 22,995 persons paid \$591,265 for 304,102 days in April 1945.

The average duration of the unemployment compensated was, then, 21.8 days in April, 22.2 days in March and 13.2 days in April of last year. The average amount of benefit paid per beneficiary was \$44.33 in April, \$46.13 in March and \$25.71 in April 1945. The average amount paid per compensated day of unemployment was \$2.03 in April, \$2.08 in March and \$1.94 in April last year.

Table 1 Omitted

Registration of employers and insured employees which is tabulated each month in the LABOUR GAZETTE as "Table 1", under the section on the activities of the Unemployment Insurance Commission, has been omitted in this issue. This tabular information is subjected to an annual adjustment in April, following the renewal of insurance books at the close of the fiscal year. The adjustment is based upon reports covering insurance book renewals. The reports from local offices are far from complete as this issue goes to press. It is expected that the revision will be concluded in time for inclusion in the July issue of the LABOUR GAZETTE.

Unemployment Insurance Fund

Total employer-employee contributions during April were \$4,830,106.27 compared with \$4,886,364.97 in the same month last year, a

*Statistics (including tables) are based on returns supplied by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

TABLE 2.—NUMBER OF PERSONS FILING CLAIMS FOR UNEMPLOYMENT INSURANCE BENEFIT IN LOCAL OFFICES FEBRUARY, 1942 TO APRIL, 1946

	1942	1943	1944	1945	1946
January.....		4,637	11,751	20,412	71,832

Total.....	26,924	36,660	90,897	296,391	217,517

decrease of 1.2 per cent. There was thus very little change in the amount of contributions received compared with April last year.

On the other hand benefit payments in April this year were 7.2 times those of April

1945, the figures being \$4,286,614.02 and \$590,203.31 respectively.

Total revenue during April this year was \$6,458,294.80. After payment of benefits the net increase to the Fund was \$2,171,680.78.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the LABOUR GAZETTE and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU-B. 50

(Sept. 28, 1945)

The claimant left his employment on January 4, 1945, and applied to the local Office for benefit on April 19 asking that his claim be dated back to January 5, and giving as his reason for delay in applying for benefit that he did not know that he had to notify the Commission as soon as he was laid off work. His application for antedating his claim was disallowed by the Insurance Officer and by the Court of Referees—HELD: The claimant was aware or should have been aware of the procedure to be followed in applying for benefit and it is not incumbent upon the officers of the Commission to notify or request a person to claim benefit.

The material facts of the case are as follows:—

The claimant, a married man, aged 36 years, was employed as a general labourer for a manufacturing company from May 17, 1942 to January 4, 1945, when he left his employment voluntarily because of weather conditions.

From January 23 to February 17, 1945 he was employed by a stove manufacturing company and he left voluntarily because the work was too hard.

He had no other employment except for a day with a coal and wood dealer. It was only on April 19, 1945 that he made application for benefit, asking that his claim be

dated back to January 5, 1945. He gave as his reason for delay in applying for benefit that he did not know he had to notify the Unemployment Insurance Commission as soon as he was laid off work and that he had hoped that he would be employed each day but that, when he lost so much time, he obtained information about unemployment insurance and duly filed his claim.

The Insurance Officer did not approve of the request for antedating, on the grounds that the claimant had not shown good cause for the delay in making application under Section 30 of the Act and Section 7 of the Benefit Regulations.

From this decision the claimant appealed to the Court of Referees which, by a majority decision, sustained the decision of the Insurance Officer.

The claimant appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claimant's request for antedating should not be approved and gave as his reasons:

Section 30 of the Act and Section 7 of the Benefit Regulations provide that, where good cause is shown for delay in making an application for benefit, the day on which the period of unemployment actually began shall be substituted for the date of the application. The question then is, has the claimant shown good cause for the delay within the meaning of the Act and the Regulations.

The Unemployment Insurance Act has now been in effect for several years and there has been a good deal of publicity in connection with the Act and the procedure to be followed in order to obtain benefit under the Act. The insurance book contains clearly printed instructions regarding the simple procedure to be followed where an insured person wishes to claim benefit and I have no hesitation in concluding that, after this passage of time and in view of the clear instructions in the insurance book, the claimant was aware or should have been aware of the procedure to be followed and that it is not incumbent upon the officers of the Commission to notify or request a person to claim benefit. I am satisfied that, had the claimant expressed the slightest desire to claim benefit, the local office would have provided him with all necessary information.

CU.-C. 8

(May 21, 1946)

A lumbering and logging concern carried on an enterprise consisting of a pleasure resort and contended that nevertheless, its employees were employed in excepted employment—HELD: The nature of the operations of the company at the pleasure resort were not such as to constitute lumbering and logging and the employees engaged therein were insured against unemployment in the manner provided by the Unemployment Insurance Act, 1940.

DECISION

W. Mills Limited, of the City of X, employed about 32 persons at C. The general business of the company is lumbering and logging, but it carries on, at C, an enterprise consisting of a pleasure resort.

On January 23, 1945, auditors of the Commission called at the office of this company and learned that Unemployment Insurance contributions were not being paid. During the next several months considerable correspondence was exchanged and further visits were made by the auditors. The company refused to pay contributions under the Unemployment Insurance Act, contending that it was engaged in lumbering and logging and that the employees concerned were therefore employed in excepted employment.

The matter was finally brought to a head on August 16, 1945, when the Commission gave its consent, pursuant to Section 70 of the Act to the institution of Summary Conviction Proceedings. The information was laid and the case was set down for hearing. At the outset of the hearing Counsel for the company raised the question of insurability of the employees concerned. Counsel for the Commission then argued that the question of insurability should be decided by the Commission under Section 46 of the Act. The Court accordingly adjourned the hearing.

The company was given the opportunity of applying to the Commission for a decision under Section 46 of the Act, but did not choose to do so and on March 7, 1946, Counsel for the company requested that the case be dismissed on the ground that the question had not been decided by the Commission and that the Court lacked sufficient jurisdiction. His request was granted and the case dismissed.

On March 19, 1946, the Commission appealed against the dismissal of the case to the Court of Competent Jurisdiction. I understand that the appeal is still pending.

On March 19, 1946, the Commission, pursuant to Section 9 of the Determination of

Questions and Appeal Regulations, 1941, expressed its intention to determine on its own initiative, whether the employees concerned were in insurable employment. All the employees in question have terminated their employment with the exception of P.B. who, together with the company, was furnished with a copy of a notice giving them an opportunity until April 8, 1946, of making any representations that they may wish to bring to the attention of the Commission. The company only, under date of April 3, 1946, submitted representations to the Commission.

On April 9, 1946, the Commission, in accordance with the provisions of Section 46 of the Act and Section 9 of the Determination of Questions and Appeal Regulations, 1941, decided that the said persons, whose names appear at the end of my decision, were, during the respective periods of employment, employed in employment specified in Part I of the First Schedule to the said Act, such employment not being specified as excepted employment in Part II of that Schedule and were, therefore, pursuant to the provisions of the said Act, insured against unemployment in the manner provided by the said Act. The parties were notified of the decision forthwith.

On April 18, 1946, W. Mills Limited, forwarded a rather informal appeal against the decision of the Commission. The reasons for their appeal are as follows:—

We hereby protest against and appeal from your decision of April 9 in regard to the status of Unemployment Insurance assessments for this company at the woods operation at C.

We note that your communication was received on the morning of April 11 and it appears that the time for transmission was exceedingly short if the meeting was held on April 9 and we cannot understand why our explanation in regard to that matter dated April 3 and sent to you by air mail on April 5 was not given consideration at the meeting referred to in your letter of April 9.

You have not made any mention whatever of receiving our letter of April 3 and we must ask that you give that statement of facts careful consideration in arriving at any decision affecting this case.

On April 25, 1946, the Commission, pursuant to the Determination of Questions and Appeal Regulations, fixed the 13th day of May, 1946, as the date on or before which any interested party may file with the Commission for submission to the Umpire a statement of the observations and representations which he desires the Umpire to consider in deciding the question referred to him. Under

date of May 10, 1946, W. Mills Limited, forwarded their representations in this connection. They merely reiterated their previous statements which they submitted when making representations to the Commission at the time of the decision of the Commission.

I do not consider that the ground of appeal of the company, as quoted above, has any bearing on the question at issue, as the record shows that the Commission has been apprised of the representations made by the company. However, the substance of the representations made by the company under date of May 3 and under date of May 10 is to be considered again, as the whole question of insurability of these employees will be reviewed when arriving at my decision.

Section 13 of the Unemployment Insurance Act, 1940, is in the following terms:

Subject to the provisions of this Act, all persons who are employed in any of the employments specified in Part I of the First Schedule to this Act, not being employment specified as excepted employment in Part II of that Schedule, shall be insured against unemployment in the manner provided by this Act.

The first question is whether the employment is specified in Part I of the First Schedule to the Act. It is apparent from the record that there can be no doubt that the persons involved were employed under a contract of service; therefore, their employment comes within paragraph (a) of Part I of the First Schedule.

Under Section 13, the next question to be determined is whether the employment is specified as an excepted employment in Part II of that Schedule. That question revolves about the correct interpretation of paragraph (c) of Part II of that Schedule, which lists as an excepted employment—

Employment in lumbering and logging, exclusive of such saw mills, planing mills, shingle mills, and wood-processing plants as are in the opinion of the Commission reasonably continuous in their operations.

The contentions of the company in brief are that they own a large body of timber in the vicinity of C, that a mill site was acquired from the Dominion Government for the purposes of manufacturing lumber in that area, and for some years past, during 10 months of the year, logging operations have been carried on at that site.

The facts, as they are reported by the officers of the Commission and appear from the record, are that the only operations known on the mill site has been some clearing of land, building of roads and erection of approxi-

mately 80 cabins and a combined store and dining room. Several boat houses have been erected, also outside cooking places and a series of small piers built out in C. for diving and bathing. There is a small saw mill on the property almost completely dismantled, fitted originally with a converted automobile motor capable of cutting a few small logs and wood for firewood.

As far as the Commission was able to establish, no woods operations have been carried on in that area. The C. mill site as is commonly known, has been and is operated as a summer resort and any employment outside the summer months has been in the nature of erection and repair of cabins and boats, land clearing for the camp site and work on the beach moving rocks, etc. The occupations of the employees concerned were that of labourer, caretaker, store clerk, painter and carpenter. Their duties in connection with the operation and maintenance of this resort consisted of the erection of and necessary repairs to buildings, cabins, boats, operating and maintaining a lunch counter and ice cream parlour. In so far as the employee P.B. is concerned (who is apparently the only employee presently employed by the company), his duties of cutting wood for fuel, cultivating strawberry plants, looking after domestic animals, were only incidental to his duties as caretaker of the resort. Several photographs were submitted by the Commission concerning the company's operations at C. showing several cabins and buildings of the pleasure resort operated by this company. Newspaper advertising cards and advertisements were also submitted, establishing that the company operated a pleasure resort at C.

It is therefore clear that the nature of the operations of the company at C. was not such as to constitute lumbering and logging. It is also evident that the employment of the various persons concerned was employment connected with the operation of a pleasure resort and did not constitute employment in lumbering and logging.

I, therefore, find that the persons whose names appear below were, during the respective periods of employment, employed in employment specified in Part I of the First Schedule to the said Act, such employment not being specified as excepted employment in Part II of that Schedule and were, therefore, pursuant to the provisions of the said Act, insured against unemployment in the manner provided by the said Act.

(Sgd.) LUCIEN CANNON,
Umpire.

Dated at Ottawa, this 21st day of May, 1946.

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment, hours and earnings in Canada.

Employment at the beginning of April, 1946.—Widespread improvement in manufacturing and non-manufacturing industries resulted in a considerable expansion in employment at the beginning of April.

Data were tabulated by the Dominion Bureau of Statistics from 15,789 employers whose staffs numbered 1,720,726 at April 1, as compared with 1,705,529 at March 1, an advance of 0.9 per cent. More than 80 per cent of this increase took place among men, whose numbers rose by over 12,200, as compared with a gain of less than 3,000 among women workers in recorded employment.

Since the general improvement at April 1, as compared with March 1, was contrary to the usual trend at that time of year, the seasonally-adjusted index moved upwards, rising from 174.0 at March 1, to 178.5 at April 1.

Claims for unemployment insurance benefit.—Applications for unemployment insurance benefit numbered 35,781 in April, a decline of 14,925 from the 50,706 registered in March. In all, 158,168 persons received benefit payments in April, 1946, as compared with 156,180 persons in March, 1946 and 22,995 persons in April, 1945. The total benefits paid in April, 1946, amounted to \$7,011,579 as compared with \$7,205,264 in March, 1946 and \$591,265 in April, 1945.

Man-hours and hourly earnings, April 1, 1946.—Average hours per week worked by hourly-rated wage-earners employed in manufacturing was 44.4 hours during the week preceding April 1, as compared with 44 hours a month earlier. The average hourly earnings were 68.4 cents as compared with 67.9 cents for the week preceding March 1.

Report on employment conditions, May, 1946.—Labour demand continued to increase during May, but less rapidly than in April. This reduced rate of employment expansion may be attributed in a large part to the shortage of materials resulting from the continued labour unrest throughout Canada and the United States. Labour supply, on the

other hand, dropped substantially during April, despite the steady flow of ex-service men into the labour market. Manpower requirements, exclusive of agriculture, totalled 111,307 at May 23, with the number of skilled and unskilled workers required accounting for 37 and 33 per cent respectively of the labour needs. The available labour supply, as measured by the number of unplaced applicants registered at employment offices, numbered 211,744 at May 23, as compared with 247,751 four weeks earlier. An unequal geographical distribution of labour demand and supply still persists. At May 23, the Quebec and Ontario regions accounted for 72 per cent of the unfilled vacancies while only 57 per cent of the unemployed workers were in these regions. The overall demand for female workers exceeds the supply but labour shortages remain concentrated in the Quebec and Ontario regions while a surplus supply of women exists elsewhere.

Applications for Employment; Vacancies and Placements; April, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the five weeks March 29 to May 2, 1946, showed a fairly substantial gain in the average number of placements made daily when compared with the previous four weeks ending March 28, and a sharp decline when compared with the five-week period March 30 to May 3, 1945. With the exception of a decline in forestry and logging, and no change in fishing and hunting all industrial groups showed gains in placements under the first comparison, the most pronounced being in construction, manufacturing, services and public utilities operation. All industrial divisions apart from agriculture and construction recorded losses over the five weeks ending May 3 last year, the largest being in manufacturing, services, public utilities operation, trade and forestry and logging. During the five weeks under review there were 190,000 vacancies reported, 165,791 applications for employment and 82,008 placements effected in regular and casual employment.

Unemployment in trade unions at the close of the quarter ending March 31, 1946.—Returns from 2,463 local unions in Canada

with a combined membership of 414,487 indicated an unemployment percentage of 1.9 at the end of the first quarter of 1946. At the end of December, 1945, 2,460 locals with a total of 410,089 members reported 3.0 per cent unemployed, while in March, 1945, 2,337 locals representing 421,779 members, registered 0.7 per cent unemployment.

Survey of civilian labour force.—The second in a series of quarterly surveys of the civilian labour force undertaken by the Dominion Bureau of Statistics indicates that at February 23, 1946, 4,525,000 were employed, while the number of unemployed was estimated to be 213,000 making a total labour force of 4,738,000.

Employment and Payrolls at the Beginning of April, 1946

THERE was considerable expansion in employment in the Dominion at the beginning of April when widespread improvement was indicated in the manufacturing and the non-manufacturing industries. The general advance, which was contra-seasonal according to the experience of the years since 1920, raised the index of employment, on the 1926 base as 100, from 167.0 at March 1 to 168.5 at the date under review. Although the latter figure was the highest so far recorded in 1946, it was otherwise the lowest since the summer of 1942, being 4.7 per cent below that of 176.9 at April 1, 1945. It is important to note, however, that industrial employment continues decidedly above its pre-war level, the index at the beginning of April of the present year exceeding by 60.6 percent that indicated at April 1, 1939.

Data were tabulated by the Dominion Bureau of Statistics from 15,789 employers,

whose staffs numbered 1,720,726 at the date under review; as compared with 1,705,529 at March 1, there was an advance of 15,197 persons, or 0.9 per cent. More than 80 per cent of this increase took place among men, whose numbers rose by over 12,200, as compared with a gain of less than 3,000 among women workers in recorded employment.

Since the general improvement in the situation at April 1 as compared with March 1 was contrary to the usual trend at the time of year, the seasonally-adjusted index moved upward, rising from 174.0 at March 1 to 178.5 at the date under review.

Within the manufacturing group, there were widespread gains in employment as compared with a month ago, the only declines of any size being in tobacco and electrical apparatus plants. The most pronounced expansion was in the iron and steel group, which reported nearly 5,500 more employees than at March

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

1. The increase was partly due to resumption of work on a more normal scale following the disruption occasioned by industrial disputes in Canada and the United States. Among the non-manufacturing divisions, the movement was favourable in mining, communications, transportation, construction, services and trade. The greatest improvement was in trade, in which it was above-average for the time of year. On the other hand, logging reported a considerable seasonal contraction, over 11,000 persons being laid off from work in the bush.

Payrolls

The weekly payrolls reported at April 1 by the firms furnishing statistics in the eight leading industries aggregated \$55,931,903, as compared with \$55,321,019 distributed on or about March 1. The increase amounted to 1.1 per cent. The average weekly earnings of the typical individual in recorded employment advanced from \$32.44 in the last return, to \$32.50 at the date under review, as compared with \$32.00 at April 1, 1945, \$32.37 at April 1, 1944, \$31.14 at April 1, 1943, and \$28.41 at April 1, 1942. The mean at April 1 of last year had been lowered by loss of working time during the Easter holidays, which had fallen within the pay period for which the earnings were then reported.

Including the figures for financial institutions, the most recent survey shows that the total number of persons reported in the nine major industrial groups was 1,795,048, as compared with 1,777,927 at the beginning of March. The weekly payrolls of these workers totalled \$58,500,160, as compared with \$57,843,560 in the preceding report. The per capita earnings in the nine main industries, including finance, were \$32.59, as compared with \$32.53 at March 1, and \$32.06 at April 1, 1945. In the months since then, the number in recorded employment in the nine leading industries has declined by 4.1 per cent, while there has been a reduction of 2.9 per cent in the indicated salaries and wages.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at March 1, 1946, and April 1, 1945. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1943.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment

and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table I indicates that in the period for which data are available, the number of persons employed in the eight leading industrial groups has shown an increase of 10.3 per cent, while the aggregate weekly earnings of these workers are higher by 38.9 per cent. Including finance, the gain in employment from June 1, 1941, to April 1, 1946, amounted to 10.9 per cent, and that in payrolls, to 39.3 per cent. The explanation previously given for the much greater rise in the reported salaries and wages than in employment during the period of observation may again be stated:— (1) the concentration of workers still indicated in the heavy manufacturing industries despite the reductions which preceded and followed the termination of the war; in this group, rates of pay are above the average and there has been a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive up-grading of employees as they gained experience in their work and (4) the payment of higher wage-rates in a great many cases.

At the date under review, the increase in employment in manufacturing since June 1, 1941, amounted to 10.1 per cent, and that in the indicated salaries and wages, to 38.7 per cent; the advance in the same comparison in the non-manufacturing industries taken as a whole was 10.7 per cent in the case of employment, and 39.2 per cent in the case of payrolls. The slightly greater gain among the latter group is at variance with the experience during the war, when activity in manufacturing was maintained at levels decidedly above those in many of the non-manufacturing classes, and the indicated salaries and wages were also relatively higher.

With regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of paramount importance.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, May, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE labour situation improved steadily during May, with unemployment dropping 15 per cent during the month. Employment opportunities expanded but less rapidly than in April. General labour unrest has made employers hesitant to list their vacant jobs in full at this time. Scarcities of raw materials and skilled labour continue to handicap re-conversion and expansion projects. The "tight" labour market situation in the mining, construction, and service industries has been temporarily eased by the employment of students and teachers.

At May 23, the number of unfilled vacancies¹ exclusive of agriculture, totalled 111,307, as compared with 98,781 four weeks previous. The additional loggers, miners, construction workers, and light labourers required accounted mainly for the rise in vacancies during May. By the end of May, the over-all demand for women was slightly in excess of the available supply as labour needs for service and unskilled workers rose markedly. The available labour supply, as measured by the number of unplaced applicants² registered at employment offices, numbered 211,744 (169,956 male and 41,788 female) at May 23. Unemployment continues at a high level in the Maritime, Prairie, and Pacific regions while expansion of labour demand has taken place, for the most part, in Ontario and Quebec.

The over-all labour situation has substantially changed from that reported during the comparative period in 1945. During May, 1945, vacancies declined following V-E Day to total 172,857 at May 25; labour supply, on the other hand, showed little change, and at the reporting date numbered 69,355. Table I shows labour demand and supply by main occupational group and by sex as at May 23, 1946. Table II presents a monthly comparison

of total labour demand and supply. Unfilled vacancies classified by main industry group and by sex, as at May 23, 1946, with absolute and percentage changes in total demand during the last month, are shown in Table III.

Clerical Workers

The labour situation for clerical workers remained substantially unchanged during May. Undoubtedly unsettled labour conditions and the uncertainty surrounding the procurement of necessary raw materials have made employers cautious of expanding their "white-collared" staff at this time. At May 23, there were 7,567 clerical workers required across Canada, while the unemployed in this field totalled 23,683. The greatest discrepancy between supply and demand was evident in the labour situation for male workers, particularly in the Maritime, Prairie, and Pacific regions. Placement in the clerical occupations continues to be hampered, on the other hand, by the lack of fully educated and experienced applicants, while, on the other hand, many employers are not offering salaries consistent with their strict requirements. Insurance companies and real estate firms reported additional staff requirements during the month and this was reflected in a 14 per cent rise in the number of general female clerical workers required. Typists and stenographers remain in short supply; at May 23, there were 2,903 vacancies for female typists and stenographers throughout Canada with available supply totalling 2,288 at that date. In some cases employers are requesting veterans, but ex-servicemen are reluctant to accept many of the positions because of the low salaries offered.

Sales Workers

A surplus supply of applicants classified as sales workers persists, but the situation is easing as commodity goods gradually return to the market. Unplaced sales workers at May 23, totalling 12,974, were 12 per cent below the level reported four weeks earlier. Unfilled vacancies increased slightly during the month to total 4,632 at the reporting date. Placing of orders for additional help has been curtailed as wholesalers and merchants begin to feel the effects of labour disturbances. Competent and experienced help, however, is easily placed, but many applicants cannot meet the high standards now specified by employers. In some places where qualified applicants cannot be obtained, employers are training inexperienced help.

¹ Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

² Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Service Workers

Demand for service workers continued to increase during May, as summer resorts expand their staffs in anticipation of a very active tourist season. It is feared that sufficient help may not be available to staff the numerous expansion projects for hospitals throughout Canada. The supply of service workers fell short of demand due to the acute shortage of women seeking employment in the service trades. At May 23, there were 18,679 service workers required while unplaced applicants numbered 16,077; female labour requirements accounted for 78 per cent of the demand but only 38 per cent of the applicants were women. Considerable relief should be obtained by the summer employment of students and teachers. Waitresses, cooks, and kitchen workers are urgently needed with available supply less than half the orders on file. There were 4,653 domestic servants needed at May 23, but those seeking this type of work were less than one-quarter the number required. The introduction of the Home Aide courses and the scarcity of high-paid jobs following the cessation of hostilities eased the situation for household help considerably. With the seasonal upswing in industrial activity, alternative employment opportunities have improved, and applicants are even more reluctant to accept domestic service.

Skilled and Semi-skilled Workers

A marked improvement was evident in the labour situation for workers in skilled and semiskilled occupations during May, particularly for men. Despite unsettled labour conditions and the general uncertainty of obtaining vital raw materials, 20 per cent more skilled and semiskilled men were required during May. At May 23, there were 31,815 skilled or semiskilled male workers required. Unemployed skilled workers continued to decline and the number of men unplaced at May 23, totalling 59,320 was 19 per cent less than that reported four weeks previous. The shortage of qualified and experienced applicants is becoming even more acute as industrial activity increases, especially in mines, foundries, and construction work. A moderate improvement was evident in the labour situation for female skilled and semiskilled workers and at May 23 labour needs, totalling 9,783, outnumbered the available supply by 2,010.

Textile Workers:—The shortage of both male and female textile workers continues, despite the efforts of employment offices to interest unemployment insurance claimants of

nearby areas in textile work. A deterrent factor in obtaining additional help continues to be the serious lack of housing accommodation. Quebec reports that beginners are urgently needed in garment industries, glove and leather trades, and cap manufacturing industries. As alternative employment opportunities improve, a high degree of labour turnover again becomes a major problem. At May 23, there were 8,444 textile workers required but only 3,670 applicants were seeking this type of work. The need for female sewing machine operators remains acute, with 4,776 required at May 23, but the available supply was slightly less than one-quarter the labour requirements.

Lumber and Wood Products Workers:—The crippling effect of the strike in the British Columbia lumber camps is already being felt in the agriculture, shipbuilding, and construction industries. To cope with this situation, employers have increased their orders for additional help; demand for lumber and wood products workers rose by almost 40 per cent during May to total 13,620 at May 23, but few applicants were interested in this type of work. Demand for loggers rose contraseasonally during the month as additional men were required to complete the river drives and commence summer logging. Saw-mill operations are well under way in many sections of the country but work has been curtailed due to the shortage of trained help. This shortage has been considerably aggravated by the withdrawal of German prisoners of war. In some areas, however, labour requirements have been met by the importation of Japanese workers.

Miners:—Orders for miners showed a marked gain during May as weather conditions improved and expansion projects got underway. Additional staff is needed for developmental and exploration work, following the lull during the spring break-up. At May 23, there were 1,530 skilled miners required with only 893 available applicants. Demand for hard rock miners almost doubled during May but many of these vacancies have been filled temporarily by university students.

The coal strike in the United States has necessitated maximum production in Canadian coal mines. The lack of certificated miners, however, has curtailed expansion in some areas. Demand for coal miners totalled 824 at May 23 while unplaced applicants numbered only 252 at that date. The return of farmers temporarily employed in the coal mines intensified the shortage of experienced help.

Construction Workers:—An extremely active construction season is anticipated for 1946. Building permits issued during April reached

the highest total for that month since 1920, while contracts awarded continue at a high level. The effect of the strike in the British Columbia lumber industry is already being felt and many employers are temporarily holding back orders for additional help until the supply of raw materials becomes more reliable. The shortage of trained help persists. Many of the construction workers now registered have received only a limited training in war plants, and, consequently, are not proficient in the general trade.

At May 23, there were 6,728 skilled and semiskilled construction workers needed across Canada, while unplaced applicants numbered 7,946. Demand for carpenters accounted for over one-half the construction workers required, with the Ontario and Prairie regions reporting a short supply. The need for bricklayers and plasterers remains acute, but no immediate alleviation of the situation is in sight.

Workers in Miscellaneous Occupations:—The surplus of metal workers was reduced during May; unplaced metal workers fell by

21 per cent to total 14,327 at May 23. Vacancies, however, showed no improvement during the month and at May 23 totalled only 2,338. There are 23 machinists registered for every job available; slightly smaller surpluses exist in the structural steel, welding and flame cutting occupations. Moulders and core makers remain in short supply and the scarcity of this type of worker has handicapped reconversion in heavy industry. The situation in many foundries has been seriously aggravated at this time by the withdrawal of temporarily employed farm labour. Fully-qualified mechanics are in demand but many of the orders on file require employees to provide their own tools. As weather conditions improved during May, additional truck and tractor drivers were required, but applicants are still greatly in excess of demand. Laundries remain hard-pressed for labour and some firms may curtail operations during the summer if additional help is not obtained. At May 23, there were 589 women required for laundry and cleaning finishing work, but applicants were less than half the number required.

TABLE I—UNFILED VACANCIES AND UNPLACED APPLICANTS, BY OCCUPATION AND BY SEX, AS AT MAY 23, 1946

(excluding Agriculture)

Unskilled Workers

Conditions for unskilled labour continue to improve with unemployment dropping by 17 per cent while 13 per cent more jobs were made available during May. At May 23, demand for unskilled labour totalled 36,648, while the labour supply at that date numbered 83,047. Contrary to the usual seasonal trend, demand for longshoremen and stevedores fell, due to the strike of the seamen. Additional workers should be required shortly to carry

out the extensive provincial program for high-way construction during the summer. Man-power needs for male light labour increased substantially during May as reconverted and seasonally active industries expanded their labour requirements. The situation for female unskilled labour changed from an excess supply of this type of worker to a shortage of unskilled help during May. Demand, however, was concentrated mainly in Quebec and Ontario while an excess supply of unskilled female workers continues elsewhere.

TABLE III—UNFILLED VACANCIES BY INDUSTRY AND BY SEX, AS AT MAY 26, 1946

(excluding Agriculture)

Industry	Male	Female	Total	Change from April 25, 1946

Regional Analysis

The regional analysis which follows is based on the semi-monthly reports received from Local Employment Offices across Canada. The report covers employment conditions during the month ended May 22, 1946.

Maritime Region

Agriculture.—The arrival of warm, dry weather has stimulated farming activity throughout the region and orders for farm workers are rapidly increasing. Good jobs and reasonably good wages are offered but applicants are not numerous enough to meet demand. In addition to casual workers for planting, about 200 men will be required on a full-time basis until the autumn frost sets in.

Logging.—River stream drives have been completed in many districts. The recent rainy weather has provided favourable water conditions and most of the winter cut will reach the booms. Summer pulpwood cutting is commencing in New Brunswick areas but the demand for woodsmen varies with the locality. In the St. Stephen area local operators cannot compete for labour against high wages offered by the American logging companies across the border. Sawmills are now in operation throughout the region; the supply of labour is satisfactory.

Coal Mining.—Most mines are working steadily and production levels remain stable. Apart from the continued shortage of approximately 200 skilled miners in the Cape Breton area and of about 80 in the Minto area, demand for labour in this industry is slight. At Inverness, employment prospects for the colliery workers laid-off at the beginning of May are poor. Strip mining operations have been resumed in the Minto area and production will return to normal in a few weeks.

Manufacturing.—Manufacturing plants are operating at normal levels except where a shortage of materials hinders production. The steel plant in the Sydney area is working steadily with the exception of the electrical department, where an industrial dispute has been in existence since May 3. The Eastern Car Company of New Glasgow will complete its Belgian order by the end of June, and other orders will enable it to remain in operation on a reduced scale until August. Ships carpenters are required for fishing boat construction, but employment is declining in steel ship repair yards. The clothing and leather goods industries are seriously hampered by shortages of raw materials; the Maritime Pant Manufacturing Company of Amherst is still

idle, awaiting material shipments. Fish-processing plants are suffering from a shortage of experienced fish handlers and cutters. Few workers are applying for work in fish plants, although earnings in this industry are now the highest ever recorded. The scarcity of female labour is becoming more acute in the Halifax area; sewing machine operators and factory workers are in heavy demand.

Construction.—Residential and commercial construction is expanding, although material and labour shortages and unfavourable weather conditions prevent large-scale activity in this industry. Extensive programs are planned in all areas. Better progress is reported in Halifax and Saint John as the supply of labour has improved. The scarcity of skilled carpenters, bricklayers and plasterers in some areas is intensified as construction expands.

Transportation.—Port activity at Halifax and Saint John is now at the seasonal low, and displaced freight handlers and stevedores are forced to seek employment in construction. Railways continue to reduce operating staffs, although extra gang labour is required spasmodically.

Quebec Region

Agriculture.—Inclement weather conditions have retarded seeding in most agricultural districts. Farmers are rushing operations to make up for the delay, which will adversely affect crop yields if prolonged. Demand for farm help is thus extremely heavy, with the supply situation critical, as unemployed persons with previous agricultural experience are reluctant to accept farm work. The suspension of unemployment insurance payments for single men with agricultural experience who refuse to accept suitable farm work, will commence shortly in order to accelerate farm labour placements.

Logging.—River driving operations are progressing well throughout the region; demand for workers is heavy but supply is adequate in most districts. The Coaticook district is furnishing lumber companies in the United States with workers—since May 13, 500 labour exit permits and 650 renewals have been issued in this area. Sawmills are operating at full capacity with a plentiful supply of labour.

Mining.—Operations in hardrock mining districts continue to be curtailed by the serious dearth of experienced miners. The possibility of meeting the demand for labour is remote as, in addition to the lack of housing accommodation in such areas, most applicants

for mining jobs are seeking surface work for the summer months. The new agreement arising from the brief wage dispute at Thetford Mines is expected to have a stabilizing influence on asbestos production.

Manufacturing.—The serious effect of the American coal strike on steel supplies has become increasingly apparent during the latter half of April. Extensive staff reductions are threatened at the Montreal Locomotive Works if the situation continues, while production at the Dominion Engineering Works is already retarded. Rapidly increasing activity is occurring in consumer goods industries. The new automotive plant now nearing completion at St. Laurent, at capacity production will provide employment for 1,000 persons. An acute shortage of workers still exists in the clothing and footwear industries, expansion of factory facilities nevertheless continues unabated. Strikes in the low-wage textile industry are further hindering production, already hampered by raw material shortages. Many new plants or plant extensions in the furniture industry are in various stages of completion; a market for their products is assured by the heavy "new family" demand now existing. Building material firms are working at full capacity, although labour turnover is high.

Construction.—New building projects are increasing throughout the region and, although a scarcity of skilled tradesmen exists in many areas, the shortage of building supplies is the chief impediment to progress. Wage increase demands in the building trades are causing unsettled labour conditions which will remain until official agreement has been reached. Low-cost housing projects have difficulty in competing against industrial projects for available construction tradesmen.

Transportation.—The Seamen's Union strike dominates the transportation field at this time. No immediate settlement is in view, as both shipowners and employees are deadlocked on the issues involved. The maintenance of skeleton freight and passenger service between Quebec and the head of the Great Lakes is being attempted.

Ontario Region

Agriculture.—The over-all demand for farm labour is strong, and no general slackening is indicated in the near future. The use of German prisoners-of-war is relieving the situation in some areas. Seeding operations in northern sections have been delayed by heavy rains, but in the rest of the province most crops have now been planted. Workers will be required for sugar beet thinning operations

at the end of May and as acreage has been increased this year, labour demand will be correspondingly heavier.

Logging.—Recent rains have been of great benefit to river driving and sawlogs are reaching the booms in large quantities. Sawmill workers are in ample supply except at Braeside, where 50 men are needed. Demand for pulpwood cutters is firm owing to the withdrawal of German prisoners-of-war, and will increase as the weather clears. Operators are willing to employ any available Japanese workers.

Mining.—Base metal mines, now operating at the normal peacetime rate, are planning expansion during the summer. All men previously laid off, have now been recalled. Kirkland Lake mines urgently require 50 experienced miners and 50 beginners. The Wood Hall Mines of the Porcupine district, are producing barite ore for shipment abroad in crude form, and plan eventually to install a processing plant.

Manufacturing.—Seasonal employment opportunities and the attraction of outdoor work is the cause of a movement of labour away from heavy indoor jobs. Foundries in particular are experiencing great difficulty in replacing such workers. Agricultural implement manufacturers and other iron and steel firms require forge machine operators, pattern-makers, moulders and coremakers. The number of unplaced metalworkers has decreased by 10 per cent during the past two weeks. Textile workers are in heavy demand but few suitable applicants are available, the shortage in Toronto and St. Catharines being especially acute. A new textiles plant is commencing production at Stratford. Skilled workmen are needed in the furniture industry, which is expanding rapidly. A new plant has recently been established at Collingwood, manufacturing furniture for European markets.

Construction.—The Residential Construction Survey discloses that an increase of 15 per cent has occurred in the number of houses begun during May as compared with those started in April. The demand for skilled construction tradesmen has grown proportionately, with the supply of bricklayers and carpenters particularly scarce. Over 1,000 skilled construction labourers are required immediately but such workers are almost unobtainable. Building materials in short supply are lumber (joists and studding), gyproc, plumbing and electrical fixtures.

Transportation.—Great Lakes shipping schedules have been disrupted by the Seamen's Union strike and considerable confusion exists. Railways require track main-

tenance men at various points; this demand cannot be met at Sudbury and Sault Ste. Marie, where heavy labour is scarce.

Prairie Region

Agriculture.—Seeding is now almost completed throughout the Prairie region. The supply of farm labour has been satisfactory and requirements during the planting season were adequately filled. In fact, small surpluses of farm help are now appearing in some districts. Such surplus workers are easily diverted into construction, sawmill and railway maintenance work. Planting of sugar beets in Alberta is now over, and "thinning" is commencing; a shortage of labour may develop in this industry as the season advances. The seasonal movement of combines to the United States to aid in harvesting Texas grain has started; these crews will move north as regional crops ripen, reaching Canada in time for fall harvest operations.

Logging.—River drivers are in full swing throughout Northwestern Ontario; labour supply is adequate. Summer cutting operations are now commencing and a brisk demand for pulpwood cutters exists in the Port Arthur, Winnipeg and The Pas districts. In the Blairmore zone, stocks of mining timber supplies have reached a low point, and log and prop cutters and mill hands are urgently needed. Summer logging on a limited scale has commenced in the Edmonton district.

Mining.—Coal mines are in steady production, except in the Edmonton district. Unplaced miners in this area are being referred to Edson and Blairmore mines, but lack of accommodation is an obstacle to transfers. The return of many winter miners to their farms has created replacement difficulties.

Development and exploration work is underway in the Flin Flon and The Pas areas; labour demand is chiefly for experienced men. However, university students on vacation are being hired. The Steep Rock Iron Mines at Atikokan require qualified labourers, euclid drivers and diesel mechanics, and are screening applicants carefully.

Manufacturing.—Chief activity is in building supply firms throughout the region. Employment is expanding in brickyards at Estevan, Medicine Hat and Edmonton, and the new plant now under construction at Winnipeg will create additional jobs upon its completion at the beginning of June. Sash and door factories are still hampered by shortages of materials. The Canadian Car and Foundry Company of Fort William is increasing employment as its bus production program is now progressing smoothly. The

iron and steel industry in Saskatoon requires skilled welders and mechanics but no suitable applicants are available. Meat packing plants throughout the region are now operating at the seasonal low.

Construction.—Activity in the construction industry is expanding in nearly all districts, despite shortages of materials and skilled labour. In the western part of the region the British Columbia lumber strike is affecting labour demand, but elsewhere orders for labour are increasing. Material shortages exist in the Prince Albert, Brandon and Regina districts. Shortages of labour, particularly skilled carpenters and bricklayers, are hampering projects in North Battleford, Saskatoon, Medicine Hat, Regina and Edmonton.

Transportation.—Railways require track maintenance workers at most divisional points, and placements are being effected through local and clearance orders. Air service to the Yellowknife area is expanding.

Pacific Region

Agriculture.—Fine weather has now arrived in the Fraser Valley and farmers are speeding up planting operations as it is feared that the delay may result in a poor crop yield. Casual labour is more readily available for farm work as activity in the lumber industry is now at a standstill because of the current strike. It is estimated that it will be necessary to recruit over 600 prairie workers for Fraser Valley berry farms and about 60 for North Okanagan fruit farms. The fruit industry fears a shortage of packing boxes if the logging strike continues.

Logging.—The strike in the lumber industry which began on May 15, has crippled all logging and sawmill activity. No immediate settlement is indicated as operators and employees are deadlocked on the issues involved—wages, hours, and union security. The far-reaching effects of this strike threaten to disrupt the entire economy of the province.

Mining.—The labour situation in regional coal mines shows no improvement—orders remain numerous for skilled miners, while response is negligible.

Gold mines continue to report a need for experienced miners, but labour unrest throughout the region somewhat hinders placements. The situation is not critical, however, and recruiting through clearance orders in the Whitehorse area is progressing steadily.

The base metals industry is very active, and ambitious plans are reported for enlarged development in the Nelson and Trail districts; orders for suitable labour are increas-

ing. The urgent labour requirements in the Princeton area are difficult to fill as the agreement between the union and management is not yet settled.

Manufacturing.—Production schedules in the metal industry have been upset by the moulders' strike. Some plants may be forced to close if the dispute is not settled shortly. First-class machinists are still required by firms not affected by the strike.

The steel shortage has eased somewhat in the shipbuilding industry, but yards are now feeling the effects of the lumber and foundry strikes. Lumber shortages have caused the lay-off of several shipwrights at Burrard Drydock Company and the curtailing of wooden shipyard operations. Fish processing and packing plants are suffering from a scarcity of labour as the halibut season is now in full swing. Seasonal activity is commencing in

vegetable canning factories and orders for female workers are increasing.

Construction.—The building industry is beginning to feel the effect of the lumber strike and a serious shutdown of projects is expected. Most contractors have cancelled orders for construction workers, and many are now releasing those with the least skill. The majority of smaller contractors have sufficient materials for only one week. Highway construction projects are increasing throughout the province and are steadily absorbing labour.

Transportation.—In the marine transportation field, vacancies for deck hands, wipers and firemen are difficult to fill as most ex-naval personnel are not interested in sea-going jobs. Railways require section men at Penticton, Kamloops and Nanaimo.

Applications for Employment; Vacancies and Placements; April, 1946

THE volume of business transacted by the National Employment Service Offices of the Unemployment Insurance Commission during the five-week period March 29 to May 2, 1946, showed an increase of 23.1 per cent in business transacted when compared with the preceding four weeks March 1 to March 28, 1946, and a loss of 47.6 per cent in comparison with the five-week period March 30 to May 3, 1945, this computation being based on the average number of placements recorded daily. With the exception of forestry and logging and no change in fishing and hunting all industrial divisions showed gains in the daily average of placements effected in comparison with the previous four weeks, the most pronounced being in construction, manufacturing, services and public utilities operation. When comparison is made with the five weeks ending May 3 last year, all industrial groups except agriculture and construction showed declines the most pronounced being a substantial loss in manufacturing and moderate decreases in services, public utilities operation, trade and forestry and logging.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took upward courses. The ratio of vacancies to each 100 applications was 114.6 during the five weeks ending May 2, in contrast with 85.5 during the previous four-week period and 127.9 in the five weeks

March 30 to May 3, 1945. The ratio of placements to each 100 applications during the period under review was 49.5 compared with 37.6 in the preceding period and 71.0 during the five weeks ending May 3 a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the five weeks March 29 to May 2, 1946 was 6,786, compared with 5,398 during the preceding four weeks and 10,059 in the five weeks ending May 3, 1945. The average number of applications for employment received daily by the offices during the five weeks ending May 2, was 5,921 in comparison with 6,312 during the previous period and 7,863 during the corresponding five weeks a year ago. The average number of placements made daily by the offices during the period under review was 2,929 of which 2,697 were in regular employment and 232 in work of one week's duration or less, as compared with a total daily average of 2,379 during the previous four weeks. Placements during the five weeks March 30 to May 3 a year ago, averaged 5,586 daily consisting of 5,414 in regular and 172 in casual employment.

During the period March 29 to May 2, 1946 the offices of the Commission referred 133,297 persons to employment and effected a total of 82,008 placements; of these the placements in regular employment were 75,512 of which 59,228 were of males and 16,284 of females, while placements in casual work totalled 6,496. The number of vacancies reported by employers was 136,882 for males and 53,118 for females, a total of 190,000 while applications for work numbered 165,791 of which 124,212

were from males and 41,579 from females. Reports for the four weeks March 1 to March 28, 1946 showed 129,539 positions available, 151,501 applications made and 57,078 placements effected, while from March 30 to May 3, 1945, there were recorded 291,722 vacancies, 228,035 applications made and 161,993 placements in regular and casual employment.

The following table gives the placements effected by employment offices each year, from January 1936.

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763

1946 (18 weeks).....	233,083	21,882	254,965

Nova Scotia and Prince Edward Island

Employment opportunities as indicated by orders received at National Employment Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending

May 2, 1946, showed a daily average of 248 compared with 178 in the preceding period and 352 during the five weeks March 30 to May 3, 1945. Placements recorded a daily average of 122, in contrast with 92 in the previous period and 226 during the corresponding five weeks a year ago. The reduction in placements from the period ending May 3 last year, was greatest in manufacturing with decreases of more moderate proportions in public utilities operation, services, trade and mining. Placements by industrial divisions numbered: services, 1,022; manufacturing 907; trade 540; construction 533 and public utilities operations 213. Regular placements totalled 2,385 of men and 839 of women.

New Brunswick

Orders received at Employment Offices in New Brunswick during the period under review, called for an average of 174 workers daily compared with 120 in the four weeks terminating March 28, 1946, and 323 during the period March 30 to May 3 a year ago. There was a daily average of 74 placements in comparison with 67 in the preceding period and 167 during the five weeks terminating May 3 last year. A fairly large decline in manufacturing together with moderate losses

in public utilities operation, services, trade and construction accounted for the decrease in placements from the corresponding five weeks of 1945. Placements by industries included: services 600; manufacturing 475; construction 332; trade 254; public utilities operation 177, and forestry and logging 126. Placements in regular employment numbered 1,450 of men and 419 of women.

Quebec

Positions offered through Employment Offices in the province of Quebec during the five weeks ending May 2, averaged 1,473 daily compared with 1,156 in the previous period and 3,510 during the corresponding five weeks of last year. The average number of placements effected daily was 447 during the period under review, in comparison with 356 in the preceding four weeks and 1,730 during the period March 30 to May 3, 1945. Except for a minor gain in fishing and hunting, all industrial divisions showed decreases when compared with the five weeks ending May 3 a year ago. The most marked reduction was reported in manufacturing followed by substantial losses in forestry and logging, and services, and declines somewhat smaller in volume in trade, public utilities operation and construction. In addition, moderate decreases were noted in finance and insurance, and mining. Industrial groups in which most of the placements were effected were: manufacturing 5,152; construction 2,594; services 1,903; trade 909; forestry and logging 743; mining 567 and public utilities operation 476. There were 9,956 men and 2,396 women placed in regular employment.

Ontario

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Ontario during the period terminating May 2, was 3,012 in contrast with 2,461 in the preceding four weeks and 3,982 during the period terminating May 3, 1945. Placements registered a daily average of 1,336 during the five weeks under review, in comparison with 1,070 in the previous period and 2,254 during the corresponding five weeks a year ago. The heavy reduction in placements from the period terminating May 3 last year, was chiefly attributable to a pronounced decline in manufacturing augmented by substantial decreases in services, public utilities operation and trade. A fairly large decline occurred in finance and insurance and moderate losses in mining, and forestry and logging but these contractions were somewhat modified by an appreciable gain in construction and a small increase in agriculture. Industries in which

employment was secured for more than 500 workers included: manufacturing 13,816; services 7,469; construction 5,840; trade 3,534; public utilities operation 3,509; forestry and logging 1,420; mining 752 and agriculture 651. Regular placements numbered 28,489 of men and 7,155 of women.

Manitoba

There was an increase in the average number of positions available daily at Employment Offices in Manitoba during the five weeks ending May 2, 1946, when compared with the period ending March 28, but a decrease in comparison with the corresponding five weeks of last year; the daily average being 357 during the period under review, 272 in the previous four weeks and 464 during the period ending May 3, 1945. Placements showed a daily average of 192, in contrast with 166 during the preceding four weeks and 280 in the period ending May 3 a year ago. Placements were fewer than those during the five weeks March 30 to May 3 last year, the largest reduction being in manufacturing followed by decreases more moderate in volume in public utilities operation, trade and services. Of the changes in all other groups, the gains exceeded the losses. Placements by industries included: services 1,834; manufacturing 1,127; trade 898; construction 556; public utilities operation 454 and agriculture 242. There were 2,748 men and 1,321 women placed in regular employment.

Saskatchewan

Opportunities for employment at Employment Offices in Saskatchewan during the period under review, numbered 268 daily in comparison with 212 in the previous four weeks and 279 during the period terminating May 3 last year. There was a daily average of 141 placements compared with 91 in the preceding four weeks and 165 during the period March 30 to May 3, 1945. The decrease in placements from the five weeks terminating May 3 a year ago, was small for the province as a whole under this comparison. The most significant changes were moderate losses in manufacturing, trade, services and public utilities operation and an increase in construction. Placements by industrial divisions numbered: services 1,429; construction 661; trade 630; agriculture 475; manufacturing 367 and public utilities operation 331. Regular placements totalled 2,434 of men and 809 of women.

Alberta

Orders listed at Employment Offices in Alberta during the five weeks ending May 2,

1946, called for a daily average of 418 workers, compared with 303 in the previous period and 460 during the corresponding five weeks last year. The average number of placements recorded daily was 215, in comparison with 161 during the preceding period and 294 in the five weeks ending May 3 a year ago. Reduced placements in trade, manufacturing, public utilities operation, services and mining accounted for the decline from the period March 30 to May 3, 1945, although these were partly offset by moderate gains in construction and agriculture. Industrial groups in which the majority of placements were effected were: services 1,961; construction 1,143; trade 744; agriculture 706; manufacturing 637; public utilities operation 388 and mining 333. Placements in regular employment numbered 3,822 of men and 1,202 of women.

British Columbia

During the period terminating May 2, 1946, the daily average of positions offered through

Employment Offices in the province of British Columbia was 837, in comparison with 695 during the period ending March 28, and 1,048 in the five weeks March 30 to May 3, 1945. The average number of placements effected daily was 400, in contrast with 374 in the preceding period and 669 during the corresponding five weeks a year ago. Substantial declines in manufacturing, services, public utilities operation, and forestry and logging were largely responsible for the decrease in placements from the period ending May 3 last year, although a fairly large reduction took place in trade. A moderate loss was recorded in finance and insurance but this was offset by a gain in mining. Industrial divisions in which most of the placements were effected were: services 2,759; manufacturing 2,586; construction 1,602; forestry and logging 1,331; trade 1,316; public utilities operation 835; mining 506 and agriculture 127. There were 7,944 men and 2,143 women placed in regular employment.

Labour Law

Labour Legislation in Alberta, Manitoba and Ontario in 1946

NO new labour statutes were enacted in these three Provinces during the recent legislative sessions. An amendment in Manitoba authorized the extension of the scope of the Fair Wage Act and amendments in

existing statutes in Ontario provided for fixing overtime and part-time minimum rates of wages and regulating "split-shifts".

Other legislation of special interest related to mothers' allowances and to pensions.

Alberta

Between February 14 and March 27, laws were amended in Alberta relating to old age pensions, mothers' allowances and credit unions. A new health insurance measure and an Act Respecting the Rights of Alberta Citizens were enacted.

Mothers' Allowances

A new section in the Mothers' Allowance Act provides that an allowance is payable to a mother, otherwise eligible under the Act, in respect to any child between 16 and 18 who continues to attend school and make satisfactory progress. Previously, an allowance might be paid only to the end of the school year during which a child became 16.

Old Age Pensions

An amendment in the Old Age Pensions Act, Alberta, validates an agreement of April 1, 1944, between the Provincial Government and the Government of Canada which permitted an increase of \$60 per year in a pensioner's income without affecting the amount of his pension.

The Old Age Pensions (Supplementary Allowances) Act was amended to permit the pension authority of Alberta to pay up to \$5 per month to pensioners who have moved to another Province which pays a supplementary allowance to its pensioners in Alberta. Previously, payment "equal to that paid by such other province but not exceeding the sum of five dollars per month" was authorized. The Act validates the Order in Council of July 6, 1945, to the same effect.

Credit Unions

A new subsection in the Credit Union Act permits a credit union or federation of credit unions to accept deposits from or make loans

to any co-operative association. Previously, the Act prohibited such transactions except with members of the credit union.

Co-operative Associations

The Co-operative Associations Act consolidates three Acts. It contains provisions concerning co-operative associations generally and special provisions relating to marketing associations, sets out additional objects for which associations may be incorporated, and confers ancillary powers, including the power to do business with credit unions. New clauses stipulate that an association may not carry on business until it has satisfied the Supervisor that it has sufficient capital; that an association may not make loans to members unless empowered to do so by three-fourths of the members at a general meeting; and that no member may hold more than ten per cent of the outstanding shares. Other new sections deal with the withdrawal of members and the winding-up of associations.

Mechanics' Liens

The section of the Mechanics' Lien Act dealing with the sale of mortgaged premises which are subject to a mechanics' lien was amended to strike out the provision that neither the lien-holder nor the mortgagee had the right to bid at the sale of the lands in question. The amendment permits such bid, provided it is equal in amount to the value of the premises as fixed by the Court before the sale, and that, if the bids of lien-holder and mortgagee are equal, preference is given to the one having the larger claim.

Health Insurance

A new Act replacing the Alberta Health Insurance Act, 1935, to come into force on

Proclamation, authorizes the appointment of a Director of Health Insurance, who, with the approval of the Minister of Health, may establish health insurance districts which will furnish to residents, in whole or in part, hospitalization, medical, dental, nursing, pharmaceutical and other health services. Those eligible for benefits are adults, resident in the health insurance district, who have paid the prescribed annual fee and who have resided in the Province 12 months out of the preceding 24; (2) their dependents, if not adult; and (3) persons, such as indigents, on whose behalf the fee has been paid and for whom the municipality is responsible. To prevent duplication, exception is made in the case of persons receiving medical and other services under the Tuberculosis Act and the Workmen's Compensation Act.

With the approval of the Lieutenant-Governor in Council, the Minister may: appoint an advisory committee; make agreements with municipalities; fix an annual fee not exceeding \$10 for adults, and the age at which residents become liable for the fee; enter into agreements with physicians and hospitals; make agreements with the Dominion Government as to the application of any grants made to the Province for health services; appoint referees to settle disputes; and generally provide for the administration of the Act.

Upon the setting up of a district, the Director must prepare a scheme, showing services to be given, estimated costs, etc., and submit it to a vote of the qualified residents of the district. Sixty per cent of those voting will ratify a scheme. Procedure is set forth for a similar vote to be taken when an expansion of services is contemplated or an addition to the area of a district proposed. If a scheme is rejected by the voters, after three months any area may be detached or added and a second vote taken. Provision is also made for the dis-establishment of a district.

When a district ratifies a scheme, a census is to be taken and a register prepared by the municipality of all persons entitled to benefits. Payment is to be made by each municipality to the Minister of an annual sum obtained by multiplying the number of adults on the register by the amount of the annual fee fixed. After the first year payment is to be made quarterly, and amounts remaining unpaid after they fall due become debts to the Minister recoverable by action. If paid when due, the municipality is to retain three per cent for expenses. The annual fee of any adult entitled to the benefits of the Act may, in the case of any person on the assessment roll, be added to the amount of his taxes, and

in all cases may be recoverable by action as a debt due to the municipality.

The Act was stated to be designed to take advantage of the social service grants proposed by the Dominion Government at the Dominion-Provincial Conference.

Bill of Rights

The Alberta Bill of Rights Act was passed, but will not be declared in effect until its validity has been upheld by the Supreme Court of Alberta and no appeal has been made.

Rights of citizenship under the Act include: for every citizen between 19 and 60 the opportunity to engage in gainful employment or, if gainful employment is not available, a social security pension of not less than \$600 a year on the basis of the 1945 price level; for every citizen under 19 (1) the necessities of life adequate for health and physical well-being, (2) free public and high school education and the opportunity to acquire further specialized training, if aptitude and ability are shown, and (3) free medical, hospital, surgical and dental care; for every citizen on retirement at the age of 60 a pension of such amount as may be authorized by the Legislature but not less than the current social security pension, as well as medical benefits; and for the disabled a social security pension and medical benefits.

Part II of the Act furnishes the machinery for providing the benefits. Payment of social security pensions is contemplated through the issue of credit certificates based on the Province's economic resources. The extent of these resources is to be estimated by a Board of Credit Commissioners, of not more than five persons. The Board is to maintain a balance between the aggregate purchasing power of the people of the Province and the estimated collective prices of goods for sale.

Licensing of Guides

The revised Game Act incorporates provisions formerly in the regulations. As heretofore, a person acting as guide to another in hunting game must obtain a licence. An application for a licence must be accompanied by an affidavit of residence, a recommendation from an R.C.M.P. constable or game officer, and a completed guide's examination paper, on which 75 per cent is the minimum mark required for a Class A licence, and 45 per cent for a Class B licence. B guides may act only as assistants to A guides. A Class C licence, for which no examination is necessary, is for a guide in hunting game birds only, but he may not act for more than five persons on a trip.

Miscellaneous

A section of the Municipal District Act stipulates that, where the council of a municipal district assists a non-resident, it may recover the amount of the expenditure from the municipality of which the indigent is a resident or from the Minister of Municipal Affairs. This is amended to provide that where the indigent was a resident of an improvement district the Minister of Public Welfare is to be responsible for repayment.

The Amusements Act now provides that the Lieutenant-Governor in Council may appoint an advisory board of not more than three members to advise the Minister concerning regulations relating to motion-picture operators.

An amendment in the Public Health Act enables the Provincial Board, with the approval of the Lieutenant-Governor in Council, to regulate (1) the fees to be imposed by the governing body of a hospital for the enrolment of student nurses, and (2) the working conditions of student nurses and of all persons employed in the hospital and the living conditions of student nurses and employees living in the hospital buildings.

Resolutions

The Agriculture Committee of the Legislature was directed to consider requests of labour organizations for amendments to the Industrial Conciliation and Arbitration Act, the Hours of Work Act, the Male Minimum Wage Act, the Female Minimum Wage Act, and the Labour Welfare Act. After hearings, the Committee, which consisted of the whole House, brought forward a recommendation, which was adopted by the Legislature by a vote of 39 to 13, on March 22, that no legislative action on labour should be taken during the session but that the Government should consider implementing any recommendations made before the committee when it deems it advisable to do so.

Manitoba

During the session from February 19 to April 13 the Manitoba Legislature amended the Fair Wage Act and enacted new statutes respecting housing and credit unions.

Fair Wages

The Fair Wage Act, 1916, was amended to give the Lieutenant-Governor in Council power to bring any business, trade or undertaking except agriculture under the operation of Part II of the Act, under which minimum wages and maximum hours of labour may be

On February 26 a resolution carried unanimously requested the Dominion Government to provide for old age pensions of \$50 a month at 65 years of age on a non-contributory basis and without a means test, without adding to the tax or debt burdens of the nation, and to reduce the age-limit for pensions to 60 as soon as possible.

A resolution of March 26 urged the Dominion Government to legislate concerning pensions for the blind so that: a uniform pension, adequate for the cost of living will be provided for all blind persons over 21; that permissible earnings or income limits will be raised to \$660 for single and \$1,200 for married blind pensioners; that all blind persons possessing visual acuity of $\frac{3}{60}$ Snellen's Chart, or less, will be granted a special assistance allowance of \$10 a month; that residence qualifications will be reduced to five years for persons who entered Canada with good vision and lost their sight through illness or non-compensatable accident.

A motion of March 4 urging that the Dominion Government inaugurate a substantially subsidized national home-building program, which would enable wage-earners either to buy a home by making nominal initial and low monthly payments or to rent at a low rental was carried unanimously.

A Government resolution of March 8 requested the Dominion to initiate a nationally-financed Dominion-wide five-year rehabilitation program, and in order to ensure participation of Provincial Governments, to make available to each Province not less than a per capita amount of \$20 a year for five years, such program to be financed either by expanding the national credit through the Bank of Canada or by floating an annual National Reconstruction Victory Loan.

A motion of March 19 for a special committee to hear representations concerning the Workmen's Compensation (Accident Fund) Act was lost, the Government's policy being to review the Act every five years. The last review was made in 1943.

fixed by Order in Council for all employed in a particular trade or industry if the conditions have been agreed upon by a sufficient number of employers and employees in the trade or industry. Previously, only ten businesses and trades came within the scope of Part II. Part I applies to public and private works of construction.

Credit Unions

Part VIII of the Companies Act which related to credit union societies was repealed,

and its provisions re-enacted, with some additions, in a new statute, which came into force May 15, 1946.

The Act establishes incorporation procedure, sets out the duties and powers of directors, officers and committees, lays down rules for their election or appointment, and provides, generally, for administration, disposal of earnings, deposits and loans. New sections provide for the appointment by the Minister of Agriculture and Immigration of a supervisor of credit unions to inspect annually, and examine the business of, each society, audit its books and report on its financial position to the Minister, confer with and advise directors and officers, and generally promote the welfare of credit union societies.

Housing

The Housing Act, 1946, enables the cities of Winnipeg and St. Boniface and, subject to the consent of the Municipal and Public Utility Board, any other municipality to take advantage of the National Housing Act, 1938 (Canada) and the National Housing Act, 1944 (Canada). The Act permits the Government to make agreements with local housing authorities or municipalities, as defined in the Acts or regulations, and to make payments required by such agreements. An amendment to the Winnipeg Charter makes valid an agreement of June 20, 1945, between the city of Winnipeg and the Government of Canada with respect to housing.

Veterans

An amendment in the Municipal Act makes provision for determining the residence of a veteran in connection with the section of the Act under which a municipal corporation is liable for aid or relief by reason of a person being a resident of the municipality. It is stipulated that a veteran of the Second Great War must retain the residence he had at enlistment until one year after discharge, and thereafter must be considered as having residence at the place where he lived the longest period, without relief, during the year after discharge, excluding periods of attendance at a vocational training school or other educational institution under the Dominion Government's rehabilitation plan.

Winnipeg Charter

A change in the section of the Winnipeg Charter relating to advanced polls, to come into effect January 1, 1947, provides that polls in municipal elections are to be open from 1 to 5 p.m. and from 7.30 to 9.30 p.m. on the

second day before election day and during the last three days in the preceding week.

Statutory Regulations

The Regulations Act, 1945, was amended, retrospective to July 15, 1945, to permit the Lieutenant-Governor in Council to dispense with the publication of regulations which have been available in printed form and are of such length as to make their publication undesirable. When the time for publication is extended or publication dispensed with, a notice to that effect must be published within one month in the *Manitoba Gazette*. Where an amendment is made to a regulation before it is filed, the regulation as amended may be filed.

Bills not Passed

A private member's Bill to amend the Shops Regulation Act, withdrawn after first reading, would have provided for early closing of service stations.

Two other private members' Bills which failed to pass would have provided for a two-weeks annual holiday with pay for employees, and prohibited discrimination, on the ground of racial origin or religious belief, against any class of person in the matter of employment, except in personal or domestic service or by a religious, charitable or educational institution operated or maintained by a denominational organization.

Resolutions

A motion approved by the Legislature on February 26 recommended that the Minimum Wage Board, at the request of the Minister of Labour, should institute inquiries into wages, hours of labour and other working conditions of employees in retail stores and clothing factories, with the object of improving these conditions.

Another resolution agreed to on March 7 urged that when the result of the Dominion-Provincial Conference was known the Government give consideration to amending Mothers' Allowances legislation with respect to (a) amount of benefit paid; (b) including mothers with one child of eligible age; (c) raising the eligible age to 16 and, in cases where the child is attending school, to 18 years of age.

The Legislature on April 4 unanimously approved a resolution that the Dominion Government put into effect as soon as possible its proposals with respect to treatment, care and pensions for the blind and preventive measures for diseases causing blindness; that pensions for blind persons be made available at 21 years of age; that for persons who have entered Canada with good

vision and lost their sight through illness or non-compensatable accident, the residence qualifications be reduced to five years.

A resolution of April 4 requested the Government to abolish the means test for old age pensioners 70 years of age or over, and, in the meantime, to permit liens to be filed in cases where the Old Age and Blind Persons' Pension Board consider interests of the pensioner might be protected by the lien.

Two resolutions related to housing were approved. A Government resolution passed on March 25 provided for a special committee to study and report on the methods which might be developed locally to deal with the emergency housing problem. Another resolution, carried on March 12, urged the Dominion Government to undertake immediately a five-

year housing plan for the construction of 15,000 rent-subsidized, well-built housing units in the urban centres.

A resolution, defeated on March 21 by a vote of 37 to 13, advocated that the Dominion should enact legislation during the coming session, or press for agreement this year with the provinces for the passing of uniform legislation, limiting the hours of employment for all employees in Canada to 40 hours in any one week, with no reduction in weekly earnings.

Another resolution recommending that a sub-department of labour statistics and research be set up by the Minister of Labour to collect and tabulate information as to labour relations and working conditions was also defeated on March 21.

Ontario

The Ontario Legislature, in session from March 4 to April 5, amended statutes relating to minimum wages, workmen's compensation, apprenticeship, hours of work, labour relations, municipal and other pension schemes, and mothers' allowances.

Workmen's Compensation

After July, 1, 1946, the cost of medical aid to workmen whose employers are individually liable to pay compensation is to be paid through the Workmen's Compensation Board instead of directly by the employers. In the case of employers collectively liable, it has always been paid by the Board from the Accident Fund. To ensure prompt payment of medical aid, as well as compensation, the Board may require such employers to make a deposit with the Board.

A further amendment provides that compensation for industrial diseases within the Act may be subject to modifications made by regulation as it is to certain modifications stipulated by the Act itself.

A private member's Bill, which was rejected, would have required the payment of compensation for injuries disabling for seven days or less, and would have provided compensation for total disability at the rate of wages received at the time of injury or at a rate equivalent to the average weekly earnings, whichever was greater, thus raising the compensation from 66 $\frac{2}{3}$ per cent of earnings to 100 per cent. For partial disability the Bill would have required payment of the full difference between earnings before and after the injury.

Minimum Wages

The Minimum Wage Act was amended to enable the Industry and Labour Board to

fix minimum hourly rates for overtime work and for work of less than 40 hours per week.

The section which prescribed, according to the size of the municipality, the maximum hours of work for which a minimum weekly wage could be established was repealed as inconsistent with the Hours of Work and Vacations with Pay Act, 1944.

A defeated private member's Bill would have established a minimum hourly rate of 65 cents for any person, except an apprentice, within the scope of the Minimum Wage Act.

Hours of Labour

New clauses in the Hours of Work and Vacations with Pay Act, 1944, empower the Industry and Labour Board to make regulations, subject to the approval of the Lieutenant-Governor in Council, prescribing the maximum number of hours which may elapse between the time a worker on a split-shift begins and finishes work, and providing for payment to a worker employed less than a full year of such proportion of one week's pay as he is entitled to receive in lieu of his annual holiday with pay.

Amendments in the same Act proposed in three private members' Bills failed to pass. One of these would have reduced the maximum weekly hours from 48 to 40, with no reduction in "take-home pay", limited overtime to eight hours in a week and 100 in a year, required overtime payment at the rate of time and one-half and increased the annual holiday with pay from one to two weeks. Another Bill would also have limited hours to 40 per week with no reduction in pay from the 48-hour week basis, and provided for overtime payment after eight hours at time and one-half. A third Bill would have

provided a two-weeks annual holiday with pay to every employee in an industrial undertaking.

Hours of Labour in Fire Departments

A new section in the Fire-Departments Act authorizes a municipal council, in addition to permitting a two or three-platoon system, to adopt any system of working hours in fire-departments, provided firemen are not required to work more than 72 hours a week except in emergency. The stipulation stands that firemen in a permanent department are to have one day off weekly.

Labour Relations

Changes in the Labour Relations Board Act, 1944, provide for an alternate chairman of the Ontario Labour Relations Board; bring the Act up-to-date by making in the appropriate context references to the National Emergency Transitional Powers Act, 1945 (Canada); and empower the Lieutenant-Governor in Council, if the Dominion War-time Labour Relations Regulations cease to have effect, to amend the regulations to include in them all or any employees and employers who are within provincial jurisdiction.

A private member's Bill, which was defeated, would have repealed the section of the Labour Relations Board Act, 1944, providing for the application of Dominion War-time Labour Relations Regulations to non-war industries which are within provincial scope. It would have given to trade unions the exclusive right to collective bargaining; required a vote to determine the union eligible to bargain to be taken on the request of 25 per cent or more of the employees; authorized the Government to take over and operate any plant where an employer has disobeyed a Board order; and required every collective agreement to stipulate that new workers must join the union within 30 days, that all union members must maintain their membership during the life of the agreement and that there should be a check-off of union dues at the request of the union and the request of each employee.

A Bill to amend the Department of Labour Act, also defeated, would have increased the membership of the Industry and Labour Board from three to five, two representing the Trades and Labour Congress of Canada and the Canadian Congress of Labour, two representing organized employers, and a chairman representing the general public.

Apprenticeship

An amendment in the Apprenticeship Act provides for a "probationary period" of three months during which employment in a trade designated under the Act is permitted without a contract of apprenticeship. The Act now permits an employer, with the Director's approval, to employ for not more than one month before requiring a contract of apprenticeship, a person who has served three months with another employer.

Regulations made by the Industry and Labour Board, subject to the approval of the Lieutenant-Governor in Council, may now determine the conditions upon which certificates of qualification may be issued to persons who have been employed in a designated trade; provide for the issue, without examination, of such certificates, on payment of the prescribed fee, to holders of certificates of apprenticeship; provide for the registration of self-employed persons in a designated trade; prescribe the form of certificates and other documents; provide for duplicate certificates and renewals of certificates, on payment of a fee; require the holder of a certificate of qualification to keep it posted conspicuously or to carry it upon his person; and prescribe the classes of persons in any designated trade to whom the Act and regulations apply.

The Board may exempt from such provisions of the Act and regulations as may be considered necessary any ex-member of the Armed Forces who is taking a course of training under an approved rehabilitation plan.

Factories

The section of the Factory, Shop and Office Building Act enabling the Lieutenant-Governor in Council to prohibit by proclamation the employment of girls under 18 and boys under 16 in occupations he deems dangerous or unwholesome was amended by striking out "by proclamation".

Licensed Hotels

An amendment consequential on the Liquor Licence Act, 1946, again permits hotels, without obtaining a licence from a municipal authority, to sell non-intoxicating beverages, cigars, cigarettes and tobacco and to operate an ice-cream parlour, restaurant or cafe, and exempts them from municipal early closing by-laws. These provisions were dropped when the Liquor Authority Control Act was enacted in 1944.

Under the Liquor Licence Act, to come into force by proclamation, the Liquor

Licence Board of Ontario, with the approval of the Lieutenant-Governor in Council, is empowered to make regulations to license employees in licensed premises.

Statutory Regulations

Since the Regulations Act, 1944, lays down the conditions under which publication of regulations must be made, inconsistent provisions of the Industrial Standards Act, the Minimum Wage Act, the Steam Boiler Act and the Woodmen's Employment Act have been repealed.

Mothers' Allowances

Changes in the Mothers' Allowances Act reduce from three years to one year the period of desertion which entitles a woman to an allowance, and provide for paying an allowance until the end of the school year during which a child becomes 16 and continues to attend school.

Municipal and Other Pensions

Sections of the Municipal Act which make provision for employees' pensions were amended. The Municipal Employees' Pension Fund Act, 1937, which had never been proclaimed, was repealed. The Municipal Act authorizes municipal councils to make by-laws providing for pensions for employees of the municipality or of a local board. Two or more municipalities or local boards jointly may set up a pension plan. "Employee" means any person designated as such by the Department of Municipal Affairs, including any salaried officer, clerk, workman, servant or other person in the employ of the municipality or of a local board, but excepting persons covered by the Teachers' and Inspectors' Superannuation Act and the Power Commission Insurance Act.

Further amendments empower municipalities to establish a system of "sick leave credit gratuities" for employees, but no employee may, at the end of his employment, receive more than he earned during the last six months he was employed. Teachers, inspectors, and employees to whom the Power Commission Insurance Act is applicable are not excepted from this provision.

Another amendment in the Municipal Act is designed to encourage the adoption of pension plans by municipal corporations. Retirement allowances, previously restricted to officers, may now be granted to all employees, except where a pension plan is in effect, but they are not to be payable to persons hired after January 1, 1948. Under these conditions

a council may grant an annual retiring allowance to any employee who, after at least twenty years' service, retires because of illness or old age, provided the allowance and any annual pension payments do not exceed three-fifths of his average salary for the preceding three years, or \$2,500. Where there is a pension plan, the section applies only to those employed by the municipality on April 5, 1946.

For persons employed by companies, new clauses in the Companies Act provide for benefits from the pension fund in respect of an illness, accident or disability which incapacitates their wives, husbands or children under 18, including adopted children. Previously, benefits were paid only in the case of illness, accident or disability of the officers or employees themselves.

Post-War Reconstruction

Amendments, retrospective to June 14, 1943, were made in the section of the Municipal Act dealing with the establishment by municipal councils of a reserve fund for post-war rehabilitation. These strike out the words "for the duration of the present war", extend the power to set up such funds to boards, commissions or other municipal authorities in unorganized territory, and enlarge the purposes for which reserve funds may be used.

Provisions of the Vocational Education Act concerning reserve fund deposits with the Treasurer of Ontario for future capital expenditures for buildings and equipment of any vocational school or department have been repealed. The limitation in the High Schools Act of \$2,000 for permanent improvements to vocational schools and departments in any one year was abolished, effective January 1, 1946.

Planning

A new Planning Act replaces the Planning and Development Act, 1944. The latter remains in effect, however, for one year with respect to projects undertaken under it. The 1944 Act made provision for a Department and a Minister of Planning and Development to collaborate with other Departments, both Provincial and Dominion, and with municipal councils and private agencies in stimulating and maintaining employment. The new legislation is designed to enable municipalities to plan programs for their future development in order to secure the health, safety, convenience and welfare of their inhabitants. The Minister may define planning areas, for each of which a planning board is authorized to prepare and recommend a plan to the council for adoption. The Board is to consist of three,

six or nine members, not elected to municipal office or employed by the municipality, with one member chosen by the municipal council for every three appointed. If adopted, and approved by the Minister, the plan is to be the official plan of the area. Municipalities may acquire, hold, sell or lease land required for housing projects.

Housing

The Wartime Housing Act, 1944, and the Veterans' Housing Act, 1945, were amended to provide for agreements between municipal councils and the Dominion Government, Wartime Housing Limited, or any other corporation on behalf of the Dominion Government as to the amount to be paid annually in lieu of taxes on Government land used for the purposes of the Veterans' Housing Act or the Veterans' Land Act, 1942. Both Acts are retrospective.

The Ontario Housing Act, 1919, as amended, empowers the Lieutenant-Governor in Council to reduce or cancel loans made under the Act and to make agreements with municipalities as to the payment of any balance, including the fixing of the rate of interest.

An amendment in the Companies Act empowers life insurance companies to form, and invest their funds in, holding companies and housing corporations, as defined in the National Housing Act, 1944 (Canada), as amended in 1945.

Miscellaneous

The revised Game and Fisheries Act contains the previous provisions of labour interest without material change.

Changes in the Municipal Act authorize municipalities to take advantage of grants for community programs of training in physical fitness.

It now makes provision for municipal by-laws to license and regulate installers of

insulation systems in buildings, fuel delivery men, and shoe-repair or shoe-shine shops.

Bills not Passed

Two Bills, designed to provide relief for persons who have suffered substantial loss of income because of illness or unemployment or any other cause beyond their control, were defeated. These would have permitted an application to a judge for a stay of proceedings arising out of any obligation incurred before April 1, 1946, or taken under a mortgage or agreement to purchase farms and dwellings.

A proposed amendment in the Municipal Health Services Act, 1944, also defeated, would have enabled a municipal council which has enacted a by-law for the provision of health services to make agreements and pay necessary expenses for health services directly instead of through the Ontario Municipal Health Services Board. It would have removed the provision making a vote on a plan compulsory after three years, required six months' notice before termination of plan and stipulated that any agreement must be approved by the appropriate professional organization.

Resolutions

A motion was defeated on April 4 to request the Government to appoint a committee on labour legislation to make recommendations during the session for a new "labour code" for Ontario.

Another Resolution of the same date seeking amendment of the British North America Act to enable the Parliament of Canada to enact a national labour code without restricting the right of any province to pass more favourable legislation was declared out of order, on the ground that it had been dealt with in Bills previously considered by the Legislature.

Recent Regulations Under Dominion and Provincial Legislation

CERTAIN Orders in Council passed under the War Measures Act to provide free medical treatment for seamen for disabilities incurred in war zones, have been continued under the Department of National Health and Welfare Act. A number of Orders in Council of labour interest, most of which related to the training of war workers or to specific war projects, have been revoked. The Emergency Coal Production Board has been abolished.

In Alberta, grain elevator repair crews have been exempted from the Hours of Work Act

from April 1 to October 31, 1946. In Manitoba, regulations under the Licensed Practical Nurses Act fix the fees to be charged by the nurses, their maximum hours of work and holidays with pay. In Quebec, female employees and boys under 18 may now work at night under a three-shift system in a continuous industry if their employer is granted a permit to that effect. The Minimum Wage Order covering glass factories has been amended to apply to the entire province instead of to certain cities and towns. In Saskatchewan, regulations have been issued

governing apprenticeship and tradesmen's qualifications in trades designated under the Apprenticeship Act. Regulations made under

the 1944 Health Services Act to give certain classes of people free health services have been re-issued under the 1946 Act.

Dominion

Seamen

Certain Orders in Council, passed under the War Measures Act, to provide free medical treatment for merchant seamen for non-pensionable disability which was incurred in war zones, have been continued under the Department of National Health and Welfare Act by an Order in Council (P.C. 1691) of April 30, 1946. This free treatment, provided by P.C. 164/6991 of September 4, 1943 (L.G., 1943, p. 1417) and extended to seamen detained by enemy or neutral countries by an Order in Council (P.C. 9002) of November 23, 1943 (L.G., 1944, p. 105), was later limited to disability arising before January 1, 1946, by an Order in Council (P.C. 7479) of December 28, 1945 (L.G., 1946, p. 209).

The new Order merely permits the carrying out of the object of the Orders made under the War Measures Act but specifically stipulates that their authority is not to be continued into the normal peacetime administration of the Department of National Health and Welfare.

Certain Orders Under War Measures Act Revoked

A number of Orders in Council passed under the War Measures Act have been revoked by an Order in Council (P.C. 1297) of April 26, gazetted May 6, 1946. Most of the rescinded Orders which are of labour interest related to the training of war workers of one kind or another or to specific war projects. Among the Orders revoked was one (P.C. 2685) of June 19, 1940, setting out principles to govern labour relations in wartime.

Emergency Coal Production Board Abolished

This Board, established in 1942 to stimulate coal production to meet the great wartime need, (L.G., 1942, p. 1404), was abolished from April 1, 1946, by an Order in Council (P.C. 1684) of April 30, 1946, gazetted on May 6. All Orders in Council relating to the Board are revoked.

Provincial

Alberta Hours of Work Act

Grain elevator repair crews have been exempted from the provisions of the above Act (L.G., 1945, p. 1843) from April 1 to October 31, 1946, by an Order of the Board of Industrial Relations approved by an Order in Council, dated April 18, and gazetted on April 30. Those exempted are employees of United Grain Growers Limited, Alberta Wheat Pool and member companies of the North-West Line Elevators' Association.

Manitoba Licensed Practical Nurses Act, 1945

Regulations of May 1, gazetted May 4, have been issued to fix the fees to be charged by licensed practical nurses, their maximum hours of work and holidays with pay. The Licensed Practical Nurses Act, 1945, requires practical nurses to be licensed by an Advisory Council which is set up by the Act. The qualifications and provisions for training practical nurses are set out in the Act.

The fees for an eight-hour day will be \$3.60, for a 20-hour day, \$5, for a four-hour evening shift, \$2; the fee for overtime will be 45 cents an hour. The fees charged by a nurse paid on a monthly basis and supplied with

free room, board and laundry, will be \$50 a month for the first year, \$55 monthly for the second year, \$60 for the third and at least \$60 monthly subsequently. An additional sum equivalent to the value of room, board and laundry services must be paid when these are not supplied free of charge.

Nurses paid by the month may not be required to work over eight hours daily nor more than six days a week and they must be given two weeks holidays with pay each year.

Quebec Industrial and Commercial Establishments Act

Female employees and boys under 18 may now work at night in Quebec under a three-shift system in a continuous industry if their employer is granted a permit to that effect by the Minister of Labour under the authority of an Order in Council of May 10, 1946, gazetted and effective on May 18. The employment between the hours of 9 p.m. and 6 a.m. of women and boys under 18 in industrial establishments is prohibited by the above Act except where the chief inspector permits them to be employed on a two-shift system in which case the prohibited hours are between 11 p.m. and 6 a.m.

During the war, the prohibition of night work for these classes was lifted by Order in Council 1257 of March 15, 1940, authorized under Section 3 of the Act. Permits for such employment were granted under certain conditions.

The new Order in Council stipulates that the organization of three shifts employing women and boys under 18 is subject to the general provisions of the Act, that the employer desiring to institute a three-shift system must supply on approved forms all the pertinent information required by the factory inspector, and that the Minister of Labour, after an investigation and report by an industrial hygiene physician, shall set in each case the time to be allowed for meals to workers.

Quebec Minimum Wage Act

Order 45 covering glass factories (L.G., 1945, p. 675) was amended by an Order gazetted on May 18 to make it applicable to the entire Province. As before, the municipalities on the Island of Montreal or within a five-mile radius will be in Zone I, but Zone II, for which lower minimum rates are established, will comprise the rest of the Province, instead of only certain cities and towns. The minimum and maximum rates set by the Order remain unchanged.

Saskatchewan Apprenticeship Act

General regulations governing apprenticeship and tradesmen's qualifications in trades designated under the above Act, were issued on April 12 and gazetted on May 15. Specific regulations covering wages and hours, etc. of apprentices were issued in 1945 for the motor-vehicle repair trade and the building trades (L.G., 1945, p. 1208), and for the printing trade in weekly newspaper plants and the electrical trade (L.G., 1945, p. 1844). A syllabus of training for most trades was later issued (L.G., 1946, p. 212).

The new regulations, designed to raise the general standard of tradesmen, require tradesmen other than apprentices in training to apply to the Director of Apprenticeship for certificates of qualification. A tradesman will receive such a certificate if during the preceding nine years (twelve in the case of ex-service-men) he has served over six years in the motor-vehicle repair, plumbing, steamfitting or printing trades, or over five years in the carpentry, bricklaying and masonry or sheet metal work trades, or over four years in plastering, painting and decorating. If a tradesman has served one year less than the specified number, he must sit for an oral or written examination or practical trade test,

as the examining board may decide. An examining board may recommend that an interim certificate be issued to a person who has not qualified as a journeyman. The examining boards, consisting of a chairman and two representatives each of employers and workers in the designated trades, will conduct the trade tests.

An apprentice who passes a trade test during his apprenticeship will be given an interim certificate as to his ability in the trade at that time. On completion of his apprenticeship, he must take a final trade test and if successful will be given a certificate of qualification.

The new regulations also require the employer to provide an apprentice with adequate practical training and to permit him to attend a full-time class of technical instruction when necessary. Three copies of each apprenticeship agreement and of each permanent transfer must be forwarded by an employer to the Director for registration, a copy later to be forwarded by him to the employer and apprentice. Fees for certificates of registration and qualification, interim certificates and examinations, are also set by the Regulations.

Building Trades.—In the carpentry, painting and decorating, plumbing and steamfitting trades, an employer may now hire one apprentice for the shop and one for every three journeymen thereafter, instead of only one for every three. This change was made by an amendment of April 12, gazetted April 30, to the apprenticeship regulations for those trades.

Saskatchewan Health Services Act, 1946

Regulations under this Act were made on April 16 and gazetted April 30 to list the free health services to be provided to certain classes of people and the regulations enumerating these classes were re-issued on April 26 and gazetted on May 15.

The regulations of April 16 list the health services provided: preventive and curative medical and surgical care, hospitalization, nursing services, dental services, physiotherapy, drugs, medicines and appliances and optical services.

A medical card will be issued each year to or for every person entitled to benefits. A person requiring medical or dental services may consult the physician, surgeon or dentist of his own choice. Physicians' and surgeons' fees will be paid out of a fund to be set up on the basis of \$9.50 per year per capita of the persons obtaining benefits.

A Medical Advisory Committee of not more than three members nominated by the Council of the College of Physicians and

Surgeons of Saskatchewan, will in addition to acting as an advisory body, prepare a price list of essential drugs and compounds, and review and authorize payment of physicians' accounts.

Persons Obtaining Benefits.—The Regulations of April 26, re-issued under the 1946 Act, were made under the 1944 Health Services Act in 1945 and 1946 to give certain classes of people free health services.

As before, the following classes will be entitled to free health services: old age pensioners, including those from other provinces if they have resided in Saskatchewan for at least 12 months immediately before applying for health services; blind pensioners; the spouse of a blind or old age pensioner and dependent children and grandchildren under 16 (in the case of a husband of a blind pensioner, he must be at least 70); mothers entitled to allowances under the Social Aid Act and their dependent children

under 16; fathers of children on behalf of whom such allowances are being paid, if the fathers are physically or mentally incapacitated and are living with their wives and children or with their children; and children who are wards of the Province or of a Children's Aid Society.

For the purposes of the Regulations a person 21 years or over is not considered a child. A child eligible for health services until the age of 16 and who reaches that age, will be entitled to the health services for the rest of the calendar year unless he is the youngest or only child in a family. A person who is under 21 and permanently incapacitated, mentally or physically, and dependent on a pensioner or a recipient of a mother's allowance will continue to receive free health services until the age of 21. The widowed spouse of an old age pensioner will also continue to receive free service until the end of the calendar year during which the pensioner died.

New Zealand Employment Service

Following the passage of the Employment Act, 1945, the Employment (Information) Regulations 1946 have been issued to require employers to furnish to the National Employment Service information concerning labour turnover, the number of their employees, the amount of wages paid and a forecast of employment conditions for their business.

The Employment Act established a National Employment Service as a Government Department to promote and maintain full employment. A Director of Employment was provided for and such Advisory Councils and Committees as the Minister of Employment thinks fit. The Department is to provide a complete employment service for placing workers in jobs, assisting employers to secure labour, assisting employers to provide employment and workers in all sections of the community to find better or more suitable employment (whether in professional, technical, supervisory, or any other capacities), and for aiding workers who require occupational readjustment or training or other help so as to enable them to continue or resume full-time employment.

Surveys are to be made from time to time of the classes of employment required or available or likely to be required or available. The Department is authorized to operate hostels or boarding establishments for workers and to provide a home-aide service by making the services of workers employed in the Department available for domestic or

other work in case of emergency or in other special circumstances. The Minister may fix charges for services provided by the Department.

Industry is divided into three classes for the purposes of the Regulations: building and construction; seasonal, which means food-preserving of any kind, dairy factories, wool stores and grain-threshing; and general industry, which takes in all other industries except farming, fishing, trapping and loading and unloading ships.

Every employer who employs at least two workers, is required to file a return at the nearest District Employment Office, monthly in the case of seasonal industries and half-yearly in others. These reports are to state the number of male and female employees and the amount paid out in wages, ordinary time and overtime, on the last pay-day of each month. Except in seasonal industries, the number employed at the beginning of the six-months period, the number at the end and the number hired are to be shown by main occupational groups and according to age over 21 years and under 21. Any marked changes in the number of staff must be noted, except in seasonal industries and, also, the reasons for any necessity to work short-time. A forest is also required regarding the size of the staff, special vacancies and business difficulties during the next six-month period. In seasonal industries, an estimate is required of the peak labour force of men and women.

Prohibition of Employment Under 18 in Operating Hoisting Apparatus Being Considered Under U.S. Federal Law.

The dangers to juveniles between 16 and 18 years of age in operating power-driven hoisting apparatus are to be considered at hearings to be held this month by the Chief of the Children's Bureau of the U.S. Department of Labor. A draft Order to forbid such employment under the authority of the Fair Labour Standards Act will be discussed.

The Fair Labour Standards Act, 1938, prohibits the shipment or delivery for shipment in interstate commerce of any goods produced in establishments in or about which "oppressive child labour" has been employed within 30 days before removal of the goods. "Oppressive child labour" is defined as employment of children under 16, except in such non-mining and non-manufacturing occupations which the Chief of the Children's Bureau determines does not interfere with their schooling, health or well-being, and employment of children between 16 and 18 in occupations declared by order of the Chief of the Children's Bureau to be particularly hazardous or detrimental to their health or well-being.

Six Hazardous Occupations Orders already in effect prohibit employment under 18 in or about explosive plants, in motor-vehicle driv-

ing or helping, in coal-mining except for a few surface occupations, in logging and saw-milling, in operating power-driven woodworking machines, and in occupations involving exposure to radioactive substances.

The occupations prohibited by the proposed Order which would go into effect on August 1, 1946, if it is adopted, would be the work of operating an elevator, operating or assisting in the operation of a crane, derrick, hoist, or high-lift truck, and loading or unloading a freight elevator or riding on one in conjunction with such work or with the transport of materials.

The hearings on the draft order follow a report made to the Chief of the Children's Bureau in which it is pointed out that many young persons under 18 are being injured in these occupations, that injuries caused by hoisting apparatus are substantial in number and relatively severe, resulting in a disproportionately high number of deaths and permanent disabilities, and that the hazards are greater for juveniles because they usually lack the judgment and caution required for safe working.

Strikes and Lockouts

Strikes and Lockouts in Canada During May, 1946

DURING May, 1946, the number of workers involved in strikes and lockouts in Canada and the resulting time loss increased sharply as compared with the previous month and with May, 1945, due mainly to a strike of loggers and woodworkers in British Columbia. Preliminary figures show 35 strikes in existence during May, 1946, involving 47,730 workers, with a time loss of 564,925 man-working days, as compared with 24 strikes in April, 1946,

with 6,907 workers involved and a time loss of 47,116 days. In May, 1945, there were 15 strikes, involving 3,336 workers, with a time loss of 6,738 days.

Preliminary figures for the first five months of this year show 92 strikes, involving 61,866 workers, with a time loss of 691,108 days. For the same period last year there were 83 strikes, with 23,098 workers involved and a time loss of 77,573 days.

STRIKES AND LOCKOUTS IN CANADA, JANUARY-MAY, 1945-1946†

Date	Number of Strikes and Lockouts		Number of Workers Involved		Time Loss

Cumulative totals.....	83		23,098		77,573	0.21

* Preliminary figures.

† Strikes unternminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

Of the 35 strikes recorded for May, six were settled in favour of the workers, eight in favour of the employers, three were compromise settlements and seven were indefinite in result, work being resumed pending final settlement. At the end of the month 11 strikes were recorded as unterminated, namely: bakery workers at Halifax, N.S; woollen factory workers, Carleton Place, Ont; carpet factory workers at Brantford, Guelph and Toronto, Ont; compositors at Winnipeg, Man; loggers, sawmill and shingle mill workers in British Columbia; asbestos miners at Black Lake and Thetford Mines, P.Q; textile factory

workers at Sherbrooke, P.Q; compositors, etc., at Edmonton, Alta., and Ottawa and Hamilton, Ont; foundry workers at Vancouver and New Westminster, B.C; brass factory workers at New Toronto, Ont; and seamen in Quebec, Ontario, Nova Scotia, New Brunswick and Prince Edward Island.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾
	Establishments	Workers		

Strikes and Lockouts in Progress Prior to May, 1946

MANUFACTURING—				
<i>Vegetable Foods, etc.—</i>				
Bakery workers, Halifax, N.S.	1	25	500	Commenced February 11; for a union agreement; unterminated.
<i>Tobacco and Liquors—</i>				
Brewery workers, Montreal, P.Q.	4	400	5,000	Commenced March 28; against Finding and Direction of RWLB ⁽³⁾ cancelling wage increase previously approved; terminated May 21; return of workers and replacement; in favour of employer.
<i>Textiles, Clothing, etc.—</i>				
Woollen factory workers, Carleton Place, Ont.	1	160	4,000	Commenced April 2; for increased wages, union shop, check-off, two weeks' vacation with pay, etc.; unterminated.
Carpet factory workers, weavers, Brantford, Guelph and Toronto, Ont.	3	113	2,500	Commenced April 29; for reduced hours, increased wages and two weeks' vacation with pay; unterminated.
<i>Printing and Publishing—</i>				
Compositors, etc., Winnipeg, Man.	2	108	2,000	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; unterminated.
<i>Metal Products—</i>				
Metal factory workers, Niagara Falls, Ont.	1	33	330	Commenced February 25; for a union agreement providing for union shop, check-off, etc.; terminated May 11; conciliation, provincial; compromise.
Foundry workers, Guelph, Ont.	1	(4) 250	4,250	Commenced April 30; against dismissal of two workers for infraction of company rules; terminated May 20; negotiations; in favour of workers.

Strikes and Lockouts Commencing During May, 1946

LOGGING—				
Loggers, sawmill, shingle mill workers, etc., British Columbia.	(5) 365	37,000	500,000	Commenced May 15; for new agreements providing for increased wages, reduced hours, union shop, check-off, etc.; unterminated.
MINING—				
Coal miners, Mercoal, Alta.	1	340	1,020	Commenced May 13; protest against hoistman working as pump operator; terminated May 15; return of workers; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1946⁽¹⁾—Continued

Industry, Occupation and Locality	Number Involved		Time Loss in Man- working Days	Particulars ⁽²⁾
	Establish- ments	Workers		

Strikes and Lockouts Commencing During May, 1946—Continued				
MINING—Con.				
Coal miners, Drumheller, Alta.	1	98	294	Commenced May 13; alleged refusal of company to supply cap pieces for mine props; terminated May 15; negotiations; in favour of workers.
Coal miners, Cumberland and Nanaimo, B.C.	2	1,400	1,400	Commenced May 15; protesting failure of Provincial Government to include coal miners in 44-hour week legislation (Hours of Work Act); terminated May 15; return of workers; in favour of employers.
Coal miners, Drumheller, Alta.	1	141	315	Commenced May 16; protesting transfer of a driver to surface job; terminated May 18; negotiations; in favour of workers.
Asbestos miners, Thetford Mines, P.Q.	4	1,650	4,125	Commenced May 16; against Finding and Direction of NWLB ⁽³⁾ re increased wages; terminated May 18; return of workers pending further reference to NWLB; compromise.
Asbestos miners, Black Lake and Thetford Mines, P.Q.	2	625	1,500	Commenced May 28; inter-union dispute re bargaining agency; untermiated.
Coal miners, Drumheller, Alta.	1	(⁶)64	64	Commenced May 28; protest because slack not cleaned back from coal faces; terminated May 28; negotiations; in favour of workers.
Coal miners, Glace Bay, N.S.	1	(⁷)6	6	Commenced May 30; refusal of a miner to handle new and heavier type of coupling; terminated May 30; return of workers; in favour of employer.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Textile factory workers, Carleton Place, Ont.	1	(⁸)250	250	Commenced May 1; in sympathy with strike at Carleton Place, commencing April 2, 1946; terminated May 1; return of workers; in favour of employer.
Textile factory workers, Sherbrooke, P.Q.	1	(⁹)115	1,750	Commenced May 13; inter-union dispute re bargaining agency following demand for increased wages and reduced hours; untermiated.
Textile factory workers, Yarmouth, N.S.	1	467	3,000	Commenced May 17; for increased wages; terminated May 28; negotiations and return of workers pending reference to RWLB; indefinite.
Twine factory workers, Brantford, Ont.	1	321	1,926	Commenced May 23; for increased wages; terminated May 31; conciliation, provincial, and return of workers pending further reference to RWLB; indefinite.
Pulp, Paper and Paper Products—				
Paper mill workers, Lachute Mills, P.Q.	1	113	180	Commenced May 17; against dismissal of a worker for insubordination; terminated May 18; return of workers; in favour of employer.
Printing and Publishing—				
Compositors, etc., Edmonton, Alta., Ottawa and Hamilton, Ont.	4	(¹⁰)173	210	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing Nov. 8, 1945; untermiated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in March, 1946, was 189, and 21 were still in progress from the previous month, making a total of 210 during the month. There were 54,200 workers involved and a time loss of 268,000 working-days was caused.

Of the 189 stoppages which began during March, 30 arose out of demands for advances in wages; 60 over other wage questions; 6 on questions as to working hours; 22 on questions respecting the employment of particular classes or persons; 63 on other questions respecting working arrangements; 6 on questions of trade union principle; and 2 were in support of workers involved in other disputes.

New Zealand

Figures now available for the year 1945, show 154 strikes involving 39,158 workers and causing a time loss of 66,629 working-days.

United States

Preliminary figures for April, 1946, show 465 strikes and lockouts beginning in the month, in which 575,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 15,500,000 man-days. Corresponding figures for March 1946, are 385 strikes and lockouts, involving 130,000 workers, with a time loss of 14,000,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, May, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THERE was a rise of 1.2 points to 122.0 in the Dominion Bureau of Statistics cost-of-living index between April 1 and May 1, 1946, due to increases in a wide range of commodities. Foods registered the sharpest advance, moving up from 135.1 to 137.7 on firmer quotations for butter, fresh pork, lard, fruits and vegetables. Homefurnishings and services gained 1.4 points to 122.1 between April and May, while clothing recorded a gain of 0.5 to 123.7. Rents were 0.3 points higher at 112.6, while the miscellaneous items group moved up 0.5 to 111.5, due mainly to higher rates for newspapers and periodicals. Fuel and light continued unchanged at 107.2.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include

* Indexes prior to 1926 have been recalculated, resulting in revisions from figures previously published. Typographical errors in 1945 averages and in rent indexes for 1941 and 1944 have also been corrected.

† Commodities in the cost-of-living excluding rents and services.

prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these

figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings, etc., with their weight, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices, April, 1946

Wholesale price levels moved substantially higher between March and April as indicated by a gain of 2.6 points to 108.2 in the composite index. Gains mainly reflected higher ceiling prices for a number of important commodities including pork and pork products, iron and steel products, lumber and cotton and woollen items. Iron and steel products registered the sharpest rise, advancing 9.9 points to 127.9, reflecting upturns for pig iron and steel billets, steel bars, sheets, rails, pipe, car axles and certain hardware items. Animal products rose 3.6 points to 112.6, higher prices for canned lobster, live stock, bacon, ham, butter and lard outweighing minor losses in raw furs and eggs. A gain of 3.0 to 128.4 for wood, wood products and paper was due to increases in wrapping paper and pine, spruce, hemlock, fir and cedar lumber, while textile products were 2.7 points higher at 98.2 supported by strength in cotton knit goods, woollen hosiery and knit goods, and woollen cloth. An advance of 0.6 points to 103.0 for non-metallic minerals reflected higher quotations for dinner sets, coke, and gasoline and kerosene at Regina and Calgary. A gain of 0.4 to 97.8 for vegetable products was due to oranges, rye, molasses, potatoes and onions which overbalanced weakness in hay. Two groups, non-ferrous metals at 87.8, and chemicals and allied products at 95.7 were unchanged.

Canadian farm products rose 0.3 points to 107.5 between March and April due to increases in both field and animal products. Higher quotations for live stock and poultry outweighed lower prices for eggs to advance the animal products group 0.4 to 126.5, while field products moved 0.3 points higher to 96.2, supported by gains for rye, potatoes and onions which overbalanced lower hay quotations.

Labour and Industry in Nova Scotia, Ontario and Saskatchewan

THE Annual Reports of the Departments of Labour of the provinces of Nova Scotia, Ontario and Saskatchewan for 1945

were issued recently. A brief summary of each of these reports appears below.

Nova Scotia

The annual report of the Nova Scotia Department of Labour for the fiscal year ending November 30, 1945 states that the index number of reported employment as at November 1, 1945 was 193.6 as compared with 204.5 at the same date the preceding year. These figures are derived from reports of the Dominion Bureau of Statistics and are based on the 1926 average as 100.

The number of persons employed in the province at November 1, 1945, as reported by co-operating establishments, totalled 81,319 with per capita weekly earnings of \$30.15. Construction contracts awarded in Nova Scotia for eleven months in 1945 amounted to \$14,309,200, as compared with \$8,789,600 for the same period in 1944.

In the colliery districts the total shifts worked during the year amounted to 3,283,392 as compared with 3,501,869 the preceding year, a decrease of 218,477 shifts.

Strikes and Lockouts.—During the fiscal year 1944-1945 the stoppages of work numbered 32 with a time loss of 34,913 man working days, as compared with 46 stoppages with a time loss of 108,728 man working days during the preceding year. Of the stoppages in 1945, 11 were for one day or less, 16 did not exceed five days and five lasted for five days or more. The total number of workmen involved in all stoppages was 17,397. The Provincial Department of Labour was called upon to mediate in a number of disputes and grievances during the year. Several alleged infringements of the Industrial Standards Act and the Nova Scotia Labour Act were investigated promptly, and satisfactory adjustments were made in every case. Close co-operation with the Federal Industrial Relations officers was maintained.

New Legislation.—By the "Tradesmen's Qualification Act, 1945" (to come into force by Proclamation), the Governor in Council may prohibit from engaging in any trade to which the Act is declared to apply any person who has not a valid certificate of proficiency. These trades may be in the construction industry, building and repair of automobile

engines, radios, refrigerating machines; plumber, steam-fitter, gas-fitter, electrician, or any other trade which the Governor in Council may designate, other than certificated miners, certain railway employees and engine operators. The exceptions are provided for under the "Mines Act", the "Coal Mines Regulation Act", the "Board of Transport Commissioners", and the "Engine Operators Act", respectively.

The "Male Minimum Wage Act, 1945", which also comes into force by Proclamation, applies to all male employees in Nova Scotia, except farm labourers and domestic servants. It will be administered by a Board of Industrial Relations of five members, of which an official of the Provincial Department of Labour shall be chairman. The Board was given power to make an order fixing minimum wages after any necessary inquiry. It may apply the minimum wage so fixed "to all employees or to a group or class of employees in any industry, business, trade or occupation, or to any group or class of employees in all or in any two or more industries, businesses, trades or occupations"; fix a minimum wage applicable only in certain parts of the province; fix the minimum wage upon an hourly, weekly or monthly basis; establish a minimum rate for overtime; classify employees and several other details relating to the classification of workers and the payment of wages.

The "Engine Operators' Act, 1945", replaces the Act passed in 1944 and applies to compressor plants, including machinery and equipment used for compressing or storing air or other gas under pressure when the motive power driving such machinery and equipment exceeds 25 horse-power; steam boilers in excess of two horse-power; internal combustion engine plants and traction plants.

The "Nova Scotia Labour Act, 1945", is virtually a renewal of the Act passed in 1933 and which expired on May 1, 1945. It was designed to insure that Nova Scotians get first chance for jobs in the province.

The "Apprenticeship Amendment Act, 1945", amended the "Apprentice Act, 1937", so as to broaden the definition of "Inspector", and

also to shorten periods of apprenticeship and modify contracts of apprenticeship.

The "Workmen's Compensation Amendment Act, 1945" provides for increases in compensation to injured workmen and re-defines "service in employment of the Workmen's Compensation Board."

Following meetings between the Department's Secretary of the Buildings Trades Council and representatives of the building trades, new wage schedules for a number of the building trades were set up. These were approved by the Regional War Labour Board.

Wartime Labour Relations Board.—During the year this Board dealt with 89 applications under the Wartime Labour Relations Regulations, P. C. 1003. Certification of bargaining representatives was granted in 42 cases, while 17 applications were rejected. Of the remainder, ten applications were withdrawn by the applicants, and five asking leave to appeal were disposed of by the Board. There were six applications pending at the end of the fiscal year.

Ontario

In the twenty-sixth annual report of the Ontario Department of Labour for the fiscal year ending March 31, 1945, it is stated that a slight decline was indicated during that year, in wartime industrial activity in Ontario. The annual index number of employment as recorded by the Dominion Bureau of Statistics, based on the 1926 average as 100, stood at 184.6, as compared with 185.3 for 1944, the highest point recorded for any year in the province. At the close of the year under review the index number stood 1.3 points higher than at the beginning.

Manufacturing, over the whole group, showed considerable curtailment. The largest proportion of the loss was in the iron and steel industry, which however, was at a high level with an index number of 302.4, as compared with 112.5 for the fiscal year 1940.

In the non-manufacturing group the greatest expansion was recorded in the logging industry, with more moderate gains in trade, communications, services and transportation. Contractions in the volume of employment were reported in the construction and mining industries.

Industrial Disputes.—During the fiscal year, 1945, there were 67 strikes reported in Ontario in which 32,999 workers were involved in a time loss of 263,621 man-working days, as compared with 90 strikes, involving 31,947

Vocational Training.—The report of the Regional Director of Vocational Education and Training described the development of vocational training in the province during wartime and the changes made necessary during the transition to peace-time conditions. These changes were prompted, in part at least, by the need of developing other industrial skills than those required by the Armed Forces.

In the matter of "youth training" the province has been working on three projects. These were started before the war and continued, with essential modifications, during the war. They are the apprenticeship training centres at North Sydney, Sydney and Glace Bay, and provide "opportunity schools" for youth desiring vocational counselling, employment, or instruction that will help in getting a job, or promotion on the job. Classes and tutorial instruction are carried out in both daytime and evening.

Apprenticeship training is provided for potential workers, particularly in the construction industry, and is actively supported by the Canadian Construction Association, labour organizations and by financial assistance from the Federal Government.

workers in a loss of 134,840 man-working days in 1944.

Of these 67 strikes, 29 were settled within the first day, 59 lasted less than five days and 65 less than ten days. One strike which involved 13,346 workers lasted 18 days and one involving 15 workers lasted for 24 days. In 23 of the 67 strikes fewer than 50 workers were involved, in 29 fewer than 100 workers and in 53, fewer than 500 workers were involved.

Conciliation and Arbitration.—During the fiscal year conciliation officers of the Department of Labour were successful in bringing about satisfactory agreements in 21 disputes and also acted as arbitrators in 49 cases involving 200 grievances, which had passed through the various stages without agreement. Officers of the Department acted as returning officers in 64 plant elections for the Ontario Labour Relations Board; eight for the National Labour Relations Board; six for the Labour Court; and conducted 25 consent votes at the request of the parties concerned.

The conciliation officers investigated 36 cases of application for certification for the Ontario Labour Relations Board and two for the National Labour Relations Board. They also undertook 412 investigations into wage schedules in plants in all parts of the

Province for the Regional War Labour Board and five for the Industry and Labour Board.

Factory Inspection Branch.—A total of 735 plans for factory, shop, and office buildings having a total value of \$17,607,685 were approved by the Factory Inspection Branch during the year, as compared with 714 plans having a value of \$20,394,800 in 1944.

The Examiner of Reports and Designs made 126 field inspections to investigate special hazards reported by the factory inspectors and to facilitate the approval of building plans.

For the first time since the beginning of the war the number of industrial accidents reported to the Factory Inspection Branch showed a decrease as compared with the preceding year. There were 16,344 industrial accidents reported in 1945, of which 62 were fatal, as compared with 16,610 accidents including 68 fatalities, in 1944.

Examination of Operating Engineers.—The Board of Examiners of Operating Engineers issued 17,498 certificates of all grades during the year. Of these, 16,151 were renewal certificates, 1,037 were issued on examination, 20 were provisional, 25 duplicate and 265 were plant registration certificates. There were 2,093 candidates examined by the Board at 53 sessions at centres throughout the province during the year.

Boiler Inspection.—During the fiscal year, 1945, 459 designs were surveyed, registered and re-registered; 1935 new boilers and pressure vessels were inspected and a total of 3,217 second and final inspections were given 883 used boilers and pressure vessels following their complete overhaul. As required by the Factory, Shop and Office Building Act, 6,319 annual inspections were made of uninsured boilers and pressure vessels, as compared with 6,209 in 1944. The number of certificates issued by the Branch totalled 6,066.

Apprenticeship Branch.—Greater interest in apprenticeship was evidenced during the year, resulting in an increase in both the number of registrations and the number of

apprentices attending trade training classes. A total of 516 apprentices registered, as compared with 328 the previous year and 815 apprentices were receiving training at the end of the year, as compared with 601 the previous year. The increase in the number registered was divided as follows: 87 in the building industry, 79 in the motor vehicles repair trade and 22 in hair dressing.

Under an amendment of 1944, to the Apprenticeship Act, the regulations for the motor vehicle repair trade were modified so that only apprentices and certificated mechanics may now be employed in the repair of motor vehicles, with certain exceptions for minor repairs, adjustments and services.

The Apprenticeship Branch undertook the responsibility of rating, placing and supervising discharged members of the Armed Forces entering trades designated under the Apprenticeship Act.

Minimum Wage Act.—The number of employers who reported to the Minimum Wage Branch in 1945 was 21,404, covering 682,836 employees, of whom 243,234 were female workers, the largest number ever reported by the Branch and almost double the number reported in 1940.

Improved conditions in the matter of wages resulted in fewer complaints and fewer wage adjustments. Increase in wage rates were ordered for 36 employees in 24 establishments, as compared with 74 employees in 58 establishments in 1944. Arrears of wages amounting to \$123.13 were collected from three employers on behalf of three employees.

Regional War Labour Board.—The volume of work of the Regional War Labour Board continued unabated. In all, 8,846 cases were considered during the year, making a total of 24,729 since the inception of the Board. The Board paid tribute to the assistance and co-operation given it by both industry and labour in achieving its chief purpose, namely, the checking of inflation and guarding against any undue rise in the cost of living.

Saskatchewan

The Second Annual Report of the Department of Labour for the province of Saskatchewan covers the year ending December 31, 1945, for the first full calendar year since the Department was established in 1944. The report sets forth the activities of the several branches of the Department and outlines certain legislative changes designed to facilitate future administration.

Minimum Wage Act.—The Minimum Wage Act was amended to provide a penalty for an employer who accepts from an employee any

part of the minimum wage provided for under the Act. Another amendment to the Act is designed to increase the penalty for false or misleading statements in communications by an employer to the Department, or for interfering with, or obstructing an authorized representative of the minister in his duties. Still another amendment requires the payment to the Deputy Minister of back wages due an employee, who will in turn transmit the amount to the employee.

Administration of Minimum Wage Act.—During 1944, the Minimum Wage Act applied to eight cities and eight towns. In December of that year the Minimum Wage Board extended the Act to 13 additional towns. In 1945, wage sheet returns were completed by 4,835 firms having 31,325 employees (17,225 males and 14,100 females). Of the total number of employees 28,017 were employed full time, and 3,308 were employed on a part-time basis. There were 29,769 employees paid at the rate of wages for experienced employees and 1,556 received the wages of inexperienced employees. The report shows that in the cities 82.74 per cent of the employees received more than \$16.80 per week of 48 hours, the highest minimum wage in any Board Order governing cities. In the towns, 82.69 per cent received more than \$14 per week of 48 hours, the highest minimum rate in any Board Order for towns.

It is pointed out that owing to war conditions in 1945, the prevailing rate of wages in lumber mills was much higher than that set in the Minimum Wage Board Order.

During 1945, a total of \$8,634.60 arrears of wages were collected in the cities, compared with \$1,969.18 during 1944. A further amount of \$3,876 was collected in the towns in 1945.

The inspectors of the Board made 242 special investigations and 3,520 regular inspections.

Apprenticeship Act.—The provincial Apprenticeship Board, consisting of five members, was set up in April, 1945. Regulations governing apprenticeship were recommended by the Board and approved by representatives of the employers and employees in the motor vehicle repair trade, the building trades, the printing trades (weekly newspapers) and the electrical trade. During the year there were 52 apprentices indentured to 25 firms in the cities and three indentured to three firms in the towns. The numbers of apprentices by trades were: motor vehicle repairs 5, carpentry 35, bricklaying and masonry 2, painting and decorating 1, plumbing 3, sheet metal work 4, electrical 3, printing 2.

Conciliation Service.—There were three strikes in the province in 1945 which resulted in a time loss of slightly less than 1,700 man-working days. One of the strikes was in an industry not under provincial jurisdiction; a second was a one-day sympathy strike in meat-packing plants; and the third lasting two days, resulted in a time loss of about 120 man-working days. Two Boards of Conciliation were set up by the Minister during the year to "investigate, conciliate and report

upon" labour disputes. In one of these cases a settlement was effected by the Board and in the other case the Board was unable to achieve a settlement. This dispute remained unsettled at the end of the year, but up to that time no work stoppage had occurred.

In addition, the Department assisted informally in 27 disputes, 16 of which were settled, wholly or in part through the efforts of the Department. Some of the others were referred to the Labour Relations Board, at least one other was found to be under federal jurisdiction and in four cases, conciliation negotiations were proceeding at the end of the year.

Labour Relations Board.—A complete summary of the Saskatchewan Trade Union Act is included in the report, showing the powers held by the Labour Relations Board in connection with employer-union labour agreements. The Board was appointed in January, 1945, and is made up of representatives of the general public, two of organized labour, and two of employers, with an official of the Department, W. K. Bryden, as chairman.

During 1945, the Board held 29 meetings. In all, 213 applications and two references under section 18 of the Act were considered (disputes referred to the Board by agreement of both parties for final and binding decisions). In addition, 69 hearings were held in 1945. Of the 213 applications made to the Board during the year, 163 were disposed of, 42 were withdrawn and eight were pending at the end of the year.

A total of 174 applications, affecting 10,728 employees were for Orders to determine that a specified unit of employees was appropriate as a collective bargaining agency. Votes were conducted in 28 cases under the provisions of the Act, to determine the bargaining agency.

There were 18 applications for orders requiring employers to refrain from unfair labour practices, or other violations of the Act. Seven of these were granted, two were dismissed and nine were withdrawn. Seven of the withdrawals were due to satisfactory settlements arranged while the cases were under review.

Thirteen applications were made for the reinstatement of employees allegedly discharged contrary to the provisions of the Act and for reimbursement of these employees for the monetary loss suffered by reason of their discharge. Of these, six were granted, two were dismissed and five were withdrawn.

Four of the latter were satisfactorily settled while they were pending before the Board.

Steam Boilers Inspection Branch.—A total of 3,830 inspections were made under the provisions of the Steam Boilers Act; 2,479 under the Factories Act; and 1,472 under the Elevator and Hoists Act. Owing to the shortage of steel during the war, much equipment throughout the province was in poor condition. Numerous repairs were ordered during the year.

Engineers' examinations were conducted in three of the leading cities three times during the year and candidates were able to take examinations at any time at the Steam Boilers Branch in Regina. A total of 507 certificates was issued for all classes of engineers as a result of these examinations.

Accidents reported by industrial firms in 1945 numbered 367. Of these, one was fatal. There were 119 permits issued for the overtime employment of females.

Building Permits Issued and Residential Construction in Canada, 1945

THE Dominion Bureau of Statistics recently published a report of building permits issued in Canada during 1945. The value of the permits issued by 204 municipalities which make monthly returns to the Bureau totalled \$197,173,870 as compared with \$128,728,465 for 1944, a gain of 53.2 per cent.

The greatest percentage increase was reported by Saskatchewan and Prince Edward Island as shown by the comparison of the building permits issued by provinces for the years 1944 and 1945 in the table below.

commercial \$23,092,999; industrial \$31,891,709; institutional \$21,542,456; and other construction work \$2,769,765. Of this amount \$156,734,902 was for new construction and \$40,438,968 for additions.

The report stated that municipalities in Ontario showed the highest value of building permits, amounting to \$80,053,564. Quebec was second with \$50,250,668 and British Columbia third with \$24,671,705. The Prairie Provinces and the Maritime Provinces reported values of issued permits of \$35,821,779 and \$6,376,154 respectively. A percentage

Province	1945	1944	Percentage Variation + Increase - Decrease
Prince Edward Island.....	600,705	283,670	+111.8
Nova Scotia.....	4,101,950	3,971,420	+ 3.3
New Brunswick.....	1,673,499	1,227,879	+ 36.3
Quebec.....	50,250,668	38,993,871	+ 29.1
Ontario.....	80,053,564	46,793,136	+ 71.1
Manitoba.....	11,025,760	6,680,229	+ 65.1
Saskatchewan.....	7,457,215	2,715,680	+174.6
Alberta.....	17,338,804	10,584,572	+ 63.8

Canada.....	197,173,870	128,728,465	+ 53.2

The value of the various classes of construction permits comprising the aggregate for 1945 was as follows: residential \$117,876;

distribution of building permits by type of construction and provinces for the year is shown in the table below.

Province	Permits	Residen- tial	Institu- tional	Com- mercial	Industrial	Other Building
Prince Edward Island.....	100.0	13.9	46.6	34.1	5.4
Nova Scotia.....	100.0	61.6	13.1	21.4	3.5	0.4
New Brunswick.....	100.0	43.5	28.2	19.4	8.5	0.4
Quebec.....	100.0	54.5	11.0	13.3	19.2	2.0

Canada.....	100.0	59.8	10.9	11.7	16.2	1.4

The residential construction permits issued in Canada during the year resulted in the creation of 41,032 new dwelling units throughout the country and the conversion or reconstruction of 5,928 existing structures. The greatest number of new units was for the construction of single dwellings which num-

bered 31,970. Semi-detached or doubles numbered 1,784, duplexes 1,890, triplexes 1,044, apartments 2,965, buildings containing business premises and apartments or flats 966, rows or terraces 235 and 178 unclassified.

The great bulk of this construction took place in the 12 principal cities although few cities in Canada were entirely excluded.

Australian Labour Statistics

The quarterly summary of Australian statistics published by the Australian Bureau of Census and Statistics reported that union membership in that country totalled 1,218,778 at the end of 1944. This membership was contained in 370 separate unions with 2,144 branches. The population of Australia, excluding full-blood Australian aboriginals, was estimated, subject to revision, at 7,341,715 as of December 31, 1944.

Industrial disputes during 1944 numbered 941, and involved 276,358 work-people employed in 1,192 establishments. A total of 912,752 lost work days was incurred which represented an estimated loss in wages of £1,111,729.

The weighted average for adult males and females in respect to average nominal weekly and hourly rates and weekly hours of labour in industrial occupations as of June 30, 1945 was as follows:

For Males

Weekly wage	119s.2d.
Hourly wage	2s.8½d.
Working hours	43.61

For Females

Weekly wage	71s.10d.
Hourly wage	1s.7½d.
Working hours	44.03

WAGES AND HOURS IN THE PRIMARY TEXTILES INDUSTRY IN CANADA, 1944

The statistics of wages and hours printed in this supplement to the *LABOUR GAZETTE* have been collected and compiled by the Department of Labour on substantially the same basis as the data in the supplement published one year ago applying to the year 1943. The period covered was the complete pay period nearest to November 30, 1944.

The method of presenting the statistics in this and the last preceding report differ materially from the method employed in earlier years.

Previously, statistics of wage rates in this industry were published in a series of annual supplements which contained statistics of wages and hours for the principal industries in Canada. Sample wage rates were shown for the main occupations as reported to the Department by each of a representative number of employers. Averages of the rates for each occupation were not calculated for Canada as a whole or by regions as has been done for 1943 and 1944.

The coverage of the industry represented in this, as well as in the preceding report, is also much more complete than was the case in any other survey for which statistics have been published.

The total number of employees in the industry as shown by the annual census of manufacturing of the Dominion Bureau of Statistics was about 69,000 in 1943. Of the 346 establishments on the mailing list of the Department of Labour used in this survey of the industry, reports were obtained from 325 in 1944 having a total of approximately 60,000 employees. Workers covered in the selected occupations comprised 8,753 males and 18,245 females.

The tables which follow are arranged in this order: the first four apply to Canada as a whole and give wage data for the four main divisions of the Industry, namely:—Cotton Yarn and Cloth Industry, Woollen Yarn and Cloth Industry, Knitting Industry, and Rayon Industry.

The tables for Canada are followed by thirteen additional tables showing certain data for each of the four divisions of the Industry by province or region.

Most of the wage earners in the textile industry are paid on a piece rate basis. However, information on both time and piece workers is included.

The average straight time wages or earnings per hour are shown for all qualified employees eighteen years of age and over in each of the selected occupations on day and rotating shifts only. The figures are arithmetic averages and do not include any overtime premium earnings.

Data for male and female workers are shown separately for the same occupation. Information is not included for foremen and supervisors, learners and beginners, aged and handicapped workers, or for part-time workers.

Workers in the same occupation do not necessarily have the same work load. For example, one weaver might be operating two looms, another four and another six but all three are included as weavers. The work load tends to be heavier for males than for females.

Any of the selected occupations which did not have 30 or more male employees or 30 or more female employees was not included in the tables for Canada as a whole.

In the regional tables the minimum number was 10 employees, male or female. The figures for Canada, however, include all workers in the occupation regardless of the regional minimum.

The occupations for which data are shown in this report differ somewhat from those published in the previous report. Occupations were omitted from the Canada tables this year when there were less than 30 males or less than 30 females employed throughout Canada; similarly occupations were omitted from the regional tables when less than 10 males or females were employed. Also, a number of occupations were combined in a revision of the occupational code.

In the columns headed "Range of Wages Per Hour—Middle 80 Per Cent" are shown the ranges of hourly rates which include the middle 80 per cent of the workers in any of the occupations covered. Ten per cent of the workers were actually receiving hourly wages greater than the highest figure shown in the range and 10 per cent were receiving less than the lower figure. The purpose of this was to eliminate extremely high and extremely low wages but at the same time to show the ranges between which the great majority of the workers in each occupation fall. As stated above the wages for all workers, however, were included in the average wages shown.

¹Middle 80 per cent of the workers covered by each occupation listed where there are 10 or more workers. In each case 10 per cent received more, 10 per cent received less than the range of wages shown.

²The figures are the arithmetic mean of the wages of all of the workers in the occupation on day and rotating shifts only, and do not include any overtime premium earnings.

³The figures are the arithmetic mean of the hours actually worked per week by all the workers in the occupation, during the pay period covered.

OTTAWA, CANADA

CANADIAN VOCATIONAL TRAINING

ANNUAL REPORT FOR 1945-46

Issued as a supplement to LABOUR GAZETTE

June, 1946

Minister — Hon. Humphrey Mitchell
Deputy Minister — Arthur MacNamara, C.M.G.

OTTAWA
EDMOND CLOUTIER
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1946

OTTAWA, May 11, 1946.

HONOURABLE HUMPHREY MITCHELL, P.C. M.P.,
Minister of Labour,
Ottawa

SIR,—Clause 11 of the Vocational Training Co-ordination Act, 1942, provides that an annual report shall be prepared on the administration of the Act, and that such report shall be placed before Parliament within sixty days after the termination of each fiscal year, if Parliament is then sitting.

I have the honour to transmit herewith the report of the Director of Training for the fiscal year ended March 31, 1946.

Respectfully submitted,

A. MACNAMARA,
Deputy Minister of Labour.

CANADIAN VOCATIONAL TRAINING

Introduction

A. MACNAMARA, ESQ., LL.D.,
Deputy Minister of Labour.

SIR,—The undersigned begs to report as follows for the fiscal year ended March 31, 1946, on the activities of the Training Branch which has been responsible for administering vocational training as authorized by the Vocational Training Co-ordination Act of 1942. This included the following main divisions, all carried on by means of Dominion-Provincial Agreements.

(1) Youth Training, for the training of young people, including assistance to students;

(2) War Emergency Training, for workers for industry, tradesmen for the Armed Forces and rehabilitation training for persons discharged from the Armed Forces;

(3) Apprentice Training, for the training of indentured apprentices under the jurisdiction of Provincial Apprenticeship Acts;

(4) The training for peacetime occupations of workers released from gainful employment;

(5) Dominion assistance to the provinces for the carrying on and development of vocational training on the secondary school level.

From the inception of Dominion-Provincial Training in 1937 up to March 31, 1946, the gross enrolment under Youth Training has been 283,300 and under War Emergency Training 477,963.

GROSS ENROLMENT DURING THE YEAR

Youth Training.....	5,062
Student Aid.....	2,471
Tradesmen for the Armed Forces	
R.C.A.F.	11
Army	2,760
Navy	383

Full-Time Classes.....	625
Part-Time Classes.....	709
Plant Schools.....	1,093
Supervisors and Foremen.....	36,417
	<u>102,203</u>

The appropriations administered by the Training Branch during the year 1945-46 were as follows:

Youth Training.....	\$ 500,000
Apprentice Training.....	250,000
R.C.A.F. Tradesmen.....	15,000
Army, Navy and Industrial War Workers.....	800,000
Special Grants to Universities and Students.....	75,000
Supervisory Training.....	10,000
Retraining of Civilian Workers.....	1,500,000
Training for Discharged Members of the Forces.....	4,950,000
Assistance to Vocational Schools.....	2,000,000
Advisory Council.....	5,000
Administration	55,000
Assistance to Vocational Schools Capital Expenditures....	3,000,000
Total	<u>\$13,160,000</u>

The termination of hostilities brought about still another adaptation of the Dominion-Provincial Training Program. Started originally in the spring of 1937 as a depression measure to assist unemployed young people, it provided a skeleton establishment, which was rapidly expanded and the content of training given, modified to meet the demands made by the war in the training of workers for war industries and tradesmen for the Armed Forces. This phase was known as War Emergency Training. The termination of hostilities witnessed the end of War Emergency Training, and the organization, now under the name of Canadian Vocational Training, initiated training plans to meet the anticipated needs of the immediate post-war period.

During the past year War Emergency Training Agreements, Youth Training Agreements and Assistance to Vocational Schools Agreements were in effect in all provinces. Apprenticeship Agreements were in effect with all provinces, except Prince Edward Island and Quebec, and Agreements for the retraining of workers released from industry were completed with the Province of British Columbia, Alberta, Saskatchewan, and Nova Scotia. The decentralized method of administration, that had been in effect in past years, was continued and the necessary expansion of instructional and administrative and field staff was made, commensurate with the new and changed training demands.

The Vocational Training Advisory Council appointed under the authority of the Vocational Training Co-ordination Act, continued to advise the Minister on the general aspects of training plans. Only one full meeting of the Council was held during the year, but contact was maintained by correspondence and by local meetings of the members of Councils. The names of the Council members are listed in an appendix to this report.

Separate sections of the report deal with the details of training activities under the different headings:

- I Youth Training
- II Assistance to Students and Universities
- III Training of Industrial Workers and Service Tradesmen
- IV Training of Discharged Members of the Forces
- V Apprenticeship Training
- VI The retraining of Civilian Workers
- VII Dominion Assistance to Vocational Schools

I—Youth Training

The appropriation for the fiscal year 1945-46 was \$500,000 which was allotted among the provinces as shown in Table 1. Each province submitted to the Department of Labour a list of the various types of training which it proposed to carry on, and, on approval by the Minister of Labour, these were

incorporated into appropriate schedules, which set forth the regulations governing the operation of the different plans. As in previous years, those eligible for training were men and women between the ages of 16 and 30 (in some classes the maximum age could be increased to 35) and the approved costs were shared equally between the province and the Dominion.

The various classes carried on in the different provinces during the year were as follows, apart from assistance to students, which was in effect in all provinces:

Prince Edward Island.—Homemaking and handicrafts (women)—2; farm mechanics—2; carpentry—2; blacksmithing; egg and poultry grading (men and women).

Nova Scotia.—Industrial and Commercial training (men and women)—3; egg grading (men and women).

New Brunswick.—Rural homecraft and handicraft (women)—2; general agriculture (5 months' course)—5.

Quebec.—Homemaking and home service (women)—2; dairying—2; farm apprentices, poultry—3; egg grading—2; rug making (women); fisheries; potato culture; wood carving; weaving (for blind men and women); beekeeping—8; rural co-operatives and credit unions—9.

Manitoba.—Rural homecrafts and handicrafts (women)—5.

Saskatchewan.—Rural homecrafts and handicrafts (women)—10; farm mechanics (4 weeks' course)—2; farm implement repairs (3-day course)—12; general agriculture (2 weeks' course)—33; agriculture (5 months at University of Saskatchewan); farm mechanics (6 weeks' course at University of Saskatchewan).

Alberta.—Rural homecraft (women)—3; farm mechanics—8; general agriculture (Olds School—5 months).

British Columbia.—Power sewing (women); clothing remake (women)—10.

Total Classes—138.

II—Assistance to Students and Universities

One schedule of the Youth Training Agreement in each province was devoted to assistance to students and included not only university students, but, in many provinces, prospective teachers and nurses in training. Those eligible for assistance were students of good academic standing, who without financial assistance could not enter on or continue their course. The restrictions in effect in the past few years, giving special emphasis to assistance to those whose services would be needed in connection with the war effort, were lifted, and deserving students in any year of any faculty of a university, who were registered in a course leading to a degree, were eligible. At the discretion of the province, assistance could be given either as an outright grant or as a loan or as a combination of both. In most cases the assistance was given as a grant as is indicated in Table 3.

SPECIAL DOMINION STUDENT AID FUND

To supplement the Dominion-Provincial Student Aid Schedule, the Special Dominion Student Aid Fund commenced in previous years, was continued in some provinces, but with participation restricted to those students who had received assistance from the fund in a previous year. This special fund was utilized mainly for students who were non-residents in the province in which they were attending a university, and all payments were made solely by the Dominion, 50 per cent being given as a grant and 50 per cent as a loan.

SPECIAL DOMINION GRANTS TO UNIVERSITIES

Defence, was still operating in some universities, the Training Branch of the Department of Labour continued its grants to such universities to assist them in meeting the additional costs incurred. During the year these grants amounted to approximately \$48,900 and were made to the following universities: Dalhousie, Laval, McGill, Queen's, Toronto, Western Ontario and Alberta.

III—War Emergency Training, Training of Industrial Workers and Service Tradesmen (Schedule "K")

As hostilities drew to a close there was a very marked contraction in this type of training, and during the year it was entirely discontinued, except for the streamlined courses for training foremen and supervisors.

There were no new enrolments in the R.C.A.F. classes and very few new enrolments in the Navy and Army tradesmen's classes. As each group of industrial trainees finished, the industrial classes and the plant schools were also closed. The expenditures and enrolments under this schedule are shown in Tables 4, 5, and 6.

SUPERVISORY TRAINING

The interest and support of industry for the short intensive classes for training foremen and supervisors continued with a gross enrolment during the year of 36,417. There was a considerable expansion of this type of activity in many of the Civil Service Departments of the Dominion Government. Prior to the end of the fiscal year the Provincial Governments were all notified that after March 31 this type of training would be carried on, only in those provinces which indicated their willingness to co-operate with the Department of Labour by sharing the approved costs on a 50-50 basis. During the fiscal year just concluded, all costs were borne solely by the Dominion Department of Labour. The enrolment statistics are shown in Table 7.

IV—Training of Discharged Members of the Forces (Schedule "L")

The training of discharged members of the Forces was carried on under one of the schedules (Schedule "L") of the War Emergency Training Agreement, which expired on March 31, 1946. For the ensuing year this training will be transferred to the Re-Establishment Training Agreement and carried on as one of its schedules.

Rehabilitation training of veterans developed into the major responsibility of the Training Branch and the one which has given most serious concern to all connected with the administration of Canadian Vocational Training. Innumerable problems and difficulties, both of a minor and major nature, have been

encountered owing to the very rapid increase in the number of applicants in the last six months of the fiscal year, and to circumstances which were unforeseen twelve months ago.

The sudden ending of the war with Japan, the rapid acceleration in demobilization, the temporary dislocation of industry during the conversion period from war to peacetime production, coupled with the seasonal difficulties owing to the approach of winter, threw an unexpected and severe strain on this part of the joint Dominion-Provincial Training Programme. At the same time, serious difficulties and delays were experienced in obtaining the buildings, equipment, hand tools and supplies absolutely essential to carrying on efficient pre-employment training in many occupations desired by veterans. The end of the year, however, saw most of these difficulties overcome, and, generally speaking, training accommodation has been available for veterans as and when required in the great majority of occupations.

GENERAL ADMINISTRATION

The same method of administration was followed as in the previous year with all Provincial Governments co-operating with the Department of Labour in a field of education which, under the Constitution, is under the jurisdiction of the Provincial Governments. The programme in each province was administered by a Regional Director, who, within the broad terms of the policy laid down by the Dominion Government, had authority, at the discretion of himself and his advisory groups, to make whatever adaptations were necessary to meet the situation in each province, and to provide the types of training required, with facilities established, so far as possible, in accordance with the two following factors:

(a) the number of veterans desiring training and approved for such training in different occupations by the Department of Veterans Affairs;

(b) the anticipated field of employment in each occupation. It has been found almost impossible to estimate the latter factor with any degree of precision.

The staff of Canadian Vocational Training, administrative, field, supervisory and instructional personnel, has been greatly augmented as training developed. A summary of the staff employed on March 31, 1946, is given in Table 11. During the year Superintendents of Rehabilitation Training were appointed in all provinces, also Supervisors of Women's Training. In all appointments preference has been given to veterans with overseas service. The temporary nature of the work has made it difficult in many cases to obtain the highly qualified school directors and instructors required to give the discharged members of the forces adequate and efficient training.

The closest liaison was maintained with the Department of Veterans Affairs, through the central administration and through different district offices, which both D.V.A. and C.V.T. have established throughout the country. Equally close contact has been maintained with the offices of the National Employment Service at the local regional and national levels, in order to expedite placement in employment of men and women who completed their training, either in private schools or in C.V.T. training centres. The Bovey Commission on veterans' credits travelled across the country throughout the year, hearing representations from various groups representing veterans, Provincial Governments, employers, trade unions, educationalists, etc. The Commission has made many recommendations covering a broad field. Where the subject matter of the recommendations came under the jurisdiction of the Provincial Governments or of another department of the Federal Government, these recommendations were referred to the proper authorities for their consideration.

ENROLMENT

On March 31, 1945 there was a total enrolment in all types of training of 3,607. This increased as follows:

September 30—7,490; December 31—20,166; March 31, 1946—36,341.

During the month of January alone 10,750 new trainees were absorbed. At the end of the fiscal year the distribution of the enrolment in different types of training was as follows:

Correspondence courses—1.8 per cent; private trade schools and business colleges—12.8 per cent; Special C.V.T. vocational schools—38.1 per cent; Special C.V.T. pre-matriculation schools—27.1 per cent; training on the job in industry—20.2 per cent. The total number of man days training in the special C.V.T. training centres during the year was 1,917,786.

There has been a certain lack of balance in the numbers applying for training in the different occupations in spite of efforts of D.V.A. counsellors and C.V.T. Officials to divert applicants from occupations in which there appears to be danger of overcrowding. These occupations were: electricians, plumbers, radio technicians, watch repair, and, to a certain extent, motor mechanics and machinists. In other occupations, such as painting and decorating and plastering, the number of veterans enrolling appeared to be far below the anticipated demands of industry. It must be pointed out that Canadian Vocational Training was responsible for providing training in whatever occupation the individual veteran desired such training, and for which he had been approved by the Department of Veterans Affairs. If C.V.T. representatives were convinced that the veteran's choice of occupation was unwise for any reason or other, they called such matters to his or her attention, but if the applicant still persisted in his choice, he was not denied the opportunity to be trained. If the trainee failed to show the desirable aptitude and to make satisfactory progress, those facts were reported immediately to the Department of Veterans Affairs whose responsibility it then was to take appropriate action.

TRAINING FACILITIES

The training facilities were divided into the following main categories:

- (1) Correspondence Courses
- (2) Private trade schools and business colleges
- (3) Provincial or municipal vocational schools
- (4) Special C.V.T. schools, either vocational or pre-matriculation
- (5) Apprenticeship training in trades designated under the Provincial Apprenticeship Acts
- (6) Training on the job in industry

Use has been made during the year of approximately 106 private trade schools, 200 business colleges, 48 provincial or municipal schools, and 68 special C.V.T. training centres. C.V.T. training centres alone on March 31, 1946, had a capacity conservatively estimated in excess of 35,000 which is being increased by approximately 30 per cent in order to meet any possible demand that may arise in the fall of 1946.

Special C.V.T. training centres have been established in the following 38 cities, with more than one centre operating in many of the cities: Charlottetown, Halifax, North Sydney, Pictou, Windsor (N.S.), Saint John, Moncton, Edmundston, Three Rivers, Chicoutimi, Quebec, Montreal, Sherbrooke, Brockville, Prescott, Kingston, Toronto, Hamilton, Kitchener, London, Windsor, North Bay, Fort William, Winnipeg, St. Boniface, Brandon, Saskatoon, Prince Albert, Regina, Moose Jaw, Grande Prairie, Edmonton, Red Deer, Calgary, Medicine Hat, Nanaimo, Victoria, and Vancouver.

In these special centres pre-employment classes have been established for the following occupations: Air conditioning and refrigeration, agriculture, barbers, bricklayers, blacksmiths, boilermakers, bookbinders, carpenters, cabinet makers, cooks, commercial art, diesels, dairying, dressmaking, drafting, electricians (construction and maintenance), farm mechanics, fishing, fine arts, forest rangers, handicrafts, homemaking, hotels and restaurants, hairdressing, jewelry repair, machinists and toolmakers, motor mechanics (including body and fender), mining, merchandising and salesmanship, marine engineering, moulders, navigation, power sewing, photography, piano tuning, pattern making, power chain saw, painters, plasterers, plumbers, practical nursing, printing, radio servicing, radio technicians, radio announcing, shoe repair, sign writing, steamfitters, steam engineers, stationary engineers, surveying, tailoring, telegraphy, tinsmiths (sheet metal), upholstery and furniture repair, wood-working machinists, welders, waitresses, watch repair, business administration, accounting and bookkeeping, stenography and pre-matriculation.

The length of the course of training depended on the following factors: (a) the previous experience of the individual; (b) his aptitude and ability to learn; (c) the degree of skill necessary for each occupation. The normal length of the course for certain occupations was twelve months, but the average period of training was in the neighbourhood of six months. So far as possible, it was the objective of C.V.T. to provide training on a sufficiently broad basis of skill to ensure future employment. It was not the policy to turn out what might be called machine operators or individuals narrowly specialized in a semi-skilled field.

One very serious difficulty encountered in many localities has been the acute shortage of housing accommodation. This made it necessary for C.V.T. to arrange to operate boarding and lodging facilities for those veterans who are enrolled for training. In some places it is being done by outside caterers, following the submission of tenders. In other places it is done by C.V.T. Such accommodation was provided in Pictou, Moncton, St. Paul L'Ermite, Prescott, Brockville, Kitchener, Red Deer, and, in many other centres, canteens or cafeterias to provide meals were operated for the convenience of the trainees in attendance. Delays and difficulties have been experienced in obtaining the necessary dormitory and messing equipment and supplies.

At the outset of the program, the policy was laid down that the training of veterans would be given on a day shift in daytime hours. Shortages of equipment precluded this policy being carried on in all places. It was also found that many veterans preferred to take training as near their home locality as possible on an evening shift, rather than leave their home district, while substantial numbers of other veterans expressed an outright preference for an evening shift. Therefore, the majority of the training centres are now operating on a two shift basis. This will probably continue until the peak of training is passed. To suit the wishes and the convenience of those under training, the majority of the training centres operated 5 days a week, thus allowing the trainees week-end leaves to visit their homes.

EQUIPMENT

Very substantial quantities, not only of machine tools, but other items of equipment, as well as hand tools, working materials and supplies, have been needed to open up the new training centres and to provide adequate training. Through the co-operation of the Army substantial quantities have been transferred direct from the Army to Canadian Vocational Training. The majority of the items, however, have had to be purchased from War Assets Corporation

from equipment and supplies declared surplus, either by the Armed Services, war industries, or Wartime Housing. It was only late in 1945 that more than a mere trickle of equipment was obtained from War Assets Corporation. Certain items of machine tools, such as, wood working machinery, milling machines, shapers, have not been forthcoming in sufficient quantity to meet the requirements of training centres. Wherever possible, deficiencies have been made up by purchase in the open market, but even at the end of the fiscal year some of the training centres were still inadequately equipped. Even certain types of hand tools and working materials were still in extremely short supply.

In addition to the funds allotted to the different provinces for the training of veterans, a special fund administered directly by the Department of Labour was authorized by P.C. 3211 of May 3, 1945, and amended by P.C. 4822 of July 10, 1945. This fund was used for the acquisition of buildings and property required for the training of veterans, either by way of purchase or rental from War Assets Corporation, any Department of the Dominion Government or any other body; for major alterations to premises acquired for training purposes; for the purchase of equipment, either from War Assets Corporation or any other party. The bulk of the payments for equipment under this fund have been made to War Assets Corporation for machine tools, other items of capital equipment and for expendable items, such as, hand tools, materials, supplies, etc. The expenditures under this fund for buildings or equipment are shown in Table 14, according to the provinces in which the buildings or equipment were used.

PRE-MATRICULATION SCHOOLS

There has been a rapid and unexpected increase in the numbers desiring to enter the pre-matriculation schools which were established in the latter part of the previous fiscal year. Twenty-eight of these schools were operating, designed to provide intensive and streamlined training for those who lack the academic requirements, either to enter the university or certain occupations. Some students required instruction in one subject only, while others lacked their entire junior matriculation or its equivalent. The educational background of the trainees varied from Grade 9 to those with partial honour matriculation. The wide range of the individuals' educational background, as well as the difference in the subjects required necessitated operating most of the schools on a tutorial basis and has required most competent secondary school teachers, particularly specialists in mathematics and science. Inability to obtain the necessary teaching staff has been a handicap in some of the schools.

TRAINING OF VETERANS AS APPRENTICES

C.V.T. and D.V.A. worked very closely with the provincial apprentice authorities in all matters pertaining to the training of veterans for trades designated under the Provincial Apprenticeship Acts. In all such trades there is a definite ratio of apprentices allowed to journeymen under the existing provincial regulations. Special consideration, however, has been given veterans in entering the designated trades, including some relaxation in the restrictions normally applicable to civilian-apprentices and full allowances to the veteran by way of trade credit for any experience he has had, either prior to enlistment or during his period of service with the Forces.

In order to expedite the entrance of veterans into apprentice trades, special field staff have been taken on by Canadian Vocational Training, and they worked closely with the provincial apprentice authorities. As veterans were recommended for training in a designated trade by D.V.A., they were referred to representatives of the appropriate trade committee, and were trade tested

in order to assess the period of time credit that should be given them in view of their existing skill. Where, after such trade tests, it was found the veteran had little or no previous skill, he was referred to a C.V.T. school for intensive training with the normal period lasting approximately six months. On the satisfactory completion of his course he was then referred through our special field staff to the provincial apprentice authorities and was indentured to an employer, usually with the rating of a third or fourth year apprentice. By this method, when a veteran enters the service of an employer, he has enough skill to warrant the payment of a wage sufficient to maintain himself without further subsidy from the Department of Veterans Affairs. Where the initial trade test

showed that the veteran had a fair degree of practical skill and technical knowledge, he was indentured at once to an employer as a senior apprentice. Sometimes he was even given employment as a qualified journeyman.

Special efforts have been made to publicize the employment opportunities in the building and construction industry. This has been done by distribution of pamphlets to service personnel, by publicity through the press and over the radio and by personnel counselling to members of the Forces, both prior to, and subsequent to their discharge. At the end of the fiscal year the number of veterans requesting training in painting and decorating or plastering was still far below the estimated requirements of the construction industry. On the

other hand, an undue proportion of veterans have sought training as electricians and plumbers.

TRAINING ON THE JOB

The number of industrial occupations for which adequate training can be given in a pre-employment class is limited to approximately 100 out of many thousands of industrial occupations of all kinds. The only method of obtaining skill in these latter occupations, which constitutes the bulk of the skilled or semi-skilled employed in industry, is by the method of training on the job in industry itself. Therefore, during the year training on the job attained increasing importance, not only with a view to extending the range of training for employment opportunities for veterans, but also to relieve the strain on many of the pre-employment schools.

Special publicity has been given to training on the job by means of letters and bulletins to employers as well as by newspaper articles and radio announcements. During the year arrangements were consummated by which the assistance of all the National Employment Service Offices was obtained not only in publicizing training on the job, but in locating suitable training opportunities. In this way the efforts of the field staff of C.V.T. who numbered over 200 at the end of the fiscal year, were very greatly supplemented. The drawing up of the individual training contracts and the subsequent supervision of the training has remained the responsibility of the C.V.T. field staff.

All training opportunities when located were made known to the District Supervisors of Counselling of the Department of Veterans Affairs, who through their individual counsellors were then able to refer suitable applicants to these openings. The length of the training depended on the trainee's prior experience and the degree of skill needed for the successful operation of each job and has varied from three months to several years. From the beginning the trainee has been recognized as a regular employee and a wage was agreed on between the representatives of C.V.T. and D.V.A. and the employer, which represented, on an average, approximately 80 per cent of the wage paid to a normal worker in the occupation concerned. As the majority of the trainees were inexperienced, the employer paid the individual trainee what his service were worth and the balance of the training wage was made up by the Department of Veterans Affairs from the training grant for which the individual trainees was eligible. As training progressed and the trainee's service became more valuable the proportion paid by the employer increased and the amount of refund by D.V.A. correspondingly decreased.

Employers throughout the country have been very interested in the plan and most co-operative. In numerous cases they have taken veterans in for training, and, from the outset, have paid the full wage without drawing on any training grant from the Department of Veterans Affairs, and in this way they have helped to conserve the Re-Establishment Credit of the veteran, because any direct payments by way of training allowance or tuition fee of the veteran must be deducted from the Re-Establishment Credit for which the individual is eligible.

This whole plan was dependent for success not only on the goodwill of the employer and the interest and application of the individual veteran, but also on fairly close supervision by C.V.T. field staff, particularly in the initial stages. Where the trainee was not giving satisfactory service or where the employer was not giving satisfactory training, or had shown any tendency to exploit the trainee, the contract has been cancelled and the trainee removed. There have been surprisingly few instances of this. In some cases contracts have been reviewed by the Head Office of D.V.A. and C.V.T., which did not seem to be in the best interests of the veteran, either because the training

period for the particular occupation was too long or because the employer was not paying a sufficiently high percentage of the wage. Such contracts have either been cancelled or modified.

CONCLUSION

It has been almost impossible to estimate with any accuracy the accommodation that should be provided across the country for training in the different occupational groups, owing to there being too many unknown factors involved, namely, the lack of knowledge as to how many veterans would be desiring training in any particular occupation, and, at the other end, how many employment opportunities would be forthcoming in six months or a year's time. This resulted in substantial waiting lists for some types of training, particularly those for which the procurement of equipment and machine tools has been extremely difficult. On the other hand, the enrolment in many other classes set up has represented only a fraction of the training capacity throughout the country. Constant revisions are being made in training capacities, and continuing efforts are being made to obtain more adequate data on which the capacity should be based. The policy has, however, been adopted that it is better to have a surplus of capacity than to have inadequate facilities. Therefore, steps have been taken to increase the overall capacity for vocational training by September, so that C.V.T. may be in a position to handle whatever demands may be made for training during the coming winter.

V—Apprentice Training

Apprenticeship Acts were in force in all provinces except Prince Edward Island and Apprenticeship Agreements have been completed between the Dominion Department of Labour and all provinces, except Prince Edward Island and Quebec. The list of trades designated under Provincial Acts has been constantly added to during the year and at the end of the year included all the building and construction trades, automobile repair mechanics, and, in some provinces, barbering, hairdressing and other highly skilled trades.

In the Provinces of Alberta, Saskatchewan, Manitoba and New Brunswick, where Apprenticeship Acts have been in operation for a short time, very satisfactory progress has been made. Trade committees are functioning in all provinces and the length of the apprentice period has been established for each trade and has varied from two to five years for different occupations. The ratio of apprentices allowed to journeymen has shown considerable divergence between different provinces in accordance with prevailing conditions. All apprentices in designated trades are under written indenture either to an individual employer or to the industry, and wages are paid in accordance with the regulations in each province, with periodic increases throughout the term of apprenticeship. The wages have, in most cases, been set in percentages of the prevailing journeyman's rate.

An important provision in all the Apprenticeship Acts and Agreements has been for class training, partly practical, and partly technical in related subjects. In British Columbia, Nova Scotia and New Brunswick this training has been given in part-time classes. In the Prairie Provinces the training has usually been given in full-time classes lasting three months. In Ontario two months of full-time training has been given to first and second year apprentices in the building and construction trades. Use has also been made of correspondence courses.

While the main emphasis during the year has been on the indentureship and training of veterans as apprentices, at the same time, there has been a substantial increase in most provinces in the number of civilian apprentices in trades designated under the Act. The amounts expended by the Department

of Labour under the Apprenticeship Agreements, as well as statistics showing the registration of apprentices and the amount of class training given, are shown in Table 12.

VI—The Retraining of Civilian Workers

During the summer of 1945 the Re-Establishment Training Agreements were approved by the Governor General in Council and sent to all provinces, to provide for the training or retraining for peacetime occupations of workers released from gainful employment.

These agreements cover a three-year period ending March 31, 1948. Selection of trainees is to be made by representatives of the Provincial Governments and the National Employment Services, but training is not restricted to those in receipt of Unemployment Insurance Benefit, nor to those formerly employed in industries engaged solely in war production. Under the agreement the Dominion Department of Labour would bear approximately 75 per cent to 80 per cent of the approved costs as outlined in the report of the Training Branch for 1944-45.

Provision was also made for transfer to this agreement from the War Emergency Training Agreement the training of discharged members of the Forces after March 31 when the War Emergency Training Agreement expired.

So far as the retraining of civilian workers is concerned, the agreement has been signed only by the Provinces of British Columbia, Alberta, Saskatchewan and Nova Scotia. Even in these provinces practically no use has been made of the agreement and no training given under its auspices. The view has been generally held in the provinces that the training of former members of the Forces should be given first priority, and it has been recognized that the provision of this training has taxed the capacity of the training centres to the utmost during the year. The total Dominion appropriation for the retraining of civilian workers for the year was \$1,500,000, but up to the end of April the total amount of claims paid was only \$1,395.

VII—Dominion Assistance to Vocational Schools

Agreements lasting for ten years were completed with all provinces by which the Dominion Department of Labour assists financially in the carrying on and development of vocational training on the secondary school level. The allotments and claims paid under this agreement to the different provinces is shown in Table 13.

Each province received an outright grant of \$10,000 per annum. A Dominion annual contribution of \$1,910,000 was allotted among the different provinces in proportion to the number of young people in each province in the age groups 15 to 19, as shown in the last Dominion census. A further Dominion contribution of \$3,000,000, allotted on the same basis, was made available for capital expenditures for buildings and equipment. Except for the \$10,000 grant the Provincial Government must match the Dominion contribution dollar for dollar.

As the agreements were not completed, for the most part, until late in the year, little could be done in the way of expanding vocational training facilities, consequently, very little of the Dominion contribution for capital expenditures has been used, but the unexpended portion will be carried over and can be available in the next ensuing fiscal year. A shortage of building materials and the difficulty in purchasing equipment have also contributed to the inability of Provincial Governments to expand their regular vocational training accommodation. It is expected, however, that during the coming year these conditions will no longer prevail, a large scale expansion of vocational schools, buildings and equipment will take place across the country.

CONCLUSION

The year 1945-46 has witnessed the termination of another transitional stage in the Training Programme from a war emergency footing to a post-war organization. It can be fairly stated that with the authority of the Vocational Training Co-ordination Act of 1942 and the various agreements completed in accordance with that Act, provision has been made for all types of training which will be necessary in the immediate post-war period.

In concluding this report, I wish again to express the thanks of the Training Branch to the different departments of the Provincial Governments and to the individual officials of such departments, who have co-operated so fully in the different training activities. Thanks are also expressed to the Regional Directors in the different provinces, other members of the staff of C.V.T., to the officials of the Department of Veterans' Affairs for the whole-hearted assistance that they have given in carrying on the training activities undertaken, particularly the training of discharged members of the Forces.

Respectfully submitted,

R. F. THOMPSON,
Director of Training.

Proposed Changes in Unemployment Insurance Benefit and Contribution Rates

Unemployment Insurance Advisory Committee Presents Recommendations supported by Actuarial Report

At its meeting in May, 1946, the Unemployment Insurance Advisory Committee developed a proposal which was the subject of a public hearing in Ottawa on June 17, and subsequent report to the Governor General in Council.

AS its name implies, the Unemployment Insurance Advisory Committee is the consultative portion of the Unemployment Insurance Commission's administrative organization. There are six sections of the Act devoted to the appointment and functions of the Committee. (82 to 87 inclusive.)

Composition of Committee

It is stipulated in the Act that the Committee shall consist of a Chairman and not less than four nor more than six members, who shall receive their appointments from the Governor in Council for a period not exceeding five years.

Of the members other than the Chairman, at least one shall be appointed after consultation with organizations representative of employed persons and an equal number after consultation with organizations representative of employers. Senators, members of the House of Commons and members of the Legislative Council or Legislative Assembly of any of the provinces are specifically excluded from membership on the Committee.

The Committee as at present constituted follows: Dr. W. A. Mackintosh (Chairman), J. F. McMillan, Percy R. Bengough, Miss Estelle Hewson, W. A. MacDonald, George Burt, V. R. Smith, and Eric Stangroom (Secretary).

Functions of Committee

The Committee is required to make a report to the Governor in Council not later

than the end of February in each year on the financial condition of the Unemployment Insurance Fund covering the preceding calendar year (L.G., Feb., 1946, p. 324). It shall also report to the Governor in Council at any other time it considers the Fund is, or is likely to become, insufficient to discharge its liabilities. Similarly, if the Committee is of the considered opinion that the Fund is, or is likely to continue to be more than reasonably sufficient to discharge its liabilities, it shall report accordingly. In either case, the Committee is required to make recommendations for the amendment of the provisions of the Act, or any regulations made thereunder, concerning any matters relating to the financial condition of the Fund, including: (a) the statutory conditions for receipt of insurance benefit and the provisions relating to the right to benefit; (b) the disqualifications for insurance benefit; (c) the meaning of "unemployment", or "unemployed" and of "benefit year"; (d) the rates of insurance benefit, the periods for which such benefit may be paid and the computation thereof; the payment of benefit pending appeals; or the rates of contribution.

Along with any such specific recommendations the Committee shall submit an estimate of the effect which the proposed amendments will have on the financial condition of the Fund.

Then too, the Committee may be required by the Governor in Council from time to time to investigate and report upon: (a) the provision of unemployment insurance for excepted employments; (b) the adjustment of the rates of contribution and benefit of insured persons having regard to the wages or salaries of such persons.

The following is the text of the Committee's Report:—

Statement of a Proposal to Modify Certain Benefit and Contribution Rates Under the Unemployment Insurance Act

Following representations by employee organizations, the Unemployment Insurance Advisory Committee has under consideration

a proposal to modify rates of benefit and contributions under the Unemployment Insurance Act, as set out in the following table:

Class		Contribution		Benefit to Persons with Dependents
		Employer	Employee	
0	While earning less than 90 cents a day, or While under 16 years of age.....			- -
1	Earning \$5.40 to 7.49 in a week.....	.09 (18)	.09 (9)	- -
2	Earning 7.50 to 9.59 in a week.....	.18 (21)	.12 (12)	\$4.80 (\$4.80)
3	Earning 9.60 to 11.99 in a week.....	.24 (25)	.15 (15)	6.15 (6.00)
4	Earning 12.00 to 14.99 in a week.....	.24 (25)	.18 (18)	7.50 (7.20)
5	Earning 15.00 to 19.99 in a week.....	.24 (25)	.21 (21)	8.85 (8.40)
6	Earning 20.00 to 25.99 in a week.....	.30 (27)	.24 (24)	10.20 (9.60)
7	Earning 26.00 to 33.99 in a week.....	.36 (27)	.30 (30)	12.90 (12.00)
8	Earning \$34.00 or more in a week.....	.42 (27)	.36 (36)	15.60 (14.40)
			.42	18.30

(Present rates of Contribution and Benefits in brackets)

The first part of the proposal is to create a new Class for contributions and benefits. At present the highest class is Class 7. This includes insured persons, paid at hourly, daily, or weekly rates or at piece-rates, whose earnings are in excess of \$26.00 a week by whatever amount. It also includes monthly-paid employees whose earnings are in excess of \$26.00 a week, but not more than \$2,400 a year. The proportion of all insured persons falling in Class 7 has increased each year since 1940. In 1945 nearly 63 per cent of employees' contributions (by number of weeks, not value) came from Class 7, and over 91 per cent came from Classes 5, 6 and 7.

An important feature of this change in earnings has been a reduction in the ratio of benefit to average earnings for those in Class 7. As long as a contributor is below Class 7, as his earnings increase, his contributions increase and his benefits increase. Once he has entered Class 7 by increasing his earnings beyond \$26.00 a week, his contributions and his benefits are at a fixed figure, even though his earnings may go on increasing. The Dominion Bureau of Statistics reports (March 1, 1946) average weekly earnings to be \$32.44. At present, the "with-dependent" benefit for this average worker is \$14.40 or 44 per cent of the average earnings. It is argued that this is too low and that recognition should

be given to the great change in earnings since 1940.

Secondly, it is proposed to increase somewhat the "with-dependent" benefit in those classes in which the ratio of benefit to earnings are lowest. It has been argued that the margin between benefit for single persons and those for persons with a dependent is too narrow.

Thirdly, it is proposed to make some changes in employers' contribution. The intention of the Act was that total employers' contributions should equal total employee contributions. Because of the shift of contributors from the lower classes, in which the employer paid more, to higher classes, in which the employer paid less, the intention has never been realized. The total of employers' contributions has each year fallen farther behind. In 1945 contributions to the Fund would have been 8.5 per cent larger if employers had contributed an equal share. The new scale which makes employer and employee contributions equal in the higher classes is designed to remove this disparity. Other minor changes are for the purpose of graduation and to give the convenience of contributions which are multiples of six so that they may be converted into daily rates.

The proposal under consideration has been examined by the Dominion Actuary, Mr. A. D. Watson, whose statement follows:

Statement of Actuary Concerning Recommendations of Unemployment Insurance Advisory Committee

Summary of Recommendations

In summary form the recommendations of the Unemployment Insurance Advisory Committee are:—

1. That for claimants with dependents the weekly rate of benefit should be increased from the present rate of 40-times the average weekly rate of contribution paid by the claimant during the two years preceding claim to 45-times thereof, less a deduction of 60 cents.
2. That a new contribution class, to be known as "class 8", should be established for persons earning \$34.00 weekly and upwards, the employer and the employee contribution for the new class to be each 42 cents weekly.
3. That the contribution schedule, beginning April 1, 1947, should be as follows (present rates of contribution in brackets):

Contribution Class	Weekly Contribution	
	Employer	Employee
0.....	\$0.09 (.18)	\$0.09 (.09)
1.....	0.18 (.21)	0.12 (.12)
2.....	0.24 (.25)	0.15 (.15)
3.....	0.24 (.25)	0.18 (.18)
4.....	0.24 (.25)	0.21 (.21)
5.....	0.24 (.27)	0.24 (.24)
6.....	0.30 (.27)	0.30 (.30)
7.....	0.36 (.27)	0.36 (.36)
8.....	0.42	0.42

General Considerations

In any field of insurance the principles and technique to be followed must obviously be appropriate to secure sound procedures in the particular field. In most insurance fields as a whole the impact of claims does not vary widely from year to year nor over cycles of years. To guard against any large fluctuation that might occur for any particular insurer in any area, it is usual to redistribute risks through reinsurance so that each insurer may get a satisfactory stability of impact of claims from year to year. Hence, except in insurance fields where the risks insured against increase as the years go by, very large accumulations of funds are usually not necessary as a provision against future fluctuations in the impact of claims.

In the field of Workmen's Compensation, for example, there is unlikely to be a series of very favourable years followed by a series of very bad years, or *vice versa*. Years of high employment generally show a high ratio of claims to payrolls owing in part to the speeding-up of production and in part to the employment of a substantial proportion of less experienced workers; but there is no likelihood that the impact of claims will become unmanageable or even really difficult of management at any juncture. The main danger under Workmen's Compensation is failure to make adequate provision for cases of permanent disability as they arise, for there is often a good deal of uncertainty concerning what is an adequate provision.

In life insurance, owing to the increasing risks of death with advancing age, it is necessary for life insurance companies to accumulate reserves out of the premiums received throughout the term of each insurance policy so that proper provision may be made for meeting claims as they arise from year to year without increase of premiums. At the present time the reserves maintained by Canadian Companies against their unmatured insurance obligations are of the order of \$3,000,000,000, and these companies are presently adding to their reserves at the rate of about \$150,000,000 per year. There have been no really violent fluctuations in the impact of life insurance claims. Even in war years, the losses

have presented no difficulty. Nevertheless, from the increasing nature of the risks enormous reserves are necessary, and it is necessary to increase them, to the end that companies may be in a position to meet their obligations to the persons insured, presently in an amount of some \$10,000,000,000, and, in addition, their obligations to annuitants, etc. No opinion can be formed concerning the sufficiency or otherwise of these reserves unless account is also taken of the magnitude of the liabilities for the obligations the reserves will have to meet.

It is much the same under an employer's pension fund. The main obligations do not mature for payment until the employee goes on pension; and this is true even where there are important benefits to dependents in the event of death of the employee before pension age. Hence large reserves must be accumulated out of the contributions made by and on behalf of the employee throughout his service in order that the fund may be in a position to meet the pension and other obligations as they fall in for payment; and the contributions must be large enough for the due accumulation of the necessary reserves. A pension fund may be large and may be increasing rapidly, but when the accumulated reserves are set against the value of the future obligations that will have to be met, it is too often found that the fund is quite inadequate, in some cases hopelessly so. The fact that an insurance fund or a pension fund is large and increasing, even rapidly, is in itself of no real significance. Such funds may in fact be decreasing and still be entirely sound, account being taken of all the facts and circumstances.

The field of unemployment insurance is in a class by itself. There is nothing in the way of claim stability from year to year, but there ought to be reasonable stability over a long period of years. Employment history shows a series of good, or relatively good, years followed by a series of bad, or relatively bad years; and within the periods of good years or of bad years there may be fairly wide fluctuations. There is nothing to show that this history will not repeat itself with variations, and perhaps in worse form than heretofore. Apart from all other circumstances affecting employment and unemployment, conditions wholly outside Canadian control may either seriously hold up production in Canada or make it difficult or impossible to sell Canadian goods abroad; and such conditions may prevail for long periods. Hence, as in the past, it is scarcely justifiable to assume that there will not be wide fluctuations in unemployment from year to year, as well as good and bad periods of considerable length. Obviously funds must be accumu-

lated during the good years to take care of heavy claims of the bad periods, for the contributions currently receivable during those periods will be inadequate to meet the claims; and adequate funds can only be accumulated out of contributions which are adequate therefor. The fact that the Unemployment Insurance Fund already accumulated is substantial (approximately \$320,000,000 at this date) is only one of many factors that must be considered. Even if the contributions had been one-half, or for that matter one-quarter, what they have been, a large fund would have been accumulated; and, *prima facie*, it might seem to many that the Fund was in a strong position even though in fact wholly inadequate, without increase in the contributions, to meet the obligations that may reasonably be expected to mature in the future.

In certain respects our unemployment insurance scheme is akin to a life insurance fund, or to a pension fund, in that the nature of the contract imposes the need for the accumulation of reserves to meet the increasing contractual obligations. The benefit rights of insured persons, and hence also the obligations of the Fund in respect of them, normally increase, but with fluctuations, as the years go by, thus requiring the accumulation of reserves. As the benefit rights of the insured person depend directly on his contribution record, i.e. his record of work in insurable employment, during the preceding five years, and his claims' record during the preceding three years, for insured persons as a group the increase in benefit rights is generally much more pronounced during their first five years under insurance than in later years. This is particularly true if the first five years happen to be a period of high employment and low claims. After the scheme has been in operation for five years, that is, after July 1, 1946, insured persons as a group will thereafter generally have a large backlog of acquired benefit rights based on past contributions and for which accumulations out of those contributions should, on the whole, be sufficient to answer. In a period of bad employment a large proportion of these accumulated benefit rights will be cashed in, and the necessary accumulated fund should be there to meet them. Hence it is important that the monetary value of these rights should not be set too high lest the funds should prove to be insufficient.

There are other reasons why the contract of unemployment insurance imposes a general need for the long term accumulation of reserves of some importance. The daily or weekly rate of benefit is based on the average of the insured person's contributions during the 'two years preceding claim, but the dura-

tion of benefit payment depends in part on the length of his contribution period within the preceding five years, and in part on his record of claims in the preceding three years. Hence the rate of benefit may be based on a considerably higher average level of contributions than that of the contributions made during the major period of the accumulation of benefit rights. With increased efficiency and experience of the insured persons in employment, in a broad and general way their earnings normally increase throughout a large portion of their working life. Apart from this general tendency, the rate of increase is at times very marked over considerable periods. Further there would appear to be a general tendency to higher claim rates and longer periods of claim in the later working periods of life. Thus there are several reasons for the long term accumulation of reserves in order to be reasonably safe, and in special periods there may be more imperative reasons. The past five years constitute just such a special period, and perhaps no one can say that the period of rapidly increasing earnings is near its end. The number of weeks' (or days,) contributions by earnings classes in each calendar year 1941-45, per cent of the total for the year, are as follows:—

	1941	1942	1943	1944	1945
0	1.8	1.4	1.8	1.9	1.4
1	2.1	1.0	0.6	0.5	0.3
2	3.8	2.3	1.4	1.0	0.8
3	6.0	4.5	3.4	2.3	1.8
4	10.6	9.2	6.9	5.6	4.6
5	18.4	17.2	14.6	12.0	11.6
6	22.1	21.0	19.8	17.6	16.8
7	35.2	43.4	51.5	59.1	62.7

The above table shows that there has been a great movement of contributors from lower to higher earnings classes. This means that to a large extent contributions made by contributors while in the lower earnings classes have to support their claims for benefit after they have moved into the higher classes. That this is so is clear from the increasing proportions from year to year of the benefit payments which are based on class 7 contributions.

Benefit Payments based on Class 7 contributions per cent of total for all classes for the Calendar Year:

1943..	53
1944..	62
1945..	73

A large proportion of the contribution period of many of these claimants has clearly been below the class 7 level.

The analogies between unemployment insurance and life insurance indicated above, are very rough, and it is not of course practicable to determine the unemployment insurance reserves which should at any time be in hand with even a first approximation to the accuracy that obtains for life insurance. And circumstances may arise under unemployment insurance requiring such a depletion of accumulated reserves as in a life insurance fund would mean an unmanageable deficiency. It is sufficient for present purposes to point out the main reasons why under unemployment insurance it is necessary and desirable to aim at the accumulation of reserves and why it is necessary to be on guard against the unwise or unwarranted dissipation of reserves that may at any time be in hand.

It is most undesirable that the bad chapters in the history of unemployment insurance elsewhere should be re-enacted here, if re-enactment can be avoided; and, when at any juncture any enlargement of benefit is being considered it is necessary to consider whether, with the enlargement, the funds which will be available are reasonably likely to be sufficient to meet the future obligations. Responsibility for such consideration seems to impose itself at this time.

Financial Provisions of Act

It will be well to begin by an examination of the basis of the financial provisions made in the Act for the scheme of benefits to see whether they were or are more than reasonably sufficient for the purpose.

The financial provisions of the Act of 1940 were based on the statistics of employment and unemployment and of other idle time, all causes, compiled by the Dominion Bureau of Statistics from the censal data of 1921 and 1931, and from intercensus data. Between 1921 and 1931 there was no really bad employment year. In the eleven years 1921 to 1931, the year 1931 was the only really bad year, although the latter part of 1930 was also bad. The percentages of idle time to total time in each of the eleven years, 1921 to 1931, for all wage-earners are as follows:

Year	Percentage of idle time to total time in year
1921.....	11.5
1922.....	10.8
1923.....	10.7
1924.....	12.6
1925.....	11.2
1926.....	7.5
1927.....	9.5
1928.....	8.9
1929.....	8.3
1930.....	12.9
1931.....	21.8

The pattern of employment derived from data for these eleven years, which was used as a basis of settling upon the financial provisions of the Act, showed average idle time, all causes of 12.4 per cent.

Idle time here includes time lost owing to lay-offs, no job, illness, accident, strikes and lockouts, holidays, and miscellaneous causes. To give some idea, but necessarily only a rough one, of the relative importance of these several causes of idleness the following table shows, for the censal day in 1931 and in 1941, the number of wage-earners who were idle on that day, per cent of all wage-earners then enumerated.

Cause of Idleness	Percentage idle on Censal Day	
	1931	1941
No job.....	15.36	3.92
Temporary lay-off.....	1.66	.53
Illness.....	1.00	1.56
Accident.....	.17	.11
Holidays.....35
Strike or lock-out.....	.01	.04
Other causes.....	.09	.40
	18.29	6.91

The year 1941 was a year of very full employment and the censal day in that year (June 2) must have been about as favourable a day as any of the year as respects employment and illness. Yet on that day 6.91 per cent of all wage-earners were not at work. Out of the total number of persons idle on that day 64.4 per cent either had no job or were temporarily laid-off. With the heavier unemployment on June 1, 1931, the proportion in these two categories was about 93 per cent. The eleven years 1921-31, with idle time of 12.4 per cent, would fall somewhere between the data for the censal day in 1931 and in 1941 given above. The proportion idle on June 2, 1941, a year of full employment, and on really about the best day in that year as respects unemployment and sickness, the number idle, all causes, was 56 per cent of the average proportion idle, all causes, throughout the eleven years 1921-31. This seems sufficient to establish that these eleven years 1921-31 were not on the average a period of bad employment.

The average idle time for the eleven years 1921-31 of 12.4 per cent was to a substantial extent not unemployed time in the unemployment insurance sense but merely idle time. The total unemployed time, as against merely idle time, which was brought into account in the primary calculations, as a basis for the financial provisions of the Act of 1940, was 19.31 days per insured person per year, or 3.22 weeks of six days, or 6.2 per cent of the 52 weeks of the year. To allow for the

nine waiting days, 3.97 days were excluded, leaving 15.34 benefit days per insured person per year or 2.56 weeks, being 4.92 per cent of the 52 weeks of the year. This is all of the unemployed time for which benefit provision was made in the primary calculations based on the statistics of eleven years 1921-31.

The statistics for that period did not, of course, make any provision for the unemployment which would be generated by the fact that insured persons would be paid benefit on proving unemployment, nor for any adverse experience. It was recognized, and will probably now be recognized, that some additional provision would be necessary or advisable, as well as adjustments for periods of sickness, days excluded from benefit other than the nine waiting days, etc. The number of days per insured person per year for which benefit provision was finally made was 18.63 or 3.10 weeks, being 5.97 per cent of the 52 weeks of the year. On the contribution side, provision was made for 45.47 weeks of employment per contributor per year. Having regard for the history of employment and unemployment, for the substantially seasonal characteristics of most industries, and for all other factors, it would appear that it cannot properly be said that the number of benefit days provided for was more than reasonable. If the scheme had become effective July 1, 1921, instead of July 1, 1941, the Fund would probably have increased every year from the start up to 1931. In some years the increase would have been very large, and almost certainly a very large fund would have then been in hand at the beginning of 1931, but it is far from certain that that fund, together with contributions currently receivable, 1931 to 1941, would have been more than sufficient to carry through to the latter year without any increase in contributions. The long term aspects of unemployment insurance ought not to be obscured from view by any short term circumstances.

In this context it is interesting to note the statistical basis of the provision for unemployment to be made in Britain under their amended scheme of unemployment insurance. (Report of the Government Actuary, January 21, 1946.) Heretofore they have proceeded on the assumption that on the average 10 per cent of insured persons would be out of work at any time. By reason of the proposed inclusion of certain employments heretofore excluded it is now assumed that, for assessing the cost of unemployment benefit and the loss of contributions owing to unemployment, 8.5 per cent of insured persons will be out of work at any time; and it is further assumed that 72½ per cent of those persons

will qualify for benefit under the benefit formula and provisions of their Act. Now 8.5 per cent of 52 weeks is 4.42 weeks, and 72½ per cent of 4.42 weeks is 3.20 weeks as against 3.10 weeks for which benefit provision was made under our scheme in 1940. On the contribution side, 8.5 per cent of persons unemployed would mean 47.58 weeks of contribution were it not for loss of contributions owing to sickness and other idle time. Making adjustments for the loss of contributions owing to these other causes, the result would probably not differ materially from the 45.47 weeks on which our contributions were based.

Now it must be emphasized that one cannot arrive at any safe conclusions by comparing the statistical basis of one scheme of unemployment insurance with that of another in the above fashion. Employments are probably on the whole more affected by the seasons in Canada than in Britain; the waiting period is longer under our Act than under the British Act; the benefit formulas are not the same, and so on. Nevertheless the two schemes are perhaps sufficiently analogous and parallel to justify the wholly tentative and negative conclusion that, *prima facie*, a consideration of the statistical basis for the British scheme does not suggest that any very materially excessive provision for unemployed days was made under our scheme, if any.

Relation of Employer and Employee Contributions

On reference to the table on page 7 it will be seen that the employer and the employee contribution are not equal in any earnings class. Nevertheless the distribution of contributors by earnings classes on which the financial provisions of the Act were predicated was such as to show a substantial equality of employer and employee contributions in total. As shown in the table on page 8, there has been a progressive shifting of contributors from the lower to the higher earnings classes, in net effect resulting in a large increase in class 7 and decrease in each of the other classes. In class 7 the employer contribution, being only three-quarters of the employee contribution, there has been a large falling-off in the proportion of the total of the employer contribution to the total of the employee contribution. Benefit rates being directly proportionate to the average of the employee's contributions for the two years preceding claims, there has been a general increase in benefit rates and in the liability for potential claims at the higher rates with the upward movement of contributors, but without a *pari passu* increase in the employer contributions. If the employer contributions had in total been equal to the employee contributions, the receipts of the Fund would

have been larger in each year by approximately the following percentages:—

Year.	1941	1942	1943	1944	1945	1941-5
Percentages .	2.5	4.7	6.3	7.6	8.5	6.1

The additional amount that would have been accumulated had the employer contribution equalled the employee contribution is estimated at \$23,000,000. The recommendation now is to make the employer and the employee contributions equal in the higher earnings classes, where practically all of the contributions are payable, and thus remove this important cause of instability in the Fund. However, the recommendation is that the amended scheme of contributions should not become effective until April 1, 1947. By that date the amount in the Fund will be approximately \$29,000,000 less than would be the case on the basis of parity of contributions or of the order of 7 per cent of what was originally intended should be funded.

The rectification in the scheme of contributions, if adopted, will not in the future bring into the Fund any revenue for financing new benefits beyond what was originally intended for the scheme of benefits now in the Act.

Extension of Coverage to Logging

In considering the recommendations for the increase of benefits to persons with dependents, and the introduction of the new class 8, it is necessary to keep in mind the fact that it has already been decided to extend coverage to employment in lumbering and logging, at least in certain regions, without change in contributions. It was estimated

that extension to the whole field of lumbering and logging would adversely affect the Fund to the extent of about 4 per cent of the total annual contribution to the Fund. This would be a substantial inroad on any redundancy in the rectified scheme of contributions. It is true that the extension to lumbering and logging may in the first instance be to a relatively small portion of the total field and also to the area of greatest stability. Nevertheless, there will be some drain on the Fund that for present purposes ought not to be forgotten.

Effects of Introducing Recommended Benefit Factors and of Establishing New Class 8

The effects of introducing the benefit factors and of establishing the proposed new class 8, as recommended, have to be examined under two very different heads: (1) the probable effect that the increase in rates of benefit will have in generating and prolonging claims; and (2) the effect on claims apart from those mentioned in (1), i.e., the increase in benefit payments directly proportionate to the increases in the benefit rates.

The following table shows by earnings classes the benefit rates now in the Act for persons with dependents and for persons without dependents, and the benefit rates recommended for persons with dependents. There are also shown the ratio per cent of the present and of the recommended benefit rates to the minimum and maximum rates of earnings in the several earnings classes, and of the recommended with-dependent benefit rates to the present with-dependent and without-dependent benefit rates.

NOTE:—As the establishment of recommended class 8 will break present class 7 into a new class 7, \$26.00 to \$33.99, and new class 8, \$34.00 and upwards, it is convenient for the purposes of this table to show present class 7 as though it were broken into the two new classes with benefit rates the same in each. See Columns (2) and (3).

Earnings Class (1)	Benefit Rates in Act		Benefit Rates Recommended	
	Without Dependent	With Dependent	Without Dependent*	With Dependent
	(2)	(3)	(4)	(5)
1 \$5.40-\$7.49.....	\$4.08	\$4.80	As in	\$4.80
2 7.50-9.59.....	5.10	6.00	Act	6.15
3 9.60-11.99.....	6.12	7.20		7.50
4 12.00-14.99.....	7.14	8.40	See	8.85
5 15.00-19.99.....	8.16	9.60	Col. (2)	10.20
6 20.00-25.99.....	10.20	12.00	at left	12.90
7 26.00-33.99.....	12.20	14.40		15.60
8 34.00-.....	12.20	14.40	\$14.28	18.30

Benefit Rates above as percentage of minimum and maximum earnings of class

	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1.....	75.6	54.5	88.9	64.1			88.9	64.1
2.....	68.0	53.2	80.0	62.6	Same as in cols. (6) and (7) at left		82.0	64.1
3.....	63.7	51.0	75.0	60.0			78.1	62.6
4.....	59.5	47.6	70.0	56.0			73.8	59.0
5.....	54.5	40.8	64.0	48.0			68.0	51.0
6.....	51.0	39.2	60.0	46.2			64.5	49.6
7.....	47.1	35.9	55.4	42.4			60.0	45.9
8.....	35.9		42.4		42.0		53.8	

With dependent benefit rates recommended (column (5) previous page) as percentage of:

	Without Dependent Benefit Rate Recom- mended (col. (4) above)	With Dependent Benefit Rate in the Act (col. (3) above)
	(14)	(15)
1.....	117.6	100.0
2.....	120.6	102.5
3.....	122.5	104.2
4.....	124.0	105.4
5.....	125.0	106.3
6.....	126.5	107.5
7.....	127.5	108.3
8.....	128.2	127.1

The without-dependent benefit rates recommended in new class 8 (\$14.28) is 117 per cent of the present rate payable in class 7 (\$12.20).

The excess of the recommended benefit rates over the present rates increases from zero in class 1 up to 8.3 per cent in class 7, and the increase in class 8 will be 27.1 per cent. (See column (6) in the upper portion of the above Table.)

The great bulk of the benefit payments have been, increasingly, in the classes where the recommended increases will be large. The following table shows the percentage distribution of benefit payments for the past three calendar years.

Contribution Class	Percentage of Benefit payments to total payments of the year		
	1943	1944	1945
1.....	.3	.2	.1
2.....	1.2	.5	.3
3.....	2.7	1.4	.7
4.....	5.5	3.5	1.8
5.....	11.8	8.5	5.1
6.....	26.7	23.7	19.0
7.....	51.8	62.2	73.0
	100.0	100.0	100.0

Apart from class 8, it would seem certain that the increase in benefit rates as recommended would be sufficient to generate some increase in claims. In class 8 the increase is really large; persons in that class can usually afford a bit of idleness, particularly when benefit is payable; they are often more difficult to place, particularly if receiving a large benefit; the question of what is suitable employment may be of another order for them as against persons of lower earnings. It has been estimated that for the year 1943, 30 per cent of all the benefit days for persons with dependents would have been within the new class 8; for 1944, 36 per cent, and for 1945, 44 per cent; or as percentages of all benefit days in those years, respectively, 15 per cent, 16 per cent and 19 per cent. Class 8 will clearly be important; and with an increase in benefit

rates of 27.1 per cent a substantial increase in claims will likely be generated.

The establishment of new class 8 will, transitionally, have another adverse effect i.e., during the five years following the date of the setting up of the new class. The benefit periods of the block of contributors transferred to the new class on that date will be based on contributory periods prior to that date at lower levels. It is true that this effect will be decreasing as the five-year period goes by. Although something of the same effect has been going on all along through contributors moving up in the earnings classes, it is quite another matter to transfer a large proportion of contributors all at once to a much higher level. A substantial liability will forthwith be created on the establishment of class 8, beyond the additional liability arising out of the adoption of the recommended benefit factors.

Apart from the two adverse circumstances just noted, calculations based on available data indicate that the establishment of new class 8 would not likely have any other adverse effect.

Considering the issues on the basis of the relative claims that would be payable if the recommended benefit factors were adopted, setting aside for this purpose the question of the generation of claims by reason of the increased rates, the most relevant and useful data are the claims for the years 1943, 1944 and 1945 compiled by the Dominion Bureau of Statistics. These data give the number of claimants and the number of benefit days separately for males and females, and separately for with-dependent and without-dependent claimants. From these data have been computed the claims paid and the claims which would have been paid had the benefit factors as recommended been in operation in those two years, but without the establishment of class 8. The ratio of benefit payments computed on the recommended basis per cent of the benefit payments computed on the basis of the Act are: for 1943, 104.5 per cent; for 1944, 104.1 per cent and for 1945, 104.1 per cent. It probably may be taken that the relative increase in benefit payments would be of the order of 4 per cent. This is a substantial overall increase; and in addition there is to be considered the claims which will be generated by the increase in benefit rates, and the commitment to extend coverage to lumbering and logging.

Considering now the ratio of the present benefits and of the recommended benefits to the minimum and the maximum of the several earnings classes (see lower portion of the Table on page 11), it would seem that the recommended benefits are as high as they

ought to be put if there is to be a really sound basis for insurance. In fact there is probably good and sufficient reason for thinking that the present rates of benefit may be as high as they ought to be except for the upper reaches of class 7. Some increase there is quite another matter as against substantial increases in classes 5, 6 and 7. To further increase benefit rates beyond those recommended would probably be to get onto unsound ground. It is true that the shifting upwards of rates of earnings may later require a further revision upwards of the ratios and benefits to earnings, and the financial effect and the provision therefor will then have to be considered.

Owing to the shifting proportion of persons contributing in the several earnings classes,

and the shifting proportion of with-dependent and without-dependent claimants, there may well be a lack of stability in the overall average rate of benefit from year to year. So far as this may arise from the shifting proportions of persons contributing in the several earnings classes, it is not likely to be a matter of much importance, unless the shifts come about too suddenly, for benefit rates will keep a fairly close contact with the contributions to provide the benefits. The following table shows the daily average rate of benefit to claimants in each earnings class, and the average for claimants for all classes, for each of the past three years, on the basis in the Act and on the recommended basis, disregarding the establishment of new class 8.

Class	On the Basis of the Act			On the Basis Recommended		
	1943	1944	1945	1943	1944	1945
1.....	\$0.69	\$0.69	\$0.69	\$0.69	\$0.69	\$0.69
2.....	0.86	0.86	0.85	0.86	0.86	0.85
3.....	1.04	1.03	1.03	1.04	1.04	1.03
4.....	1.22	1.21	1.21	1.23	1.21	1.21
5.....	1.43	1.40	1.40	1.47	1.43	1.42
6.....	1.86	1.82	1.78	1.94	1.88	1.81
7.....	2.29	2.25	2.24	2.42	2.36	2.35
All.....	1.85	1.93	1.99	1.93	2.01	2.10

The tendency toward decreasing average daily rates of benefit in the several earnings classes arises from decreasing proportions of with-dependent claimants; and the tendency toward increases in the averages for all classes combined arises from the increasing proportions of claimants in class 7, this increase being more than sufficient to offset the effect of the decrease in the proportions of with-dependent claimants. From the above table it would appear that the first mentioned tendency may have just about spent itself; and there may of course be a reverse tendency in the next few years. There is nothing for present alarm in these tendencies.

General Conclusions

The financial provisions of the Act of 1940 were based on employment and unemployment statistics for the eleven years 1921 to 1931, with certain adjustments believed in 1940 to be no more than reasonably sufficient to provide the benefits having regard for the then circumstances. The war was then a real war and there was great uncertainty concerning its course and duration and concerning the immediate after-war situation. It is now nearly five years since the Act came into operation, hostilities have been over for a considerable period. During those years employment has been high and claims relatively trifling. Notwithstanding that the Fund would now be much larger if the employer

contribution had been equal to the employee contribution, nevertheless the accumulations in the Fund to date are probably a good deal more than they would have been during any equal period 1921-31, or for that matter during the period 1921-41. The favourable experience of the period may be taken to have offset some of the unfavourable factors herein considered.

On July 1, 1946, a substantial block of insured persons will have entered upon their sixth insurance year, and during the course of the following twelve months the greater proportion will also have done so, account being taken of the war service which will be countable for veterans returning to insurable employment. Having regard for the terms of the benefit formula this means that there will probably soon be substantial funds accumulated from the contributions of pre-five years insurance. After the first five years under insurance the benefit rights of the insured person will usually increase more gradually, and thereafter any favourable experience will strengthen the Fund more than was the case during the first five years.

Having regard for all of the facts and circumstances at this time, favourable and unfavourable, as against the facts and circumstances of August 1940; for the financial provision that will be made for benefits on the basis of the proposed rectification of the scheme of contributions; for the amount of

the accumulated fund, and the liability on account of accumulated benefit rights of insured persons, acquired in large part at lower contribution levels than those at which the liability will have to be discharged; for the commitments in respect of lumbering and logging; and for the specific terms of the recommendations of the Unemployment Insurance Advisory Committee, it appears reasonable that effect should be given to these recommendations.

Throughout this report reasons were given for not going beyond these recommendations

at this time. There is perhaps another reason. It would appear desirable that the waiting period should be reduced as soon as it may be safe to do so, and if practicable it would seem desirable to reduce it to six days. This change would, on the average over the years, add about four and one-half per cent to the cost of benefit.

Respectfully submitted,

A. D. WATSON.

Report of the Canadian Government Delegates to the Third Conference of American States Members of the International Labour Organization, Mexico, April 1946

Mexico, D.F.,
May 10, 1946.

The Honourable HUMPHREY MITCHELL,
P.C., M.P.,
Minister of Labour,
Ottawa, Ont.

SIR,—The undersigned delegates, appointed to represent the Government of Canada at the Third Conference of American States Members of the International Labour Organization, have the honour to report that the Conference met at Mexico City, United States of Mexico, from April 1 to April 16, 1946.

Organization of the Conference

Sixteen of the eighteen American States Members of the Organization, that is, all except Brazil and Haiti, were represented at the Conference. Honduras, Nicaragua, Paraguay and El Salvador, which are not Members at present, were represented by observers, as were the Inter-American Institute for the Protection of Childhood and the Inter-American Indian Institute. A total of one hundred and seventy delegates, advisers and observers attended the Conference which held eighteen plenary sittings.

The Canadian Delegation was composed as follows:

Government Delegates

Mr. H. L. KEENLEYSIDE, Canadian Ambassador to Mexico.
Mr. C. C. EBERTS, Second Secretary, Canadian Embassy, Mexico City.

Advisers to the Government Delegates

Mr. Paul GOULET, Assistant to the Deputy Minister of Labour, Ottawa.
Mr. J. S. McCULLAGH, Assistant Director of Industrial Relations, Department of Labour, Ottawa.

Employers' Delegate

Mr. C. E. SHUMAKER, Industrial Relations Manager, Goodyear Tire and Rubber Company, New Toronto, Ont.

Workers' Delegate

Mr. J. B. WARD, of Montreal, Chairman, General Conference Committee, Standard Railway Labour Organizations.

At 11.00 a.m. on April 1, the Conference was declared open by the Chairman of the Governing Body of the International Labour Office (Mr. G. Myrddin-Evans, representative of the United Kingdom Government) who introduced the President of Mexico, His Excellency General Manuel Avila Camacho. The President welcomed the delegates on behalf of the Mexican Government, emphasized his country's interest in the subjects to be discussed by the Conference, and expressed his hopes for the success of the Conference which he felt would benefit all the peoples of the American Continent.

Without discussion, the Conference then adopted, provisionally, Standing Orders prepared by the Office. Their final adoption by the Conference took place on April 2. Article 8 of the Standing Orders, regarding the form of the decisions of the Conference, states: "The decisions of the Conference shall be expressed in the form of resolutions addressed to the Governing Body of the International Labour Office."

The following were elected as officers of the Conference during its first two plenary sittings on April 1:

President

Mr. Francisco Trujillo GURRIA, Government Delegate (Mexico).

Vice-Presidents

Mr. Ismael Bielich FLOREZ, Government Delegate (Peru).
Mr. J. D. ZELLERBACH, Employers' Delegate (United States of America).
Mr. R. Blanco ALVAREZ, Workers' Delegate (Cuba).

The United States representation (through Senator Chavez) expressed the desire to nominate the senior Canadian delegate for election as one of the Vice-Presidents but, at Mr.

Keenleyside's request, the suggestion was dropped.

In accordance with the Constitution, the Acting Director of the International Labour Office (Mr. E. J. Phelan), served as Secretary-General of the Conference.

Agenda

The items placed on the agenda of the Conference by the Governing Body of the International Labour Office were as follows:

1. *Acting Director's Report* which dealt with:
Industrial Development in Latin America
The problems of inflation in Latin America
Migration
Social Security
The living conditions of the American Indians
The International Labour Code in the American countries
The work of the International Labour Office in Latin America
2. *Vocational Training.*
3. *Labour Inspection.*
4. *Industrial Relations.*

For each of these four items the Conference had before it a report prepared by the International Labour Office embodying recommendations or draft resolutions to serve as a basis of discussion.

Committees

On April 1 and 2, at its second and third plenary sittings, the Conference decided to set up the following committees upon all of which Canada was represented as indicated:

Selection (steering and credentials) Committee

Chairman: Mr. Arriaga Andrade (Colombia)

Canadian Members: Government, Mr. H. L. Keenleyside (Substitutes: Mr. C. C. Eberts, Mr. J. S. McCullagh); Employers, Mr. C. E. Shumaker.

Committee on Resolutions

Chairman: Mr. A. C. Drouet (Ecuador)

Canadian Members: Mr. C. C. Eberts, Government Delegate (Substitute: Mr. J. S. McCullagh); Mr. C. E. Shumaker, Employers' Delegate.

To discuss the draft resolutions arising out of the discussion of the Acting Director's Report, the Committee on Resolutions set up Sub-Committees on:

- (a) Economic Problems
- (b) Migration
- (c) Indigenous Populations.

Canada was represented on Sub-Committee (a) by Mr. J. S. McCullagh, Government Adviser.

Committee on Vocational Training

Chairman: Mr. Ricardo Riguera (Argentina)

Canadian Members: Government, Mr. H. L. Keenleyside (Substitute: Mr. Paul Goulet, elected Rapporteur of the Committee); Employers, Mr. C. E. Shumaker, Substitute Member.

Committee on Labour Inspection

Chairman: Mr. Verne A. Zimmer (United States of America)

Canadian Member: Mr. C. C. Eberts, Government Delegate.

Committee on Industrial Relations

Chairman: Mr. Orlando Puente (Cuba)

Canadian Members: Government, Mr. H. L. Keenleyside (Substitute: Mr. J. S. McCullagh); Employers, Mr. C. E. Shumaker; Workers, Mr. J. B. Ward.

Discussion of the Acting Director's Report

The Conference devoted eleven of its plenary sittings, from April 3 to April 12, almost exclusively to a general discussion of the Acting Director's Report. Thirty-seven delegates, from all the sixteen States Members represented at the Conference, took part in this debate, including Mr. Keenleyside, Canadian Government Delegate. The latter spoke, on April 12, of Canada's interest in the International Labour Organization; her pleasure in collaborating with the other American countries in the attainment of social justice; the social security measures in operation in Canada; the country's success in avoiding inflation during recent years; and its interest in the industrialization of Latin America which should make for higher standards of living as well as a greater volume of international trade.*

The speeches delivered in the course of the discussion of the Acting Director's Report were marked by a high sense of the importance of the Conference to the American countries. They demonstrated that the Latin-American countries look to the International Labour Organization to facilitate the implementation of advanced social legislation and that a large body of opinion in those countries favours the raising of living standards by increasing purchasing power through the intensification of industrialization and greater control of present inflationary trends. Great interest was also expressed in the suggestions that a service be set up in the International Labour Office for the study of Latin-American problems; that the Governing Body open a

*For the full text of Mr. Keenleyside's speech see Annex 1.

regional office in Latin America; and that correspondents of the Office be appointed in all Latin-American countries.

On April 13, in his reply to the observations offered by the various speakers, the Acting Director thanked the delegates for the many appreciative references made to his report. He expressed the hope that the Conference would produce positive results with a view to securing "the integration of the Indians in the national life", and that the problems of agriculture emphasized by a number of speakers would be the subject of further intensive studies by both the International Labour Organization and the Food and Agriculture Organization. He indicated his agreement with those speakers who had drawn attention to the effect that social security systems could have on national economies by maintaining the purchasing power of those who lose their ability to work. Finally, he expressed the belief that the further industrial development of the Latin-American countries would be welcomed by all countries as leading to higher living standards and an increase in international trade.

Committee on Vocational Training

The Committee on Vocational Training, composed of nine Government members, six Employers' members and six Workers' members, and voting according to the Riddell-Tzaut system, held eight sittings from April 2 to April 11.

The Committee used as the main basis of its discussions the series of principles and proposals contained in Chapter IV of the Report on Vocational Training prepared for the Conference by the International Labour Office. It also considered a draft resolution on inter-American technical training courses presented by the Mexican Government member, as well as a draft resolution on industrialization and vocational training submitted by the Argentine Government member.

In the course of their discussions, the members of the Committee demonstrated their recognition of the fact that, unless vocational training facilities are greatly enlarged in a number of American countries that have extensive industrialization programs, the latter cannot be carried out. As no serious divisions of opinion developed in connection with the three texts under consideration, the discussions were confined, for the most part, to minor changes in these texts. The Canadian Government member, drew the attention of the Committee to the position of federal countries with regard to various aspects of the main draft resolution under discussion. As a result of its deliberations, the Committee adopted unanimously, for submission to the Conference,

a Report recommending approval of two resolutions, namely:—

Resolution concerning vocational training (Annex 3)

Resolution concerning the organization of regular inter-American technical training courses for workers (Annex 4)

It also transmitted to the Committee on Resolutions, a draft resolution on industrialization and vocational training (see below).

The first of the two Resolutions communicated to the Conference sets forth an extensive program for the development of vocational training in each country (linking it closely to vocational guidance) and also for the continued co-operation of the American countries in this field. It urges the development of vocational training on the basis of a comprehensive national plan and proposes a detailed scheme with regard to vocational guidance, pre-vocational guidance, pre-vocational training, vocational and professional training in specialized schools, apprenticeship, in-plant training, part-time supplementary training, agricultural training, training and re-training of adult workers and special problems of training including women, disabled persons, special indigenous groups, and handicapped and homeless children. It also deals with the interchange of information on training, the procurement of equipment for training establishments, regional co-operative facilities for the advanced training of selected vocational training instructors and the exchange of apprentices and trainees. Finally, it proposes that the Governing Body of the International Labour Office be invited to create a Sub-Committee of the Employment Committee to intensify inter-American co-operation in vocational training and to co-ordinate the activities of the American countries.

The second Resolution proposes the creation of training facilities for workers from interested countries in those American countries that have attained a high level of technical development in any particular type of enterprise.

When the Committee's Report was presented to the Conference, on April 13, it was adopted unanimously without discussion.

Committee on Labour Inspection

The Committee on Labour Inspection, composed of twelve Government, six Employers' and six Workers' members, and using the Riddell voting system, held seven sittings from April 2 to April 10.

At its first sitting, the Committee decided to centre its discussions on Chapters IV to X of the Report on Labour Inspection prepared by the International Labour Office. In the course of the earlier sittings, members from twelve

states, including Canada, gave informative accounts of the present inspection systems of their countries, and added to the value of the discussions by their frankness with regard to the weaknesses encountered in those systems.

From the outset of the discussions, the members recognized the importance of an efficient inspection system in securing the application of labour legislation. The problems that were the subject of special attention related to the financing of an adequately staffed and equipped inspection system. It was the consensus of opinion that inspectors should be selected solely on the basis of their practical and technical knowledge of the problems before them; that they should be trained for their duties; and that their conditions of employment should be such as to attract suitable personnel. Despite the acknowledged difficulty of obtaining larger public appropriations, the Committee as a whole agreed that the appropriation of finances from public funds was the only means of financing inspection services compatible with the impartiality essential to the effective functioning of an inspectorate.

On the question of the tasks of an inspector, there was general agreement that the primary duty of an inspector is to ensure that the legal and other provisions relating to the working conditions and the protection of the workers are understood and applied by the employers and workers concerned; that, in performing this duty, an inspector should be able to supply technical advice and information to the interested parties concerning the most effective means of applying the provisions in question; and that an inspector should not be given conciliation and arbitration functions as these were considered incompatible with the need for ensuring the greatest possible impartiality and effectiveness in the performance of an inspector's primary duty.

At the fifth and sixth sittings, the Committee considered a fairly lengthy draft resolution on labour inspection, prepared by the Secretariat and the Officers of the Committee, which embraced the aspects of the problem raised in previous discussions as well as points implied by those discussions. Without debate it also gave its approval to a draft resolution, submitted by the Costa Rican Government member, proposing that the Governments consider the extension of their inspection services to agricultural and stock-raising activities. Before finishing its work, the Committee was able to approve unanimously, for transmission to the Conference, a Report proposing the adoption of the following Resolutions:

Resolution concerning labour inspection
(Annex 5)

Resolution concerning labour inspection
in agriculture (Annex 6)

The Committee's Report, presented to the Conference on April 12, was adopted by the latter the following morning without opposition.

Committee on Industrial Relations

The Committee on Industrial Relations, which consisted of fifteen Government members, ten Employers' members and ten Workers' members and used the Riddell-Tzaout system of voting, held nine sittings from April 2 to April 12.

The Committee decided to use as the basis of its discussions the seven draft resolutions contained in Chapter VI of Part II of the Report on Industrial Relations prepared for the Conference by the Office. These texts dealt with freedom of association, protection of the right to organize and to bargain collectively, voluntary and compulsory conciliation and arbitration, and the legal recognition, the extension and the enforcement by labour courts, of collective agreements. To facilitate progress in the discussion of the Office texts, a Sub-Committee (in addition to the usual Drafting Sub-Committee) was set up. Its function was to make preliminary studies of the Office texts and of many suggested amendments to those texts for subsequent consideration by the Committee as a whole. In addition, several draft resolutions on related matters, submitted by members, were considered by the Committee.

The problem of freedom of association earned the special attention of the Committee which devoted nearly five sittings to this subject. A proposal of the Mexican Government member, that states should guarantee freedom of association in their constitutions, was adopted unanimously. Agreement was reached in favour of the broadest possible guarantee of freedom of association in the conviction that such freedom is the only basis for satisfactory industrial relations. It was decided to lay down the principle of the right to freedom of association of all public and private employers and workers without distinction as to occupation, sex, colour, race, creed or nationality.

In discussing the protection of the right to organize and to bargain collectively, the members of the Committee considered it necessary to protect the exercise of the right of freedom of association for the benefit of individual workers, of labour unions in their relations with employers and of individual workers and groups of workers vis-à-vis their own organizations. It was consequently felt that employers should be prohibited from exerting any pressure on workers to join or refrain from joining

a union and from interfering in the formation, administration or financing of unions. At the same time, it was agreed that payment of wages for time taken up by workers' discussions with employers as well as the collection of union dues by employers should be permitted. It was further agreed that Governments should establish agencies to secure respect for the right to organize and to facilitate collective bargaining.

The Committee adopted the principle of voluntary conciliation and arbitration but unanimously rejected the principle of, and the Office text on, compulsory conciliation and arbitration, in view of the fact that the latter are only practised in a few American countries and are in conflict with the legislation of several others. It was maintained that, while recourse to conciliation should be voluntary, once proceedings begin the parties should abstain from taking strike or lockout action—although they should be free to accept or reject the recommendations of the conciliation agencies. The members were also of the opinion that, while recourse to arbitration should be voluntary, once the parties have consented to submit a dispute, they should accept the award.

As regards the question of the validity of collective agreements, the Committee considered that the provisions of a collective agreement should be applicable to all workers in the appropriate collective bargaining unit in the undertaking in question even though they are not members of the organization which concluded the agreement. On the question of the extension of collective agreements, it was maintained, on the suggestion of several members, including the Canadian Government member, that while the principle of extension should not be rejected, it should only be recommended to those countries where it is, or may be, provided for by legislation. The Committee as a whole rejected the idea of, and the Office text regarding, labour courts, feeling that they came near to the principle of compulsory arbitration, and consequently conflicted with practices followed in most countries.

After completing its discussion of the seven Office texts, the Committee approved a draft resolution, submitted by the United States Government member, recommending the adoption of the principle of the highest possible wage level with a view to increasing purchasing power, and consequently, general prosperity. It also approved two draft resolutions, received from the Mexican Government member, on equal pay for equal work and on stability of employment; a draft resolution submitted by the Cuban Government member

regarding the inclusion of industrial relations in the agenda of early sessions of the Regional Conference and of the International Labour Conference; and a draft resolution, introduced by the same member, regarding collaboration between the public authorities and the employers' and workers' organizations.

On April 12, the Committee reached agreement on a Report recommending that the Conference approve the following eleven Resolutions:

Resolution concerning constitutional provisions for freedom of association (Annex 7)

Resolution concerning freedom of association (Annex 8)

Resolution concerning protection of the right to organize and to bargain collectively (Annex 9)

Resolution concerning voluntary conciliation and arbitration (Annex 10)

Resolution concerning the validity of collective agreements (Annex 11)

Resolution concerning the extension of collective agreements (Annex 12)

Resolution concerning wage policy (Annex 13)

Resolution concerning equal pay for equal work (Annex 14)

Resolution concerning stability of employment (Annex 15)

Resolution concerning the placing of the question of industrial relations on the agenda of early sessions of the Regional Labour Conference and of the International Labour Conference (Annex 16)

Resolution concerning collaboration between the public authorities and the employers' and workers' organizations. (Annex 17)

When the Committee's Report was submitted to the Conference on April 15, it was adopted after the discussion of certain proposed amendments. The Conference approved an amendment, presented by the Workers' Group, which was included as paragraph (3) in Part I of the Resolution concerning protection of the right to organize and to bargain collectively (Annex 9). This called for legislation to protect labour leaders in the performance of their legitimate activities during the periods in which strikes are in preparation or in progress.

Committee on Resolutions

The Committee on Resolutions had as its terms of reference the discussion of draft resolutions not related to any item on the agenda of the Conference as well as draft resolutions arising out of the discussion of the Acting Director's Report. It was composed of 17

Government, 11 Employers' and 11 Workers' members, as well as one representative from each group of the Delegation of the Governing Body, and held nine sittings from April 3 to April 16, the Riddell-Tzaut voting system being applied.

The Committee approved unanimously, without discussion, a draft resolution submitted by the Chilean Government member, urging the American Governments concerned to arrange for early ratification of the Instrument for the Amendment of the Constitution of the International Labour Organization, adopted in Paris on November 5, 1945. It dealt similarly with a draft resolution, presented by the Chilean Government Delegates, recommending that the Governing Body invite El Salvador, Honduras, Nicaragua and Paraguay to join the Organization at an early date. A text, introduced by the Guatemalan Government Delegates and recommending the holding of national labour conferences of a tripartite character, was adopted with only minor changes. A draft resolution, submitted by the Cuban Delegation and calling for legislative measures to protect university professors and staff in the performance of their duties, was withdrawn owing to opposition. When, however, the same Delegation presented a further text inviting the Governing Body to complete, for submission to the International Labour Conference, its current studies regarding the working conditions of professional workers and teaching staff, the second draft was approved.

The Panamanian Delegation presented a draft resolution which stated that workers in the Panama Canal Zone who are not United States citizens are the object of discrimination with regard to working conditions. The draft called for the International Labour Organization to appoint a correspondent for Panama and the Zone; to initiate an investigation of working conditions in the Zone; and, if the investigation justified such action, to appeal to the United States Government to enact appropriate remedial legislation. After this text had received lengthy consideration, it was agreed to set up a special Sub-Committee, composed of the Chairman of the Committee on Resolutions, a representative of the Secretary-General and United States and Panamanian representatives, to draft a new text. The Sub-Committee reached agreement on a text, couched in general terms, which called upon Member Governments to work for the eradication of all cases of discrimination in working conditions and, for the Governments concerned, to study jointly, with the assistance of the International Labour Organization, any allegations that might be made with regard to discrimination in one country against

nationals of another country. Before this draft resolution was approved by the full Committee, the Panamanian Government Member stated that he had agreed to it in view of the fact that the United States Government member had given him a formal letter which contained the assurance that he would communicate the new text to the United States Secretary of Labour, together with a complete record of the proceedings that led to its adoption and the recommendation that the problem of the Canal Zone be given close attention.

Consideration was given by the Committee to draft resolutions, submitted by the Workers' group and the Panamanian Delegation, respectively, proposing the creation of a Branch Office of the International Labour Office in Latin-America and the establishment of correspondents of the International Labour Office in American Member countries where they have not so far been appointed. The Committee decided to combine these proposals in a single text along with a draft resolution, presented by the Colombian Government member, which recommended the setting up, within the International Labour Office, of a service to study Latin-American economic problems.

The Committee also approved, with minor changes, a draft resolution regarding training in industry presented by the Employers' Group.

As a result of its discussions on the topics referred to above, the Committee adopted, on April 13, a First Report for transmission to the Conference, urging that the following seven Resolutions be approved:

Resolution concerning the ratification of the instrument for the amendment of the Constitution of the International Labour Organization (Annex 22)

Resolution concerning the readmission to the International Labour Organization of the American States which are not members (Annex 23)

Resolution concerning the organization of national labour conferences (Annex 24)

Resolution concerning the situation of professional workers (Annex 25)

Resolution concerning discrimination (Annex 26)

Resolution concerning the extension of the services of the International Labour Office in relation to American countries (Annex 27)

Resolution concerning training within industry (Annex 28).

The Committee's Report was adopted by the Conference, on April 15, without opposition.

Sub-Committee on Economic Problems

The Sub-Committee set up by the Committee on Resolutions to consider draft resolutions on economic problems arising out of the consideration of the Acting Directors' Report, was composed of 12 Government, 6 Employers' and 6 Workers' members and, in common with the other two Sub-Committees referred to below, adopted the Riddell voting system.

Four draft resolutions were approved by the Sub-Committee and included in its Report to the Committee on Resolutions, namely:

Resolution concerning industrialization, (Annex 18.)

Resolution concerning inflation, (Annex 19.)

Resolution concerning statistics, (Annex 20.)

Resolution concerning industrialization and vocational training—transmitted by the Vocational Training Committee, (Annex 21.)

On April 15, the Committee adopted the Sub-Committee's Report with minor changes and made it the subject of its Third Report which was approved by the Conference the same day.

Sub-Committee on Migration

The Sub-Committee set up by the Committee on Resolutions to discuss draft resolutions on migration that might arise out of the general discussion of the Acting Director's Report, consisted of 8 Government, 4 Employers' and 4 Workers' members.

The following draft resolution was approved by the Sub-Committee and embodied in its Report to the Committee on Resolutions:

Resolution concerning migration (Annex 29)

On April 13, the Committee adopted the Sub-Committee's Report without discussion and made it the subject of its Second Report which the Conference approved on April 15.

Sub-Committee on Indigenous Populations

The Sub-Committee set up by the Committee on Resolutions to consider draft resolutions regarding indigenous populations arising out of the general discussion of the Acting Director's Report, was composed of 6 Government, 3 Employers' and 6 Workers' members.

In its Report presented to the Resolutions Committee on April 16, the Sub-Committee indicated that it had not had sufficient time to give adequate consideration to all of the texts referred to it, and recommended to the Committee the adoption of certain draft resolutions and the transmission of others to the International Labour Organization, for its information. Finding it impossible to reach

definite conclusions regarding the texts contained in the Sub-Committee's Report, the Committee on Resolutions decided to transmit to the Conference, with its Fourth Report, a Resolution (Annex 30) drawing attention to the importance of the proposals studied by the Sub-Committee; recommending to the Governing Body that it establish a Committee of experts on social problems of the indigenous populations of the world; and calling for transmission to the Governing Body, for reference to the proposed Committee, as a basis for the latter's studies, of the Acting Director's Report and the seven draft resolutions embodied in the Sub-Committee's Report (which are appended to Annex 30).

On April 16, the Fourth Report of the Committee on Resolutions was adopted by the Conference which approved an amendment to the Resolution contained in it, to the effect that the Committee of experts referred to should be asked to present to the next Labour Conference of American States a report on the situation of the indigenous populations of the American Continent.

Selection Committee

In addition to making recommendations regarding questions of representation on the various Committees, the Selection Committee arranged the program of the Conference and Committees.

While the credentials of the Argentine Workers' Delegate and of his Adviser were questioned in the Selection Committee, and the Workers' Group decided to exclude them from their meetings, no formal protest regarding their credentials was lodged in the normal manner. Consequently, in the second of its two Reports, the Committee stated that it had found all the credentials deposited with it in order. Both Reports of the Committee were adopted by the Conference.

Receptions and other Functions

On April 5 the delegates were received by the President of Mexico. In a short address, made on behalf of the delegations, Mr. Arriaga Andrade (Colombian Government Delegate) thanked the President for the friendly welcome given by Mexico to those attending the Conference and for the address that he had made at its inaugural sitting. In reply, the President stated that he was happy to have an opportunity to meet the delegates personally; wished the Conference success; and asked the delegations to take back to their countries his fraternal greetings to their Governments and peoples.

Several large receptions, entertainments and other functions were arranged for the delegates

by the Mexican authorities including four Ministers of State and others. On April 12, at the Palace of the Governor of the Federal District the delegates were presented scrolls naming them guests of honour of the City and the Medal of the City.

*Message from the United States Secretary
of Labour*

The following message from the Honourable L. B. Schwellenbach, United States Secretary of Labour, to the President of the Conference, regarding the Conference then in progress and the Joint Maritime Conference to be held in Seattle, Washington, in June of this year, was communicated to the Conference on April 12:

"I am greatly pleased by reports indicating the constructive results of the Third Conference of American States Members of the International Labour Organization and hope that the Maritime Conference scheduled in Seattle, Washington, in June, will be equally fruitful. To this end, I urge that

each member state send a full complement of representatives to the Seattle meetings".

Closing of the Conference

The Third Labour Conference of American States Members of the International Labour Organization was declared closed at 2.00 p.m. on April 16, by the President and Vice-Presidents of the Conference and a Latin-American representative of the Secretary-General. The closing speeches expressed considerable satisfaction with the concrete results obtained by the Conference and the hope that the Governments concerned would take the necessary steps to implement the terms of the Resolutions adopted.

We have the honour to be,

Sir,

Your obedient servants.

(Signed) HUGH L. KEENLEYSIDE
CHRISTOPHER EBERTS

Annex 1—Statement by Dr. H. L. Keenleyside

Canada has always had a very special interest in the work of the International Labour Organization. This interest has grown and spread since, owing to the tragedy of war, the International Labour Office found it necessary to establish itself in our country. We are happy to participate in this Third Conference of American States, Members of the Organization. We are anxious to learn what our brother nations of the hemisphere are doing to face the industrial and social problems that are common to all of us, and we are happy to share with you the knowledge and experience acquired in the course of our efforts to attain social justice in our country and to develop fruitful co-operation with other countries.

Now, with your permission, I will speak in English. I am sure that it will be both easier for me and more agreeable for those of you whose mother tongue is Spanish.

I intend to confine my comments to one or two very brief remarks about some of the more important aspects that are dealt with in the Acting Director's Report. Before doing so, however, I should like to say just a word or two in compliment to those who have been responsible for the preparation of that Report, which seems to me to have presented a complex subject in as clear and distinct and well organized a form as it was possible to do it.

Four main topics covered by the Report are migration, the industrial development of Latin-America, social security, and the conditions of the indigenous inhabitants of the American States. Of these, I would like to refer very briefly to two: social security and the industrial development of Latin America.

The problems of social security were dealt with in some detail in this capital in July of last year, when the Permanent Committee of the Inter-American Conference on Social Security met in Mexico City. They were also basic to the discussions which took place at the Philadelphia Conference in 1944. At that time, the Canadian Minister of Labour, the Hon. Humphrey Mitchell, expressed the determination of the Canadian Government to do what it could to wipe out, as far as Canada was concerned, the three great fears which oppress the lives of people in all countries in our modern civilization. These were the fear of destitution through unemployment, the fear of destitution from old age, and the fear of destitution from sickness.

We in Canada have made a start on the program that was outlined by Mr. Mitchell. We have had for some time a complete system of old-age pensions for those who require assistance in their later years. We have introduced and are now enforcing a comprehensive system of unemployment insurance on a federal basis which extends over a very large part of the working population of our country. We have inaugurated within the last year a system of family allowances which are paid with respect to all children, regardless of the economic status of their parents. And we are now studying the possibilities of a national health insurance scheme, which has to be worked out, of course, in collaboration with the Provincial Governments. One province has already introduced, on

its own, a system of health insurance which, so far as we can tell from early experience is going to work satisfactorily. It is altogether probable that similar experiments will be tried in other provinces, and that some overall scheme with federal assistance will be very shortly worked out.

We do not, of course, consider that by taking these steps, we have solved the problems of social security, but we do feel that there has been made a start which is promising and heartening to those who wish to see progress made in this important direction.

The Acting Director's Report discusses at some length the problem of the industrialization of Latin America, and this is a matter that is of peculiar interest to Canada. At the beginning of this century, Canada was a country almost entirely agricultural. What industrial activity we had was largely dependent upon the extraction and the initial processing of the products, raw products, of our fields and mines and seas and forests. With the development that came as a result of the First World War, the further development during the 1920's, and the progress that was made during the period of the war that has just ended, Canada has changed from a predominantly agricultural country to a country that is predominantly industrial. From being one of the last among the industrial powers, the Canadian people have now found themselves in a position to produce almost everything that is needed for their own consumption and to produce on an extensive scale for export abroad.

As a result of the rather phenomenal and very radical changes that have taken place, particularly during the last six years, we have become far more interested in foreign trade than we ever were before, although foreign trade has always been the lifeblood of our country. Now, however, we have to find abroad not only markets for our raw materials but markets for the manufactured goods that are the result of the processing of those raw materials. This means that in addition to supplying a larger proportion of our own needs from our own industry, we are in a position to supply the needs of other countries as well. It does not mean, however, that we are cutting down on our imports from other countries. The industrialization of Canada, far from resulting in a decline of imports, has resulted in a very radical increase in imports, and it is for this reason that we feel that if the process of industrialization that has now started in Latin America is carried through, it will be of value not only to the countries that are being industrialized, but of value also to those countries which rely for their welfare on a large and active foreign trade. So, Canada is enthusiastically behind any program that may be designed to increase the industrial activity of the Latin-American countries.

It is, I think, worthwhile mentioning, perhaps, very briefly, the experience that we have had in the related field of inflation during the last few years in Canada. In common with all the countries that were affected by the increased demand resulting from the war, Canada went through a period when the purchasing power

of the people was very rapidly and very radically increased. If no steps had been taken to offset the obvious results of such a development, we would have had an inflationary movement in Canada that would have been of very serious moment to all of our people, and particularly to those of our people who were on a stated income which was not easily susceptible of change.

As a result, however, of Government action, we have succeeded in obviating a good many of the probable difficulties that would have arisen had such action not been taken. The steps that the Government took to overcome the threat of inflation were those that have been mentioned in the Acting Director's report as being desirable in such conditions elsewhere. We put a ceiling on prices as of a certain date, and we maintained that ceiling. We put a ceiling on wages and we maintained it except for certain adjustments which were made necessary by the obvious injustice of existing conditions at the date when wages were frozen. In addition to that, we introduced controls on the handling of international foreign exchange and international payments. We very radically increased corporate and personal income taxes, in many cases raising them to from five to ten times what they were prior to the outbreak of the war. We now have a system of personal and corporate income taxation that is almost as high, if not quite as high, as that of any of the other countries with which we are concerned in these discussions.

As a result of these steps and one other, that is, the drawing off of surplus purchasing power by the persuasion which was addressed to the people of our country to purchase bonds—and I might interject here that the persuasion was so effective that at the present time, over three million people in Canada are personal investors in the bonds of the Canadian Government; that means that on an average, one person in every family in Canada has purchased Government bonds in the last five years—as a result of these steps, the threatened inflation was avoided and the increase in the price levels in Canada over the past six years has been only 18 per cent, a record which I think it would be difficult to equal anywhere else in the world.

There is one other word that I should like to say about the general question of industrialization. I have said that Canada is interested in seeing the industrialization of Latin America progress, seeing the standards of living of the people in the Latin-American countries raised still further, and that we would welcome, and be glad to assist so far as we can in, that process. This does not mean, however, that we believe that either in Canada or in the Latin-American

countries or in any other country it is desirable that uneconomic industries should be fostered and protected to a degree that would injuriously affect the national economy. In other words, we believe that any industry that has a reasonable chance of becoming self-supporting in a reasonable period should be given protection. We would be prepared to follow that through ourselves and we would be prepared to assist any country that follows it in its national program. On the other hand, we do not believe that, either for ourselves or for any other country, it is a desirable procedure to establish barriers which build up and maintain an industry that is bound to be permanently, or for a long period, a parasite in the country in which it is established. That is not, in our view, desirable from the standpoint either of the people of the country itself or from the standpoint of the development of international trade, which is one of the most important factors that we will have to consider, and consider seriously, if the post-war world is to reach anything like the status of general prosperity and full employment which we hope to see achieved.

I think that in conclusion there are only two things I should like to say. The first is that, speaking on behalf of the Canadian delegation, I wish you to know that we appreciate very much indeed the arrangements that have been made for the holding of this Conference, for the generous hospitality that has characterized all that has been done for us since the delegations arrived in Mexico. The traditional generosity of the Mexican people has been very apparent on this occasion. Those of us who live here and who have even wider experience of that generosity, realize that there is hardly any praise that could be higher than that. I only hope that when the members of the Conference come to Canada in the autumn of this year, as I hope all of them will do, for the meeting of the I.L.O., Canadian hospitality will not suffer too greatly in comparison.

In conclusion, I would add just this, that we have come to the discussions of this Conference with a view to learning from the wisdom and the experience of the representatives of the other countries who have met here. We have come also to contribute as far as we can, from the knowledge and the experience that we have acquired, sometimes rather painfully, in our own history of Canada. It is our very sincere hope that results will flow from this Conference which will contribute in no small way to the building up in the countries of America of a happier, a more prosperous, and a more peaceful life.

Annex 2—Statement by Mr. Paul Goulet

I have great pleasure in presenting the Report of the Vocational Training Committee to the Conference. In doing so, I should like to say that the Committee has worked together in a splendid fashion as a team, intent on arriving at decisions which, if approved by the Conference, should serve as a guide for all American States in their vocational training programs. I should like to add a word of praise for the energetic way in which the Chairman guided the deliberations of the Committee. Without this guidance, we certainly should not have been able to finish our work in such a short time. We also owe a debt of gratitude to the members of the Drafting Committee, who spent

many hours putting the resolutions into shape. It is, however, quite certain that we could not have drafted such resolutions as those now before you but for the preliminary work done by the International Labour Office, which prepared an admirable report summarizing the existing situation concerning vocational training in the American countries. We owe thanks to the staff of the Office for the work they have done and particularly to the representatives of the Secretary-General who assisted the Committee throughout its sittings.

The question of vocational training is of particular importance to the countries of this continent, because unless there is a great in-

crease in the training facilities available, the vast programs of industrialization which the Latin American countries in particular are undertaking will necessarily remain merely paper schemes. We have had experience of this situation in my country during the war, when it was necessary to expand our industrial equipment to a very large extent in order to meet the needs of the armed forces. This would have been impossible without a great increase in training facilities of all kinds. Such an increase is still more important in the countries which are in an earlier stage of industrialization.

The Vocational Training Committee presents two draft resolutions. The main resolution sets forth a detailed program for the development of vocational training in each country linking it closely with vocational guidance, and also for continued regional co-operation of the American countries on this question.

I cannot, of course, in the short time at my disposal, refer to all the interesting points which were discussed by the Committee. I may, however, be allowed to mention a few. The desirability of granting full equality to men and women in this field was stressed more than once. There was another question which, in fact, gave rise to a lengthy discussion, concerning the importance of giving preference in employment to workers who have undergone a course of training. It appeared that this proposal was in conflict with long-standing collective agreements in some countries guaranteeing seniority rights to workers already employed in undertakings. The upshot of this very real division of opinion on an important matter was a compromise in which each party made concessions. In this compromise, the Committee recognized that it was no good training workers unless there was work for

them in the occupations for which they have been trained.

There is another point to which I should like to draw special attention and that is the desirability of regional co-operation of the American countries after the end of the present Conference. Even without such collaboration the adoption of the resolutions proposed by the Committee would be useful; but clearly the utility of the work we have done would be greatly increased if means were provided for continuing the co-operation of the American countries, which has been so marked a feature of our discussions here. The resolution before you makes suggestions concerning the exchange of information, the procurement of equipment, the establishment of training facilities among groups of American countries and an exchange of apprentices and trainees. A separate resolution has been drafted which sets forth possible methods of organizing regional training facilities to which the Committee attached particular importance. In the general resolution a proposal is also included inviting the Governing Body to create a sub-committee of its Employment Committee consisting of its American members and additional members if necessary, to consider vocational training questions in the American countries in the future. If the Governing Body accepts this proposal, there will be an opportunity for continual consultation of the countries of this Continent on all questions relating to vocational training, under the auspices of the International Labour Organization.

With these words of explanation, I beg to submit the Report of the Vocational Training Committee to the Conference and to move its adoption.

Annex 3—Resolution Concerning Vocational Training

Whereas—

(1) the organization of vocational and technical training is one of the measures which were stated by the Preamble to the Constitution of the International Labour Organization in 1919 to be urgently required;

(2) in 1938 and 1939, the International Labour Conference in Geneva gave detailed consideration to the problem, and, in the latter year, adopted two Recommendations concerning vocational training and apprenticeship respectively, which have already formed the basis of the structure of vocational training and apprenticeship in the American countries;

(3) in the Declaration of Philadelphia, in 1944, the Conference recognized the solemn obligation of the Organization to further, among the nations of the world, programs which will achieve the assurance of equality of educational and vocational opportunity;

(4) although these Recommendations have a universal character, some of their provisions are of particular interest to the American countries, especially to those in which industrialization programs are being, or will be, undertaken, and which require an adequate supply of skilled labour;

(5) the number of skilled workers can be increased only if facilities are provided for systematic vocational guidance and training of workers in these countries and if their placement in employment is assured;

(6) The Governments and bodies concerned in the American countries have already given careful consideration to the principles laid down in the previous Recommendations in the revision and improvement of their vocational training systems, a fact which proves that the time has come to prepare an inter-American plan of action on vocational training;

For these reasons, the Third Labour Conference of American States Members of the International Labour Organization adopts the following resolutions:

Organizational Basis

1. (1) Vocational training should be developed on the basis of a comprehensive national plan, integrated with industrial and agricultural policy.

(2) It is desirable to define the social and economic objectives of the national vocational training program with a view to—

(a) meeting the immediate and prospective labour requirements of industry and agriculture in each area and in the country as a whole;

(b) providing opportunities for developing the full capacities of the young persons and men and women in each area in the country as a whole;

(c) ensuring that the training program is directed towards the general well-being,

by helping to develop national human and material resources with a view to raising living standards throughout the country.

2. (1) Administrative responsibilities for the development of vocational training facilities should be defined, and measures should be adopted to ensure the systematic co-ordination of vocational training activities and of the work of the authorities concerned with their development, at the national regional and local levels.

(2) Machinery should be established for enlisting the full technical assistance and co-operation, at the national, regional and local levels, of—

- (a) representative organizations of management and labour in industry and agriculture;
- (b) public agencies whose work affects education and planning of production and employment, respectively; and
- (c) other organizations in a position to advance the development of vocational training, including vocational education guidance, vocational education and youth organizations.

Vocational Guidance

3. (1) Measures should be adopted to link vocational guidance with all forms of vocational training, and for relating the choice of training to prospective employment opportunities.

(2) It is desirable to provide, free of charge, technical vocational guidance tests, including any vocational selection of general aptitude tests, and a medical examination for every person about to enter a course of vocational training.

(3) In accordance with these purposes, measures should be adopted to train qualified vocational guidance staff and to select such technical staff, if already available.

(4) Special arrangements should be made for travelling qualified vocational guidance people, able to provide assistance to young people in rural areas.

Pre-Vocational Training

4. In order to relate education closely to national social and economic policy, it is desirable to provide for a vocational bias in the last years of primary and secondary education, and to differentiate the courses offered in urban and rural schools, but without sacrificing general cultural subjects.

Vocational and Professional Training in Specialized Schools

5. (1) At least one industrial training school should be set up in each region, and this basic network should be supplemented as rapidly as possible by more specialized facilities for technical training for particular industries and occupations (including public and social service occupations) and by additional facilities for higher technical and professional training for industry, from the secondary level to the highest professional level.

(2) In order to improve the standard of training offered in commercial schools there should be adequate official supervision, and special efforts should be made to relate the training provided more closely to the requirements of the national economy.

(3) It is desirable that, in drawing up public works and development projects, Governments should, without detriment to general education, grant special facilities for—

(a) the building of vocational schools and the allocation of funds, materials and labour needed for the execution of such projects; and

(b) the equipment of vocational training schools with an adequate quantity of modern and good quality tools, machine tools, machinery and other supplies.

6. (1) A staff of instructors and teachers, adequate in number, skilled in technique and qualified in teaching, should be trained for the vocational schools.

(2) For this purpose, a special instructors' training centre or institute, at which vocational school teachers can receive a preparation for their work and to which they can return at periodic intervals to refresh and modernize their knowledge and techniques, should be set up.

(3) In order to facilitate recruitment of vocational school instructors, measures should be adopted to improve their status and conditions of employment, thus preventing their migration to other more attractive occupations.

(4) Steps should be taken to train administrative staff for vocational schools and centres, by such means as special courses in public administration and co-operation.

7. Access to vocational schools should be facilitated by such measures as—

(a) free attendance and free provision of work clothes, shoes and protective equipment, necessary tools and supplies of all kinds;

(b) free or low-cost mid-day meals and free health care through the schools, as national circumstances permit;

(c) special public transport arrangements aimed at widening the geographic area covered by any school and ensuring that trainees are able to get to the schools and return home without undue loss of time, energy and health;

(d) organization, on a basis of tripartite co-operation, of residential boarding units for young persons of both sexes who live beyond daily commuting distance of vocational training, and payment of maintenance allowances to those forced to live away from home;

(e) payment of vocational training allowances to young persons undergoing a course of training lasting for six months or more, the allowances being granted subject to proof of merit, and, on equality of merit, preference being given to the neediest trainees;

(f) extension of scholarship facilities to promote access to higher technical training.

8. Representatives of employers, trade unions and associations of graduates and alumni should be included in the administrative machinery of vocational schools, the advisory and executive functions of which should be defined locally by special regulations. These representatives should be freely chosen by the organizations most concerned with the curricula offered by the school.

9. It is desirable to encourage industrial research and experimentation in the vocational schools, especially those providing higher technical training, with a view to promoting national industrial development, overcoming technical obstacles, and perfecting methods of training.

10. Measures should be adopted to interrelate the training provided in vocational schools and technical institutes of various kinds

so that the available facilities make up a co-ordinated network through which persons in training may move upwards to the highest forms of training within their capacity.

Apprenticeship

11. (1) It is desirable to establish national State or provincial and municipal apprenticeship committees, composed of equal numbers of employers' and workers' representatives and representatives of the Government Departments most closely concerned with industrial development and vocational training, and charged with encouraging the development and carrying out of apprenticeship programs.

(2) It is desirable to organize a Government service specially equipped with a field staff of experts able to provide technical assistance in the development of apprenticeship programs in the various trades and occupations and within the different undertakings.

(3) Full employer and trade union representation should be ensured throughout each apprenticeship program, by, for example, joint trade and plant apprenticeship committees.

12. (1) It is advisable to formulate a set of uniform basic minimum standards to which every apprenticeship contract must conform.

(2) The application of such standards should be supervised and the standards should be revised to meet changing needs.

13. (1) Measures should be adopted:

- (a) to investigate in which trades it would be useful to establish apprenticeship programs;
- (b) to widen apprenticeship trades for young workers in relation to needs; and
- (c) to spread knowledge of these opportunities and to promote public understanding of the role of apprenticeship in the process of industrialization.

(2) The responsibilities of the State and of the employers' and workers' organizations in these activities should be defined.

(3) There should be official supervision to ensure that for each foreign technician employed in industry preference is given to the engagement of at least one native or naturalized apprentice, qualified to receive technical or vocational training; methods should be adopted establishing the respective responsibilities of the State and of the employers' and workers' organizations in these matters.

In-Plant Training

14. (1) It is desirable to plan a systematic expansion of in-plant training programs, in addition to apprenticeship programs, aimed at enabling each new worker to secure the training essential for the most efficient performance of his own job, and to obtain some understanding of the productive operations of the undertaking as a whole.

(2) It is advisable to develop a system of learnership, organized on the same basic principles as apprenticeship but lasting less long, and aimed at training specialized workers under contract and according to defined standards.

(3) It is desirable to include in any in-plant training plan systematic provision for upgrading and promotion training, aimed at enabling each worker to move into more highly skilled work and to develop his technical skill to the limit of his own ability and the prospective employment openings within the undertaking.

(4) It is desirable to co-ordinate in-plant training programs within any industry with a view to developing greater uniformity of method and to setting standards of technical achievement for the training of the various categories of workers within the industry as a whole.

15. In-plant training programs should be organized with the co-operation and participation of the workers' representatives in the undertaking or of the trade union concerned.

16. (1) It is desirable that the Governments should make efforts to promote the organization of in-plant training schemes and to provide the technical assistance needed for this development, as for example by means of experts and instructors to analyze the training requirements of the various undertakings and to help in getting suitable programs started and running smoothly.

(2) Other methods should be adopted to induce employers to offer suitable facilities for the vocational training of a reasonable quota of young workers (including propaganda and public financial assistance).

Part-Time Supplementary Training

17. (1) Systematic supplementary training should be provided under public auspices, in co-operation with employers' and workers' organizations, for apprentices and all young workers entering industrial or commercial undertakings without prior vocational training.

(2) It is desirable to equip specialized vocational schools to provide this form of training on a part-time basis, and, in addition, to set up special half-time schools for the various industries, offices or undertakings, maintained with the support of the employers concerned, but with public subsidy granted under conditions guaranteeing adequate and well-rounded training and operated in co-operation with the trade unions concerned.

(3) It is desirable to promote greater national uniformity in the methods and curricula of the supplementary training provided in the various industries, occupations and undertakings.

(4) It is desirable to encourage attendance at such courses of all young workers under 18 years of age employed in any undertaking, and, in addition, to require employers to give such persons free time during working hours, and without reduction of wages, in which to take the required courses, and to increase the wages of young workers who make particularly meritorious efforts and who prove by their records that they have increased their capacity by their supplementary training.

Agricultural Training

18. (1) The number of specialized agricultural schools, including schools for stock-breeding and fishing, at the secondary school level, organized on a productive basis, should be increased to ensure that young people in all rural areas have access to such schools by, for example—

- (a) adequate transport arrangements; and
- (b) setting up residential units near to each of these schools, and providing for the maintenance of the pupils at State expense and where necessary for the payment of allowances to their families.

(2) It is desirable to ensure constant improvement in higher technical training for agricultural experts and instructors for agricultural

schools, and to provide greater access to the type of school through an extensive system of fellowships for qualified pupils of the specialized agricultural schools.

(3) It is desirable to equip these institutes to provide short courses for agricultural technicians and refresher courses for teachers of agricultural education and for teachers in all primary rural schools.

19. It is advisable to establish a service of travelling agricultural experts and instructors, paid by the Government, and qualified to spread knowledge of modern methods of agriculture and develop the necessary training programs in each region.

20. In formulating and carrying out programs of agricultural education, it is advisable to secure the collaboration of agricultural enterprises, of agricultural workers, and, in appropriate cases, of local official councils, and their representation in any advisory machinery set up in this connection.

Training and Retraining of Adult Workers

21. Special provision for the training and retraining for all adults should be included in all vocational training programs.

22. (1) Training facilities should be adapted to the use of adult workers, as for example, by special daytime courses and classes in vocational apprenticeship schools, by evening classes in vocational schools, by admitting adult workers freely in in-plant training schemes, or by organizing special centres.

(2) Measures should be adopted to promote the continued technical training and upgrading of adult workers.

23. (1) Measures should be adopted to encourage the expansion and use of training facilities for adults, such as public subsidies to be used for organizing supplementary courses (either during or outside working hours), adequate allowances to adults in full-time training, and for other purposes, and the enlisting of employer and trade union support and co-operation.

(2) Machinery should be set up for special investigation and research, undertaken in co-operation with employers' and workers' organizations, into the need for training facilities for adults, the type and method of training which would be most practical and suitable for the various industries, and the measures needed to promote the organization of suitable facilities to the extent found necessary.

Special Problems of Training

Women

24. (1) Measures, including the orientation of general education towards vocational aims, and vocational guidance, should be adopted to assure women complete access to all forms of training.

(2) It is desirable to investigate women's training requirements for the purpose of determining adequate methods of improving existing training facilities.

Disabled Persons

25. It is desirable to set up machinery for investigating the special training needs of disabled persons and for ensuring that such persons have equal access to all training facilities suited to their capacity. Moreover, organizations and institutions should be established where necessary to undertake the vocational training of the disabled or to intensify such training where it exists.

Special Indigenous Groups

26. Special machinery should be established within the framework of the various vocational training schemes to investigate the vocational training needs of the indigenous population, with a view to incorporating throughout the country, as may be found necessary, suitable and adequate provision for their training for industrial, agricultural and handicraft pursuits, appropriate to their requirements and to those of their country.

Handicapped Children

27. Separate specialized vocational schools should be set up for children with retarded mental development and children with special physical defects.

Homeless Children

28. Measures should be adopted to protect minors who are socially and economically handicapped so that they may enjoy the same vocational training opportunities as other young persons.

Exchange of Information

29. Systematic arrangements should be made to ensure and promote the regular interchange among governments and employers' and workers' organizations of all information useful in developing and improving vocational training facilities.

Procurement of Equipment

30. It is advisable to recommend to governments arrangements for making available, so far as national circumstances permit and on as favourable terms as possible, the machinery and other supplies (including materials) needed for increasing the number and the activities of vocational training schools and workshops.

Co-operative Training Facilities

31. It is desirable to organize, in collaboration with employers' and workers' organizations, co-operative training facilities among groups of American countries, or on a regional basis, for such purposes as establishing centres for the advanced training of selected vocational training instructors to serve as a nucleus for the expansion of specialized training for the various trades and occupations. In order to carry through the regional co-operation of the American countries in vocational training, a body should be set up to promote and co-ordinate courses for the training of skilled workers to be held successively in the different countries, taking into account the degree of technical development achieved in each branch of industrial or agricultural activity in the countries of the Continent.

Exchange of Apprentices and Trainees

32. It is desirable to expand and develop arrangements for an interchange of apprentices and other persons, who are undergoing extended training for which facilities are especially limited, or who have completed the training available in their own country, and for the organization, on a tripartite basis, of a broad network of inter-American vocational training fellowships for this purpose.

Co-ordinating Machinery

33. The Conference invites the Governing Body of the International Labour Office to create a sub-committee of the Employment Committee, consisting of the American members, together with additional members if necessary, with the duties of intensifying inter-American co-operation on vocational training and of co-ordinating adequately the activities of the various American countries.

Application of the Resolution

34. It is desirable that all American States Members of the International Labour Organization should adopt legislation to apply this resolution and to prevent any interference with its application, and particularly to provide all those who have acquired technical skill with real opportunities for employment in the occupations for which they have been trained.

Annex 4—Resolution Concerning the Organization of Regular Inter-American Technical Training Courses of Workers

Whereas paragraphs 29, 30, 31, 32 and 33 of the Resolution on Vocational Training adopted by the Third Labour Conference of American States Members of the International Labour Organization refer to methods of establishing inter-American collaboration in the field of vocational training;

Whereas in the diversified production of America, depending on geographical conditions, many natural resources and enterprises are the same in various countries, which may be grouped in zones of similar production;

Whereas within these zones of similar production, certain countries attain a higher level of technical development in certain types of industries because preference is given to those industries;

Whereas advantages would accrue, both to the whole continent by bringing together the workers of various American countries, and to each nation because the country of origin of the worker who attends courses will thus obtain a worker highly skilled in his particular occupation;

The Conference considers that it would be useful:

(1) That in any country which has reached a higher level of technical development in a particular branch of agriculture, cattle-raising, or industry, practical and theoretical courses should be organized with the help of the workers of the countries which have even the slightest interest in this type of activity;

(2) That these courses should be given either in rotation or concurrently in various American countries, taking into account exclusively their position in a given industrial

branch and the value of training workers in that branch to the other American countries which are engaged in similar industrial operations;

(3) That the number of annual courses and of workers attending them from each country of the production zone concerned should be indicated by the Vocational Training Sub-Committee of the Employment Committee of the I.L.O. recommended to be established as the inter-American co-ordinating body by paragraph 33 of the Resolution on Vocational Training; this body would operate in agreement with the participating countries and the country in which the courses are given;

(4) That the organization of the courses, the program of technical training and the facilities for consequent development, should be the responsibility of the country in which the courses are given;

(5) That the travel and maintenance expenses of the workers attending any particular course should be borne by the country of their origin, these costs being covered by contributions from the Government or from the employers who send workers.

The Conference suggests as examples of possible courses in one year:

- (a) Training of workers in cane sugar and its derivations in Cuba;
- (b) Training of wine industry workers in Chile;
- (c) Training of railroad workers in the United States of America;
- (d) Training of cattle raisers in Argentina.

Annex 5—Resolution Concerning Labour Inspection

Whereas, it is vital to ensure the enforcement of the laws and regulations for the protection of employed persons; and

Whereas, the effectiveness of such legislation is wholly dependent upon the adequacy of its administration and enforcement; and

Whereas, universal experience has shown that enforcement can be ensured only through the agency of a system of labour inspection possessing ample authority, suitably directed and adequately staffed with competent persons who visit workplaces at sufficiently frequent intervals to ensure that the provisions of the labour legislation in force are properly understood by the employers and work people concerned, and are in fact being effectively applied; and

Whereas, a review of existing labour inspection conditions in the American countries re-

veals that employers and workers are frequently justified in complaining of the incompetence and inexperience of labour inspectors; and that the enforcement of labour legislation frequently lags far behind the enactment of such legislation; and

Whereas, Article 41 of the Constitution of the International Labour Organization declares that each State should make provision for a system of inspection in order to ensure the enforcement of the laws and regulations for the protection of the employed; and

Whereas, mutual confidence in respect of the effective application of ratified International Labour Conventions can only be assured if each ratifying country is convinced that the provisions of the National measures by which such Conventions are implemented, are strictly enforced by other ratifying countries;

The Third Conference of American States Members of the International Labour Organization resolves as follows:—

I. Nature and Scope of the Inspector's Duties

1. It should be the primary duty of a labour inspectorate to ensure, through personal visits to the work places, that the provisions of laws, regulations and contracts of employment in force at any given moment relating to the conditions of work and the protection of the workers while engaged in their work are properly understood and applied by the employers and work people concerned, and, where necessary, to supply technical information to the employers and work people concerning the most appropriate and effective means of complying with such laws and regulations.

2. Without prejudice to the performance of the advisory, educational and technical functions specified in the preceding paragraph, the individual inspector should possess sufficient authority and should not hesitate to take whatever proceedings may be necessary to ensure respect for the laws, regulations and contracts of employment.

3. Any accessory tasks, which may, in view of their special knowledge, experience and competence, be entrusted to the labour inspectors should not be of such a nature or extent as to interfere with the efficient carrying out of their due quota of inspection visits; and in the assigning of any such accessory tasks to members of the inspection staff due account should be taken of any local conditions which may make the carrying out of the latter duties particularly difficult or arduous.

4. Labour inspectors should be excluded by law from performing conciliation and arbitration functions.

II. Administrative Organization

5. In each State, province or country as the case may be, labour inspection should be placed under the direction of a single central authority.

6. District inspectors should be convened to periodical conferences at headquarters not less than once a year in order to discuss their technical and administrative problems among themselves and with members of the headquarters staff.

7. In a federal country, where labour inspection lies partly or wholly within the competence of State or Provincial authorities, the Federal Government should take all appropriate steps to encourage the maintenance of uniform standards of law enforcement. The convening of national conferences of labour inspectors, the organization of courses of technical instruction, and the preparation and distribution by the Federal Government of manuals of inspection practice and model forms may be regarded as appropriate means towards the attainment of this end.

8. The work of inspection should be subdivided in such a way that a single inspector is not expected to perform too great a variety of technical tasks. For example, a single inspector should not be called upon to perform tasks requiring a high degree of technical competence in regard to *both* industrial health and safety on the one hand, and bookkeeping and accountancy on the other.

9. The competent administrative authority should provide the inspection service with: adequately equipped offices; as far as possible, appropriate clerical assistance; all necessary office and postal expenses; and all costs involved in travelling by inspectors to whatever extent

may be necessary in order that they may visit and inspect, at reasonably frequent intervals, all the work places in the districts assigned to them.

10. Certain measures should be undertaken to enlarge the interest and enlist the increased support of organized employers and workers, as well as the general public, for the organization, maintenance and financing by the State of an efficient labour inspection system. Subject to appropriate discretionary safeguards, these measures might include dissemination of more general public information concerning working conditions and remedial measures taken or needed; and, in addition to the performance of ordinary inspection duties, the demonstration by inspection officials to the public of the effectiveness of their services.

III. The Inspecting Staff

11. In the selection of candidates for posts as labour inspectors, importance should be attached to attracting to the service persons possessing practical and technical knowledge of the problems with which an inspector is faced in the course of his inspection visits, as well as the necessary minimum of general education.

12. Competitive examinations may be regarded as an appropriate means of ensuring impartiality in the choice of recruits to an inspection service; but, in the organization of such competitive examinations, a system of weighting should be adopted which will take due account of the importance to be attached both to the technical and practical experience of candidates and to their qualities of personality.

13. Appropriate steps should be taken to secure the training of new inspectors, after their entry into the service, to the duties which they will be called upon to perform, and their initiation in the performance of their duties under the adequate training of a senior inspector.

14. With a view to facilitating the exchange of knowledge and experience on the international plane, and thus contributing to the efficiency of national inspection services, arrangements should be encouraged for enabling the inspectors of the various countries to visit other countries and to be attached for a suitable period to the inspection services of such countries, in order that they may obtain a real insight into the methods of organization and work. It is also desirable that full advantage should be taken of such facilities as may be available through the International Labour Organization. In particular, the practice already adopted by the International Labour Office of inviting labour inspectors from various States Members to spend a probationary period at the Office is welcomed, and the hope is expressed that this practice may be maintained and extended. It is desirable that every advantage should be taken of the possibilities offered by the Agenda of each successive Session of the International Labour Conference to send members of the inspection service to those Sessions as members of the national delegation. Further, it is noted that the International Labour Office has initiated the holding of a series of Regional Conferences of representatives of labour inspection services. The Conference welcomes this step and hopes that such conferences will be held at sufficiently frequent intervals in American centres.

15. In order to ensure the competence and independence of the members of the labour inspection staff, the following principles are recommended:—

- (a) Candidates for posts in the inspection service should be selected solely on the basis of their personal competence, to the exclusion of any political or party considerations.
- (b) With due regard for existing conditions in respect of the organization of the national public service, members of the inspection service should enjoy the assurance of a permanent career in the services, with adequate facilities for promotion and the right to a pension on retirement, provided that their records of conduct and efficiency are satisfactory.
- (c) In view of the delicate and difficult nature of a labour inspector's duties, salaries should be fixed at a level which will attract suitable candidates. The level of salaries should be such that, in combination with the prospects of secure employment to which allusion has been made in the preceding subparagraph, they will offer an incentive equivalent to those that apply in the case of members of the liberal professions and holders of managerial posts in commerce and industry in each country.

16. The conference welcomes the progress that has been made in various countries in the employment of women inspectors. It urges that women inspectors should enjoy equivalent conditions in regard to pay and prospects of promotion as compared with their male colleagues.

IV. Co-operation with Employers and Workers

17. In addition to the qualities of tact, discretion, impartiality and moral uprightness which every inspector should display in his dealings with all concerned, an inspector should also conform to the following rules and standards in order to capture the confidence of employers and workers respectively:—

- (a) His technical competence should be such that he will be in a position to offer really useful technical advice and information to most employers in regard to the most suitable methods of protecting the health and safety of the workers, maintaining their morale, and thus improving their economic efficiency; and he should possess and display firmness and moral authority sufficient to convince the employer that his opinion on such technical matters is worthy of the closest attention. Under no circumstances should he accept a present or a service from any employer, worker or organization, except insofar as they may be required by law—e.g., transport facilities or accommodation in outlying centres.
- (b) In order to win the confidence of the workers, the inspector should give serious

attention to all complaints of violations of the laws, regulations and contracts of employment, in respect of which he is competent, and investigate all cases of contraventions as may be reported to him. He should treat all such reports and complaints as absolutely confidential.

18. Every inspector should endeavour to obtain the co-operation of employers and workers, of their accredited organizations, and of joint bodies, such as works safety committees, in ensuring proper enforcement of the laws and regulations in regard to which he is competent, provided that he should not delegate any part of his official authority to such persons or bodies, and that their activities should in no way infringe upon his official responsibilities.

V. Frequency and Thoroughness of Inspection

19. The Conference calls attention to the fact that no inspection service can be considered to be performing its proper function unless the work places placed under its supervision are in fact visited and thoroughly inspected at sufficiently frequent intervals. It subscribes to the standard laid down in Paragraph 18 of the Labour Inspection Recommendation, 1923, viz. that, in principle, "every establishment should be visited by an inspector for the purpose of general inspection not less frequently than once a year, in addition to any special visits that may be made for the purpose of investigating a particular complaint or for other purposes." Insofar as it may be impossible to maintain such a standard in respect of outlying work places in sparsely inhabited areas, it recommends that steps be taken to ensure that such work places are competently inspected by at least one government authority (e.g., the mines inspectorate or the department of public health) with due frequency, and that arrangements be made between the labour inspection service and such other authority in order to ensure that, so far as possible, advantage is taken of such inspection visits to verify the enforcement of labour laws and regulations and to investigate complaints in that connection.

VI. Reports on Inspection Activities

20. The Conference draws attention to the provisions of Paragraph 21 of the Labour Inspection Recommendation, 1923, to the effect that the competent central authority "should publish an annual report as soon as possible, and in any case within one year after the end of the year to which it relates, containing a general survey of the information furnished by the inspectors"; and to the provisions of Paragraph 23 of the said Recommendation concerning the information that should be supplied in such published reports. It suggests that all concerned should bear in mind, the indispensability of such publicly available information both for the purpose of ensuring the effectiveness of protective labour legislation and in order to provide a basis for confidence, both at home and abroad, in the effective enforcement of the national labour legislation.

Annex 6—Resolution Concerning Labour Inspection in Agriculture

Whereas, in many of the American States Members of the International Labour Organization, there are social and labour laws applicable to agricultural and stock-raising activities; and

Whereas, both Employers and Workers are interested in the extension of such legislation and its more effective application;

The Third Conference of American States Members of the International Labour Organization recommends that, on the basis of standards approved by the Organization Governments

should consider the extension of their systems of labour inspection to cover agricultural and stock-raising activities.

Annex 7—Resolution Concerning Constitutional Provisions for Freedom of Association

Whereas, the freedom of men and peoples in its various forms is one of the essential principles of democracy and has been and is one of the aspirations of the peoples of America;

Whereas, the fundamental liberties of man must be included in the political constitution of each country; and, as in the past, "Bills of

Rights" were embodied in the different Constitutions so in the future, social rights, among which freedom of association stands in the first rank, should likewise be secured;

The Conference therefore resolves that:

The American States should guarantee freedom of association in their constitutions.

Annex 8—Resolution Concerning Freedom of Association

Whereas, the Constitution of the International Labour Organization affirms the principle of freedom of association;

The Declaration of Philadelphia proclaimed anew that freedom of association is essential to sustained progress;

The Regional Conferences of the American States Members of the International Labour Organization meeting at Santiago and Havana in several resolutions called the attention of the International Labour Organization to the necessity of ensuring the application of the principle of freedom of association; and

The recognition of the right of association is essential to the working of the International Labour Organization, which brings together in a common effort the Governments and the most representative trade organizations of employers and workers; and

Whereas, living standards, the normal functioning of the national economy and social and economic stability are dependent on a soundly organized system of industrial relations in which the interested parties have placed their trust; and

Organizations of employers and workers cannot usefully carry out their tasks unless they are granted the largest measure of independence from the public authorities; and freedom of association must be the foundation of a stable system of industrial relations.

The Conference calls the attention of the States Members of the Americas to the following

principles which seem to constitute an adequate definition of freedom of association:

(1) Employers and workers, whether public or private, without distinction of occupation, sex, colour, race, creed or nationality should be entitled to form organizations of their own choosing without previous authorization;

(2) Organizations of employers and workers should be granted full autonomy in organizing their administration and activity, in drawing up their constitution and administrative rules, and in framing their policies;

(3) Organizations of employers and workers should not be subject to dissolution by administrative orders. In those countries where forced dissolution is imposed by way of penalty for certain acts deemed illegal, the trade unions should be entitled to the full protection of the appropriate procedure;

(4) Organizations should have the right to constitute federations and confederations of trade organizations.

The formation, operation and dissolution of federations and confederations should not be subject to formalities other than those prescribed for employers' and workers' organizations;

(5) Where the acquisition of special privileges by organizations is subordinated to certain conditions of substance and of form, these conditions should not be such as to imperil freedom of association as defined above.

Annex 9—Resolution Concerning Protection of the Right to Organize and to Bargain Collectively

Whereas, the Declaration of Philadelphia has proclaimed the need for the effective recognition of the right of collective bargaining; and

Whereas, it is in the interest of all the parties that conditions of employment be determined by collective bargaining; and

Whereas, collective bargaining can only be based on the due observance of the right to organize of all the interested parties and on the acceptance in good faith of the principle of collective bargaining; and

Whereas, it is therefore the duty of the State to safeguard the exercise of the right to organize and to facilitate collective bargaining by all possible means,

The Conference calls the attention of the States Members of the Americas to the following

principles which seem to provide a suitable basis for the regulation of collective bargaining.

I. Protection of the Exercise of the Right to Organize

(1) In view of the fact that the individual worker's right to organize may be placed in jeopardy by discriminatory measures directed against him at the time of hiring or during tenure of employment, the law should particularly prohibit on the part of the employer or his agents all acts designed to:—

(a) make the hiring of the worker subject to the express condition that he does not join a certain trade union or withdraws

- from a trade union of which he is already a member;
- (b) prejudice or injure in any manner whatsoever a worker on account of his being a member, agent or official of a certain trade union;
 - (c) dismiss a worker for the sole reason that he is a member, agent or official of a certain trade union;
 - (d) in general, exert any kind of pressure upon a worker with the object of compelling him to join or not to join a certain trade union.
- (2) With a view to ensuring that collective bargaining be undertaken in good faith, the law should particularly prohibit on the part of the employer or of the employers' organization or their agents, all acts designed to:—
- (a) promote the formation of trade unions controlled by the employer;
 - (b) interfere in the formation or administration of a trade union, or support it by financial means or other support; except that an employer should not be prohibited from permitting workers to confer with him during working hours without loss of time or pay, and further that nothing in this section should prohibit the collection of dues.
 - (c) hamper the exercise of the workers' right to form organizations, conclude collective agreements and take concerted action for the defence and protection of their interests;
 - (d) refuse to recognize trade unions and to negotiate with them with a view to the conclusion of collective agreements.

It should however be understood that a clause in a collective agreement requiring compulsory membership in a certain trade union, not only as a condition precedent to employment but also as a condition of continued employment, is not barred by this resolution.

(3) Appropriate legislative measures should safeguard in each country the exercise of labour union rights and the legitimate activities of the labour leaders, particularly during the preparation, and the period of, strikes so that labour leaders may not be dismissed, prosecuted or deprived of their liberties because of their union activities.

II. Collective Bargaining Machinery

(1) The State should undertake to place at the disposal of the parties, agencies to secure the due observance of the right to organize as defined above.

(2) These agencies should be given exclusive power, insofar as the judicial system permits, to take cognizance of, and impose penalties for, violations of the exercise of the right to organize.

(3) The agencies should be entrusted with the authority to determine which labour organization represents a majority of the workers for collective bargaining purposes. In case of disagreement they should hold a secret ballot election and certify the union which represents the majority of those voting in the appropriate collective bargaining unit as the exclusive representative of all the employees in such unit for the purposes of collective bargaining.

Annex 10—Resolution Concerning Voluntary Conciliation and Arbitration

Whereas, the Havana Conference adopted a Resolution, No. XXIV, stressing the need to establish in all countries conciliation and arbitration agencies and to place them at the disposal of the parties for the prevention and adjustment of collective labour disputes, and

Whereas conciliation and arbitration machinery set up by agreement of the parties concerned is generally considered to be the most suitable means of reaching an agreement; and

Whereas in the absence of contractual machinery or in the event of its failure to function successfully, the State should place at the disposal of the parties official machinery for voluntary conciliation and arbitration,

The Conference calls the attention of the States Members of the Americas, to the following principles which it considers should be the basis of any system for the voluntary adjustment of collective labour disputes.

I. Voluntary Conciliation

(1) Conciliation agencies should be established on a permanent basis in all parts of the country and should be in sufficiently large numbers to assist the parties whenever a labour dispute becomes imminent.

(2) In those countries which have a formal conciliation machinery and where the agencies operate on a group basis, they should be tripartite in character. Labour organizations concerned in a dispute should be permitted to intervene in all stages of the proceedings.

(3) Conciliation procedures should be free of charge and expeditious. The delays for the

appearance of the parties and the hearings of the evidence should be fixed in advance and reduced to a minimum.

(4) Recourse to conciliation procedures should be voluntary, but, once a dispute has been submitted to a conciliation agency by consent of all the parties concerned, the parties should agree to refrain from strike or lockout while conciliation is in progress.

(5) The parties should be free to accept or reject the recommendation of the conciliation agencies. But once a recommendation has been accepted, it should be binding on the parties.

(6) Agreements arrived at by the parties in the course of the proceedings as well as recommendations of the conciliation agencies that are accepted by the parties should legally have the same force as voluntarily concluded collective agreements.

II. Voluntary Arbitration

(1) There should be instituted voluntary arbitration machinery which may be resorted to either before or after conciliation procedures.

(2) Recourse to arbitration should be voluntary. But once a dispute has been submitted to arbitration by consent of all the parties concerned, the parties should agree to accept the award.

(3) Arbitration awards should have the same legal force as collective agreements voluntarily agreed to by the parties.

Annex 11—Resolution Concerning the Validity of Collective Agreements

Whereas collective agreements constitute the most appropriate means for the regulation of wages and other conditions of employment and the parties to such agreements must be entirely free to determine their substance, scope and duration; and

Whereas machinery should be provided to ensure that the provisions of a voluntarily concluded collective agreement are duly observed by all the employers and workers engaged in undertakings, occupations or industries covered by the collective agreement,

The Conference calls the attention of the States Members of the Americas to the following principle which should serve as a guide for the future elaboration of national laws and regulations respecting the validity of collective agreements.

The provisions of the collective agreements should be applicable to all the workers in the appropriate collective bargaining unit in the undertaking or undertakings even though they are not members of the organization which concluded the agreement.

Annex 12—Resolution Concerning the Extension of Collective Agreements

Whereas the employers and workers who accept in good faith the principle of collective bargaining should be protected against the adverse effect of unfair competition in regard to the regulation of conditions of work, and

The extension of collective agreements to certain minorities appears to be the most appropriate means to ensure stability in the regulation of conditions of work as established by collective agreements; and

The interest of such minorities must be duly safeguarded,

The Conference calls the attention of the States Members of the Americas where extension of collective agreements is or may be provided for by national laws or regulations, to the following principles and conditions which should be at the basis of national laws and regulations:—

(1) The collective agreements should be made applicable only to the employers and workers

who operate within the industrial or territorial scope of the agreement as determined by the contracting parties.

(2) Only those collective agreements which have been voluntarily agreed to and which bind the majority of the workers and the majority of the employers (who must also employ the majority of the workers), may be the subject of the legal extension.

(3) The employers and workers who may be brought under the provisions of the collective agreement must be previously consulted and authorized to submit their observations and objections.

(4) The extension of a collective agreement should only be effected if the competent authority is satisfied that the employers to be brought under its provisions are in a position to enforce the conditions of employment stipulated in the agreement without endangering the economic existence of the undertakings.

Annex 13—Resolution Concerning Wage Policy

Whereas the economic prosperity of a nation is dependent upon its production of wealth in all forms; and

Economic demand for wealth-production is dependent upon the capacity of the people to use and consume such wealth; and

The consumption of wealth is dependent upon the wages paid, such wages constituting the measure of economic prosperity and the purchasing power of the people; now

The Third Regional Conference of the American States Members of the I.L.O. therefore Resolves:

(1) That as a matter of basic, economic self-interest, the principle of the highest possible real wages, in order to establish, raise and maintain buying power, is recognized and endorsed in behalf of the economic interest of both employer who develops and wage earner who produces;

(2) That this principle of high real wages and high buying power, together with the effort to put it in practice, establishes a basis for greater production by reducing labour strife to a minimum.

Annex 14—Resolution Concerning Equal Pay for Equal Work

Whereas the idea of democracy, the ideal for which all the peoples of America are struggling, has as its fundamental principles the liberty and equality of all men;

Whereas the idea of democracy requires that men receive the same treatment when the same conditions obtain, a situation which may be expressed in the general principle of equality before the law;

Whereas, if these principles are to be enforced it is indispensable that workers should receive the same treatment when they are in identical conditions—a situation which may in turn be expressed in the principle of equal pay for equal work;

Whereas the principle of equal pay for equal work was recognized in the Treaty of Versailles

as one of the immediate objectives of the International Labour Organization;

Whereas the States Members of the Americas should take the steps calculated to secure application of this principle;

Whereas the Committee on Industrial Relations has resolved that differences of race, colour, creed, sex or nationality may not be used as ground of discrimination between workers;

The Third Conference of the States Members of the Americas resolves that:

For work of equal value, equal pay should be required, without distinction of race, colour, creed, sex or nationality.

Annex 15—Resolution Concerning Stability of Employment

Whereas to secure greater harmony between workers and employers, it is necessary that the principle of good faith should govern industrial relations;

Whereas labour is the source of income of the workers, and they are naturally concerned about the danger of unemployment;

Whereas, in order that workers may look forward calmly to the future and engage with efficiency and satisfaction in the work which they perform in any establishment, they need the guarantee that, provided their services are satisfactory and contribute to the success of production, they will not be dismissed by their employers;

Whereas arbitrary dismissal of workers helps to give rise to a spirit of uneasiness and dissatisfaction which deprives the worker of all interest in the success of the undertaking he serves;

Whereas stability of employment of workers gradually establishes certain rights—of promotion, wage bonuses, old age pensions, etc.;

Whereas it is unjust that workers should be exposed to the loss of their legitimately acquired rights;

The Third Regional Conference of the States Members of the Americas resolves that:

States should adopt measures calculated to secure stability of employment for the workers.

Annex 16—Resolution Concerning the Placing of the Question of Industrial Relations on the Agenda of Early Sessions of the Regional Labour Conference and of the International Labour Conference

Whereas the Third Regional Conference of the American States Members of the I.L.O. has adopted a certain number of Resolutions determining certain principles which should be at the basis of the regulations of collective labour relations;

Whereas the problem of industrial relations is of equal importance in all parts of the world;

The Conference requests the Governing Body to place the question of industrial relations on the agenda of early sessions of other Regional Conferences and of early sessions of the International Labour Conference.

Annex 17—Resolution Concerning Collaboration between the Public Authorities and the Employers' and Workers' Organizations

Whereas the New York Conference (1941) has recognized the universal and permanent value for all States of the effective collaboration between the public authorities and the employers' and workers' organizations, and has requested the Governing Body of the International Labour Office to place the question of the methods of collaboration on the agenda of an early session of the Conference;

Whereas, in the Declaration of Philadelphia, the Conference recognizes the solemn obligation of the International Labour Organization to further among the nations of the world programs which will achieve among other objectives:—

the co-operation of management and labour in the continuous improvement of productive efficiency and the collaboration of workers and employers in the preparation and application of social and economic measures;

Whereas reconversion from a war economy to a peace economy, the reconversion of the countries devastated by the war, and the industrialization of the countries which are economically less developed, require a sustained and concerted effort on the part of the Governments and the organizations of employers and workers;

Whereas a large number of States have in fact resorted to co-operation with employers' and workers' organizations for the furthering of their programs of reconversion, industrialization or reconstruction;

The Third Regional Conference of American States Members of the I.L.O. requests the Governing Body to entrust the Office with the task of making an enquiry into the methods of collaboration in the different countries with a view to placing that question on the agenda of an early session of the Conference.

Annex 18—Resolution Concerning Industrialization

Whereas the industrialization of Latin-American countries is indispensable to the attainment of higher standards of living, a better equilibrium in economic structures, increased international trade, and at the same time, greater economic independence, and

Whereas the Declaration of Philadelphia imposes on the International Labour Organization the obligation to further among the nations of the world programs which will achieve rising standards of living,

The Third Conference of the American States Members of the International Labour Organization

Resolves:—

(1) To recommend that the Governing Body call to the attention of the Economic and Social Council of the United Nations the desirability of studying in the near future, in co-operation with the International Labour Organization and other interested bodies such as the International Bank for Reconstruction and Development and the Food and Agriculture Organization, the most efficient methods of facilitating the process of harmonious industrialization of the Latin-American countries which is an indispensable basis for their social welfare; and

(2) To recommend that the Governing Body transmit to the Social and Economic Council of the United Nations, Chapter I of the Director's Report to this Conference which constitutes a valuable guide for the study of industrialization and discusses the different measures which are considered appropriate and adequate to achieve industrialization, such as public and private investment and credits, development of natural resources, and an adequate system of customs tariffs, and

(3) To recommend that the Governing Body transmit also to the Social and Economic Council of the United Nations the Resolutions and the Record of Proceedings of this Conference, which contain valuable statements by many delegates relative to the peculiar problems of the economic structure of their respective countries and ways and means desirable for the achievement of industrialization under varying conditions.

Annex 19—Resolution Concerning Inflation

Whereas inflationary tendencies are at work in many countries of the world which, if unchecked, will bring down real wages and lower the standard of living, and

Whereas it is desirable that the State take prompt and effective measures to prevent hoarding and check speculation, to increase production and to bring about a proper relationship between wages and salaries and commodity prices.

The Third Conference of the American States Members of the International Labour Organization

Resolves:—

(1) That the Government delegates present at this Conference be requested to

bring to the attention of their Governments the chapter of the Director's Report which contain an interesting description of the methods used in different countries, under varying conditions, to check inflationary tendencies which result in reducing standards of living;

(2) That the Governing Body be requested to take adequate measures to continue the study of this problem in collaboration with the other competent international organizations and report on the results obtained to the next International Labour Conference.

Annex 20—Resolution Concerning Statistics

Whereas the development and standardization of labour statistics, a task in which the International Labour Office has accomplished one of its most important efforts, is of urgent necessity in gaining knowledge of the social reality in each country;

Whereas without this knowledge the possibilities of facing and solving with certainty the economic and social problems of the post-war period are limited, as well as those of co-ordinating internationally the action of the countries Members of the International Labour Organization;

Whereas the Second Conference of American States Members of the International Labour Organization, held in Havana in 1939, adopted a resolution requesting the International Labour Office to carry out its work on this matter with particular regard to the American countries; and

Whereas the development of the methods employed in labour statistics and their standardization should agree with that of other economic and social statistics or statistics of a general character such as population, agricultural and industrial censuses, a field in which the Inter-American Statistical Institute has done important work on this Continent, the

Third Conference of American States Members of the International Labour Organization

Resolves:—

(1) To request the Governing Body to bring to the attention of the International Labour Office the desirability:—

(a) of intensifying the development of labour statistics and their international standardization;

(b) of carrying out, for statistical purposes, a technical classification of manufacturing industries with a view to distinguishing the principal factors and elements which make up their various branches;

(c) of requesting the co-operation of the Inter-American Statistical Institute and other competent international organizations, with a view to achieving these aims.

(2) To recommend to the Governments of the American States Members of the International Labour Organization which have not yet ratified the Convention concerning statistics of wages and hours of work of 1938, that they should do so as soon as possible.

Annex 21—Resolution Concerning Industrialization and Vocational Training

Having heard the delegations of the American Countries represented in the Vocational Training Committee of the Conference concerning the problem of vocational training, who are in agreement with the thought and doctrine expressed by the delegates taking part in the plenary sittings of the Conference, and considering the necessity of incorporating these opinions in precise terms which can influence

the future legislation of the States Members of the International Labour Organization;

The Third Conference of the American States Members of the International Labour Organization

Resolves:—

(1) To declare that, in order to obtain the economic and social improvement of the population, it is urgently necessary to

promote, on a basis of technical and vocational organization, industrial development in each of the regions or zones which have not yet begun their industrialization, with a view to giving the populations, by means of adequate vocational training, the skills needed to produce more than is necessary to meet their minimum requirements and those of their families, in order to raise constantly their economic and social standards;

(2) To recommend, that, for this purpose, each State study through its technical organizations the specific possibilities of development of each region or zone, to stimulate industrial and agricultural production; and

(3) To recommend the exchange of students and technicians by means of reciprocal grants or scholarships for training and refresher courses.

Annex 22—Resolution Concerning the Ratification of the Instrument for the Amendment of the Constitution of the International Labour Organization

Whereas, the International Labour Conference adopted in Paris, on November 5, 1945, a resolution drawing attention to the importance of prompt ratification of the Instrument for the Amendment of the Constitution of the International Labour Organization, adopted on the same date, as a necessary preliminary to the fuller consideration of constitutional questions at the next session of the Conference:

The Third Conference of American States Members of the International Labour Organization:

Urges all Governments represented at the present Conference to take the necessary measures at the earliest possible date to ensure that the Instrument will have been ratified by all Members before the opening of the next general session of the Conference.

Annex 23—Resolution Concerning the Readmission to the International Labour Organization of the American States which are not Members

Whereas, four American States are not active Members of the International Labour Organization;

Whereas, it is a duty of continental solidarity to seek the co-operation of all the American States within the International Labour Organization in order to secure a concerted and effective effort in favour of social justice;

Whereas, the fact that some of these States, not active Members of the International Labour Organization, have participated as observers in recent sessions of the International Labour Conference and in the present Labour Conference of American States Members of the International Labour Organization, shows their interest and desire to collaborate in the work of the Organization;

Whereas, the 26th session of the International Labour Conference held in Philadelphia in 1944

adopted a resolution expressing the keen desire of the Organization that all the American States should be represented in the International Labour Organization;

The Third Labour Conference of the American States Members of the International Labour Organization:

(1) Expresses its desire that El Salvador, Honduras, Nicaragua and Paraguay should become Members of the International Labour Organization.

(2) Recommends the Governing Body to invite these countries to join the International Labour Organization and to take steps to secure their admission at an early date, in order that, at the next session of the International Labour Conference, which will take place in Montreal in September 1946, all countries of the American Continent will be represented as Members.

Annex 24—Resolution Concerning the Organization of National Labour Conferences

Whereas, for the convenient solution of the economic and social problems which the International Labour Organization is considering, direct contact between the people and their Governments is necessary in order that the conclusions reached in this way may serve as a basis for the studies which the International Labour Organization may undertake with a view to proposing common solutions for adoption by the States Members of the Organization;

Whereas, National Labour Conferences have been held in various countries with a great deal of success and this example might usefully be followed in other countries;

The Third Conference of American States Members of the International Labour Organization recommends:

(1) That the States Members of the International Labour Organization should encourage

the holding of National Labour Conferences in which properly designated representatives of workers and employers may participate together with the Government, that is, tripartite Conferences;

(2) That the States Members of the International Labour Organization should communicate to the International Labour Office the dates of the meetings of such Conferences in order that the Organization may be represented;

(3) That the States in which such Conferences are held should in each case print a report of the proceedings and send a copy to the International Labour Office;

(4) That at future Regional Conferences the International Labour Office should present information derived from these reports, together with relevant recommendations.

Annex 25—Resolution Concerning the Situation of Professional Workers

Whereas, the majority of professional workers and teaching staff are in a special situation since they are neither workers nor employers:

The Third Conference of American States Members of the International Labour Organization:

Requests the Governing Body of the International Labour Office to consider the most appropriate method for completing and bringing up to date the studies already undertaken by the Office with regard to the conditions of work of professional workers and teaching staff, in order to submit to the International Labour Conference the various aspects of the problem according to the progress realized in the above-mentioned studies.

Annex 26—Resolution Concerning Discrimination

At the request of the Workers', Employers' and Government delegates of the Republic of Panama;

Realizing that discrimination based upon race, colour, creed, sex or national origin is repugnant to the principles embodied in the Declaration of Philadelphia, the Act of Chapultepec and Recommendations adopted by the International Labour Conference;

Realizing that the American States Members of the International Labour Organization subscribe to the principle that "all human beings, irrespective of race, colour or sex, have the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity"; and

Realizing, nevertheless, that it will require the determined effort of Governments, employers and workers of each Member country to translate these high principles into actual effect:

The Third Conference of American States Members of the International Labour Organization calls upon all Member Governments and the people who compose such Governments to—

(1) Aim effectively to establish the principles of equal treatment and equal wages for work of

equal value in the same operation and undertaking, and to prevent unjust discrimination directed against workers by reason of their race, colour, creed, sex or national origin in respect of wage rates and other conditions of labour;

(2) Take all practicable measures to lessen any existing differences in wage rates and conditions which are due to discrimination by reason of race, colour, creed, sex or national origin by raising the rates and improving the treatment applicable to the lower paid workers;

(3) Recognize that reasonable allowances for personal or family expenses may be made to workers engaged for employment from distant countries, to compensate for the added cost and inconveniences of such employment; and

Recommends that wherever allegations are made of discrimination in one country against the nationals of another, as set forth in paragraph (1), the Member Governments concerned should, through the medium of joint committees or other suitable agencies, study the facts and recommend remedial action; and

Requests the Governing Body of the International Labour Office to make the services of the Organization available in such situations whenever the Governments concerned jointly request its assistance.

Annex 27—Resolution Concerning the Extension of the Services of the International Labour Office in Relation to American Countries

Whereas, the development and importance of social problems in America makes it necessary to endow the International Labour Office with more appropriate means of action for the study of such problems;

The Third Conference of American States Members of the International Labour Organization requests the Governing Body to consider the advisability of establishing as soon as circumstances permit:

- (1) A regional branch office in Latin America similar to those which exist in Washington and London;
- (2) Correspondents' offices in those American countries Members of the Organization in which no correspondents have so far been appointed;
- (3) A service entrusted with the task of studying within the Office the economic problems of Latin America.

Anex 28—Resolution Concerning Training within Industry

Whereas, some of the United Nations during the last world war developed a new training technique, known by the name of "training within industry", which has demonstrated its unquestioned effectiveness and has already, to some extent, been applied with success in a few Latin-American countries;

The Third Conference of American States Members of the International Labour Organization:

Requests the Governing Body of the International Labour Office to consider the possibility of placing the question of "training within industry" on the agenda of an early session of the International Labour Conference.

Annex 29—Resoluton Concerning Migration

The Third Labour Conference of American States Members of the International Labour Organization:

Attaches great importance to the systematic organization of migration with a view to assist-

ing the agricultural and industrial development of the American countries;

Supports the resolution of the 26th Session of the International Labour Conference, held at Philadelphia in April-May 1944, to the effect

(a) that the United Nations should encourage by appropriate measures, with adequate safeguards for all concerned, the orderly migration of labour and settlers in accordance with the economic needs and social conditions prevailing in the various countries, and (b) that an enquiry should be made by a commission appointed by the Governing Body of the International Labour Office as to the means necessary to protect the interests of labour both against barriers which prevent migration from areas of limited resources and also against the lowering of labour standards that might result from immigration at a rate exceeding the capacity of the receiving country to absorb immigrants:

Believes that the unilateral regulation of migration should be supplemented by bilateral multilateral agreements;

Notes with great interest the chapter on "Migration" in the Director's Report to the present Conference, including particularly the information on the international action that has already been undertaken and that may be

undertaken in the future and the speeches made in the discussion of the Report in the Conference.

Urges all American Members of the International Labour Organization to give urgent consideration to the possibility of ratifying the Draft Convention and of applying the Recommendation concerning the recruitment, placing and conditions of labour of migrants for employment adopted by the International Labour Conference in 1939;

Notes that the Governing Body of the International Labour Office has decided to convene the Permanent Migration Committee as soon as circumstances permit for the consideration of future prospects of migration, forms of international co-operation suitable for facilitating the organized resumption of migration movements, and racial discrimination in respect of migration; and

Requests the Governing Body to fix the date of the meeting at the earliest possible moment and suggests that it should add to the Committee's agenda the question of the technical selection of migrants.

Annex 30—Resolution Concerning Indigenous Populations

The Third Conference of the American States Members of the International Labour Organization:—

Having taken note of the Acting Director's Report and of the draft resolutions embodied in the Report of the Sub-Committee on problems of indigenous populations;

Finding it impossible at this stage to come to definite conclusions as regards the numerous and valuable suggestions contained therein;

Convinced, however, that these suggestions can be regarded as a useful basis for the further study of the problems of indigenous populations;

Recommends to the Governing Body of the International Labour Office that it should establish a Committee of experts on social problems of the indigenous populations of the world;

And decides to transmit to the Governing Body of the International Labour Office, for subsequent communication to the proposed committee of experts, as a basis for its studies, the Director's Report and the draft resolutions embodied in the report of the sub-committee on the problems of indigenous populations.

(The Conference left it to the Office to add a further paragraph to the effect that the Committee of experts on social problems of the indigenous populations, to be set up by the Governing Body, should be asked to present to the next Conference of American States Members of the International Labour Organization, a report on the situation of the indigenous populations of the American Continent.)

The draft resolutions embodied in the Report of the Sub-Committee of the Resolutions' Committee on Indigenous Populations to which the above resolution refers, are as follows:—

(1) *Draft Resolution Submitted by the Mexican Workers' Delegate*

The Third Labour Conference of the American States declares its adherence to the conclusions of the First Inter-American Congress of Indian Affairs, held in the city of Pátzcuaro, in the Republic of Mexico, in April 1940.

Whereas labour law is only the formal expression of social legislation, and this law considers as a worker any person subject to another through economic dependency, the International Labour Office should take interest in the situation of industrial workers as well as the situation of rural workers, independently of the legal forms which the economic relation of rural workers may take in respect to those who profit by their work.

The Third Labour Conference of American States declares that it is just and necessary to incorporate in the appropriate manner in the different countries, the relations of rural and Indian workers with persons or institutions which profit by their services, in the general labour legislation of the various American nations as one of the most effective means of raising the standard of living of the large masses of rural workers.

In order to stimulate the development of social legislation to protect rural workers, particularly the Indian workers, which form a high proportion of the population of most nations of the American continent, the International Labour Office should convene opportunely a regional conference of the Latin-American countries to study particularly the social and labour union conditions of the rural and Indian workers of Latin America.

In order to prepare the regional conference dedicated to the problem of the rural Indian workers of Latin America, the International Labour Office should make a comprehensive and detailed survey of the situation of the Indian and rural workers, formulating the conclusions to be drawn objectively from such investigation.

**(2) Draft Resolution Submitted by the
Mexican Government Delegates**

1. This resolution includes every inhabitant of whatever country of America, if a native of it and backward in his living conditions.

2. The Indian problem is an economic, social and political problem, with the education, moral and ethnic factors being parts of it.

3. The legal régime of indigenous peoples ought to be the same as that of the rest of the inhabitants of the country. All legislative acts that, in practice, subject the indigenous peoples to the tutelage of the state ought to be considered discriminatory.

4. All the measures to improve the indigenous populations ought to be directed to increasing intermarriage, that is to say, to making more frequent and possible the marriage of the indigenous with the mixed and with the white populations, but recognizing as the base of these intermarriages the domestic group.

5. All legislative measures of an economic and cultural nature that will result in the improvement of the indigenous population ought to be adopted by the States with large populations of this type or extended to these peoples. Of this type one may mention agricultural legislation which has as its object the restoring of the land to the indigenous peoples from which it has been taken; giving land to indigenous peoples and rural workers when they need it; subdivision of the large estates and their use in order to make a just distribution of the land and better utilization of natural resources, and labour legislation which ought to be extended to the land workers.

6. Creation of the most elementary services of social security for the indigenous peoples.

7. The population of each country has the duty of collaborating with the State in the improvement of the living conditions of the indigenous peoples; therefore, it is recommended to the States that possess a high percentage of Indian peoples, to study the types of law that apply to their social and economic conditions and ought to be adopted, and that have as an aim the frank co-operation of the population in the solution of the Indian problem. The study of Mexican illiteracy now in force, of the Mexican law of enforced military service and, especially, the method by which this law helps in forming regiments of indigenous peoples, and of the bill now being studied by the Mexican Government concerning the training of the indigenous peoples, is recommended.

8. The establishment of an office with a specialized staff in each country with a large Indian population is recommended in order to study the problems of the indigenous groups, to recommend solutions of these problems, to survey and note the results of the improvements that are applied, and to be alert to the necessities, problems, and living conditions of the indigenous peoples in general, but principally of those under observation.

9. The States Members of the Organization should communicate their experiences to the International Labour Office and to the other American Governments and to the Inter-American Institute on Indian Affairs.

**(3) Draft Resolution submitted by the
Bolivian Government and Workers'
Delegates**

Whereas the execution of the plans of industrialization in the American countries will

make it necessary to supply modern mechanical implements for agricultural work;

Whereas, as an effect of the mechanization of agriculture, the displacement of a part of the Indian population of the rural areas is probable;

Whereas, simultaneously, the new industrial activities of urban centres will increasingly need the co-operation of the labour force;

The Sub-Committee on Indian Populations agrees to request the Third International Labour Conference to recommend to the American States Members of the International Labour Organization:

1. To include in the industrialization plans of the American States, measures tending to maximize the gains from agricultural work;

2. To establish with the necessary forethought the most practical methods of training displaced rural workers, giving them elementary technical skill which will facilitate their absorption into urban industrial activity.

**(4) Draft Resolution submitted by the
Bolivian Government and Workers'
Delegates**

Whereas there have existed ideological prejudices and sentimental customs concerning the American Indian since colonial days:

Whereas these prejudices and customs were created by the system of slavery and the desire for profit which characterized the conquest and foreign exploitation;

Whereas in spite of the legislation establishing equality of status which is in force in the American countries, the really inferior status of the Indian cannot be denied; this inferior status is an anomalous factor considering the modern tendency to incorporate him in the national communities on an equal footing with the white population;

The Sub-Committee on Indigenous Affairs agrees to request the Third Regional Labour Conference to recommend to the Governments of the American States Members of the International Labour Organization:

1. To organize and carry out, by all educational means at their disposal, an efficient campaign against all discrimination against the Indians.

2. To see to it, in particular, that this campaign is carried on in public educational institutions, so as to plant firmly in the mind of the new generations the concept of the complete and natural equality of the Indian and the white man.

3. To develop by adequate methods the knowledge of the spiritual value, intellectual capacity, and the high place in the human hierarchy of the individual Indian role

**(5) Draft Resolution submitted by the
Sub-Committee**

Whereas the carrying out of industrialization plans in the American countries will make it necessary to supply modern mechanical implements for agricultural work;

Whereas because of the mechanization of agriculture, a displacement of part of the rural Indian population is to be foreseen;

Whereas, simultaneously, the new industrial activities situated in urban centres will require the constantly growing co-operation of the labour force;

The Sub-Committee on Indigenous Affairs agrees to request the Third Regional Labour Conference to recommend to the Governments

of American States Members of the International Labour Organization:

1. To include in the industrialization plans of the American countries measures designed to take advantage of the excess manpower available in rural areas.

2. To establish with the necessary foresight the most practical means to equip rural workers, who have been displaced from the fields, with technical knowledge even if elementary, to facilitate their absorption in urban industrial activity.

*(6) Draft Resolution Submitted by the
Guatemalan Government Delegation*

Whereas it is a duty of the American States to face the Indian problem, and to realize that large masses of the Indians are dispossessed of workable land suitable for agriculture, thus making them an easy prey to exploitation;

Whereas, as a consequence of the above, a sound policy of "subjecting the land to the Indian" and not of subjecting the Indian to the land is desirable, under which a program of improving the economy of the people would be realized and the attainment of social justice would follow;

Therefore:

It is recommended to the American States represented at the Third Regional Labour Conference:

(1) to lay down adequate measures for setting up technical agencies to study the best means of solving the problem of land distribution;

(2) to pass effective legislation, based on the above, to "subject the land to the Indian";

(3) to prescribe practical methods for making rural credit facilities available to Indians; and

(4) to agree on measures to liberate the Indian from his customary methods of cultivation, thus making possible the mechanization of his work.

*(7) Draft Resolution submitted by the
Peruvian Workers' Delegate*

Having become acquainted with the history of the origin of the soil and knowing that man, when he came into this world, did not come with priority rights making him the exclusive owner of it;

Whereas the urgency of contributing to national progress by a change in the feudal traditions which to this day govern property and the exploitation of the soil is thereby shown:

The Sub-Committee on Indian Populations considers useful:

(1) The revision of the original titles to property of the large estates.

(2) The right to property being thus legalized, the estates deprived of their legal titles would pass to the State to be distributed in the interests of the rural classes and indigenous communities which are in a position to possess them in the interest of the whole;

(3) In the case where no lands are found in the situation indicated above, the State should expropriate such lands as it deems convenient paying to the owners a price based on the respective taxes paid.

(4) To fix a limit to the extension of private property in order to combat and avoid the existence or creation of future large estates.

(5) To declare as property of the State all the lands belonging to private individuals who have not cultivated them.

(6) For the Governments to develop as a preliminary and effective policy of irrigation and of increasing the live stock with a view to ensuring a supply of the populations and of the large centres of industrial activity.

(7) To establish schools for the teaching of agricultural and industrial techniques in all spheres.
